Dates are down to the 7th of June. The P. and O. mail of the 10th of April arrived out on the 24th of May, and French mail of the 17th on the 2nd of June. Telegrams had been received up to the 10th of May announcing the failure of Overend, Gurney, and Co. and the German war. Business was quite at a stand in consequence. In another column it will be seen that telegrams have been received from Shanghai to the 27th of June. Telegrams to the 25th May had arrived out announcing the failure of the Commercial Bank, Bank of London, &c. The news of the Agra Bank failure had not been received. Admiral King seems to prefer Japan and the north of China to the head-quarters at Hong Kong. By last accounts he was about to proceed from Shanghai to Nagasaki in the *Princess Royal* flag ship. We hear that Sir Edmund Hornby has gone to Peking to consult with Sir R. Alcock.

The following summary of news is from the *Commercial Record*:—

Much disappointment has been felt by the mercantile community here with respect to a despatch received from Sir Rutherford Alcock in reference to the question whether small steamers could be permitted to penetrate into the interior of China. This question was referred to Peking some two months ago, in consequence of the native authorities suddenly raising an objection to steamers going into the silk district; and it was very confidently expected that an answer favourable to the views of the foreign trader would be received. Such, however, has not proved the case, and it is now decided that foreigners who wish to "go up country" must do so in Chinese-built boats.

By the *Suwonada* the Taoutai of Shanghai took his departure for Hong Kong, *en route* to Chow-chow-foo, which city he has been commissioned to open to foreigners. His Excellency does not at all appreciate his task, and anticipates no little unpopularity and opposition on the part of the inhabitants of the city.

A case of some importance in its bearing upon the jurisdiction of the Chinese in reference to Customs' confiscations was after some difficulty brought before the Mixed Court for decision. A chest of opium belonging to a foreigner was seized by some of the watchers connected with the "Opium Committee" on the plea that the duty on it had not been paid. It appeared however upon investigation that the Customs' duty had been duly discharged and the chest was returned to its owner accordingly. It is a question whether the Mixed Court was not exceeding its province in taking cognisance of the matter, and this objection appears to have been raised by the native officials. A step, however, would no doubt be gained in the right direction if matters of this kind were recognised as coming within the province of that court.

The foundation stone of new Trinity Church was laid on the 24th May, Queen Victoria's birthday, amid much ceremony. The Masonic fraternity were the chief actors, the stone being placed by the Deputy Provincial Grand, C. E. Parker; Mr. Winchester, H.B.M. Consul, reading a suitable address. The larger portion of the Consular body and other officials of importance both civil and naval, including Admiral King and Captain Boys, were in attendance.

In reference to the bankruptcy of Jarvie Thorburn and Co., the Chief Judge has given a decision, the effect of which is that the Oriental Bank will be recognised as the one to be employed by the Court for depositing funds connected with estates in liquidation. An application was made by some of the creditors for the funds to be placed in other banks who would allow a higher rate of interest; but the Chief Judge stated that it was not his province to decide what banks were suitable depositories for such money, and he would follow the practice of the Government in employing the Oriental.

The case of Yuh Chun *versus* William Church heard at the Supreme Court, has attracted some attention, the defendant, only recently discharged as a bankrupt, having bought a chop of tea from the plaintiff and after receiving tls. 23,800 from the banks upon it, only paying the Chinaman tls. 14,000, retaining the balance and speculating with it. The counsel for the plaintiff spoke in very severe terms of the transaction, characterising it as little short of a swindle.

The case of Bonney *v.* Hockly, recently heard before C. W. Goodwin, Esq., was expected to settle the point whether a British employé engaged in such capacity as that held by the Commissioner of Customs or the Harbour Master can be made responsible for liabilities incurred on behalf of the Chinese Government. The judgment, however, justly points out it is quite possible for a person occupying a post under the Chinese Government to make engagements in respect to certain individual matters himself for which he would be properly held responsible. In order, therefore, to oust any claim from the jurisdiction of the Supreme Court it will be necessary to do more then merely show that the person granting the appointment did so in his official capacity, and it will be incumbent clearly to establish that the contract or engagement was made as on behalf of the Chinese Government.

A serious robbery was committed on the morning of the 29th. Some five or six foreigners in a four-oared gig made their way to a boat near the Soochow Creek, containing some dollars designed to be sent up country to purchase silk for Messrs. Waller and Co.; and after a serious scuffle, in the course of which one of the Chinamen on board the boat attacked was killed and another wounded, the robbers succeeded in carrying off $9,000. They then made for the shore, and abandoned the gig, getting off with the booty. A revolver and a sword were left by them in the silk boat. A portion of the money, consisting of about one-half, was discovered the next day by the police, secreted in a ditch on the Pootung side; and the Superintendent of Police and three constables proceeded to the spot and by lying in wait they succeeded in capturing two of the culprits, who came to the spot to take away the booty. The men were armed, but seeing that there were four

Digitized by Google

against them, they made no resistance. An examination which subsequently took place at the Prussian Consulate General, has resulted in the discovery that the party who attacked the boat consisted of an American of the name of Thompson, an Austrian called Spiro, and two others as yet unknown. The two Austrians examined do not appear to have had any part in the attack, but were only hired by Spiro to fetch the money deposited in a small creek on the Pootung side. Spiro has confessed to the correctness of the deposition of the other two Austrians, and has given a full and complete statement of the whole affair. He was also very explicit with reference to the action taken by Thompson in the robbery. The clearest evidence against this man and Spiro is that given by the mate of a British schooner in port, who distinctly recognised them as two of the foreigners who came on board at 9 P.M. on the evening when the robbery was committed, and borrowed a boat. From the revolvers seized only one ball has been found missing and that from the pistol of Thompson, a circumstance which would appear as strong circumstantial evidence that he was the man who committed the murder.

The eight-oared race, which has been looked forward to with some interest, took place on the 28th. A large number of spectators went down to the Pootung Dock, the place of starting, on board the tug *Hercules*, and on the *Wang Leong Fei*. After some little time, Mr. Whittall, who was on board the *Hercules*, gave the sign to start, and both boats pulled off sharply. The red unluckily got foul of a native boat, the occupier of which, Chinaman like, thought it necessary to turn across their bows. The blues, seeing the difficulty, generously pulled up amid much cheering for their sportsman-like conduct, and a second start was shortly after effected. The blue soon got a boat's length in advance of the red, and gradually was seen increasing the interval till they came into the goal near the *Barossa* some five lengths ahead. The red were at no little disadvantage on account of the awkwardness of their coxswain, who balanced himself the wrong way, so as to give them his full weight to pull. We do not, however, think that without this disadvantage they would have been able to make head against the blue, who were superior both in style and strength. We are inclined to look upon four-oared races as better suited to this place, where there is necessarily much difficulty in finding so large a crew as eight, so that they are likely to be less evenly balanced. The distance was about two miles and a quarter.

From a native informant, we hear that Li-C'hang-Sh'u, who formerly distinguished himself against the rebels, and bears the title of Chung (Honourable) granted him on account of the services he rendered, is shortly to come to Shanghai and intends to lend a large collection of theatrical costumes which he possesses, to the proprietor of the native theatre near the Shakloo. Li-Chang-Sh'u is well known as a great amateur of theatricals. This in China consists not in acting as with Europeans, but in possessing these gorgeous dresses and appurtenances which play so conspicuous a part on the Chinese stage, and lending them to hired actors at private entertainments given to the amateurs' friends. The actors are looked upon as in quite a subordinate position, and as of very inferior importance.

At Ningpo a very serious catastrophe has befallen several hundred Chinese, who were celebrating some great holiday which occurs every eighth year. The party were crossing the River Ying on a bridge of boats, when it gave way, precipitating them into the water, causing the death of over one hundred. Forty-seven bodies have been recovered.

HONG KONG.

Dates are down to the 13th June. The P. & O. mail, of 26th April, arrived out on the 5th June. Telegrams to 12th May, announcing the stoppage of Overend, Gurney and Co., and suspension of the Bank Act, had arrived, and caused great alarm. Our dates by telegraph are down to the 29th June, at which date the outward telegrams to 30th May had been received, announcing failure of Commercial Bank, &c. The news of the Agra Bank (7th June) failure had not reached.

The steamer *Feroze* arrived from Galle on the 2nd June with the Ceylon Rifle troops, noticed in a previous issue. She is to return and embark a further number for Hong Kong. On the arrival of those troops the *China Mail* has the following :—

The "economy" involved in the despatch to this colony of he Ceylon Rifle companies is receiving a somewhat laughable illustration. The idea was that they would be considerably cheaper than any other troops which could be expected to stand the climate. The hire of quarters for married men and for single officers amounts to no less than $60,000 per annum ; while as many of the officers are married, it is to be presumed that a heavy outlay will be required to provide them with house accommodation. While on this subject it may be well to notice a report which has reached us of the manner in which these troops were conveyed hither. If the description given be in any way true, their stowage on deck must have strongly resembled that of the unfortunate cattle who are ofttimes at home to be seen on the decks of steam vessels plying between Holland, the Baltic and other ports, and London. The cattle, however, are allowed to stand or lie singly, while the unfortunate Ceylon Rifles are stated to have been absolutely overlying each other, preserved-sardine fashion, during the whole voyage from Point de Galle to this port. The officers, also, by all accounts, appear to have been most unduly crammed as regards space. Of course, it does not follow that any blame is due to the captain of the *Feroze* for this : he simply brought the number of persons which he was directed to embark, but this cheeseparing way of conveying troops is not calculated to increase either the efficiency of the corps or its zeal for the service.

The steamer *Far East* left on the 2nd June with about 400 troops and 10 officers. The details will be given in our next.

The leading news is the despatch of the "tea clippers," details of which will be found in a tabular form. We find the following also in the *China Mail* :—

The *Taitsing* tea clipper, which left Foochow on the 31st May, exchanged signals with the *Suwonada* at 9.30 A.M., on Saturday, 2nd June, a little to the south of Amoy. There was a fresh breeze blowing from the north-east at the time ; she had every stitch of canvas set, and was going at least twelve knots. The reason why the *Ariel*, *Serica*, and *Taiping* could not leave the Min on the 29th was that their draft of water was too great to permit of their crossing the bar in the state of the tide that day. The *Fiery Cross*, however, whose good luck is proverbial being of a somewhat lighter draft managed to clear the river. The time of their *departure*, as understood in the case of any bets or wages dependent on their speed, dates from the hour of their crossing the bar at the entrance of the Min. The dates of departure therefore stand thus :—*Fiery Cross*, May 29th ; *Serica*, 30th ; *Ariel*, 30th ; *Taiping*, 30th ; *Taitsing*, 31st.

(FROM OUR OWN CORRESPONDENT.)

HONG KONG, June 13, 1866.

Just as the last mail was leaving here an expedition was despatched against the piratical haunts near Macao, and some effectual results were speedily accomplished. Three British gunboats, the *Opossum*, *Banterer*, and *Janus*, under Commander St. John, R.N., were joined at the mouth of the Canton river by a force of Chinese troops from Canton, and at once occupied the islands of Pak-sui, which have long been one of the main fastnesses of the coast pirates, and a convenient depot whence the merchandise plundered from vessels at sea could with ease be transported to Hong Kong and Macao. A large Chinese force was placed as a permanent garrison on the islands, and several villages were utterly destroyed. Some complaint was made by the naval officers of the expedition with reference to an alleged display of pusillanimity on the part of the Chinese troops, but I am given to understand that this arose from an error rather than from any lack of audacity, which would be the more surprising, even with Chinese troops, as no effectual resistance was attempted by the piratical villagers. It is reported that the Chinese authorities intend to fortify one of the islands as a permanent base for operations against the piratical cruisers. They have signified their entire willingness to co-operate with the Government of Hong Kong and the naval department in measures for the suppression of piracy ; and it will probably be found unnecessary for the valiant burghers of Hamburg and Bremen to equip a steam fleet for the protection of their peddling little brigs and schooners, whose defenceless condition and inadequate equipment form the principal encouragement to pirates in attacking European vessels. The bombast with respect to a Hamburg anti-piratical squadron, news of which was brought hither by last mail, is only paralleled (perhaps outdone) by the proposition on the part of Count Bismarck to annex the "savage" island of Formosa, with complete disregard of the little incident that three ports open to British (and therefore all foreign) trade by treaty with the Chinese Government exist on that island, a fact which would probably complicate in some measure the otherwise

Digitized by Google

easy process of hoisting King William's flag on the summit of Ape's Hill.

We are all looking forward with anxiety to the arrival of the next mail, not only to have some certainty regarding the threatened European war, but with respect also to the "unparalleled panic" which curt and unsatisfying telegrams have told us has supervened in London. Speculators not a few are shaking in their shoes pending the arrival of further intelligence, and any great disaster in England is likely to be followed by crashes here. The Chinese even are in a very insecure condition, having notoriously dipped deeply into over-trading on their own account, in which they are encouraged by the multitude of "commission agents," principally Germans, who have sprung up within the last few years, and heavy losses in rice and cotton, as well as opium, are darkly hinted at. Tea is beginning to get shipped away from Canton, though slowly, as buyers there seem more cautious than the gentlemen of Hankow and Foochow, whose rashness in giving the extreme prices asked by the Chinese is again the subject of newspaper comment both here and at Shanghai.

The Mint turns out its coinage but slowly, and the new dollar can barely yet be said to be in circulation. The efforts of Capt. Kinder have succeeded in making the milled edges a little more respectable and less like the production of an idle schoolboy's pocket-knife, and it must remain for time to show how far the predictions of those who prophesy extensive counterfeiting and debasing are correct. Sir Richard MacDonnell continues his energetic efforts towards ameliorating the condition of government, and a sharp correspondence published in the last official *Gazette* between the Colonial Secretary at his direction and the two acting police magistrates, Messrs. Whyte and Smith, shows that his Excellency has no hesitation in "pulling up" his subordinates very tightly when he has reason to believe them negligent of duty. The correspondence originated in some complaints made by an inspector of nuisances, to the effect that his efforts to compel obedience to sanitary laws on the part of the Chinese population were frustrated by the leniency of the magistrates in awarding punishment for offences. A protest on the part of the magistrates against the publication of this complaint has led to some exceedingly plain language on the Governor's part.

The only news of interest from the North consists in some correspondence which has passed between the British Consul at Shanghai and the Chinese authorities on the subject of a barefaced attempt made by the latter to nullify the privilege obtained by Sir Frederick Bruce in 1862, respecting the shipment of beancake and pulse from the Northern ports in foreign bottoms. An alleged desire to protect the native junkowners against foreign competition led lately to a prohibition to native traders to ship by foreign vessels; but this has now been withdrawn.

STRAITS OF MALACCA.

SINGAPORE.

Dates hence are to the 21st June. The London mail of the 10th May arrived out on the 14th June, and the French steamer brought the mail of the 17th May on the 19th June.

Anxiety is still expressed in the papers just received for some definite intelligence regarding the Transfer. It was feared that a change of Ministry would delay the completion of the measure; but it is remarked—"In whatever Ministry succeeds the present, Lord Stanley is almost certain to occupy an important office, and he has identified himself too actively with the prosecution of the Transfer to leave any doubt but that his influence will be used to carry it through."

The *Fort St. George* (Madras) *Gazette* notifies that the services of Lieutenant D. T. Hatchell, 34th Regiment Light Infantry, are placed at the disposal of the Government of the Straits Settlement, for appointment as Assistant Resident Councillor, Prince of Wales' Island.

The British steamer *Douglas*, from Aberdeen, *via* Gibraltar, which last she left on the 26th March, arrived on the 14th June.

The Imperial French steamer *La Creuse*, from Suez the 23rd May, anchored in the harbour on the 15th June, with 841 troops on board, and proceeded to Saigon on the following day.

The following promotions and appointments have been made in the Singapore Volunteer Rifles:—

PROMOTIONS.—Lieutenant C. H. H. Wilsone to be Second Captain, to complete the Establishment. Sergeant D. Rodger to be Lieutenant, vice Wilsone, promoted.

APPOINTMENTS.—Second Captain C. H. H. Wilsone to be Adjutant; Lieutenant D. Rodger to be Quartermaster.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BUCHANAN—On the 25th June, at Edinburgh, the wife of Walter Buchanan, Esq., of a daughter, stillborn.

BARNES—On the 20th June, at the Pavilion, Singapore, the wife of F. D. Barnes, Esq., of a son.

CAZALAS—On the 9th June, at Singapore, the wife of Mr. J. Cazalas, of a son.

DANDO—On the 17th July, at Fryern Barnet the wife of N. Dando, Esq., of a son.

JOHNSON—On the 19th July, at West-hill Lodge, Hastings, the wife of Francis Bulkeley Johnson, of Shanghai, China, of a daughter.

LATTEY—On the 18th July, at 4, Gloucester-gardens, Hyde-park, the wife of Arthur P. Lattey, Esq., of a son.

LEVESON—On the 9th June, at Cluny, Singapore, the wife of Edward J. Leveson, Esq., of a daughter.

WILSONE—On the 20th June, at Srimanengok, Singapore, the wife of C. H. H. Wilsone, Esq., of a daughter.

MARRIAGES.

ANNESLEY—ANDERSON.—On the 24th inst., at the Holy Trinity Church, Paddington, by the Rev. Canon Boyd, incumbent of St. James's Church, Westbourne-terrace, Lieut.-Colonel R. M. S. Annesley, second surviving son of the late Captain the Hon. Francis Charles Annesley, R.N., to Jane Hume, youngest daughter of the late Sir George Anderson, K.C.B.

BASSAGOITI—BANDY.—On the 16th June, at the Presbyterian Church, Singapore, by the Rev. Mr. Jeffrys, Mr. James Parke Bassagoiti, to Miss Maria Bandy, both of Singapore.

LAIRD—CARMICHAEL.—On the 14th inst., at the British Consulate, Cologne, and on the same day, in the University Church, Bonn-on-the-Rhine, by the Rev. J. Scott Anderson, English Chaplain, Henry Hyndman, fourth son of John Laird, Esq., M.P., Birkenhead, to Jessie, eldest daughter of John Carmichael, Esq., of Honduras.

VENN—JARVIS.—On the 24th inst., Frederick Whatley Venn, eldest son of J. W. Venn, Esq., Colombo, Ceylon, to Marian Jane, youngest daughter of T. H. Jarvis, Esq., of Blenheim-crescent, Notting-hill, London.

SMITH—BAUMGARTEN.—On the 12th June, at St. Andrew's Episcopal Church, Singapore, by the Rev. E. S. Venn, M.A., Mr. William Buchanan Smith to Louisa, fourth daughter of Christian Baumgarten, Esq., Registrar of H.M.'s Court of Judicature

DEATHS.

BROWN—On the 18th May, at Hong Kong, on board the N. B. Palmer, John Brown, seaman.

BAKER—On the 10th June, at Hong Kong, George Samuel, infant son of S. W. Baker, aged seven weeks.

CLUNIS—On the 12th June, at Singapore, suddenly, Jacob Clunis, Esq.

HASPEN—On the 31st May, at the Civil Hospital, Hong Kong, Hempes Haspen, seaman, aged 18 years.

KLIFFALD—On the 29th May, at the Seaman's Hospital, Hong Kong, H. Kliffald, seaman, barque Luzon.

LEWIN—On the 27th July, at Tynwald Lodge, Springfield-road, St. John's-wood, of congestion of the lungs, Grace Eleanor, eldest surviving twin daughter of D. Duncan and S. Ida Lewin, aged 13 months.

POULTON—On the 23rd June, on board the P. and O. Co.'s steamship Baroda, in the Red Sea, on his passage to England, Charles Frederic Poulton, Esq., Sub-Manager of the Bank of Hindustan, Bombay, the third and beloved son of the Rev. William Poulton, of 13, Talbot-terrace, Bayswater, W., in the 26th year of his age.

PARKER—On the 11th June, at the Government Civil Hospital, Hong Kong, William Parker, seaman.

THOMPSON—On the 23rd May, at the Government Civil Hospital, Hong Kong, John Thompson, seaman, late of the U.S.S. Hartford.

WAKE—On the 11th June, at the Seaman's Hospital, Hong Kong, George Wake, mate late of barque Nelly.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight	4s. 7¼d.	4s. 8d. to 4s. 8¼d.
At Shanghai (per Tael.)	6 ditto	6s. 1¼d. to 6s. 2d.	6s. 2¼d. to 6s. 3d.
At Canton, At Hong Kong, At Macao	6 ditto	4s. 6d.	4s. 7d.
At Singapore	6 ditto	4s. 5¼d.	4s. 6d.. to 4s. 6¼d.
At Manila	6 ditto	4s. 4d.	4s. 4d. to 4s. 5d.

At Shanghai, Bills on India, Rs. 296 per 100 taels. At Hong Kong, Rs. 217 to 218 per $100. Bar Silver at Shanghai, 111.10 taels; at Hong Kong, 10¾ per cent. prem. Mexican dollars at Shanghai, taels 73-3 per 100; and Exchange on Hong Kong, 26¾ discount. Hong Kong and Shanghai Bank Shares, par; Gas Company,——; Hong Kong and Whampoa Dock, 40 per cent. prem.; Steam Shares, 32½ per cent. discount; Union Dock Company, 7 per cent. dis.

Latest telegrams are reported to have been received giving exchange at Shanghai at 5s. 10d.; but we have not traced these to any authentic sources.

The following is from Messrs. Sharp and Co.'s Circular:—

GOLD.—The price of gold has varied but little during the fortnight. The arrivals represent $490,000 value, and the exports $370,000, including the shipments per *Orissa* on the 30th ultimo, and excluding those to-leave to-morrow; also the shipments already prepared for the direct Calcutta steamers.

SILVER.—Has come in freely both in Bars and Sycee and been as readily purchased. The imports are $1,970,000 the exports only $220,000, but this is exclusive of the shipments per present mail, which must amount to nearly a million dollars worth.

DOLLAR CURRENCY.—Inwards $860,000, outwards $1,320,000, of which latter sum Foochow has absorbed a very large proportion.

The issue of New dollars from the Mint proceeds very slowly. The coins lately circulated are much better than the first in point of execution.

DISCOUNT.—There has been a general disposition in view of the unfavourable advices from home to grant few facilities, and the rate has slightly risen in consequence. Loans have been made at from 9 to 12 per cent. Very short undoubted paper is negotiable on better terms. Some first-class mortgages are now offering for a period of twelve months, and as centrally situated water-side property in Hong Kong is as secure as Lombard-street or Lothbury, and pays twice the interest, these may be worth the attention of capitalists at home.

EXCHANGE.—A fair business has been done against shipments of New Season's Tea from Foochow. In rupees the business has been but small, the low price of opium restricting sales, and dollars still offering a better remittance.

SHARES have sympathised in the general depressed state of trade, and some forced sales have much lowered the market.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is divided into decimal parts of ten.

COMMERCIAL REPORT.

CHINA EXPORTS.

CANTON.—This market opened for Canton-made teas at rates rather easier to those of last season. During the last week, however, the market has remained very quiet, and the startling telegrams, just to hand, have caused a general dulness. Sales, &c., are reported as follow:—Canton Packed Congou, 1,300 ½-chests, at tls. 29 to 31; do. 800 boxes, at 31 to 33; Scented Orange Pekoe, 24,000 boxes, at 29 to 38; Scented Caper, 33,000 boxes, at 25 to 35; and Gunpowder, 1,000 boxes, at 27 to 28.

FOOCHOW.—After the departure of the last mail steamer, supplies of Congou began to arrive in quantity, and the market was regularly opened on the 25th May, during which day and the next about 50,000 chests were settled. As most of the buyers were required to make up without delay the tonnage they had engaged in the first clippers to be despatched, there was much excitement and considerable competition to secure desirable purchases. Prices were, therefore, irregular, though no actual advance was established on the very high rates paid for the finest parcels then to hand. The demand continued active, and settlements were on a very large scale until within the last two or three days, when so many vessels having been loaded, buyers began to hold back for a decline in rates. Oolongs have been arriving freely, and a considerable quantity has been settled for shipment to England at extreme rates. No true Souchongs have yet appeared, though a few parcels of the description have arrived from the inferior districts. Scented Teas are now coming forward, and have been taken at very full prices. The quality of the whole crop this season is excellent. Congou: Settlements 81,300 chests, and 79,700 half-chests, at the following rates:—Tls. 8 to 13, for Dust and broken Leaf; tls. 22 to 28, for Fair to good Flavory; tls. 29 to 34, for Medium to good Kaisows; tls. 35 to 38, for Fine Kaisows; tls. 39 to 46 for Finest Kaisows. Opening purchases were entirely confined to near district Teas, Yung Hows, Suey Kuts, and Keining-foo kinds fetching tls. 33 to 38, Saryunes tls. 38 to 40, and Paklins, tls. 40 to 44. The true Kaisow and Sinchune kinds which arrived subsequently have met with ready sale at tls. 42 to 46. The lower grade teas are now coming to hand freely, and have been sold to some extent, the demands of the teamen for these descriptions being more moderate. Buyers now show some disinclination to continue purchases at late rates. The teamen are anxious to realize, but are not yet disposed to submit to any material reduction. Stock 43,500 chests.

SHANGHAI.—Black: Settlements since the last mail have been two chops of common Black Leaf at tls. 16¼ and 22, and a parcel of Oonam Dust at tls. 10 per picul, leaving 800 chests of old tea in stock. Green teas: One small chop of Fychow has been taken at tls. 25½, and 500 half-chests have been shipped, reducing the stock to 1,100 packages. As yet there are no reliable advices from the Pingsuey districts, but teamen state that high prices have been paid in the country, and that a full supply may be expected.

HANKOW.—The market for new teas was opened on the 24th of May. The first purchase was a good flavoury Oonam at tls. 33, which was immediately followed by other settlements up to tls. 38¼ for finest from the same district, while good to finest Oopacks were eagerly taken at prices ranging from tls. 35 to 42½. Two really crack chops ("Ly Sunn" and "Ming Sing") were also placed at tls. 45½ and 46 respectively for Russia. At these rates a large business was done, reported settlements up to the 31st May having exceeded 40 chops, exclusive of contract teas. The prices paid are the highest yet reached since the opening of the port, and lay down at 6d. to 9d. per lb. over last year's purchases. The quality of both Oopacks and Oonams is generally admitted to be superior to late season's in flavour and strength, and some of the favourite chops are very fine. Only a few parcels had arrived in bulk, but large receipts were looked for daily. About 45 musters were on offer, but an easier feeling prevailed amongst buyers. Quotations are given as follow:—Oonams, Medium to finest, tls. 29 to 38¼ per picul; Oopacks, do., 34 to 42½; and Oopacks Crack Chops, 43 to 46.

KIUKIANG.—Black Teas.—Prices for leaf in Ningchow were reported lower, but the teas already lay down at about ten taels above last year's cost, and the opening rates in Hankow when known are sure to stimulate buyers in the country. A few musters have come to hand which are certainly superior to last season's, and the yield is likely to be above the average. Green Teas.—The new crop would be earlier than of late, and teas would be in Kiukiang in August. Laying down cost however would be much above last year's, best Moyunes being estimated to cost tls. 34 all round. The supply is expected to be large and the quality is well spoken of. The market was quite bare of old tea.

YOKOHAMA.—Prices have fallen slightly, but not sufficiently to induce foreigners to clear off the old stock, of which there are about 1,600 piculs left. A few parcels of New Tea have arrived, and they are being offered at $37 to 42 per picul, but until a great concession is made no large business is expected, The leaf is very fair and the liquor is a slight improvement on the first musters brought to hand about the same time last year. There are about 300 piculs on offer, but as there is no business being done, prices must be considered nominal. The settlements of old season's are estimated at about 340 piculs.

RAW SILK.—CANTON.—Since last advices, the market has been quite at a standstill, for the very unsatisfactory reports of the Bombay and Calcutta markets have quite closed up operations in silk for that quarter; the consequence is, a decline of more than $100 has been established for Loong-Kongs, Kow-Kongs, and other sorts in proportion. The second crop may be expected in about a fortnight, and report speaks very favourably of it in every respect. Prices, it is expected, will continue to decline, as at present rates there are no buyers. The last quotations are as follows:—Loong-Kong, No. 1 (white), $500 per picul; ditto, No. 2, $480; Cumchuck and Lacklow, No. 1, $470; Re-reeled Cumchuck, $540; Kow-

Digitized by Google

Kong, No. 1, $430; ditto, No. 2, $400; Tsatlee Reel, No. 1, $540 to 560; Seu-lam, No. 1, $375 to 380; Pun-jum, No. 1, $175 to 180; Waste Silk, No. 1, $80; ditto, No. 2, $75; Pierced Cocoon, $75.

SHANGHAI.—The increasing high cost of the mulberry leaves has had the unfortunate effect of making it necessary for the peasant growers to abandon at least a quarter of the worms, seeing that they had not the means of feeding them. It would now appear that the total yield for this season will not exceed 55,000 bales; the second crop will necessarily be a poor one, as so small a quantity of the first-crop Silk has yet been sold, that sufficient funds have not been forwarded by growers wherewith to undertake the culture of the second. The market for No. 3 Tsatlee of chops opened in the country at an equivalent of taels 485, and purchases were made to a small extent, when the telegraphic advices received by the French Mail of the 17th April, put a stop to all business, and on the re-opening of the market a reduction of from taels 70 to 90 per picul is expected.

YOKOHAMA.—The latest quotations show a further decline of 20 to $25. However, this difference only obtains for the common and inferior sorts, a few parcels of Oshio, Sodai, and Mybash, above the medium being still held at previous quotations. Settlements for the fortnight amount to about 130 piculs, leaving an unsold stock of 900 piculs, and some parcels which could not fetch the price demanded were sent back to Yedo. As regards the prospects of the crop in Japan, in the district of Hatchojee, the worms have arrived at the third age, and some very sudden and unhealthy changes in the atmosphere have taken place. The native dealers will persistently talk of the losses caused by the frost at the beginning of this month, and the respectable Japanese silkmen will not be easily induced to enter into a contract for silkworms' eggs, except, perhaps, at a very high price, and for a small quantity only. Total settlements since the 1st of July amount to 10,900 bales, against 15,450 bales same time last year. The latest quotations are as follows:—Ida, inferior, 580 to $620; Mybash and Sinchu, best, none; medium, 680 to $730; inferior, 600 to $660.

DRUGS, &c.—CANTON.—Cassia Lignea purchases amount to only 300 piculs; the stock is 400 piculs, and as the demand has been trifling the the price has receded to $18.35 and is still tending down. Cassia Buds quoted at $40 are quite neglected, stock 50 piculs. China Galls offering at $14, being much too high for the home market. Galangal, $2, with 300 piculs in stock and no buyers. China Root, $3.35 to 4.25 for good to trimmed. Vermilion, $38½ per box of 50 catties for best chops. Rhubarb, no transaction. Essential Oils and Star Anniseed: None on the market.

CAMPHOR.—HONG KONG.—There has been no transaction in this article, the price asked by the holders being higher than purchasers will pay; the stock is 2,400 piculs Formosa, for which $27 per picul packed is asked.

CHINA GRASS.—SHANGHAI.—Must be quoted lower, the demand for export having ceased, and there is hardly anything doing in the article amongst natives. Stocks are gradually getting reduced, and but little of good quality is left. Quotations:—White, No. 1, taels 14.5; No. 2 taels 12 to 13; No. 3, short staple, taels 10 to 11.5; Green, taels 8.5 to 9 per picul.

CHINA IMPORTS.

HONG KONG.

The clearances of the fortnight show how little has done in both Cotton and Woollen Manufactories; a few auction sales have been sufficient to supply any inquiry which existed. During the last few days however Yarn has attracted some little attention from the Chinese, and, just at the last moment some demand is said to have sprung up for shipment to the West Coast.

RAW COTTON.—Prices have again declined, and the market has been quite stagnant until within the past day or two, when the lower rates which have become current induced a few Chinese buyers to enter the market. Foreigners, however, continue to hold aloof. Quotations are, Bengal, $15 to 17 per picul; Tientsin, $18 to 20 per picul; Shanghai, $19 to 20 per picul; Ningpo, $20 to 22 per picul.

Cotton Yarn: No. 16 to 24, $200 to 215; 28 to 32, $240 to 265; 38 to 42, $265 to 285 per bale.

Grey Shirtings: 7 lbs., $3.25 to 3.30; 8 lbs., $3.45 to 3.50; 8.4 lbs., $3.60 to 3.65; 8.6 lbs., $3.70; 8.8 lbs., $3.75; 9 lbs., $4 to 4.10; 9.8 lbs., $4.50 to 4.60; 10 lbs., $5.25 to 5.30 per piece.

American Drills, 40 yards, 30 in., 15 lbs., $7 to 7.5; Jeans, 30 yards, 30 in., 10½ lbs., $5.5 to 6; Sheetings, 40 yards, 40 in., 15 lbs., $6.5 to 7.

Lead: Common, $6.40 to 6.75; W.B., $7 per picul. Spelter; $5.30 per picul. Iron: Wire, $7 to 8.50; Nail Rod: $3.10 to 3.20; Bar, $3 to 3.10; Hoop, $4 per picul. Tin: Straits, $23 per picul; Plates, $5.75 to 6 per box. Steel: $4 to 5 per picul. Quicksilver: $66 per flask.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: May 15, Challenger, Conference.

At SHANGHAI.—From London: May 26, Lauderdale; June 1, Hoang Ho; 2, Gossamer. From Liverpool: May 30, Illimani. From Newcastle: 25, Princess of Wales; June 4, Tycoon; 5, Maria Laurie, Delengles. From Newport: May 13, General Harbitz. From Sunderland: Ellen Prowse; 28, Neptune. From Cardiff: 26, Tewkesbury.

At HONG KONG and CANTON.—From London: June 6, Valdivia. Reported by telegram:—From London: Mary Nicholson, Veronica, Melbreck.

At MANILA.—From Cardiff: May 25, Benjamin Bangs. From Glasgow: June 3, Bella Gallega.

At SINGAPORE.—From London: June 14, Malta; 18, Dovercourt. From Liverpool: 14, Egmond D. Horn; 20, Agamemnon (str.). From England and Gibraltar: Douglas (str.). From Cardiff: 8, Metis; 18 Nederland. From Newport: Burgemeester. Reported by telegram:—From London: June 5, Eastern Ssar. From Liverpool: 6th Harry Puddemsey. From Clyde: Edinburgh Castle.

At PENANG.—From Liverpool: June 15, Agamemnon.

DEPARTURES.

From YOKOHAMA.—For New York: May 12, Castlehow.

From SHANGHAI.—(Reported per telegram.) For London: Lauderdale; for Liverpool: Vigil.

From FOOCHOW.—For London: May 28, Ariel; 29, Fiery Cross, Serica, Taiping; 31, Taitsing; June 3, Black Prince; 5, Chinaman, Flying Spur, Erl King, Ada. For Liverpool: Ziba.

From HONG KONG, CANTON, and MACAO.—For London: June 5, Deerfoot; 12, John Milton. For Liverpool: May 30, Luzon. For New York: June 10, Ann Lucy (*via* Hong Kong).

From MANILA.—For London: June 2, Ironside. For Falmouth: 3, William Cundale. For Cork: 4, Laura. Do. (*via* Cebu): May 23, Simoon. For Boston (*via* Cebu): May 18, Leopoldin Bauer. For New York (*via* Cebu): 25, Mercurio. Reported by telegram:—For London: May 17, Loyola. For Queenstown: Crest of the Wave.

From SINGAPORE.—For London: June 13, Bastian Pot. For Liverpool: June 8, Patriot Queen; 15, Grenada. For Bristol: Alfred Ray. For Bordeaux: 15, Aurelie.

From PENANG.—For Falmouth: Eidsvold.

VESSELS LOADING.

At HANKOW.—For London: Eliza Shaw (full), Guinevere, Highflyer, Min, Coulnakyle, Sir Launcelot, Napoleon III.

At SHANGHAI.—For London: Cinderella, Burdwan, Ethiopian, City of Aberdeen, Fusi-yama, Georges, Pakwan, Illimani; for Liverpool, Trebolgan.

At FOOCHOW.—For London: Falcon (full), Belle of Southesk, Yang-tsze, Tamana.

At HONG KONG and CANTON.—For London: Alma, Island Queen, Taymouth Castle; for Liverpool, Luzon; for New York, May Queen, Music.

At MANILA.—For London: Oithona; for New York, Sailor Prince, Castleton, Looloo.

At SINGAPORE.—For London: Winona, Yuh-Shing; for Liverpool, River Eden, Activ.

At PENANG.—For London: Queensberry.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, cotton and tea, £2 10s. to £3 per ton; silk, £4 to £4 10s.

At NAGASAKI.—To London, £3 per ton; to New York, £4 5.

At HANKOW.—To London, the rate is £7 to £7 10s. at which the Eliza Shaw, Guinevere, Highflyer, and Min are engaged, full. The Napoleon III. is on the berth, and the Coulnakyle and Sir Launcelot are expected.

At SHANGHAI.—The rate to London is expected to be £4 15s. to £5 for the new teas. Vessels on the berth not yet commenced loading.

At FOOCHOW.—To London, £4 10s. per ton.

At HONG KONG and CANTON.—Tonnage is in less demand both for home and coast. The Taymouth Castle has taken the berth for London at former rates, and two charters have been made for New York at £2 2s. 6d. and £2 10s. per ton of 40 cubic feet.

The circular of George Holmes gives as the estimated number and tonnage of disengaged vessels in harbour as 91 representing 38,548 tons.

At MANILA.—The Ann Holzberg has been taken up for Pernambuco for orders, to the United States, or a port in the U.K., at £4 per ton, for Clayed Sugar and Hemp. The Oithona for London has engaged 200 tons Hemp at £3 7s. 6d. per ton.

At SINGAPORE.—Rates to England remain unchanged at £2 dead weight, £2 10s. light freight

At PENANG.—To London: The Queensberry has finished loading at £2 5s. dead weight and £2 15s. light freight, dead weight is scarce while light cargo is plentiful.

CASUALTIES.

At HANKOW.—(Reported by telegram).—Guinevere totally lost below Hankow. The Highflyer had been on shore, and will return to Shanghai to be docked,

At SHANGHAI.—(Reported by telegram).—The Coulnakyle damaged through collision will have to go to Shanghai to dock. Sir Launcelot, for London, damaged.

At SWATOW.—(Reported by telegram).—The Electricity totally lost near Swatow.

HONG KONG.—The British barque Trinculo reports having called in at Guam on May 5th, and found there the chief mate, passengers, and part of the crew of the Bremen barque Libelle, from San Francisco, bound here, which was lost on Wake Island, in the North Pacific; the captain and other boats' crew not yet turned up; on losing the vessel the captain buried the treasure—$150,000—on the island, and the mate on arrival at Guam chartered the schooner Anna to return and get the treasure and what else could be found. The Trinculo left Guam on May 9th, and had light airs and fine weather across.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—June 2, Helen Nicholson, London to Shanghai; Mary Nicholson, London to Hong Kong; Isaura, Cardiff to Manila; John Norman, Cardiff to Japan; 3, Bella, Cardiff to Hong Kong; Charlgrove, Liverpool to Shanghai; Str. Eagle, London to Japan; Elton, Liverpool to Hong Kong; Red Rose, Newport to Hong Kong; 4, Petronella Johanna, London to Batavia; 5, Mysore, Bordeaux to Batavia; John Bull, Cardiff to Shanghai; Egmond and Hooren, Liverpool to Singapore; Eulalie, Liverpool to Manila; John Paul, Liverpool to Shanghai; 8, Veronica, Liverpool to Hong Kong; Kelso, London to Hong Kong; 9, Countess, Liverpool to Hong Kong; Golden Hind, Liverpool to Hong Kong; 10, Acapulco, Liverpool to Hong Kong; Summer Cloud, Shields to Shanghai; 11, Earl of Chester, Liverpool to Singapore; Nederland, Cardiff to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT.—June 1, Robert Dickson, Samarang to Amsterdam; 8, Eurandot, Manila to Cork; 9, Vanguard, Shanghai to London.

Digitized by Google

COMMERCIAL POSTSCRIPT.

TEA.—The sales concluded yesterday at stiffer prices. The total sales amounted to 33,849 packages, without reserve.

SILK.—Messrs. Kilburn, Kershaw, and Co. report on the market as follows :—"There is considerable improvement to report since our last circular; demand (chiefly speculative) has been very general since the prospects of peace on the Continent, and altogether a good business has been done at improved rates; prices have recovered much of the decline which had taken place, and the leading silks are now current as follows :—No. 3, Tsatlee, 28s. 6d. to 29s.; Bengal Filatures, best, 28s. to 29s.; Japan, best Mybash, 31s. to 31s. 6d.; the medium and inferior classes are sharing in the inquiry, but not to the same extent as the better descriptions. The general tone of the market is, however, decidedly better than for some time past."

COFFEE.—370 casks and 450 bags of Plantation Ceylon sold readily in public sale at a further advance of fully 6d.; 250 bags of native Ceylon sold at 63s.; 300 bags of Manila withdrawn.

SILVER.—Bar silver sales at 60¾d.; dollars at 59d.; very small demand. An amount of £200,000 is reported at St. Nazaire by the last French steamer from Mexico.

ARRIVALS NOT INCLUDED IN THE TABLES.—July 24, at Falmouth, from Banjoewangie, Acadie; from Singapore, Leotine; from Akyab, Gottingen; 25, at Queenstown, from Rangoon, Vincenzo Gianello; at Liverpool, from Rangoon, Cathaya; at Torbay, from Ceylon, Granville; at Falmouth, from Akyab, Norfolk, Aristides; from Rangoon, Irene; 24, off the Lizard, from Batavia, Hoop; at Scilly, from Akyab, Chalmers; 26, at Deal, from Akyab, Diana; from Colombo, Miranda; 25, at Falmouth, from Bassein, Theo, Lulu; from Rangoon, Queen of Commerce; 24, from Akyab, Orion; 25, at Liverpool, from Rangoon, Thos. Blythe; at Queenstown, from Rangoon, Nevada; 26, off Falmouth, from Singapore, Rio de Janeiro; 27, at London, from Manila, Crest of the Wave; at Deal, from Colombo, Queen Bee; 26, at Falmouth, from Batavia, Nornen; from Akyab, Dorthea Ann and Gottland; 6, at Havana, from Macao, Independent; at New York, from Hong Kong, Tai Lee; 27, at Deal from Penang, Kinnaird; 26, at Falmouth, from Sourabaya, Duc de Richelieu; from Bassein, Theresa; 27, from Bassein, Old England, Matilda; from Rangoon, Persia; from Akyab, Havelock. In the Clyde from Singapore and London, County of Ayr; 27, at Falmouth from Rangoon, Chefoo; 28, at London from Japan, Ben Nevis; at Liverpool, from Shanghai, Seawfell; 25, off the Start, from Colombo, Champion.

DEPARTURES.—July 26, from London, for Shanghai, James Shepherd; for Colombo, Cochin, &c., Excelsor; 25, from Shields; for Singapore, Catherine Elizabeth; from Sunderland for Colombo, Sanderson.

DEPARTURES.—July 23, from Cardiff for Galle, Argonaute.

SPOKEN.—Ker Airnee, St. Nazaire to Galle, May 29, 4 N., 28 W.; Ida Maria de Raoth, Samarang to Middelburg, July 10, 44 N., 25 W.; Bothwell Castle, Clyde to Singapore, July 15, 50 N., 14 W.; Louise Collet (French barque), Singapore to Bordeaux, July 9; Chanticleer, Shields to Shanghai, June 10 N., 6 N., 25 W.; Algernon (barque), London to Penang, July 18, 48 N., 10 W.; Galt (?), Batavia to Falmouth, 67 days out, May 19, 34 S., 14 E.; Scawfell, Shanghai to Liverpool, June 29, lat. 35, lon. 35 W.; Aalanta, Colombo to London, 49 N., 10 W.; Richard S. Eli (?) (ship), Penang to London, 31 days out, April 20, 18 S., 84 E.; Doxothy (barque), Colombo to London, July 11, 44 N., 25 W.; Rover (ship), Ceylon to Falmouth, 77 days out, May 24, 12 S., 10 W.; Mathilde, of Bremen, Bassein to Falmouth, 40 days out, 21 S., 72 E.; Feiga (bargue), of and from Hamburg for Hong Kong, June 15, 7 N., 23 W.; Stirlingshire, Swansea to Hong Kong, June 9, 6 N., 21 W.; Hamilla Mitchell, Cardiff to Shanghai, July 21, 51 N. 6 W.; Graaf Dirk, Sourabaya to Amsterdam, July 7, 39 N., 36 W.; Toin (Dutch barque), Sourabaya to Amsterdam, 134 days out, July 18, 49 N. 10 W.; Elgiva (Dutch barque), Sourabaya to Amsterdam, 136 days out, 49 N., 10 W.; Eclipse, Liverpool to Japan, Jan. 6, 3 N., 24 W.

CASUALTIES.—The Singapore Holges, from Liverpool to Singapore, which sunk in Formby Channel on the 9th January, has been raised and beached half a mile higher up.

LAID ON.—At London: For Colombo, Avon. For Singapore: Rushing Water.

Mr. E. L. Oxenham has been appointed to be a student interpreter in China.

RE THE AGRA AND MASTERMAN'S BANK (LIMITED).—This was an application under the Companies' Act, 1862, on behalf of Messrs. Rennie, Clowes, and Co., of Liverpool, for leave to file a bill against the Agra and Masterman's Bank (Limited), now in course of being wound-up. The object of the proposed suit was to obtain information as to certain acceptances of Messrs. Rennie, supposed to have been held by the Agra Bank before their suspension, with a view of establishing a set-off in favour of Messrs. Rennie, who hold acceptances of the Agra Bank to a considerable amount of bills drawn in Bombay. Mr. Giffard, Q.C., and Mr. Kay appeared in support of the application. Mr. Rolt, Q.C., on behalf of Mr. Cannan, the official liquidator of the bank, opposed the application, and referred to Mr. Cannan's affidavit, which distinctly denied the possession (as part of the assets and securities of the bank), since the suspension of payment, of the acceptances referred to by Messrs. Rennie. After some discussion, his Honour granted leave to file a bill, upon an undertaking that it should not be filed against the company and the official liquidator alone.

THE NEW HOTEL AT GALLE.—*Colombo Observer*, June 14.—The building erected by the Oriental Hotels Company at Galle is quite palatial in its dimensions and accommodation. It is a fine three-storied edifice erected on an elevated site, and the upper rooms command the most beautiful views of the harbour, the sea, the undulating hills around, and the mountains beyond Galle. When we visited the place, the appliances from England were being unpacked, and we almost envied those who were to use the nice marble-topped tables and wash-hand stands, the neat iron bedsteads, the baths, and other comforts and conveniences. If the views from above were splendid, the sight below in the cellarage was wonderful. Not to speak of the array of wines, spirits, beer, aerated waters, and all kinds of drinkables; the display of stores, preserved meats and soups, fruits, jams, jellies, &c., was so extensive and varied that a little fellow who accompanied us in our exploration of the crypt exclaimed, "I should like to live in this cellar!" The management of the establishment is entrusted to Mr. and Mrs. Barker, true types of English activity and civility.

POSTAL AND TELEGRAPHIC COMMUNICATION WITH INDIA, CHINA, &c.

The following is a condensed report of the recommendations of the Committee noticed in another column :—

The Commons Select Committee on this subject have presented their report to the House. In relation to postal communication with India the committee are of opinion that the time had arrived when tenders should be invited for a weekly express service to Bombay, entirely unconnected eastward of Suez with any other mail services, the separate postal service between this country and Madras and Calcutta to be discontinued. The committee recommend in consequence an early consideration of arrangements for maintaining a fortnightly service to China and monthly to Australia, having regard to facilities afforded by the monthly service to China performed by the Messageries Impériales; and the committee consider that the payment by India of half the net cost of the China service will not under the proposed arrangements be equitable. In relation to telegraphic communication with India the committee consider that it should not be dependent upon any single system in the hands of several foreign Governments and under several distinct responsibilities; and that the establishment of separate lines, entirely or partially independent of the present line through Turkey, is desirable. They are of opinion that means should be taken for improving the condition and facilitating the use of the lines which connect the Persian system with Europe by way of the Georgian lines of the Russian Government, and for bringing if possible within the Turkish convention the line recently established through Syria for connecting Alexandria with the main line to India at Diarbekir. They recommend that the communication by way of the Persian Gulf be doubled. They regard as deserving of serious consideration and the support of the influence of the Government, the proposition for a direct communication between Alexandria and Bombay by way of Aden, on the principle of a line practically under one management and responsibility between London and India in the first instance, and afterwards with China and Australia. In regard to telegraphs on the several railway lines in India, the committee suggest that the Indian Government might sanction the use of the wires by a public company willing to rent the privilege, or that there should be some such organisation of the several independent companies as will establish a unity of system and bring the use of the lines fairly within the reach of the public. Lastly, the committee represent that it is desirable that arrangements should be made to bring China and Australia within the reach of telegraphic communication with Europe. The report, which is of considerable length, was agreed to without a single division. It calls attention to the fact that one-fourth of the external commerce of the United Kingdom is with the following countries :—British India, China, Australia, Japan, Philippine Islands, Ceylon, Mauritius, Egypt, and Singapore and Dutch Indian possessions.

TRADE WITH THE FAR EAST.

SHANGHAI.

The following is Mr. Consul Winchester's Report on the trade of Shanghai for the year 1865 :—

Probably no year ever opened on the trade of this port with gloomier prospects than 1865. The vast exodus of Chinese after the defeat of the rebels had left stranded in serious difficulties many traders, whom the enormous return yielded by Chinese houses had induced to embark their own, and such funds as they could raise, in real estate.

The extension of the tea export in the Yang-tze had thrown upon the home market an excess of that article. The closure of the great outlet of the United States, and consequent necessity imposed on American firms to contract their operations, had diverted the supply destined for that market to the London stocks. The increasing severity of the blockade materially increased this unprofitable accumulation, and a rapid fall in home prices was the consequence. This was disastrous to many long-established and respectable firms. Bank accommodation, on the facilities connected with which recent commercial building operations were much based, was withdrawn, and the usual result of numerous failures followed.

To add to this depression, the astonishing successes of the "Union forces" led to a marked decline in the value of cotton, a staple which had formed during the year a large though exceptional article of export to England from this locality. Chinese cotton, being always packed with water to effect a fictitious increase of weight, was even exceptionably depreciated as the prospect of less objectionable supplies opened. The effect upon the state of business at this port was striking. The whole aspect of the place seemed to have changed. Mercantile houses of world-wide reputation were reported to have sustained enormous losses, to meet which the fortunes made by former generations of merchant princes were to be called out. The expression of men's faces was sombre and depressed. Exchange fell because sellers could see no way to the profitable employment of their funds; and the list of names to whom the banks were allowed to give credit was largely reduced in numbers. Freights went down so low as 30s. a ton for tea; and the profitable employment for shipping, either on homeward or coasting voyages, became impossible. The port was rapidly deserted by its mercantile fleet; and the crowd of storekeepers and artizans, foreign and Chinese, supported by its presence, soon became straitened in their business operations.

So complete a reversal of prosperity as that witnessed between the fall of 1863 and the spring of 1865 was hardly ever before witnessed; nor was there the slightest prospect of improvement previous to the arrival of the intelligence of the reduction of the tea duties—a measure which will be ever memorable in the history of British commerce at Shanghai, as having, almost providentially, interposed to bring back prosperity to this mercantile community.

There was much in the condition of affairs above described traceable to contingencies within the range of those hazards to which commercial

Digitized by Google

operations are necessarily liable; but much of it, even on the most favourable view, is attributable to the excessive and short-sighted spirit of speculation with which all classes of residents in this settlement had been infected by the enormous and short-lived returns of the two former years. When the crisis arrived it was quickly found that those houses who had withdrawn their funds from the slower circle of legitimate commercial operations to invest them in real estate, or on alluring Chinese ventures, were the first to succumb to pressure. The extent to which these causes operated in depopulating Chinese and foreign houses was surprising; and in a future despatch, in which I hope to present a general view of the state of the settlement, I trust to be able to furnish some interesting particulars on this head. In the meantime it is sufficient for the purpose of this letter to note the connection. Probably no interest suffered more generally than the banking. The establishment of seven or eight additional branches led to a competition for business, of which the results were severe losses.

After the end of July the condition of the settlement and commerce generally gradually improved; and, indeed, so far as trading ope tions proper were concerned, the year closed with prospects of more than average success.

The tables of imports and exports embodied in Mr. Winchester's report are too lengthy for reproduction, but the following analysis of them gives the general results of British trade :—

IMPORTS.

	Taels.
Value of imports from Great Britain	12,359.022
„ „ Australia	309,732
„ „ Hong Kong	3,905,063
„ „ India	17,769,726
„ „ Singapore	522,686
Total value of British Imports (exclusive of treasure)	34,866,229
Treasure imported from Hong Kong... ...	2,650,551
„ „ Great Britain ...	351,659
Total treasure imported	3,002,210

REMARKS.

COALS are imported from Great Britain, Australia, the United States of America and Japan, as well as from the Chinese port of Kelung, in Formosa. The importations from Australia, Kelung, and Japan seem likely to increase in proportion to the high rates and short supplies of those from Great Britain. Formosa coals have sold at Shanghai at from 5 to 6½ taels per ton. The Chinese have been almost the only consumers, though this coal has occasionally been used for steamers. The only port in Japan from which Shanghai receives coals in any quantity is Nagasaki. Owing to the recent abolishment of the Government monopoly, the workers of the Japanese mines have been enabled to supply a more uniformly good description of coals than formerly, but at somewhat advanced prices. It is estimated that 25 tons of the best Japanese coals will give the same result for steaming purposes as 20 tons of Welsh coals. Owing to the introduction of improvements in the working, an increasing supply, and of superior quality, may be looked for.

The consumption of Australian coals has largely increased as compared with other descriptions, having been used by some steamers more generally han the English coal, owing to the high cost of the latter. The quantity of coals imported from Great Britain in 1865 was 51,325 tons; the stock n Shanghai on the 1st January, 1865, was 46,630 tons, and on the 1st January, 1866, was 23,724 tons, showing a consumption of 74,221 tons during 1865.

EXPORTS.—TEA.—The year 1865 was one of the most eventful in the annals of the trade. For the first few months those who had been largely interested in shipments of cargoes during the season of 1864-65 were smarting from the disastrous results which had accrued to their ventures; and when the market opened for the new season's teas, there was a feeling of distrust as to the likely results of the shipments about to be made. Some houses had already succumbed to the pressure of the times; and most of the banks having been sufferers in consequence, became distrustful of mercantile paper, and credit sustained a severe loss thereby.

The prices paid at the opening of the new season, although not so high as the opening rates of the previous year, were in excess of what the teamen had been led to anticipate; and consequently rashness was again the character applied by many to the operations of the foreign merchants. After the first settlements had been made, little disposition was shown on he part of foreigners to continue purchases, and prices exhibited a weakening tendency. Any material decline was, however, arrested by the announcement of the reduction in the duty on tea in England from 1s. to 6d. per pound; and an advance of 3 taels per picul was at once established. The stimulus to purchasers, however, which would in ordinary times have resulted consequent upon such intelligence, was not realised, caution having been instilled into the minds of most operators by the costly experience of the previous year's shipments, and part of the above advance was soon lost. Moreover, advices from home did not encourage the anticipation of any large increase of consumption in Great Britain in consequence of the lowering of the duty 50 per cent. Considerable fluctuations took place in the values of cargoes owing to the accounts received from the home markets until the end of September, after which time a steady and continuous rise took place month by month, and quotations for black leaf teas exhibited at the end of 1865 an advance of fully 6 taels per picul upon the opening rates of the season. The position of the market was much improved when the favourable out-turn of the first shipments of the season to England became known, and was much strengthened by the fact that the supply of black leaf teas had been proved beyond doubt to be considerably less than that of the previous season—say some 50,000 to 60,000 chests, or about 5,500,000 lbs. Green Teas during the first half of the year commanded some attention for shipment to America, but for England not much business was done.

SILK.—At the opening of the year 1865 the stock of China silk was almost exhausted, only about 3,100 bales being exported from the 1st of January to the 1st of June, at which time the new crop began to be brought down to market. The first crop proved good; but about the beginning of July, when the second crop was nearly ready for reeling, the weather was unusually wet, and the result was that the second crop was almost entirely lost. The finest silks have throughout the season been most in demand, as being the most suitable to replace the deficiency of the European crop; and prices for such qualities have naturally advanced to the greatest extent. The unsold stock on the 31st December only amounted to about 1,500 bales, and but little more silk can be expected to be brought down to market until the arrival of the new crop of June next. The high prices paid for fine silk this season have greatly enriched the growers, as well as encouraged them to increase the production of suitable silk for export; great preparations are accordingly said to be in progress for the coming season; and should the weather prove fairly favourable for the culture of the worms, a much larger yield than heretofore may be confidently expected for next season.

The total export of China silk from Shanghai, from the 1st January to the 31st December, 1865, amounted to about 42,000 bales. Of these about 25,800 were shipped by the Peninsular and Oriental Company's steamers, 14,400 by the Messageries Impériales steamers, 1,167 by British sailing-vessels direct to London, and 633 to Hong Kong, for shipment thence to Europe. About 7,000 bales were shipped to Marseilles.

COTTON.—For the first three months of 1865 cotton was in some inquiry for shipment to England; but after that time the demand subsided, and by the end of May it had ceased to be exported to Europe. Lower prices in Liverpool consequent on the termination of the American war, and character given to China cotton as "water-packed," deterred shippers from operating further; and, in fact, the latter reason caused the China cotton trade to be looked upon with suspicion and distrust.

CANTON.

Mr. Consul Robertson gives the following account of the trade of this port for the year 1865 :—

The returns of trade at the port of Canton for the past year, 1865, show a marked improvement in amount over those of the preceding year, 1864, as the following summary will show.

Total value of imports in Mexican dollars :—

1865.	Goods	9,228,634	
	Treasure	3,421,114	
			12,649,748
1864.	Goods	5.706,147	
	Treasure	2,828,045	
			8,534,192
			4,115,556

Total value of exports in Mexican dollars :—

1865.	Goods	13.984,555	
1864.	Ditto	9,813,711	
			4,170,844
Increase in value for 1865			8,286,400

The increase of revenue to the Imperial Government has likewise been in proportion, amounting to the sum of 116,000 taels; but of that particulars are unnecessary beyond observing that by a customs regulation of the 30th October, 1861, native produce carried coastwise, that is, from one treaty port to another, in foreign vessels paid full export duty at the port of shipment, for which a certificate was granted, and coast trade duty at the port of entry, the amount of which is half import duty. Orders, however, were given to the various Custom-houses not to receive export duty certificates after the 31st of March, 1864, except on such goods as came direct from a treaty port; thus placing the British Colony of Hong Kong on the footing of a foreign port, from whence heretofore native produce accompanied by a certificate was allowed to be imported on the payment of half duties.

EXPORTS.—TEA.—It can scarcely be said that the state of the tea market at home during the past year had much influence on that of this port; for, under any circumstances, the ports of Hankow and Foochow must monopolise the bulk of the black teas, leaving only a comparatively insignificant amount to find its way down here. Such indeed is a natural result

Digitized by Google

from the local conditions of these two ports, and there is little, if any, prospect of amendment. What business is done at all is chiefly in teas produced in the neighbourhood of Canton, and of these a considerable portion are taken for shipment to the Portuguese settlement of Macao, to avoid the levy of the Customs tariff duty at Canton. The export for the past year, 14,457,024 lbs., against 13,961,836 lbs. in 1864, shows an increase over that of the preceding one of 495,188 lbs., leaving a stock on hand at the close of the year of about 14,000 piculs, or 1,866,666 lbs.

SILK.—The market quotations at home had their influence on the trade here; and the export of silk shows an increase of 5,919 piculs over that of the preceding year, being 8,778 piculs in 1865, against 2,859 piculs in 1864. All, in fact, that was available was bought up, notwithstanding the high rates which prevailed. Wild raw silk also shared in the improved demand, and shows an increase in export of 1,619 piculs. This description of silk is purchased chiefly for the Indian market, where there is a ready sale for it. In silk piece goods there is a falling off, being 2,775 piculs in 1865, against 3,290 in 1864, showing a diminution of 515 piculs, which may be accounted for in the demand for the raw article.

SUGAR shows an improvement, the shipments of last year being 90,000 piculs, against 65,000 piculs in 1864, showing an increase of 25,000 piculs.

IMPORTS.—The importation of grey shirtings was almost doubled in 1865, and in white the increase was about one-fourth over that of the previous year, and with few exceptions there was an equal improvement in other fabrics. In woollens the market was not so active, and in metals also there was a considerable falling off.

TONNAGE.—Some improvement in the employment of vessels is exhibited in the returns for the past year over those of 1864; 218 sailing-vessels were entered inwards in 1864, 157 of which, measuring 74,346 tons where in ballast; and 226 were cleared outwards, of which 108, measuring 46,840 tons, were in ballast; from which it will be seen that of 157 vessels entered in ballast, 49 took cargo out of port; whilst in 1865, 310 vessels were entered inwards, of which 227, measuring 102,023 tons, were in ballast; and 303 cleared outwards, 134 of which, measuring 58,875 tons, were in ballast; thus showing that 93 of the vessels in ballast left with cargoes.

The total value of trade, imports and exports, for the past year, 1865, may be estimated at 28,611,159 Mexican dollars, against 21,851,972 Mexican dollars in 1864, showing a balance in favour of the former of 6,755,187 dollars; and so far an improvement, owing, probably, to the increased demand for teas and silk exhibited by the home market, and larger imports on Chinese account than were made in the preceding year. As regards tea, the total receipts of the year did not exceed thirty-seven chops, notwithstanding that full rates were asked and obtained for all descriptions. It is, however, but fair to state that the rise in the home market and the reduction of the duty were not anticipated by either foreigners or Chinese, and consequently the market was not prepared for any exceptional call upon it; and the same may be said of silk. Every available bale was bought up at extreme rates, and the stock was cleared off at the close of the year. In imports, however, little or no business has been done by foreigners. During the whole of the year not a single piece of grey or white shirtings was sold by them, and comparatively little of other articles of import.

MACAO.

A return of the trade of this port is made by Mr. Lauca, the British Consular Agent. It offers no special feature of interest, except the following remarks on Coolie emigration as now conducted at that port:—

There has been a great demand for coolies, both for Havana and Callao, which caused much speculation and excitement on the subject; however, nothing can be said with justice against the freedom with which the emigration is carried on at this port under the present Government regulations; every opportunity is allowed to the coolies to desist up to the last day of the ship's despatch, when the vessel is visited by the Captain of the Port, who questions every one of them, through an interpreter, as to their own free will to emigrate, and there have been several instances of some of them returning after having signed their contracts and received advances; moreover, they are allowed one dollar to return to their native country; the Chinese brokers who bring the coolies from the country are closely watched by the police, so that the coolies may not in any way be forced to sign a contract against their will, and many of the brokers have been severely punished for interfering; nor are the coolies allowed to be watched at all on their way to the office to sign their contracts, they are perfectly free to take their own way, which has occurred very often. Provisions are also carefully inspected, both by the authorities as well as by the master of the vessel; and the latter is held responsible to carry out the Government regulations, for which purpose the merchant signs a bond of 1,000 dollars, with one surety of a resident merchant or property-holder in Macao.

From the Return of Emigrants it will be observed that the number of vessels despatched with coolies during the past year has been 39, measuring 24,671 tons, carrying 13,674 coolies; and, in 1864, 33 vessels, measuring 20,450 tons, carrying 10,722 coolies, thus showing an increase of 2,952 coolies despatched from this port, being 738 for Havana, 2,164 for Callao, and 50 for Sandwich Islands as compared with the previous year.

SWATOW.

Mr. Consul Caine gives the following account of the trade of Swatow:—

IMPORTS.—During 1864 the value of the import trade was £1,961,740, an increase of £191,105 over that of the previous twelvemonth; but 1865 shows a marked improvement, the excess being £526,242.

The very large increase in the import of rice is attributable to the destruction of the crops in the early part of the year, and the presence of the rebels in this department necessitating the storage of rice in the several cities threatened. The imports of rice from Saigon amounted to 131,670 dollars, from Siam, to 68,634 dollars, and from Batavia, to 27,000 dollars. At the same time there has been a decrease in the quantity of opium and tin imported.

The import of treasure during 1865 amounted to 742,619 dollars.

EXPORTS.—The total value of the export trade for 1865 amounts to £991,973 1s., being a decrease of £175,934 as compared with 1864. This falling off has been chiefly in chinaware, cotton, hemp, paper, rice (of which the export was prohibited), and sugar, in the latter article alone the decrease has been £191,178. There has, however, been an increase in the export of paper fans, grass cloth, and tobacco.

The total value of the trade of Swatow for 1865 computes to £3,479,955—an augmentation of £350,308 over the previous year.

The export of treasure during the year has been 5,341,483 dollars.

REMARKS.—It is very satisfactory to note the steady extension of trade at this port since its opening in 1860. At one time, as mentioned in my report for 1863, it seemed probable that the small and handy vessels under the flags of continental States would monopolise the coasting trade, but the class of English vessels now engaged in this trade are better suited to the work, and will be able, I believe, to hold their own.

The local Customs authorities have recently notified the Chinese merchants that in future it will be permissible to store sugar at Swatow itself. This measure will enable merchants to collect cargo and so make it worth the while of steamers to load from this for the more northern ports; for whilst the prohibition lasted cargo could not be collected nearer than Alimpo, some ten miles from Swatow. The detention, therefore, to a vessel was great whilst cargo was being brought to the port of shipment, and steamers would not, on the uncertainty, come in seeking.

Great facilities have been given by the Customs officials to steamers engaged in the coasting trade, by which their loading and discharging is much expedited. Such steamers when once entered at the Consulate need not again report for a period of four months, the agents at the same time giving a guarantee to abide by the regulations of the port. This change has worked well, and has given satisfaction to all concerned.

HANKOW.

The following is Mr. Consul Medhurst's report on the trade of Hankow for the year 1865:—

IMPORTS.—The returns of this branch of the trade for the past year contrast very favourably with those of the preceding twelvemonth. The gross imports for the year from the Chinese ports and from foreign countries, including copper cash and treasure, and deducting re-exports, amount to 12,862,182 taels, against 12,068,870 taels for the preceding year, showing a difference in favour of 1865 of 793,312 taels. The actual increase, however, in the value of goods imported will be found to be much larger than this, if the considerable decline in the import of copper cash and treasure for the year be taken into account. The import of these articles fell off during 1865 to the amount of 2,086,308 taels, which sum must, therefore, be considered as representing a portion of the increase in the merchandise imported, making the actual increase for 1865 fully 2,879,620 taels. This increase may be divided between foreign goods and native produce in the following proportions:—Foreign goods, 2,638,170 taels; native produce, 241,450 taels.

The large preponderance of the imports from Chinese ports, more especially from Shanghai, over those from foreign countries, need cause no surprise, when the situation of this port relatively to other places is taken into consideration. Shanghai, from its position, must always serve as a seaport to Hankow, through which all its carrying trade with foreign ports and the Chinese coast ports would be conveyed. Hence, as will be seen from the table, Shanghai takes the first rank in the value of its imports hither, and consequently any development in the trade of this port must always be expected to have a correspondingly beneficial influence on that of Shanghai.

EXPORTS.—The total value of the exports for the year 1865, leaving out of consideration treasure and copper cash, amounts to 12,685,231 taels against 13,448,313 taels for the preceding year, showing thus a falling off for the former period of 763,082 taels. This discrepancy, however, is more than accounted for by the diminished shipments of tea, the exports in which for the year 1865 are valued at 6,091,156 taels, while those for 1864 were estimated at 7,222,009 taels, whence it may be inferred that the export of other staples of produce must have increased by 367,771 taels.

The total export of tea for the year is shown to have been 35,886,144 lbs., against 39,630,305 lbs. during 1864, being a decrease of 3,744,161 lbs.; but although this serious decline has to be recorded as regards the total export, yet it is gratifying to observe that the direct shipments to England continue to exhibit a steady increase as compared to previous years, as will be seen from the following figures:—

In 1863. Exported in 5 vessels...	. .	...	3,711,582 lbs.
1864. „ 8 „ ...	...	...	6,407,077 „
1865. „ 12 „ ...	...	...	10,519,973 „

SHIPPING.—As I have already remarked in the opening paragraph of this report, the shipping on the Yang-tze consists principally of steamers which ply regularly between Shanghai and this port. These numbered during 1865 12 vessels, 4 of which were under the British flag and 8 under American colours, representing an aggregate tonnage of about 10,000 tons, and they were entered at the Custom-house 225 times during the twelve months. Since November 3 of these vessels have been taken off the line. The entries of steamers during 1864 amounted 217. Of direct ships to England 12 vessels of 8,641 tons left the port in 1865, against 8 vessels of 6,199 tons in 1864, and 5 vessels of 3,059 tons in 1863. The aggregate tonnage of British steamers, ships, lorchas, and junks (under special pass) entered at Hankow for the year 1865 amounted to 90,758 tons, against 59,744 tons during the preceding year. The tonnage of American vessels of all kinds for the same period amounted to 120,650 tons, against 143,649 tons during 1864. The remarkable increase in the British tonnage, as well as the equally noticeable decrease in the American, is traceable to the steamers alone, the American entries of these vessels having fallen from 160 to 154, and those entered under the British flag having increased in number from 62 to 64, as well as in carrying capacity. Other national flags show an entry during 1865 of but 260 tons, against 216 during the previous year.

The London & China Telegraph.

LONDON, SATURDAY, JULY 28, 1866.

DEFICIENCY OF THE INDIAN TELGRAPHIC SYSTEM.

THE evidence brought before the Parliamentary Committee charged with an investigation into the state of our East India telegraphic and postal communications goes to show that owing to the virtual ban placed on private enterprise, the telegraphic system in India itself is wofully defective. It might have been supposed that with the surrender of the interests of the East India Company a more liberal policy would have been pursued in India in respect to telegraphic facilities for the Indian public, but such has not to any great extent been the case. Although the Act of 1854 has been modified, and railway companies may now transmit messages in which they possess a pecuniary interest, the spirit of monopoly still asserts itself, excluding the commercial community from those advantages that they may rightly claim. The Indian public are not sufficiently accommodated, either as to number of wires, the extent of lines, or the efficiency of working; and this is felt to be more grievous as under proper management—such as might be expected from a public company—additional Indian telegraphic lines would in all probability prove, financially, admirable investments. Even many of the scientific improvements in telegraphy at home have been ignored in India, whilst the present condition of telegraphy in this vast dependency is simply disgraceful. The state of things gives some foundation to the opinion that a considerable proportion of the errors charged on the new submarine and overland lines might be fairly debited to the Indian lines. Be this as it may, Great Britain, no less than India, which now possesses an external and internal trade of £250,000,000 per annum, has an immense interest in the establishment of prompt and sufficient communication in dealing with the Indian telegraphic system. The evils to be encountered are two-fold; first, that the Government lines are so fully employed, and so defective in their transmissions, that the commercial and mercantile community of India cannot rely on them for use; and, secondly, that the restricted licences of the railway companies prevent them from sufficiently supplementing this want. We have in India all the results which might be expected to spring from the absence of the modifying influence of competition. We witness, too, a general want of confidence by the public in existing lines; and no wonder, when messages are actually evaporated on transmission from station to station. It was on January 15, 1852, that it was officially announced that "there would be no objection "made by the Government to the construction of private lines "of telegraph in any direction from one part of India to an- "other," yet all attempts of private capitalists to obtain permission to this end have hitherto been baffled. We are satisfied that the matter will not be suffered by Parliament to remain in abeyance. Telegraphic enterprise in India, as in Great Britain, must be rendered free, and independent proposals as to new routes, money payment, maintenance and working, be dealt with on their merits. Hitherto, the real point at issue in the proposals made has been abandoned; when entering into minutiæ they have been too specific, when revised too comprehensive. Those proposals have come from capitalists in India and capitalists in London, separately and conjointly, and have all shared the same fate. Notwithstanding the single uninsulated wire of the Government, it has shown no disposition in the negotiations entered into to be abruptly broken off, to sanction to the extent desired or available the use of its own supports.

A scheme, too, has been rejected by which the East Indian Railway and Great Indian Peninsula Railway Companies would have given the Indian public all the telegraphic facilities required between Calcutta and Bombay. It cannot be tolerated that the interests of the commercial community of India should be trifled with by a monopolising and exacting spirit which finds play in the imposition of restrictions on enterprise, and exercising unreasonable control. By the time that China will be connected telegraphically with India, it is to be hoped that the restrictive licences granted to the Indian railways will be withdrawn, and that in combination with them the Indian telegraph system will be vastly improved. The lines that now exist are both overtaxed and inefficient, and in any event it is quite as necessary to erect lines in India, independent of the Government, in and between the three Presidencies, as it was to erect a separate line from Alexandria to Suez free from the supervision of the Egyptian Government. The Government lines of India are necessarily much employed on official business, so much so, that at times the public are completely excluded from their use. The maximum rapidity of transmission is only 800 words per minute, which is far behind English and American accomplishments. The policy that has been pursued has evidently much to do with the result. But commercial necessities must be met, and with perfected means of communication with India itself, it will in addition be a political necessity, that transmission of information to all the chief centres of Indian population shall be at once rapid and correct. We are daily expecting the report of the Parliamentary Committee which sat under the presidentship of Mr. R. W. CRAWFORD. As to connection between Europe and India itself, the convention between Her MAJESTY and the Shah of PERSIA is calculated to provide great facilities. The line will be divided into six sections, extending from the Turkish frontier to Hamadan, thence onwards to Tehran, Kashan, Ispahan, Shiraz, and Bushire, and as the organisation and working will be superintended by English officers, we may anticipate that the undertaking will be successful from the outset. The rates for messages will conform to the tariff in force from Bushire to India, and from Khanikin to Constantinople or Europe, and all yearly receipts beyond 30,000 tomans—the sum accredited to the Persian Treasury—are to be made over to the officers of the English Government. There are to be two wires, one ordinarily under the control of the Persian Government, but the use of which on English account is subject to specified arrangements under stated conditions, such as excess of work or temporary derangement on the other line. No difficulty can apparently arise in the settlement of the accounts of international traffic, as difficulties of every kind that may arise are to be referred and arbitrated upon by their Excellencies the Persian Minister for Foreign Affairs, and the British Minister at Tehran. The convention is to take effect from the opening of correspondence on the second wire, and to remain in force five years.

Since the above was written, the report of the Committee has been published, and concludes with the following results:—

"AS REGARDS THE POSTAL QUESTION.

"1. That, while it has not been expedient hitherto to add to the expense of the postal communications with India, by establishing a more frequent service to Bombay, in addition to the existing services to Madras and Calcutta, yet having regard to the facilities already afforded by the railways under construction in India, and to the prospect of the early completion of the main lines of communication connecting the port of Bombay with the Presidencies of Calcutta and Madras, the North-West Provinces, and the Punjab, the time has arrived when tenders should be invited for a weekly service to Bombay alone, and the separate postal service between this country and Madras and Calcutta should be discontinued.

"2. That such service should be on the footing of an express service, entirely unconnected, to the eastward of Suez, with any other mail services.

"3. That the tenders should be either for the entire service to and from Bombay, or for the sections to the east and west of Egypt separately, the parties having the option to tender for either weekly or fortnightly services.

"4. That the time table should be based on a prescribed speed of not less than 11 nautical miles per hour on the voyage between Marseilles and Alexandria, and 10 miles per hour between Suez and Bombay; but that the tenders be required to state also terms in each case for higher rates of speed of not less than one additional half mile per hour.

"5. That in consideration of the outlay which must necessarily be incurred in the construction of new vessels, or adapting those now employed, for the efficient performance of the future service to India, it is expedient that the new contract shall be for a term of years certain, subject to a subsequent notice of two years on either side.

"6. That Her Majesty's Government should take into their early

Digitized by Google

consideration the arrangements to be made, in consequence of the proposed separation of the Indian service, for maintaining a fortnightly or half-monthly service to China, and a monthly or four-weekly service to Australia, having regard to any facilities which may be afforded by the monthly service to China now performed by the Messageries Imperiales from Marseilles.

"7. That, in the opinion of your committee, the arrangements under which India now defrays a moiety of the net cost of the China service, after deducting the postal receipts, will not, under the proposed arrangements, be equitable as regards that Government, and should be modified.

"AS REGARDS THE TELEGRAPHIC QUESTION.

"1. That, having regard to the magnitude of the interests, political, commercial, and social, involved in the connection between this country and India, it is not expedient that the means of intercommunication by telegraph should be dependent upon any single line, or any single system of wires, in the hands of several foreign Governments, and under several distinct responsibilities, however well such services may be conducted as a whole in time of peace.

"2. That the establishment of separate lines, entirely or partially independent of the present line through Turkey, is therefore desirable; and, in that view, that means should be taken for improving the condition and facilitating the use of the lines of telegraph which connect the Persian system with Europe, by way of the Georgian lines of the Russian Government, and for bringing, if possible, within the Turkish convention the line recently established through Syria for connecting Alexandria with the main line to India at Diarbekir.

"3. That, with the view to better security against accident in time to come, the communication by way of the Persian Gulf should be doubled, either by the laying of a second submarine cable or by continuing the land line from Kurrachee and Gwadel to Bunder Abbas, and thence, under arrangements with the Government of Persia, to Ispahan, by way of Kerman and Yezd.

"4. That a proposition made to your committee for the establishment of a direct communication between Alexandria and Bombay, by way of Aden, on the principle of a line practically under one management and responsibility, between London and the Indian Presidencies in the first instance, and afterwards with China and the Australian colonies, is deserving of serious consideration, and such reasonable support as the influence of Her Majesty's Government may be able to bring to its aid.

"5. That, considering the great outlay of guaranteed railway capital already incurred in the establishment of the telegraph on the several lines of railway in India, it is expedient that means should be taken for affording the public the utmost benefit attainable from that expenditure, either by the Government of India sanctioning the use of the wires of the companies by a public company willing to rent the privilege on equitable terms, or by such an organisation of the several independent companies as will establish a unity of system, and bring the use of the lines fairly within the reach of the public.

"6. That the magnitude of the interests involved in the trade of this country with China and Australia, and the rapidly-increasing development of the colonies in population, in commerce, and in the various elements of national greatness, render it desirable that arrangements should be made to bring these communities within the reach of telegraphic communication with Europe."

THE HONG KONG DOLLAR.

THE community at Hong Kong interested in the new coinage will be glad to hear that a more powerful press than any in his possession is about to be shipped to Captain KINDER for the use of the Royal Mint. As the "weakness" complained of in the appearance of the dollars issued at Hong Kong at the commencement of operations was due in part to the defective power in the presses employed, a nearer approach to the specimens struck at Tower Hill may be anticipated as soon as the new machinery comes into play. As to milling, the specimens struck here were with a plain edge, this being the invariable rule for "proofs." A difficulty has always attended the outer milling of large silver coin, interfering as the process does with the liberation of the coin, and thus checking the rapidity with which it might be otherwise produced. Thus it was abandoned in the crown piece. It is evident, however, that to prevent the exterior rim of the Hong Kong dollar from being tampered with, necessitates either milling or lettering, and either to be effectual should approach very near perfection. When so much difficulty has been encountered in correct milling, it is easy to conceive how much more serious would be the task of lettering—the method proposed by Captain KINDER, and which he considers would defy manual imitation. Lettering would certainly interfere with the rapidity with which the coin could be worked off, but the compensation could be found in additional presses and an increased number of employés. It was not to be assumed that the Hong Kong Mint would at the outset rival the production of Tower Hill, even with the same die. In respect to ornamentation, the borders of the dollar represent a design largely entering into Chinese designs; but however elaborate the surface might have been rendered, this would have afforded little protection, for it is the cutting the coin in two that has to be guarded against. Captain KINDER'S communication to the Treasury and Mint authorities will doubtless lead to all requisite steps being taken to rectify any deficiency in the Hong Kong coinage, more especially as on its integrity depends the range of its circulation, and the facilities it can afford in the East to trading and commercial transactions. We are satisfied the machinery of the Royal Mint at Hong Kong should have been entrusted with experimental work for a longer period before any coin was issued, so as to have rendered it more creditable to British art. But the very anxiety of the public to be in possession of the new coinage has evidently caused Captain KINDER to yield, when his judgment would have been in favour of a postponement. The Hong Kong Council, too, are anxious to secure at the earliest period any profits derivable from seigniorage; but the extent of profit, if any, must be largely determined by the excellence of the coin.

CEYLON PLANTING INTERESTS.

THE increasing attention now being paid in Ceylon to the reduction of the expenditure on estates, the improved organisation as to the employment of native labour of a superior and sufficient character, satisfy us that in the future none of the elements of success will be overlooked. If there is one influence that more than any other has turned aside British capital from Ceylon it has been the apprehension of insufficient hands, or of labour intermittently supplied. Planters are beginning to discover that they have the remedy in their own hands, not by any excessive outlay, but by a just treatment of coolies; whilst as to outlay for wages, it is evident that it must be materially decreased, apart from the effect of competition, by a proper system of registration, and by aid of the law for the enforcement of contracts. We are not surprised to see coolies flocking to "the land of rupees," and, although labour in Ceylon is never likely to become a drug, an available surplus is always desirable to guard against unwarrantable exactions as well as the capricious dispersion of hands.

CEYLON PRODUCE.

IT could not be otherwise than that Ceylon coffee should share in the depreciation common to all descriptions of stock during a period of panic increased in its intensity by a foreign war. Although the rate of discount is maintained at 10 per cent., the effect of a less stringent money market is witnessed in the rise of Colonial produce generally, and in our next issue we anticipate being able to report a considerable improvement in prices. Although the amount of Ceylon coffee consumed at home holds but an inconsiderable proportion to that consumed on the Continent, the effect of buyers in our market has a stimulating influence on the prices of this article. The war promises to be shortly closed, and with peace our continental trade may be expected rapidly to assume its accustomed proportions.

THE STRAITS TRANSFER.

THE Bill for the transfer of the Straits Settlements has passed through all its stages in the House of Commons, and its second reading through the Lords yesterday. The measure is therefore at last accomplished.

Literature.

MR. HENRY RUTTER'S *Tables for Calculating Exchanges between England, India, and China, in Sterling, Rupees, and Dollars* have reached a Ninth Edition, revised and enlarged. Such a fact dispenses with the necessity of notice or recommendation. Each edition has received amendments and additions to its predecessor; and such, indeed, is the highly honourable purpose of the author, for his present preface explains that every succeeding issue has been limited in number, as it "has been his desire from time to time so to improve and alter the book that it might keep pace with the requirements of an extending commerce." For this, the ninth appearance of this thoroughly standard work, the author carefully went through a great part of the tables, and has altered and extended the whole of Part VIII, viz., the Comparative Exchanges between Hong Kong and Shanghai; and also that portion of the Bullion Tables relating to remittances of silver from Hong Kong to India. This constant supervision will continue to keep the book in the first rank of all such aids to the business of the Eastern merchant or banker.

Ti-Ping Tien-kwoh. The History of the Tiping Revolution, including a Narrative of the Author's Personal Adventures. By LINDLEY.—Day and Son.—Our attention has been called to the

Digitized by Google

fact that in our review of this work expressions and statements reflecting on the author personally were inadvertently and in the absence of the editor allowed to appear. Feeling as we do that personalities, even if well founded, are not fair weapons in criticism, we hasten to express our very great regret that the expressions and statements in question found place in our review, the more so as we are assured that they were really without foundation. We differ from the author's opinion of the Taipings, and think his conduct in joining them laid him open to criticism of the same kind as that to which he has subjected the British officers on the other side; but we freely admit that it does not fall within the province of a reviewer to judge of the propriety of the conduct of an author, and are sorry that any remarks of ours should have given Mr. Lindley any pain.

NOTES FROM PARIS.

The transport *Ardeche* has left Toulon for Alexandria with 1,400 persons on board, consisting principally of eight companies of marines and 250 sailors for Cochin China, where revolutionary attempts are said to have been made against the French authorities, together with 300 tons of materials of war. The report afloat is that the Imperial Government intends to take possession of the three Annamite Provinces of Lower Cochin China, whence all the difficulties proceed. The Toulon papers declare that nothing is heard in that port of any such insurrection, or of any demands for reinforcements by Admiral de La Grandiere, but it is difficult to conceive that, unless some pressing necessity existed, the present season should be chosen for such an expedition. The heat in the Red Sea is said to be excessive; the *Orne,* bringing a number of passengers from Saigon, has suffered terribly, typhus having broken out on board the ship, giving rise to the most serious apprehensions. Under any circumstances the 1,400 persons going out in the *Ardeche* are to be pitied. We have just heard that the *Ardeche* departed without waiting for certain passengers and a quantity of baggage which were behind time, a pretty good proof that the expedition is the result of a pressing demand.

A Chinese collection has just been opened in the Lonore; the number of objects amounts to ten thousand, and the exhibition is said to be one of the most complete of its kind ever seen in Europe.

The flags of China, Japan, Tunis, and Morocco are now flying over those portions of the International Exhibition reserved for these countries. The setting up of the flags was performed officially by representatives of the Imperial Commission, Baron Jules de Lesseps, Commissioner for Tunis, Morocco, and Japan; the Marquis de Hervey de St. Denis, the Barons de Mériteus and Girette, Chinese Commissioners; and MM. Fleury-Herard, Erlanger, and Gréhan, Commissioners for Japan, Tunis, and Siam. The predominance of yellow in the bunting makes a brilliant exhibition.

Japan, we are told, is about to be endowed with a Franco-Japanese bank, having a capital equal to six millions sterling, two-thirds of which are to be raised in France and the rest in Japan.

The breeding of silk worms in the gardens of the Acclimatisation Society, in the Bois de Boulogne, is just terminating for the season, and no sign of the prevailing epidemic is said to have appeared. The eggs produced in the garden by Japanese insects have succeeded much better than those imported from Japan this year. The cocoons are decidedly finer, which would seem to prove that the climate of France is peculiarly suited for these insects, though it must not be forgotten that the extreme care with which the breeding is conducted in the gardens may have been a part cause of this successful result. The importance of the fact, on the other hand, is increased by another, namely, that the French insects which were bred side by side with those of Japan and other varieties have not succeeded nearly so well as those derived from Japan. The produce of the season is now being wound off in the presence of the public, and we shall probably have some more definite information regarding the yield in a short time.

Matters seem decidedly improving at Lyons; a month ago the quantity of raw silk taken by the manufacturers was little more than a quarter of what was taken during the corresponding week of 1865, the price of cocoons was falling, and business was becoming worse every day—the stagnation seemed hopeless. But when things come to the worst they needs must mend, says the old proverb, which, in the present case, has proved true, for although the war still goes on and the hopes of immediate peace seem terribly deferred, the Lyons markets have recovered in an extraordinary manner. Prices have recovered themselves; the quantity of raw silk demanded last week was nearly double that of the same week last year, and some manufactured articles have risen more than once in price. Lyons exhibits a decided tendency towards improvement, and a further improvement is predicted for the present week. The truth may be that the manufacturers and merchants could hold out no longer, and are determined to try and create activity. Another hypothesis may be risked, namely, that the difficulties of Austria and Italy may turn to the advantage of the French silk trade. There is, they say, no evil without its compensation.

Naval and Military.

The Renown, East Indiaman, has been chartered by the Hon. Council of India for the conveyance of the following troops to Bombay, viz.: 4 officers and 27 men of the 11th Hussars; 2 officers and 136 non-commissioned officers and men of the Royal Artillery; 3 officers and 61 non-commissioned officers and men of the 1st batt. King's Own Royals; 2 officers and 45 men of the 26th Cameronians; 26 men of the 49th Regiment, and 2 officers and 119 men of all ranks of the 96th Regiment. The following troops have embarked on the troopship Rajah of Cochin, for conveyance to Kurrachee, 57 non-commissioned officers and men of the 95th Regiment, and 84 men of all ranks of the 3rd battalion Rifle brigade, together with 2 officers' wives, 20 soldiers' wives, and 5 children.

The regimental returns of target practice at Aldershott just issued show figures of merit of battalions and companies, the marksmen per cent., and the number of points obtained by the best shots in the division. The 52nd Regiment stands first, the battalion figure of merit being 98·70, best company, 120·48; marksmen per cent., 6·28. The second in order of merit is the 66th Regiment—battalion 94·15, best company 100·84 marksmen per cent. 5·71.

Tenders are invited for the conveyance of about 79 men and 4 officers for Colombo. These are intended to replace time-expired and sick troops now on the station.

His Swedish Majesty's sailing corvette Chapman, 24, Capt. A. Herkepe, from the Western Islands July 4, bound for Gottenburg, arrived in Plymouth Sound on the 23rd for supplies.

The Cruiser, 5, unarmoured screw sloop, has been commissioned at Portsmouth by Commander E. Field, for service on the Australian station.

The court martial at Portsmouth upon the captain and officers of Her Majesty's ship Amazon (for sinking the Osprey, as reported in our last) was concluded on the 21st. Commander Hunter was honourably acquitted, and the President returned him his sword in the most complimentary manner. The Court ascribed the collision to a grave error of judgment on the part of Sub-Lieutenant Loveridge, the officer of the watch, in having the helm put to starboard and not to port, according to the regulations, and sentenced that officer to be dismissed the service, at the same time recommending him to mercy. The exertions of the officers and crew to save life after the collision were the subject of warm panegyric on the part of the Court.

The new Lords of the Admiralty are working most industriously, and we believe that before the present session of Parliament closes the House of Commons will be called upon to vote money to enable their lordships to commence the construction of at least four additional iron turret-ships, of not less than 4,000 tons each.

The Secretary of State for India will announce in a few days the steps to be taken with respect to the long-pending question of the grievances of the officers of the old Indian army. Lord Cranborne, we believe it will be found, has adopted the views of his predecessor.

CELESTIAL BUTTONS.

(PALL MALL GAZETTE.)

When the Chinese Mission, which has now left for the Continent, was in the House of Commons—not on the day which the papers erroneously mentioned, but on that when Mr. Mill, a sort of minor Mencius, complimented the Tory squires on their justifiable ignorance of his books,—Pin, the head of it, remarked, regarding some member who was speaking with more energy and vehemence than usual, "But is he speaking sense?" It is quite evident that no one but a stranger to our public logomachies would ever have thought of putting such a question, or of imagining that sense was at all necessary in the House; but a suspicion of the truth seems to have come across Ta-Jin's mind. And it may be noted generally that, though they said very little on the subject, the impression left by our material civilisation on the minds of the members of the mission was by no means one of overwhelming admiration. In so short a space of time brought in contact with so much that was imposing, magnificent, and to them new, it might have been expected that they would succumb; but they did not. Was this simply Chinese impassive pride—the spirit of the Cantonese, who, when a steamer was first pointed out to him by an exultant foreigner, said, "Hab got allo same up Peking;" or was it the insight of intelligent men? It would be difficult to say, even if we had perusal of the notes which Pin took every night, and in which he probably recorded only the outward appearance of what he had seen. Few people are content with things as they are, and a rumour has risen lately that this elderly and long-headed mandarin is something more than he assumes—is no less than a brother of the late Emperor Hienfung! It unfortunately happens for this pleasing theory that Pin is very well known to foreigners in China, and has long been associated with the Maritime Customs. There is a "Red Book" published periodically at Peking, giving the rank and occupations of the officials that we loosely call "Mandarins," a word not of Chinese origin, but from the Portuguese *mandar*, "to command," and, as we use it, having no proper equivalent in Chinese. In this Red Book Pin appears as a mandarin of the third class, and he wears a transparent blue button as the insignia of that class. There is another division into literary, civil, and military mandarins; but as regards rank the arrangement is into nine classes, of which the first two have red buttons of different descriptions, the next two blue ones, and the remainder glass or gilt ones. Of the lowest class of all there is a subdivision who bear the title of "not yet entered the stream." If we applied this system to England it may be roughly said that the Premier, the Lord Chancellor, and the Foreign Secretary would be found wearing ruby buttons of the first Class, the other Cabinet Ministers would have red coral ones, and on the caps of the Under Secretaries of State would be seen sapphires like that borne by Pin. The title Ta-Jin, which the head of the Mission bears, and which has generally been mistaken for a portion of his name, literally means "great man," and is best, but still very inadequately translated by "your excellency."

The mission has had every opportunity of seeing things in this country, and now on the Continent it may, if so disposed, have some estimate of the enormous armaments which European nations can bring into the field—armaments which, compared with anything that China can now produce, or is likely to produce for a couple of centuries, are as the power of a tiger before that of a kitten. But the Chinese have now no need to be practically instructed in the force of England or of any other great country. They, that is the Government, know also that their true security lies in our sense of justice, and still more in the fact that all our interests are opposed to attacking them without just and cogent cause. When one of the Japanese Ministers was witnessing a review of troops here he was heard to exclaim, "It is a long way to Yokohama," being probably mentally engaged in balancing the length of the way against the efficiency of the troops. So, in like manner, the Chinese know that it is a long way from here to Peking. Their real danger is from Russia, whose Siberian domains impinge upon their territory, and who has already taken such large slices from the northern frontier of the Celestial Empire. But if the Chinese do not require

Digitized by Google

instruction in these matters, will this mission accomplish no good? That it will not effect anything in making the Chinese less Chinese and more English we deem certain. Even in the most favourable circumstances their contact with foreigners has had no effect upon them, except perhaps in abating their contempt for us; and this is very doubtful, for much on which we pride ourselves they regard as no better than the civilization of the London cabby who inquired of the missionary regardi the Chinese, "Are they a civilised like people, sir? do they take their gin of a morning?" The real question is whether this mission will be followed by a more formal one, and then by one to be permanently settled in London. Of this we should say there is little doubt.

HOLLAND.

FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, JULY 17.

Again a week has elapsed without our Parliament being called together; our home politics have come to an extraordinary standstill. The leading papers are occupied in discussing the probable duration of the existing Cabinet, and their conjectural comments go so far as to predict that the Minister for the Home-Department, Mr. Heemskerk, will resign, as a concession to the anti-revolutionary party. I need not say that this hypothesis springs from the dearth of news, but as it is very probable that this unfounded rumour will reach Java, it is necessary to contradict it.

The King has again started for his seat "*Het Loo*," but now without the Royal family.

Vice-Admiral May died suddenly on his way from Wiesbaden to the Hague. It is not possible that this vacant place will soon be filled, because a general promotion will take place amongst our naval officers.

ROTTERDAM, JULY 24.

We learn that at last the Second Chamber of the States General is to meet on the 1st of August, when the East India budget will be at once discussed. It is not probable that the House will have any other Bill submitted to their consideration, and it is generally thought the session will be closed about the middle of the month and the new session be opened, as usual, on the first Monday in September. Again it has been widely rumoured that a difference exists between the Minister of the Colonies, Mr. Myer, and Mr. Heemskerk, who remains at the head of the Home Department. The Liberal papers are apparently of opinion that a ministerial crisis will ensue, and that Mr. Heemskerk—who represents the Liberal element in this Cabinet—will be sacrificed to the anti-revolutionary or orthodox party. Nothing, however, can be yet said with any authority in reference to this rumour.

The question whether our Government is of opinion that the German Diet is dissolved by the existing war between Austria and Prussia still preoccupies our papers. According to the *Handelsblad* our representative at Frankfort has declared that he will not follow the Diet to Augsburg, but that it was not to be concluded from this refusal that his Government was of opinion that the Diet was dissolved. Our official paper, the *Staats Courant*, declared that this statement had no foundation. I need not say that it would have been better for our Government to have published the declaration made by our representative, instead of now making known what was *not* said. The greatest uncertainty exists on this important question.

The Minister of the Home Department has taken the excellent resolution of reducing the price of the parliamentary reports to six florins per annum. At the same time he has ordered that official documents, laws, reports, appointments, &c., may be published by the press upon unstamped paper. We hope that this will be a first step towards the press being free of the stamp duty, which, without any doubt, is a tax upon intelligence.

According to the *Staats Courant* a protocol was signed on the 4th of July at Paris, by the representatives of the Netherlands, England, and Belgium, by which the term fixed by Art. 3 of the International Regulations for the sugar duties was prolonged for three months.

Your readers in India will remember how much sensation was created, both here and in our colonies, when Money's book, "How to Manage a Colony," was published. This was chiefly caused by the figures exhibiting the revenues and expenditure in India, which were furnished to him by our Government, and which showed an unfavourable difference of 114,500,000 guilders, when compared with the amount returned here. Of course the Liberal party accused the Conservative Government, and our Tories endeavoured in vain to clear themselves of this impeachment. Mr. Myer at once interrogated Mr. Fransen van de Putte on this question, and asked him if he had not found *les pieces justificatives*, but all the Minister of the Colonies answered was—"Please, come yourselves into my department and seek what you wish to find; I have sought, but I cannot find them!" Mr. Myer, who has succeeded Mr. Fransen van de Putte, has sought, and seems to have found, what he wanted. He has laid before the House a cartload of parliamentary papers to justify the former Conservative Administration.

Messrs. J. L. Kuinders and C. Otshoorn, the well-known architects, who built the Crystal Palace at Amsterdam, have now asked for the concession for building a principal street in the capital besides a *cite ouvriere*. This street, ,225 yards in length and 20 yards broad, will run from the centre (*de dam*) to the extreme end of the town (*de plantaadje*). The cost of the street, which will be for Amsterdam what Regent-street is to London, Rue de Rivoli to Paris, and the Prater to Vienna, will amount to 4,541,000 florins. The capital wanted will be at once furnished by one of our most influential financial establishments. It is generally understood that the concession will be speedily granted.

Our corn merchants are trying energetically to effect a modification in the system of that trade. Till now corn has been sold by measure, but it is proposed that henceforward the sale shall be by weight. I have reason to believe that this modification will take effect. Likewise our swornbrokers will disappear sooner or later. The Council of Rotterdam has sent in an address to the Government urging that our Commercial Code must be modified, so that the broker's business is to be open to free competition, and that the appointment of swornbrokers by the town councils gives no security at all to trade. The Chambers of Commerce are inclined to favour both alterations.

The National Exhibition, which is opened in the Crystal Palace at Amsterdam, suffers much from the present sanitary and monetary condition of the country. A financial crisis still prevails, though not so seriously, and trade is somewhat revived. Our sanitary condition, however, becomes daily worse, and the cholera has attacked nearly every community throughout the country. Fifty-five to sixty per cent. of the cases still prove fatal. Unwholesome water for drinking and culinary use is considered to be one cause of the epidemic, and therefore our Government has appointed a Royal Commission to examine the water used for drinking in different places, and to propose measures for providing an unobjectionable supply of that great necessary of life. It is more than probable that extensive waterworks will be constructed by the Government, since private exertions have not proved successful in this respect. Both at the Hague and Rotterdam endeavours to construct reservoirs, as private undertakings, failed.

His Majesty is still at his seat "*het* Loo," where he makes, in company of some officers, experiments with breech-loaders. The press energetically insists that our army must be provided without delay with this gun.

Mr. J. F. Happenbrouwers, the well-known *peintre artist*, died suddenly at the Hague, aged 47.

His Majesty's screw steamers, *Leeuwarden* and *Java*, have been ordered to start for the East Indies on the 16th of August.

COMMERCIAL.

COFFEE.—The market has become very firm since our last report; there is much inquiry and the stock of the Trading Company is strongly decreasing. Some days ago an advance of ½c. to 1c. was offered for 27,000 b. of the Trading Company, but the offer was declined. The managers have now taken the resolution to sell nothing privately. The private transactions include 6,000 b. Padang, ex Helena, at 43c.; 1,000 b. Java, ex Quintet, at 41c.; 350 cases and 100 b. Plantation Ceylon, at different prices.

SUGAR.—Raw, in waiting for the auction of to-morrow the market remained in a very firm condition. There was only a little doing in refined, because refiners prefer to wait upon the result of the auction.

RICE.—The market has been very active and a good business doing, comprising 8,500 b. Necranzie, ex Diana; 8,800 b. Bassein, ex Johannes, at 6¼f.; 11,000 b. Rangoon, ex Kinderdyk, at 6¾f.

SPICES.—The market has been so inactive that quotations are rather nominal.

TOBACCO.—Java leaves without transactions. Stock, 12,937 bales.

JAVA INDIGO.—With much demand, and a good business doing at firm prices. 70 chests were sold privately.

BANCA TIN.—600 slabs were sold at 46¼f., and 800 slabs at 46f.

COTTON.—1,000 b. E.I. were sold at firm prices; the market closes, however, flatter.

HIDES.—3,620 p. Buffalo ex Advance were sold at Amsterdam at 30 cents., in average. Holders now decline to operate without an advance. To-morrow are to be sold by inscription 2,865 p. E.I. Buffalo cornes, ex Helena, and on the 25th 1,000 p. Java Rinderhides, ex Cornelia Adolphina.

STOCK AND MONEY MARKET.—The market has been for the last few days totally under the impression of the steps which had been taken to bring about an armistice between Prussia and Austria. When this news, however, was known, there was a little hesitation, while it was found that sellers were very willing to come forward upon the much improved prices. The market closed, however, firmly. Dutch Two-and-a-Half per Cents., 57⅜; Three per Cents., 67⅝; Four per Cents., 88½; Trading Company, 135½; Dutch Rhenish Railway (shares), 282; Austria Five per Cents., 46¾; ditto Amsterdam, 63½; ditto 1864 (silver), 51⅜; Nation, 48⅝.

Money abundant, and at 1 per cent. under Bank rate large sums were offered.

CHANGE.—London, 3 mo., f. 11.46; 2 mo., f. 11.54; short, f. 11.70. Paris, 3 mo., f. 45.75; 2 mo., f. 45.90; short, f. 46.50. Hambro, 3 mo., f. 34.40; 2 mo., f. 34.60; short, f. 35.15. Bremen, 3 mo., f. 186. Bordeaux, 2 mo., f. 54¾.

SHIPPING.—ARRIVALS.—July 19, at Flushing from Java, Emanuel.

The Trading Company chartered the following thirteen ships to convey produce from Java to the following ports.—For Rotterdam: Karel August, Capt. P. Meermans; Singapore, J. P. Stoop; Nereus, H. F. Planten; Krimpenerwaard, H. P. Kluit; Catharina Jacoba Henriette, C. J. Tonjes. —For Amsterdam: Catharina, Capt. S. Visman; Astrea, J. Koorders; Vice-Admiral May, N. M. O. de Groot Stiffry; Macasser, P. Vitringa Coulon; Sirius, W. van Wijngaarden van Rees Nederland and Oranje, P.

Digitized by Google

Haesnoot; Baron van Pallandt van Roosendaal, W. S. Kramers.—For Dordrecht: Grootmeester Nationaal, Capt. A. F. Giesse.

DEPARTURES.—July 16, from Brouwershaven for Batavia: Kosmopoliet I.; July 17, from Texel for Batavia: Vice-Admiraal May; Constance, via Newsdort, for Singapore; from Hellevaet for Singapore (via Newcastle): Abblasserwaard; for Hong Kong (via Newcastle): Voorwaarts.

PASSENGERS OUTWARD.

For Java: per Vice-Admiraal May: Mr. G. T. Koornengel and family; R. Steenmeyer and family; Messrs. A. C. Baay, J. F. Sandicky, O. W. Seket, W. de Lanoy, Miss A. S. Sinken. Per Samarang: Mr. Bezoet de Bie.

THE HANSEATIC TOWNS.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, July 23.

About twenty years ago the merchants and shipowners of Bremen found that the Weser was silting up so fast that vessels of large tonnage were no longer able to come up to that city without discharging a great portion of their cargo into lighters, an operation accompanied by considerable risk, delay, and expense. They therefore entered into negotiations with the late King of Hanover, and succeeded in persuading him to cede to them a small strip of useless marshy land on the right bank of the Weser, and about thirty miles lower down, on which to found a dock and warehouses for the accommodation of the trade and shipping of the port. This is the origin of Bremerhaven, which has become a great success, and has grown into a lively and flourishing seaport with about ten thousand inhabitants, and of the utmost importance for Bremen, where the larger class of vessels trading with Transatlantic countries can discharge and load their cargoes with perfect safety, in a capacious floating dock, with plenty of water outside in the river, and approachable at all times of the tide for ships of even 3,000 tons.

On witnessing the unparalleled quick development of Bremerhaven Hanover appears to have repented of the bargain when too late; but in order to make up in some degree for her mistake in ceding this bit of land to Bremen, she determined at all events to enter into competition by the foundation of a similar port with even still greater facilities. This has been carried into effect by the Hanoverian Government at an enormous expense, the floating dock covering an area of more than a hundred acres, the dock gates being 74ft. wide, and consequently able to admit any ship afloat, except perhaps the *Great Eastern*, whilst the basin itself is surrounded by noble quays, with massive warehouses and cellarage of great extent. A little river, called the Geeste, falls into the Weser, and forms the southern frontier of Bremerhaven; whilst the new establishment—called Geestemunde, or the mouth of the Geeste—is placed on the opposite or south side of that river, but on the same side of the Weser, and therefore nearer to Bremen. To encourage and facilitate the communication with the new pet port, Hanover further constructed a railway from Bremen to Geestemunde, which stopped there; and it was only after tedious negotiations and a delay of many years that Bremen was enabled to obtain a concession from Hanover, under very onerous and disadvantageous conditions, to build a railway bridge over the Geeste, at a considerable distance from its mouth, and lay down an extension line to Bremerhaven, the works being constructed at the sole expense of Bremen, but a certain part of the revenue derived to be paid over to Hanover.

But now Hanover's dreams of ruining her rival and drawing all the trade of the Weser to Geestemunde are suddenly and unpleasantly dispelled by the greedy rapaciousness of Prussia; for as the works in question were all made by the Hanoverian Government, and that kingdom has been conquered by Prussia, that latter Power has declared it to be Prussian State property and an admirable spot for the establishment of a naval port and arsenal, all ready made and to hand, without waiting any long years for its construction. Your readers are no doubt aware that Prussia has long coveted a naval port on the North Sea, and some years ago actually bought for that purpose a couple of square miles of unfathomable mud on the coast from the Grand Duke of Oldenburg, where ever since she has been spending annually a couple of millions of dollars with the vain intention of making it into a naval port. Prussia must therefore secretly or openly exult in the lucky chance that threw this ready-made harbour and port of Geestemunde into her hands. To make it all doubly safe a treaty has been concluded with the Provisional Government of Hanover for the cession of the place in due form, and since my last letter commissioners of the two Governments have been sent down to Geestemunde for the formal transfer of the property, which ended by hauling down the Hanoverian flag and hoisting the Prussian eagle.

The Hamburg Contingent is now mobilised, and, after being inspected by the authorities of the Military Department, left this city yesterday by special train for Cassel, whence they will be forwarded to Frankfort, which is now in the hands of the Prussians, the Rump Diet having retired for the present to Augsburg.

Mr. G. H. Siemssen, the eminent China merchant of this city, has been appointed member of the Finance Department by the combined election on the part of the Senate and the Burgerschaft.

COMMERCIAL.

COFFEE.—There is a decided improvement in this market, the prices being firmer with more demand. Sales 12,000 bags.

SUGAR.—Raw is in a rather better position as there is more inquiry, though prices continue still deplorably low. Refined also in more demand, but as the stock of ready goods is so low, the sales were confined to 12,000 loaves.

RICE.—No great alteration to report. Clean commands an easy sale at full values. Some parcels of rough have been sold, amongst which were 9,000 bags of Ballam and Madras, ex Venus, from Chittagong, and 2,000 bags of Rangoon, ex Conrad.

SPICES.—All descriptions neglected; prices nominal, but looking down.

SPELTER.—The low prices have attracted speculators, and the market is firmer in consequence. The following sales are reported:—

3,000	centners	for August, ...	13	marks	12	sch. bco.
2,000	„	September ..	13	„	12	„
2,000	„	in loco	13	„	9	„
2,000	„	August and Sept.	13	„	9	„
2,000	„	do.	13	„	12	„
5,000	„	do.	13	„	13	„
2,000	„	Sept. and Oct. ..	13	„	15	„

The present quotations are 13.12 for loco and 14 marks for forward delivery.

DISCOUNT.—As money is now so abundant, discount has gone down to 5 per cent., and even lower. In consequence of the armistice and probable conclusion of the war the stock market is very buoyant and all descriptions of funds and railway shares are considerably higher.

SHIPPING.—SAILED.—July 19, Penguin, to Singapore.

THE INDIAN BUDGET.

(THE TIMES.)

Lord Cranborne, the new Secretary of State for India, introduced the Indian Finance Statement on the 19th inst. The past year produced a small surplus, instead of the deficiency which had been anticipated. The gross revenue for the year 1865-6 was £47,041,000, and the gross expenditure £47,021,000. These sums show a surplus of £20,000, which is no doubt small enough, but is better than the deficiency calculated in the previous year. It must be remembered, also, that these figures are not to be accepted as absolutely conclusive; they are, as Lord Cranborne said yesterday, partly fact and partly estimate, and the final statement next year may be expected, like its predecessors, to show a somewhat larger balance than the present corrected estimates. As it is, however, 1865-6 is very much better than 1864-5, which has finally ended in a deficiency of £193,000 instead of an estimated surplus of £823,000. The variation between estimate and result, which in 1864-5 was more than a million to the disadvantage of the Indian Exchequer, and in 1865-6 was almost the same sum on the other side, was in each case attributable to the fluctuations in the opium revenue. Mr. Laing seems to be of opinion that such fluctuations are accidental, and that the revenue from opium can be relied upon as much as our spirit duties, but the comparison is not quite exact. The opium revenue is more like the excise duty on malt, varying, as that does, not only with variations of demand for intoxicating materials, but with the more rapid variations of seasons and of harvest. Opium continues to be consumed as much as beer, but a bad crop of the opium plant affects the revenue like a bad barley harvest. The fluctuations in the last two years are, however, to be attributed in part to some experiments made by Sir Charles Trevelyan on the effect of reducing the acreage under cultivation which are not likely to be repeated. In 1865 the opium revenue was £8,638,000, against £7,361,000 in the previous year. The good success of last year seems to have emboldened Mr. Massey to face another twelvemonth with an estimated deficiency. The total revenue of 1866-7 is calculated at £47,321,000, and the total expenditure at £47,393,800; but, as the opium revenue is taken at nearly the same as the produce of 1865 6—an amount almost, if not quite, unexampled in the previous financial history of India—it would be rash to assume that the deficiency of £72,800 will be converted into a surplus as the year progresses. The land and forest revenue is estimated at £20,668,000,—an increase of £188,000 on the amount received in 1865-6, which was itself a gain of £41,000 on the preceding year. The land revenue is thus rising, but very slowly, and the slowness of its increase is the characteristic of Indian Finance which ought to excite the greatest attention. It forms nearly one-half of the whole revenue, and upon it depends the stability of the Indian Exchequer. It is obtained entirely from the rent of land, and while the rise of prices in India compels the Government to increase the scale of its expenditure, the land or rent revenue, which ought to correspond most sensitively to the rise of prices, is nearly stationary. It has barely risen in the recent years of India's prosperity, and we may not unreasonably anticipate some decline in the future. The Custom's revenue is estimated at £2,413,000—an increase of £29,000 on 1865-6, In 1858-9, before Mr. Wilson went to India, the Customs' duties were 5 per cent. *ad valorem*, and their produce was £1,987,417; in 1865-6 they were 7½ per cent., and the produce £2,384,000. An increase in duties to the extent of 50 per cent. has produced an increase of revenue of only 14 per cent., and Lord Cranborne draws the deduction that a financier cannot in India rely, as in England, upon the elasticity of the Customs' revenue. The true conclusion is, however, exactly the other way, and the increase of revenue lagging behind the increase in the rate of duty of India teaches the same lesson that a diminution of revenue less in pro-

Digitized by Google

portion than the diminution in the rate of duty does on England. The figures Lord Cranborne quotes prove that there is the same elasticity in Customs' revenue in the one country as in the other, and that it would be expedient at the first opportunity to reduce the existing Customs' Duties. The most satisfactory item in the Indian receipts is the sum accruing from public works, which last year amounted to £1,016,000, against £588,000 in 1864-5—an increase which is expected to be maintained in the current twelve months.

The revenue from public works is the best justification of the large sums annually spent upon them, which are estimated to amount in 1866-7 to £6,395,000. Out of this total Lord Cranborne believes that £5,000,000 may be set down as capital expenditure, the rest being absorbed in repairs and maintenance of existing works. This sum is a much larger proportion of rental, as Lord Cranborne says, than any English landlord would deem it necessary to lay out on the improvement of his estate; but the analogy between an English landlord and the English Government in India is very imperfect. The improvements which are required in the Peninsula are colossal works of irrigation and road-making which no individual tenants could attempt, and the Government assumes the burden of these not only as the supreme landlord, but as the representative of the joint-stock enterprise of the community. It is satisfactory to find that our outlay is not always unproductive. In spite of the criticisms of Mr. Smollett, there is the best reason for believing in the remunerative character of the irrigation works executed in the Madras Presidency, and the utility of the expenditure on railways is shown by the fact that, though still incomplete and undeveloped, the balance of guaranteed interest over profit has fallen in one year from more than a million to £533,300. We may hope that there will soon be a sufficient surplus of profit to repay past arrears of interest.

Past experience would justify the adoption of the advice given by Mr. Laing last night, and endorsed by later speakers, to increase the amount spent on public works in India, large as it is at present, if we did not remember that the same man who would be called upon to bear the burden of the expenditure could not be insured his share when it became remunerative. The first duty of an Indian financier at present is not so much to devise ways of expending money as juster ways of obtaining it. The bulk of the revenue is derived from the land tax, opium, the Customs, Excise, and the salt duties. The land tax being, in fact, the rent of land, presses unequally upon no class, but all the other branches of revenue are fed by contributions taken from the poorest ryot, out of all proportion to his means, and the richer classes in India almost escape their share of the common burden. It is impossible not to see the impropriety of maintaining a fiscal system so unequal in its incidence, and the precipitation of Sir Charles Trevelyan in abandoning the income-tax, becomes every year more deplorable. The tax was far from perfect—indeed, it was more imperfect in India than it is here—but it did extract some contributions, however small, from the wealthier natives, and it was incumbent on any one who abolished it to provide some engine of taxation securing the same results in a manner open to less objection. If Lord Cranborne desires to make the administration he has begun with such fair promise beneficial in a lasting way to the interests of India he will attempt to retrieve the error of Sir Charles Trevelyan by revising the system of Indian taxation.

Customs and stamps yield far below Mr. Massey's estimate, which was not high, while at the last sale opium fetched only £125 a chest, or £25 less than last month, and £5 below Mr. Massey's estimate of £130 a chest. This looks ill for the next Budget. The cash balances at the end of March amounted to £14,461,351, or nearly two millions more than on the same date last year.

EAST INDIA RAILWAYS.—The annual report of Mr. Juland Danvers, the Government director of Indian Railways, has just been issued. From this it appears that the length of line open was increased during the past twelve months from 2,945 to 3,332 miles by the addition of 116 miles to the Great Indian Peninsula Railway, 40 to the Madras, and 24½ to the East Indian, and the opening of the Punjab line between Lahore and Mooltan, 208 miles. The year will be memorable in the railway history of India as that in which an uninterrupted traffic was first established betwen Calcutta and Delhi—a distance of 1,020 miles, which can now be traversed in thirty-seven hours, and which only ten years ago usually occupied as many days. The communication between Calcutta and Bombay and between Bombay and Madras is not expected to be completed till about the beginning of 1869. Of the whole extent of 4,944 miles of railway authorised in India, 3,332, or about two-thirds, have been opened for traffic. Of these only about 250 are at present made with a double line, but the increase of business is such as to demand an immediate increase in the double system. The Chord Line of the East Indian Railway, connecting Burdwan and Luckieserai, has been let under contract to Messrs. Brassey, Wythes, and Perry. Its length from Barrakur, to which place the railway is now open, is 123 miles, and it is to be made with a double line of rails at once. There is also a branch of 24 miles to the coal fields, to be constructed with a single line. The contract price is about £8,500 per mile, exclusive of permanent way and rolling stock, which, with contingencies, will probably bring the cost to £14,000 a mile, or about £2,000,000 for the whole. The total number of shareholders in Indian railways is 32,109, of which 31,347 are in England, and only 762 in India. Thus, contrary to the expectations of the East India Company at the time when these enterprises were started, the Indian investors, native and European, amount only to about 2 per cent. of the whole. With regard to the persons employed on the lines, it may, it is said, be assumed that for some time to come the number of Europeans will increase with the increase of open lines and of traffic. Measures are, however, taken to train the natives and Indian born so as to become qualified for situations which hitherto have been filled almost exclusively by European mechanics. On the Great Indian Peninsula Railway two or three natives have already been employed as engine-drivers. Under the advice of Dr. Brinton, great care is taken not to send out any Europeans of intemperate habits. The total expenditure on Indian railways has been £60,645,000, and the estimated expenditure for the current year £6,800,000—a larger sum than for several years past. This is owing to the vigorous efforts now being made to complete the works on the lines in course of construction, and to the large supplies of locomotive engines and rolling stock required to equip the open lines. The balance now in the Government Treasury towards meeting this expenditure of £6,800,000 is only about £220,000. In addition to the amount required for this year's expenditure, the sum of £1,000,000, which the Government has been obliged to advance to some of the companies, will have to be raised during the year. The sum which it is now estimated will be expended on the undertakings as at present sanctioned is upwards of £81,000,000, being £4,000,000 in excess of last year's estimate. This is accounted for by the construction of a much larger extent of double line than was then expected to be necessary, by the additional length to certain lines, and by the greater number of engines, carriages, trucks, &c., required to equip the open lines, in order to provide for the rapidly increasing traffic.

SUPPLY OF GAS TO COLOMBO.—An advertisement has appeared in *The Times* that the Municipal Council of Colombo have given notice that they are prepared to entertain proposals, estimates, and tenders for lighting the town of Colombo with gas. The Municipality will guarantee a consumption of gas sufficient for the supply of six hundred street lamps, at the rate of thirty cubic feet each per night, in addition to such supply as may be necessary for public buildings. The population of the Municipality may be estimated at 55,000, and a highly remunerative field may be anticipated from private consumption. There are about thirty-three miles of streets. Proposals are to be addressed to Mr. J. Grenier the secretary of the Municipal Council, but no contract will be entered into before the 21st July.

APPOINTMENTS, &c.—Ceylon: Captain A. B. Fyers, R.E., to be surveyor-general for the island of Ceylon; Mr. J. Parsons to be acting principal collector of customs, vice Mr. Stephen, on leave to England; Mr. R. W. D. Moir, to be acting collector of Customs for the southern province, vice Mr. Halliley, on leave to England; Mr. F. C. Willisford to be acting landing surveyor at Colombo, vice Mr. Moir, promoted; the Rev. J. Watt to be colonial chaplain of the Scotch kirk at Kandy, vice the Rev. G. W. Sprott, resigned; and the Rev. J. Burnet to be acting colonial chaplain of St. Andrew's Church, Colombo, during the absence of the Rev. C. Merson. Penang: The Queen has approved of M. Alfred Hasche as Consul at Penang for his Majesty the King of Prussia.

PROPOSED LIGHTHOUSE ON THE BASSES ROCKS.—It is to be hoped that the Colonial-office will shortly give a favourable consideration to the proposal of Captain D. D. Graham to erect a lighthouse on Basses Rocks. Notwithstanding the impossibilities pleaded from time to time we have always believed the execution of the work possible and its postponement simply disgraceful. The wants of the India and China, no less than the Ceylon, trade necessitate a permanent erection. The Government of England has uniformly been distinguished by regard to maritime interests, and the past incompetence of engineers entrusted with the Basses job, the money already thrown into the sea, can be no justification for neglect of a really sound and practicable scheme for rendering more secure this portion of the highway of our Eastern commerce.

THE GREAT RUSSO-AMERICAN TELEGRAPH.—The following account from San Francisco shows the progress of this undertaking, but according to the progress of our own cable it will be rather behind-hand:—"The Western Union Telegraph Company's steamer *Wright* sailed on the 24th June for Petropaulowski and thence to Behrings Straits and points on the Russian and American coasts. Colonel Charles Bulkley, engineer in charge of the Russian Telegraph Expedition, sailed in the *Wright*, accompanied by Count P. Anassoff, Commissioner of the Russian Government to the Telegraph Company, and Thomas W. Knox, the author and journalist, and formerly connected with the press. Count Anassoff remains in Siberia to assist the telegraph enterprise, and will probably meet the Governor-General at the mouth of the Amoor river early in August. Colonel Knox will accompany him to the Amoor, and proceed thence overland to St. Petersburg. The company's barks *Clara Bell*, *Palmetto*, *Rogers*, and *Onward*, have all gone to their various points of destination. The *Golden Gate* and *Nightingale* will sail as soon as the material they are waiting for arrives.

THE FRENCH FLAG IN JAVA.—It may be remembered that about a year ago a Convention was concluded between France and Holland, by which the French flag was assimilated to the Dutch in the navigation of Java. The expectation in France is that this will greatly increase the share of the French in that intercourse. There is much room for improvement, for, according to an official return just issued, in the year 1862, out of 5,773 vessels of 804,195 tons which entered and left Java, the French flag only figured for 14 vessels and 6,102 tons; the value of the goods carried out and in by them being not more than 5,790,000f. (£231,000) out of a total of 376,943,000f. (more than £15,000,000). The share of England in the Java trade was, also, in 1862, though far more important than that of France, not what it might be made. It was in the entries and clearings 68 vessels of 36,606 tons, and in the value of goods 20,725,000f. (£829,000).

Monetary and Commercial.

A motion has been heard before Vice-Chancellor Wood, on the part of the Bank of Hindustan and other holders of bills of exchange drawn by the Bombay City Bank upon the Bank of London (both of which have stopped payment), asking that a receiver may be appointed to receive all moneys arising from the said bills and other securities, which would otherwise be received by the official liquidator of the Bank of London. The aggregate amount of such bills is about £280,000, of which somewhat less than £50,000 are in the hands of the Bank of Hindustan, and the remaining portion are held by the other plaintiffs. The motion was refused, on the ground that the interests of the creditors were already sufficiently protected, and there was therefore no reason to disturb the present arrangements. A report appeared in the daily papers which is

Digitized by Google

calculated to convey the entirely erroneous impression that the Bank of Hindustan is interested to the full extent of £280,000.

The liquidator of the Agra and Masterman's Bank has notified that all holders of bills drawn on the bank are to present the said bills for registration before the 15th Aug. preparatory to the payment of a first dividend. It is a great satisfaction to find that Mr. Cannan will so soon be able to pay a dividend. The only mitigation now to be afforded to the sufferers, is, that what they are to receive should be paid speedily.

The accounts from Calcutta by last mail give a painful account of the distress caused by the failure of the Agra Bank, and some writers have allowed their sympathies to run into most egregious charges against the directors. *The Times'* correspondent writes:—

"Great indignation is everywhere expressed at the unprincipled roguery which is said to have characterised the union of Masterman's Bank with the Agra, to which junction all the ruin is traced, and the clearest and fullest inquiry must be made to satisfy the hundreds who are wringing their hands over the calamity."

Now there is not a shadow of truth in this aspersion, and we can only conclude that it was originated in the moment of anger. There have been no such insinuations in London, or indeed of any kind, against the integrity of the directors and officers of the bank. They are heavier sufferers themselves, not having sold out their large holdings of shares when the panic commenced.

The shares of the India and China banks continue to be influenced by the news from India and China. Although the shares have recovered from the very low prices to which they were forced they continue very sensitive, owing to the prevailing opinion that large losses must be incurred until the trade is again settled. Oriental advanced to £49, but are now at £46.

The London Joint-Stock Bank (upon which the Chartered Mercantile Bank and the Asiatic draw) has held its meeting. The net profit realised during the half-year ending the 30th June amounts to £134,571, of which the sum of £108,000 is appropriated to the payment of the usual dividend, with a bonus of 11s. 3d. per share, being at the rate of 20 per cent. per annum on the paid-up capital, leaving an unappropriated balance of £26,571 to be carried forward to profit and loss new account. The guarantee fund, with the accrued interest, now amounts to £310,991.

The report of the directors of the City Bank (upon which the Chartered Bank of India, Australia, and China draws), states the gross profit for the half-year ending June last at £81,505 3s. 2d., including the amount brought forward from the previous account. The usual dividend of 6 per cent. per annum and a bonus of 6s. per share, equal together to 12 per cent. per annum, free of income tax, are recommended. It is announced that, owing to the depreciation of securities held in connection with estates in course of liquidation, some losses have been sustained, and that £19,961 16s. 2d. has been written off to meet them.

Telegrams are reported to be in the City announcing several failures in China, and exchange at Shanghai to be down to 5s. 10d. Also that three mercantile failures had taken place in Colombo. Advices have been received of the departure of the following vessels from Foochow with new teas:—*Fiery Cross*, *Ariel*, *Taeping*, *Taitsing*, and *Serica*.

The Northern Assam Tea Company have published a very elaborate report, showing the progress of the undertaking, which, on the whole, appears to be satisfactory. The tea gardens are being gradually developed, new properties have been acquired, and there is every expectation of highly favourable results. On the subject of calls, the following is an extract from the report:

"The directors regret that the calls on the B shares should have been so heavy and frequent of late, but the necessity that has existed for meeting the company's engagements has deprived the board of any option. A period of unprecedented financial pressure has materially deranged the monetary affairs of the company, which, in ordinary times, would have been carried out in a manner less onerous to the shareholders. Hitherto the factories have been supplied with the necessary funds by drafts upon the Calcutta agents, who have, under marginal credits, drawn upon the company in London at six months' sight; but, owing to the general derangement in financial affairs, especially in India, which has been greatly aggravated by the failure of the Agra and Masterman's Bank, such bills are for the present quite unsaleable, and the directors found themselves suddenly called on, not only to provide for their acceptances, but to supply funds to be remitted to India to carry on the company's operations, and save the season's crop of tea; also to avoid any attachment on the gardens, which might possibly have been granted should the manager's drafts on Calcutta be returned unpaid, and he left without funds to meet them. The directors also regret they are unable at present to render any abstract profit and loss account for the past year, in consequence of the non-arrival of the greater portion of the tea of season 1865. The board finds that, in common with all other tea companies, the great delay in getting the produce home prevents its realisation in time for the annual meeting in July the following year."

The biddings for £350,000 in bills on India took place on the 19th. The proportions allotted were, to Calcutta, £102,700; to Madras, £5,000; and to Bombay, £2,000. The minimum prices were, as before, 1s. 10d. on Calcutta and Madras, and 1s. 10¼d. on Bombay, at which rates allotments were made in full. These results show a further diminution in the demand for means of remittance to the East.

The amount of bullion by the P. and O. Company's steamer *Tanjore*, from Southampton on the 20th inst., was in gold, to Gibraltar, £1,000; in silver, to Madras, £240.

BANK AND MISCELLANEOUS SHARES.

MANCHESTER MARKETS.

The Circular of Sam Mendel of yesterday states:—For Yarns and goods higher prices are demanded, but not obtained to the full extent. Sales are on a small scale, more especially in sorts adapted for the Eastern markets; qualities suitable for China are offered freely, and at comparatively lower prices than lighter weights. Grey Shirtings, 7lb., 11s. 9d. to 12s.; 8¼ lbs., 14s. Cotton Yarn, Nos. 16-24, 1s. 7d. to 1s. 8d. Maddapollams, 5s. 6d.; Long Cloths, 14s. 6d.; T-Cloths, 9s.; White Spot Shirtings 15s. 6d.; do. Brocade do., 15s. 6d.; do. Damasks, 29s. 6d., nominal.

PRODUCE MARKETS.

TEA.—The chief feature has been the arrival of some new teas overland, comprising Kaisows, and Pak Ling Congous, and Oolongs, which were placed on the market, and the Kaisows, being second-class teas, found buyers at from 2s. 2d. to 2s. 5d. per lb., but the Pak Lings at present have not been sold, the importers holding for more than the buyers are willing to give. The Oolongs in half-chests were sold about 2s. 4d. per lb. In Congous business generally has been too limited to give details as usual; but prices for all kinds remain much as before. In fancy teas there has been but little done. Common to fair scented capers have sold to a moderate extent at former prices. Other kinds show no change. Orange Pekoes remain at about previous prices, with only a limited demand. In uncoloured Japans there is nothing to report. Green teas have been only saleable in small parcels to the trade, the export orders being interfered with by the Tariff Bill in New York and fluctuations in gold. Prices generally have ruled rather easier, but without any marked alteration. Indian Teas.—The public sales of the 17th inst. comprised 2,319 packages, of which 2,047 were sold. Prices ruled about 1d. to 2d. per lb. dearer for the finer qualities, there being more competition than at the few previous sales. The commoner kinds were difficult of sale. The public sales which commenced on the 24th have gone at about previous prices. Another account of the new tea sale is as follows:—On the 18th some 3,000 chests and half-chests, and 2,000 boxes of the new season's teas from Foochow (per French mail steamer) were placed on the market, the trade generally showed no great disposition to purchase, though two parcels were settled at 2s. 2d. and 2s. 2½d. the same night. The following days there was more competition, and prices ruled very irregularly, varying from 2s. 2d. to 2s. 5d. per lb. for the Kaisow sorts: four parcels of Pak Lings are still unsold, the merchant refusing the prices offered; 2s. 8d. was bid and refused for one break of boxes. Two parcels of Oolong sold at 2s. 3d. to 2s. 5d. per lb. The great characteristic of these teas is the strength and rough pungency in water, the leaf being uneven and broken. Judging from advices received from Foo-chow of the cost of this shipment the turnout must be very unsatisfactory to the importer; and we trust that it may be the cause of stopping this absurd practice of sending new teas per overland, as they arrive here when the country dealers hold plenty of old tea, and the trade generally is flat.

SILK.—The resumption of business in Silk, alluded to in our last Mail Circular, has been followed during the past fortnight by large transactions at advancing prices. Now that peace on the Continent appears a certainty, all hesitation on the part of buyers is laid aside, and orders come freely from most of the European places of consumption. In Italy the advance in Silk has been very great, showing plainly that the result of the crop there this season has quite disappointed expectations. The great question now is the probable supply from China and Japan; that the total export this season is likely to be in excess of that of last year, nobody seems to doubt, but it is a very general opinion that shipments will be retarded by the financial derangement likely to result from the recent money panic here, and this has helped to strengthen our market.

COTTON.—A slight advance in price was signalised on the 18th, which nearly every day has served to increase, so that in the London market on the 24th 320 bales Tinnivelly went at 10¼d. to 11d. fully fair to good fair. The closing quotations on that day were:—Tinnivelly, mid. fair, 9¼d.; fair, 10¼d.; good fair, 11d. The Liverpool market is likewise very firm, with prices hardening.

SUGAR.—This market has gone on advancing, and prices may be quoted 6d. to 1s. higher. On the 24th 200 bags Penang, brown to good yellow, went at 27s. 6d. to 33s.

COFFEE.—Prices rising, the market closing firm on the 20th, at an advance on Plantation of 2s., and on Native of 6d. to 1s. on the quotations of the 13th. Good supplies were brought forward on the 24th, and the whole sold readily at very firm, and in some cases at stiffer prices. In auction 319 cases and 5,143 bags sold: Malabar at 68s. to 69s.; Mysore, 82s. to 97s.; Coorg Mercara plantation, 77s. to 85s. 6d.; 499 casks 27 trcs. 17 brls. and 260 bags plantation Ceylon, fine ord. to low mid. brought 70s. to 75s.; mid. to good mid., 76s. to 82s.; and bold, 83s. to 86s.

RICE.—Difficult of sale, and prices less firm. 1,360 bags Bengal were bought in on the 20th at 13s. to 15s. for middling broken to good white.

HEMP (MANILA).—Dearer, in consequence of present extreme scarcity. Of 300 bales at auction, half sold at £44 per ton for good roping; privately limited trade up to £47 10s. for Sorsogon.

HORNS.—Firm for all sorts; auctions confined to 5 tons Ceylon Deer, sold at 56s. to 58s. per cwt. for 1¼ lb. average.

INDIA RUBBER.—Steady; 48 baskets Penang at auction sold at 1s. 9½d. per lb. for very fair, and 43 baskets Assam at 1s. 5d.

JAPAN WAX.—Continues quiet; 341 packages at auction all retired; there is inquiry, but present high value checks business.

OILS.—Anniseed: Very flat, and offering at less money: 20 cases at auction retired. Cassia held firmly, not much demand. Cinnamon: A single case sold at auction at 3s. per oz. for fair. Citronelle: Of 45 cases at auction half sold at 3½d. to 3¾d. per oz. Sales advertised. Lemon Grass: Abundant, and quiet; of 76 cases at auction very few sold at 1s. 1d. to 1s. 2d. per oz.

PEPPER.—Black: Is scarcely so depressed; of 1,721 bags Penang at auction two-thirds sold at 3d. to 3½d. per lb. 320 bags Tellicherry sold at 3⅞d. to 4d. Privately some little business has been accomplished at 3⅝d. cash Singapore and 3 1-16th Penang. White: Is ¼d. per lb. cheaper, and of 743 bags Singapore at auction one-fourth sold at 7d. per lb. for fair; 130 bags Penang retired.

SPICES.—Cloves: Steady; 234 bags Zanzibar at auction sold at 3⅛d. to 3¼d. per lb. for good. Mace: Quiet: 24 cases Singapore at auction retired. Nutmegs: Dull; 49 cases Penang at auction retired.

CARDAMOMS.—Continue quiet: of 16 bags Madras at auction, one-fourth sold at 4s. 9d. per lb. for good Aleppy, and 3s. 3d. middling lean; 23 bags Ceylon retired.

CAMPHOR.—In more demand, and sales to a tolerable extent effected in China at £5 15s. to £6 per cwt. landing weights, and £6 2s. 6d. reweights; £6 7s. 6d. to £6 10s. obtained for Japan to arrive.

CASSIA LIGNEA.—Very little business doing in Cassia Lignea, but upon fully former terms; nothing doing in Buds.

CINNAMON (CEYLON).—We quote 1st sort 1s. 11d. to 3s. per lb.; 2nd 1s. 8d. to 2s. 8d.; 3rd 1s. 7d. to 2s. 4d.; and 4th and Jungle 1s. 3d. to 1s. 9d. The Quarterly Sales will take place on Monday, the 30th instant.

COCOA-NUT-OIL.—Buyers of Ceylon at £44 cash, there being some little improvement in the demand.

DRUGS.—Cubebs: Cheaper; 146 bags at auction sold at 70s. 6d. per cwt. for fair quality, but stalky. Dragon's Blood: Dearer; of 34 cases at auction four-fifths sold; one case of extra fine block at £19 per cwt.; good to very good block at £9 5s. to £13 10s.; ordinary block at £5 to £5 7s. 6d. Galangal Root: Nothing doing. Rhubarb: Supply becoming a little more in unison with requirements, the previous starvation terms are no longer to be obtained; and of 128 cases at auction about one-third sold at 6s. to 8s. per lb. for middling to good, and 4s. 6d. wormy.

GUMS.—Benjamin: Very quiet; 58 cases Sumatra at auction, all retired; very little doing privately; no alteration in prices. Damar: Of 57 cases at auction, a few sold at 60s. per cwt. for very good picked. Gamboge: Very scarce; only 2 cases at auction, and but one sold at £19 5s. per cwt. for fair pipe.

GUTTA PERCHA.—Remains quiet, and lower prices have been accepted; 300 blocks sold at auction at 1s. 0½d. to 1s. 2d. per lb. for fine reboiled, and 7½ tons at 6d. per lb. for common.

SAGO.—Flat, and of 1,945 packages at auction half sold at 17s. 6d. for fair small, and 17s. to 18s. middling to fair large. Flour: Of 1,158 bags at auction half sold at 13s. 6d. to 14s. per cwt. for old Singapore, being 6d. per cwt. lower.

TERRA JAPONICA.—Cutch, Pegu: Steady, with limited business upon fully former terms. 360 boxes at auction retired. Gambier: In much demand; stock in few hands; fair business done at 21s. 6d. to 22s. per cwt., and very nearly as much money obtained for arrival. Cubes very scarce, and much inquired for.

MISCELLANEOUS.—Blacklead: Steady; and of 229 barrels at auction half sold at 13s. 6d. to 19s. per cwt. for middling to very good lump, and 9s. 9d. to 10s. dust. Ebony Wood: Inactive; 27 tons Ceylon and 14 tons Madras at auction retired. Galls: Turkey blue selling in retail at the advanced price of £5. 10s. per cwt. China and Japan quiet; 55 boxes of the latter at auction retired. Musk: Flat; 57 caddies Tonquin at auction retired. Rattans: Quiet and low; 2,912 bundles Rangoon at auction sold at 2s. 7d. to 2s. 8d. per 100. Star Anniseed: Quiet; 86 cases at auction retired. Sticklac, Siam: Remains very dull; only 10 cases at auction retired. Tortoise-shell: Only 2 cases Singapore at auction sold at 15s. per lb., being the previous value.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars £7 5s. to £7 10s.; nail rod, £8 10s. to £8 15s.; hoops, £9 12s. 6d. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 5s. to £6 10s.

STEEL.—Swedish keg, £15 15s.

COPPER.—Sheet and Sheathing, £86 to £88 per ton; yellow metal, 7½d. per lb.

TIN.—£81 to £85 for block; £82 to £86 for common bars. Tin plates, best charcoal, I.C., 32s. to 33s.

LEAD, &c.—English pig, W.B., £22 10s.: shot, patent, £23 10s. to £24; sheet, £21 5s.; spelter, £20 10s. to £21; zinc, English sheet, £29 to £30; quicksilver, £7.

The following is from the Circular of Messrs. French and Smith:—Everything continues very dull in this market. Iron: is very quiet for all descriptions. Copper: is very dull, and to-day the Smelters have declared a reduction of £5 per ton all round, but this scarcely brings the rate as low as the price at which sales had already been made. Tin: English in moderate demand. Foreign is unaltered. Banca, 80. Straits, 75 to 76, according to quality. Tin Plates: steady with a fair business. Lead: very quiet. Spelter: the German War keeps this metal fluctuating in price.

EXPORT OF BULLION TO CHINA &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

In outward freights we have only to report an advance in coal freights to the eastward, in consequence of vessels not being readily obtainable.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel. For Hong Kong: £43. For Galle: £35 10s. For Singapore: £33. For Shanghai: £53. For Saigon: £50. For Manila: £14. For Yokohama: £52. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2 2s. For Manila: £2. For Galle: £1 13s. For Singapore, £1 12s. 6d. For Yokohama: £2 8s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Batavia: £1 12s. 6d. For the Philippine Islands: £2 2s. 6d.

The Admiralty have accepted the Shun Lee for the conveyance of stores to Hong Kong, and have invited tenders for the conveyance of about 80 soldiers from Liverpool to Colombo, and for 15 tons measurement naval stores from the River Thames to Hong Kong.

CASUALTIES.

The Cuban, English ship, from Ceylon to London, was spoken June 4 in lat. 29½ S., lon. 11 E., out 58 days, with fore and mainmasts sprung while off the Cape.

During the night of the 16th July the greater part of the main deck and some portions of the poop and forecastle decks were washed out of the Golconda, bound from Singapore to London, which vessel went on shore on the Pan Sand, near Whitstable, 4th July; the masts still remaining standing, the greater part of the cargo has been saved and conveyed to the Victoria Docks, the remainder will have to be got out by divers.

MISCELLANEOUS.

At ASCENSION.—May 26, Peep o'Day, Johnson, from Canton, and sailed for New York, June 1; Boni, Muller, from Batavia, and sailed 2, for Rotterdam.

Off ASCENSION.—June 17, Como, from Shanghai for London.

At ST. HELENA.—May 23, Marinus, Irving, from Sourabaya, and sailed for Rotterdam; 25, Queen Bee, White, from Colombo; 26, Marten van Rossem, Gerrebrands, from Tjilatjap, and sailed 29 for Rotterdam; 27, Louise Collet, Pimont, from Singapore, and sailed 29 for Bordeaux. June 1, Attagracia, Landa, from Macao, and sailed for Havana; Nina, Peters, from Manila, and sailed 2 for Cadiz; 2, Jane Symons, Burnard, from Colombo, and sailed for London; Orissa, Henderson, from Colombo, and sailed 3 for London; 4, Hoek v. Holland, Bakker, from Batavia, and sailed 6 for Amsterdam; 8, Medea, v. Teutern, from Banjoewangie, and sailed 8 for Rotterdam; 9, Cervantes, Aguirre, from Manila, and sailed 9 for Cadiz: 12, Resolute, Holt, from Shanghai, and sailed for New York; 16, Katinka, Greig, from Bangkok, and sailed 18 for Falmouth; 17, Fort Regent, Geyt, from Hong Kong; 18, Thomas Dryden, Brown, from Nagasaki, and sailed 19 for St. Thomas; J. A. U., Soltura, from Macao, and sailed 20 for Havana; 19, Valadora, Villabaso, from Manila, and sailed for Liverpool; Eva Johanna, Hordyk, from Batavia, and sailed for Rotterdam.

At ST. HELENA.—Her Majesty, Seymour, from Manila, and sailed 20 for London; Johannes Loderwyk v. Delft, from Padang, and sailed 20 for Rotterdam; 21, Minister v. Hall, Haas, from Banjoewangie.

At ALGOA BAY.—June 8, Fortuna, Loftus, from Singapore for Liverpool, put in for water; Herald, Storey, from Shields for Hong Kong, with master seriously ill.

At BAHIA.—June 12, frigate Bird, Weeks, from Liverpool, and sailed 15 for Galle; 14, Majestic, Robertson, from the Clyde, and sailed 17 for Batavia.

LAUNCH OF THE SHUN LEE.—A fine ship named the Shun Lee, built on the composite principle, but differing materially from any other vessel afloat, was launched from Lavender Dry-dock, Rotherhithe. Her length between perpendiculars is 155 feet; breadth, extreme, 31 feet 6 inches; depth of hold, 19 feet 2 inches; and register tonnage, 650 tons. She has been built by Mr. Walker, her owner, under the entire supervision of Mr. B. Waymouth, surveyor of Lloyd's; classed A 1 fourteen years, and is one of a fleet which the firm intend to build for the China trade. The frame of the ship is of double-angle iron, diagonally trussed, with extra angle and bulb iron stringers worked longitudinally on frames right fore and aft. The vessel is entirely planked with teak. The bottom double to under side of wales; the inner bottom being fastened to the frames with galvanized iron bolts, and the outer bottom being worked diagonally, and fastening to the inner bottom with pure copper bolts. A numerous and fashionable company were present to witness the ceremony, and the wife of Captain J. Milbank, the Commander, performed the ceremony of naming her Shun Lee. The vessel loads for Hong Kong, and takes out Government stores.

The steamer Agamemnon, despatched from Liverpool to China, by Mr. Alfred Holt on the 19th April, arrived out at Singapore on the 19th June, having called at Mauritius and Penang *en route*. This is a very satisfactory passage, and augurs well for this new line of large carrying screws.

EXTRACT from a letter addressed by Surgeon WOODWARD, of H.M.'s 2nd 20th Regiment, to the Commandant of the Hong Kong Garrison, and dated "Hong Kong, April 28, 1866":—

"Having in a letter addressed to Colonel Browne, Commandant of Yokohama, dated 24th February, 1866, made certain charges against the Rev. Mr. Bailey, officiating military chaplain of the garrison, imputing to the Rev. Mr. Bailey conduct most improper and unbecoming the character of a clergyman; of the whole of which charges a court of inquiry has fully exonerated the Rev. Mr. Bailey; I now beg fully to retract the said charges, and I beg you will be good enough to convey to the Rev. Mr. Bailey the expression of my regret at having been led into making charges which I admit were without foundation."

(Signed) G. P. M. WOODWARD,
Surgeon, 2nd 20th Regt.

"CHINA MAIL" OFFICE.

No. 2 WYNDHAM-STREET (back of the Club):—

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.

(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents.

ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents. and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.

(The Morning of the Mail's despatch.)

PRICE.—To Subscribers to the Weekly issue, 8 dols. to Non-subscribers, 12 dols. Single copies, 50 cents.

ADVERTISING.—The same as in the Weekly. All "Notices of Firms" appearing in the Weekly will be inserted in the *Overland*, and charged for, unless otherwise ordered.

Hong Kong, May 17, 1866.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and he works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessel tores, &c., when requiring to discharge them.

Amoy, March, 1865.

ENGLISH GARDENS IN THE EAST.

THE Fourth Season has now confirmed the complete success of MR. CHRISTY'S Cases for conveying Fruit Trees, Vines, Plants, Flowering Shrubs, and Seeds, to the East, when shipped in the holds of Steamers like ordinary Case Goods. Mr. John Waterer, junr., the American Nursery, Bagshot, Surrey, or Mr. Christy, 28, Pall Mall, London, are prepared to execute orders for gentlemen in the East, and beg to call attention to the list of prices and conditions. FRUIT TREES, including PEARS, APPLES, PLUMS, CURRANTS, GOOSEBERRIES, PEACHES, NECTARINES, APRICOTS, CHERRIES, and QUINCES, per case, 10 Guineas.

	Guineas.
20 FRUIT TREES, with Ten venes, per case	14
ROSES of the best kinds ... ... „	15
RHODODENDRONS and AZALIAS, &c.	15
GARDEN SEED (various) ... ... „	5 upwds.

The number depends on the size of the roots; the cases average 30 plants each.

All the above prices include freight, insurance, and all charges to any port where the P. and O. steamers call. The season for shipment commences about September and ends in January. All orders must be accompanied by a remittance or orders for payment. The name of the agent at the port of arrival must be furnished, to prevent delay in forwarding.

HOLLOWAY'S OINTMENT and PILLS.—These direct curatives act on the human body as mighty purifiers and healers, which slowly, gradually, and safely work a change for the better throughout the whole system. The Ointment has almost miraculous powers in cleansing and healing old sores and ulcers which had defied the highest surgical skill; but perseverance is necessary to attain this end, as it would be unreasonable to expect that any ulcer or skin disease which had been firmly rooted in the body for years could be cured in a few days. It cannot be too much to ask a week's trial of these noble remedies in any chronic ulceration, or other foul wound, in that short time they will prove their virtues.

GELLE FRERES PERFUMERY.

CHIEF ESTABLISHMENT, 35, RUE DES VIEUX AUGUSTINS, à PARIS.

THE house of GELLE FRERES, celebrated for the superiority of its Perfumery, addresses itself to the fashionable world as much for its essentially hygeianic, refreshing, and tonic preparations as for its delicate and distingué perfumes.

Prize Medal 1862.

Prize Medal 1862.

HARMONIUMS.

W. E. EVANS,

THE ORIGINAL INVENTOR AND MANUFACTURER OF HARMONIUMS IN ENGLAND,

RESPECTFULLY draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, in selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every Instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned, SPECIALLY PREPARED FOR INDIA, are recommended:—

No. 1.—With One Stop, in Oak or Mahogany... ... ... 11 Guineas.
(Tinned Packing-case, and delivery at any home port, 35s. extra).
No. 3.—With Four Stops, in Oak or Mahogany ... ... 21 Guineas.
(Tinned Packing-case, and delivery at any home port, 40s. extra).
No. 5A.—With Twelve Stops, in Oak or Mahogany ... ... 29 Guineas.
(Tinned Packing-case, and delivered at any home port, 42s. extra).
No. 6A.—With Fifteen Stops, in Oak or Mahogany ... ... 43 Guineas.
(Tinned Packing-case, and delivery at any home port, 45s. extra).
No. 9.—With Nineteen Stops, and Two Rows of Keys, in Oak or Mahogany... ... ... 80 Guineas.
(Tinned Packing-case, and delivery at any home port, 63s. extra).

THE "EVANS" IMPROVED HARMONIUMS

Are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private houses whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. EVANS' improvements, without any MECHANICAL appliances.

Fully detailed Price List, with Testimonials from the most eminent Musicians, &c., may be obtained of the Sole Manufacturer and Patentee,

W. E. EVANS, 2B, MARKET-PLACE, GREAT PORTLAND-STREET, LONDON, W.

Mr. Evans is in no way connected with any other House in London.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE. —See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have dates to the 11th June. Since last advices two home mails have been received, namely, those of 10th and 17th April.

The news from Kioto (says the *Jaapn Herald*) leaves us in a state of uncertainty. The terms offered to Choshiu by the Mikado were not replied to by that Daimio, and on the 14th day of this month (Japanese) seven days were given to him to accept the terms or fight. The general belief is that he would remain silent, and that war would be declared against him, and the Tycoon's troops put in motion on the 21st of the month, viz., on the 4th of June. In a few days therefore we may have some decisive intelligence. Satsuma will openly remain quiet, but it is the general impression that he has already sent a small force to assist Choshiu. This is, however, but conjecture. A few days ago 150 of Choshiu's men went in a band to the residence of [a Daiking in the adjoining province of Bitchou, burnt it, and it is affirmed carried off a large amount of treasure. The same band afterwards attacked and burnt another Daimio's residence in the province of Kochou, but got nothing for their pains. Very general complaints are made by the Japanese of the dearness of rice at Yeddo; at present it is not quite so high in Yokohama, but apprehensions are beginning to find expression.

Very much excitement had been caused by the intelligence that war had been declared between Austria and Prussia—and that "silk was 3s. per lb. lower"—had a very depressing effect, by no means alleviated by the fact that a telegram *via* Russia to Shanghai announced the suspension of Overend, Gurney and Co., with liabilities of £16,000,000 sterling. A report of the failure of another eminent banking firm in Lombard-street was also current.

The arrival of several agents of European houses for the purchase of silkworms' eggs had given a tone to the money market, such as it very much needed. Before the arrival of the French mail there were some who spoke of Ichibous reaching a rate below even their intrinsic value; but they afterwards slightly improved in price, with prospect of a still further advance.

The payment of the balance of the Simonoseki Indemnity has been postponed for a year.

The new Tariff is settled, and was to be signed in a few days, coming into operation on the 1st July. No change will take place however in the currency until the 1st January, 1868. [Telegraphic news announces that a convention had been concluded between the Japanese Government and the Foreign Representatives on the 25th June. This probably refers to the ratification of the revised tariff.]

The British Minister was at Yedo, with Lady Parkes, who was there entertaining a large circle of friends, including several ladies.

Digitized by Google

The review which was to have taken place on the Queen's birthday, but was prevented by the weather, came off on the 31st May.

Sir Harry Parkes, says the *Japan Times*, has been a good deal in Yedo during the fortnight. A long conference of the foreign Ministers took place just before he went up, and the object of the British Envoy in his visit to the capital was to exchange signatures to the new tariff. It is generally understood that the payment of the balance of the indemnity has been allowed in consequence of the ready manner in which the Gorogio accepted the new tariff, the ratification of which is now an accomplished fact. Our readers may like to know how much has been paid of the sum exacted from the Shogoon for the offences of the Prince of Chiosiu, and of which every cent virtually comes out of the pockets of our own merchants here, and their correspondents in Europe. We are glad to be able to satisfy their curiosity. The fine paid now by the foreign trade of Japan to the four Powers of England, France, Holland and America, amounts to $1,500,000, paid in three instalments on August 26th, 1865, January 8th, 1866, and May 18, 1866. It is pleasing to think that of whatever benefit this sum of money may be indirectly to the people of the four countries in receipt thereof, we have not taken the lion's share, the little merchant steamer *Takiang* having earned as much of this ill-gotten gain for America as did all the ships of war of England. Is this the fullest and latest development of the "most favoured nations'" clause?

A most unfortunate affair took place on the Tokaido on the 3rd June, which might have led to most serious complication with the Mikado's Government. It appears that a personage of very exalted rank, a functionary of the Mikado's court, had been sent from Kioto to Nikko, a place a little beyond Yedo, to be present at the "Matsuri" or festival which is held there on the 17th day of the 4th moon (June 2nd) in honour of Iyeyasu, known better to foreigners as Gogen-sama, the founder of the present Yedo dynasty. The envoy sent on such occasions is denominated Rei-hei-shi—or one sent to make offerings to the spirit of the departed. He is not necessarily a high officer, but his mission makes him so for the time being, and extraordinary honour is paid to him. In this case he was returning to Kioto, and all along the Tokaido in the vicinity of Kanagawa foreigners who happened to be passing were requested, civilly enough, by the local police to get off the road. It is usual when any prince is passing along this highway for the Governor of Kanagawa to notify the fact to the foreign Consuls, who issue a notification warning their countrymen of the danger of passing along the Tokaido at such times. (This action, by the way, is entirely illegal, and tending to abrogate an article of the Treaty, but we have generally been content to submit to it without complaint.) On this occasion no notification had been issued, and several parties were on the road. At Kanagawa one particular group was asked by the officials in charge of the road to step aside into a guard-house while the procession was passing. They did so, and when the Envoy had passed, proceeded on their way; but some of his two-sworded followers afterwards turned back upon the Shogoon's men, accused them of "harbouring foreigners," or words to that effect, and drawing attacked the picquet, wounding one man severely on the head. (We have also heard a report that a single foreigner met the train, and that some of them drew upon him, but that he put spurs to his horse and escaped. We have not been able to substantiate this, however.) After the guard had been attacked as above described, a strong party was sent after the offenders, who had meanwhile fled, the Rei hei-shi having gone on to Kamakura in the interval, apparently knowing nothing of what his followers had been doing. The fugitives were pursued as far as Odawara, which is more than thirty miles distant from this, and there the chase was abandoned.

Such are the facts of the case, and the natural inference is that if the Mikado has recognised foreigners in Japan, at all events, his retainers seem to decline to follow his lead. The affair is very regrettable, as foreshadowing an unpleasant reception at Osaka in 1868.

On the subject of the recent proclamation of the Gorogio permitting Japanese to leave the country, the *Japan Herald* has the following pertinent remarks:—"Since the day that the first treaty for the readmission of foreigners into Japan was signed no such evidence has been given to the world of the progress of liberal ideas as the proclamation or 'Government order' issued by the Gorogio. It was no act rendered necessary by pressure of foreign diplomatists; there was no agitation in the country; it was the spontaneous act of the rulers of Japan, resulting from their own appreciation of the state of things outside of Japan, as declared to them by their own people who had visited other countries, and the undoubted superiority of foreigners over their own people in the breadth of their views, the knowledge of the world, and in all those sciences that more essentially tend to the establishment of peace and the advance of civilisation. The Japanese intellect is equal to the brightest European, but it has been cramped and limited by the decree of exclusion of foreigners from the country and the forbidding the Japanese to go abroad. It is a pleasant think for those who have observed the narrow-mindedness of the Chinese, and even of many of the Indian gentlemen, more particularly in the Bengal Presidency—to converse with a Japanese, whose experience of foreigners is but that of a day, as it were, and to remark how very much more enlightened and consonant with progress in its most extended sense are his ideas. Already the number of students that have been sent by various daimios speaks of the thirst for knowledge and their anxiety to obtain it, by going to the best sources for its acquirement; and we may feel assured that gradually the desire for travel, for seeing the wonderful things that they have of late years heard so much about, will speedily operate, and that the decree will not be allowed to remain a dead letter. For some time before the 'order' was issued, it was expected, and it was openly declared by several Japanese, that they hope to see the Paris Exhibition in 1867. This and much more they may now do—and we trust that the world, now freely laid open to them, will teach nothing but what is beneficial to as fine a race as is to be found on the earth's surface. The promulgation of this 'order' has in it a significance that may well be noted. It is quite certain that after the experience of the past, and the troubles engendered by the admission of foreigners, that no act permitting the Japanese to leave Japan would have been passed without the sanction of the Mikado. We cannot suppose that the Gorogio would adopt such a measure at the very time when the Tycoon is at the side of his master, and in the midst of the daimios, so many of whom seem to be politically unfriendly to him, if it had not the fullest approval of the Court at Kioto. What better evidence can be desired of the actual ratification by the Mikado of the original treaties? Surely no better proof could be given—and none better required. The event, too, is of deepest moment at this time, when all are looking forward to the opening of Hiogo and of Osaca. In some minds great apprehensions have existed as to the troubles that may arise in the latter place through the hostility of the two-sworded retainers of daimios hitherto inimical to foreign intercourse. Much difficulty is cleared away by this 'order,' as the people will get into the habit of looking upon foreigners not as interlopers, but simply as visitors, to be used kindly by those who may, if they feel disposed, claim like kindness and welcome in other countries."

With regard to the extent of the emigration likely to arise from the new state of things, and its bearing on the social system of Japan, the *Japan Times* says:—"We have now to consider an edict issued by the Gorogio of the Shogoon, giving permission to Japanese subjects to travel to foreign countries for the purpose of study or trade. Not that we in the least degree anticipate any such emigration of labour from Japan as has been of late years steadily flowing out of the densely populated Flowery Land. We are of opinion—an opinion based on considerable experience of this country—that Japan is by no means so thickly populated as has been long imagined. Any one who takes the trouble to inquire for himself will find that polygamy, though permissible, is not considered respectable, and is rare; also that large families are exceedingly uncommon. The wife is, more properly, merely the housekeeper, and the habits of the people are such as to preclude any rapid growth of the population, if indeed they do not tend absolutely to its diminution. We are decidedly of opinion that in the days of the older Dutch writers the country was more thickly populated than at present, and in fact, so long as the empire of Niphon was to remain sealed to the rest of the world, self-contained and self-dependent, the system of what to Western eyes appears frightful immorality was absolutely in Japan a natural and political necessity. Increase of population, a blessing to a colonising nation like England or to a people like the Americans, who have a vast expanse of land to fill, would have been a positive curse to Japan, so long as it was imperative that all

Digitized by Google

the necessaries of life must absolutely be produced for her inhabitants in her own limited territory. The absence of all pauperism except such as is, in a semi-barbarous state, always the lot of the deformed or the crippled, is also a very conclusive proof that there is no redundancy of population. The state of things hinted at above was, of course, completely abnormal and unnatural to the last degree, and it is chiefly because we regard this measure of the Gorogio as the first step towards an entire revolution in the moral state of the country that we hail it with such pleasure. Not that we for a moment imagine that the Gorogio foresaw in the least the ultimate consequence of their act. Their intention is obvious. They have awoke to the conviction which came to the mind of our own great sovereign, Edward I., pupil of a greater intellect—that of Simon de Montfort—that the creation of a tradal class is the sole means of securing to a Suzerain, only a degree more powerful than many of his so-called vassals, the reality instead of the shadow of power. It is a matter of regret that the Shogoon at this crisis, should not have been an able man, equal to the position. Had such a man happened to have been at the head of affairs during the past six years the bold step of allying himself honestly and cordially with his new friends from the West might have been taken, and though it would undoubtedly have cost the country a civil war, the Yedo chief might now be *de facto*, what he pretends to be *de jure*, the master of Japan."

A general parade or review of the troops took place on Tuesday. the 5th June, when the young corps of Yokohama Volunteers mentioned in our last as having been established by Lieut. Harris, of H.B.M.'s 20th Regiment, acquitted itself very creditably, and was complimented by Colonel Knox, the commandant of the garrison. The *Japan Times* gives the following account :—"The troops on the ground were the 2nd 9th Regiment, a detachment of the 20th, and the Yokohama Volunteers. They paraded at 11.15 A.M. in two battalions—the first formed entirely of the 2nd 9th, and the second comprising the remainder of that regiment, the detachment of the 20th, and the Yokohama Volunteers—the latter being on the left of the line. Having first formed in mass of battalions at quarter distance, right in front, the troops then deployed into line on the 1st battalion. File firing from the right and left of companies followed, and the 1st battalion then advanced in skirmishing order, covering battalion No. 2. The enemy's horse being supposed to threaten a charge, the skirmishers were withdrawn under cover of the reserve, and the whole then formed into two squares to resist cavalry. File firings from flanks of faces then commenced. The kneeling ranks then fired a volley, and the whole then re-formed column and afterwards line. These manœuvres, which were executed with great precision and rapidity, were succeeded by file firing. The troops then formed into open column right in front, and marched past in quick time, the magnificent band of the 9th playing the regimental quick step. To the large crowd of spectators resident in Yokohama the most interesting part of the day's proceedings was the bearing and behaviour of their volunteers. This corps, composed as it is, to some extent, of old soldiers, has been got into a most commendable state of discipline with unexampled quickness by their energetic young commandant, Lieut. Harris. In the march past, especially, they acquitted themselves remarkably well, so notably so, that Col. Knox, C.B., commandant of the garrison, specially complimented them as they passed him. He took a subsequent opportunity of halting them and addressing a few words to Lieut. Harris in commendation of their appearance and steadiness, and the good state of their arms and accoutrements. We were glad to see the men of the 9th looking hearty and well; we have no doubt they fully appreciate the advantages of being quartered in such a pleasant station as Yokohama. The whole spectacle seemed to give great satisfaction to all on the ground."

NAGASAKI.

The following commercial items are from Messrs. Alt and Co.'s circular, dated June 1st :—

Our Import market continues to be most unfavourably affected by the state of our Native currency, which has still further depreciated, Ichiboos being now nominally 280 per $100. For most manufactures, however, an active demand continues at a slight advance on last month's prices, and, if remittances could be made, an improved business might be done. Camlets are in improved demand, but quotations do not come up to cost; for Scarlett Long Ells there is also some enquiry. Figured and Lustre Orleans and Camlet Cords are wanted at quotations. Of Turkey Red Prints, Turkey Red Cambrics, Dyed Brocades and Lawns, our market is quite bare, and extreme rates could be obtained for first arrivals. Of Yarn there are no stocks, with a good demand. Grey Shirtings are in fair demand, but stocks for the present are equal to requirements. American Drills could be readily placed at quotations, as well as White Shirtings. Fancy Prints continue very dull of sale, with heavy stock. Taffechelas is in demand, but holders require an advance. Metals continue dull, there being but a small inquiry for fine Nail Rod and Hoop Iron; small sales have been made, but not at paying rates. Coal is still wanted, and no stock. Produce continues in demand, with fair supplies of most staple articles. Common Vegetable Wax continues plentiful, and is offered in barter, but extreme rates are demanded for pure Block, of which only a few small parcels are on the market. Camphor has considerably advanced, only 300 piculs having come down during the month. Galls: In small supply. In Cotton no transactions. Silk: About 50 bales on the market. Tea: A large crop expected, causing a fall of $3 to $4 per picul on late prices. Settlements about 1,500 piculs, and stocks about 2,000. Exchange: On London, 6 months sight, 4s. 7½d. On Shanghai, 10 days sight bills, 1½ per cent. prem. On Hong Kong, nominal. Freights: To London £3 per ton. To New York £4 5s. per ton of 40 cubic feet. To Shanghai, $4 to $5. To Hong Kong, $5 per ton.

HAKODADI.

Our advices extend to the 8th May, under which date the correspondent of the *North China Herald* informs us that during the month of April the *Ville de Granada* was the only foreign vessel in harbour, with the exception of a few whalers which touched there for supplies. Trade therefore may be reported as dull in the extreme. On the night of the 4th April a fire broke out in the Russian Hospital, which, being built of wood, was soon entirely destroyed, with all the property it contained. Fortunately the weather was calm, which kept the flames within the plaster walls; and although the fire burned fiercely, Dr. Zuleski, with the assistance of the Japanese servants and others belonging to the establishment, saved all the sick, notwithstanding that the night was dark and the lights were quickly extinguished by the dense smoke. The patients were very numerous, many of them being Japanese. There were also two Englishmen in the wards, one of whom was a boy who lately had his leg amputated below the hip. His attendant, a Japanese, not knowing the other Englishman had taken the boy on his back and carried him out, said he must save his master, and in the attempt to find him was burned to death. This was not the only instance of devotion, for another patient, a Russian, who had lost the use of his legs, and was consequently in despair lest he should be left behind, was carried away by his servants, although all their property was left behind, and of course destroyed. Such are the Japanese; but some of their devotion to their sick charges must doubtless be ascribed to the precept and example of the Russians. Of the kindness of the latter to their patients the case of the English boy mentioned above is an excellent example.

CHINA.

SHANGHAI.

Dates are down to the morning of the 18th June. The London mail of 26th April arrived out on the 11th June.

The men-of-war in port are the *Acorn*, *Algerine*, *Basilisk*, *Firm*, *Snap*, *Starling*.

Our contemporary the *North China Herald* says that our banks at home may derive some consolation from the fact that three native banks of good standing have succumbed to the pressure of the times.

The Commercial anxiety had increased as later intelligence came forward from London, and it is expected that some houses would have to succumb to the pressure. The following items are from the *Friend of China* :—

"Sir Edmund Hornby left for Peking to confer with H.M.'s Minister regarding judicial business at the Consular ports, by H.M.S. *Barossa*.

"We hear that two Englishmen and two Chinese have been arrested as implicated in Waller and Co.'s silk boat robbery—one of the Chinese swearing to the identity of Thomson. The Englishmen are Watts, the man who turned Queen's evidence in the Hankow murder case, and Lane, another of the *Fire Fly* abstractors. Should Thomson have to swing for this Lowdah murder, it is to be hoped that he will make a full confession as to the fate of Dolly and others. Lindley, it is known, tried all he could to save their lives, and left them well and hearty. Thomson went on another tack, and it is feared brought about their murder.

"The *Plymouth Rock* is undeniably the finest steamer ever built for traffic in China waters. Over all she measures 300 feet in length, and is about 85 feet broad, with a 'tween deck for passengers about as lofty as the Club-house ball-room. Making, on a consumption of 25 tons of coal a day, 24 revolutions a minute of a wheel 30 feet in diameter, on an average speed of 22 knots an hour, her time between Hong Kong and Canton

Digitized by Google

was usually five hours; the greatest number of Chinese on board at one time being 2,700—say the strength of three service regiments; diameter of cylinder 81 inches, stroke 12 feet. Captain Simmons, so long known here as the popular commander of the *Huquong*, takes charge to-morrow, and will leave for Hankow on Thursday. As we remarked the other day, Captain Simmons has several times brought the *Huquong* from Hankow to this in two days and a trifle; in the *Rock* we may expect him to give us Sunday's Hankow news the day following. When she left America she was called the *Fung Shooy*. At Singapore advices reached her commander to drop a name coupled with so much of evil effect in Chinese minds, and hence her present designation of *Plymouth Rock*.

"The *Tun-sin* reports having passed, thirty miles from Hankow, the British ship *Guinivere*, a total wreck off an island described as one on which stands a pagoda. Up to that point she had been in tow of the *Glengyle*, and carried the first of the new season teas. It is said that the North China Insurance office lose two hundred thousand taels by the accident. Although the *Guinivere's* touching bottom and capsizing were instantaneous, all hands were saved, and taken back to Hankow in the *Glengyle*, to return shortly, it was supposed, in a gunboat and save all possible."

The *North China Daily News* has introduced a share list, of which the following is a copy:—

HONG KONG.

The dates are down to the 24th June. The mail of 10th May arrived out on the 21st June. We regret that our files of papers have missed, and we have not been able to borrow any from the banks and merchants in the City.

The troops per *Far East*, which left on 2nd June for Mauritius, Algoa Bay, Simon's Bay, and England, consisted of Col. Wyatt, 16 officers, 5 officers' wives, 22 staff sergeants, 280 men, 22 children, 16 soldiers' wives, two Miss Wyatts.

COCHIN CHINA.

SAIGON.

We are sorry to have to record a very sad event which occurred in Saigon. The circumstances of the case, as far as we can gather them, are these:—A French officer, who about four months ago married the eldest daughter of the agent of the Messageries Imperiales steamers there, was ordered into the interior about some business. He took with him about twenty men, and after they had gone about eighteen miles from Saigon they were attacked by a great number of Annamese, who killed the officer and severely wounded a great number of the men. The French authorities as soon as they heard of the affair collected a force, which they quickly despatched after the murderers, but we cannot say whether they succeeded or not in capturing any of them. The officer's dead body was found in a dreadfully mutilated condition. His wife, who had hidden herself, was also found, and taken back to Saigon.

The following is the account published by the Paris papers of this affair:—

"Official intelligence received here, dated the 12th June, announce, that a number of natives of Cambodia, to whom the French had given an asylum in Cochin China, had held tumultuous meetings near Tayning. Captain Larclause, having endeavoured to reason with them, was massacred, together with Lieutenant Lisage and a few soldiers. A company had been sent from Saigon to restore tranquillity. The cause of this hostile demonstration is not known."

We notice from the *Courier de Saigon* that the floating iron dock which has been in course of construction during the past two years at Saigon was completed on the 16th of May.

INSURRECTION IN COCHIN-CHINA.

Official intelligence received in Paris, dated June 12, announces that a number of natives of Cambodia, to whom the French had given an asylum in Cochin China, had held tumultuous meetings and captured Tayning. Captain Larclause, having endeavoured to reason with them, was massacred, together with Lieutenant Lisage and a few soldiers. A company has been sent from Saigon to restore tranquillity. The cause of this hostile demonstration is not known.

A telegram from Paris of this day's date (August 9) states as follows:—"According to the latest official intelligence received here from Cochin China, dated 28th June, the rebels had been dispersed, their encampment burnt, and their leader killed. Order had not been disturbed in other parts of the colony."

SIAM.

BANGKOK.

The death is announced at Bangkok of his Excellency P'raya Montree Suriwongs, younger and only full brother of his Excellency Chow P'raya Sri-Suriwongs, Prime Minister of the Kingdom of Siam. His Excellency the deceased was Prime Minister of Military Affairs in Northern Siam and President of the Southern Provinces of Northern Siam, Chief Ambassador from the Court of Siam to the Court of St. James's, and was selected his Siamese Majesty's representative at the coronation of the Cambodian King. His Excellency was the son of the late Somdetch Ong-Yai, born March 23, 1821. The body of his Excellency P'raya Montree Suriwongs is lying in state at the residence of the late Somdetch Ong-Yai, his father, awaiting the time of its cremation in the month of September next.

Bangkok, we learn by private advices, is distracted between grief and fear, the first caused by the severe illness of the Kalahome's brother, who is not expected to recover, and the second by the announcement that Monsieur Aubaret, the French Consul, is about to return. The death of the former nobleman, who was formerly first ambassador to England, will be a great loss to the Siamese. He did not mix himself up with politics, but he is looked upon as one on whom dependence can be placed in case of necessity, as he is possessed of considerable ability and tact, and has plenty of pluck. The advent of the latter is viewed with apprehension by the Siamese in general and with distrust by all. He was so unpopular during his former stay here, and he had so grossly insulted the King and his Ministers, that it was thought that he could hardly have had the face to return, especially as the French Emperor and his Minister must have known of his conduct. His return is therefore looked upon a sign of the approval of his conduct by the Imperial Cabinet, and as a proof of the aggressive policy of France towards Siam. Many of the Siamese nobles have lately spoken out on the subject, and openly stated their fears. The worst part of the matter is that the King appears blind to the future consequences, and is surrounded by people known for their Gallic tendencies. The way his Majesty is cajoled—the heir apparent, or as they are pleased to call him "Prince Napoleon"—flattered, and royal weaknesses humoured, would form matter for a joke, were the probable consequences not so serious. The British Consul does what he can to reassure people, but to little purpose, and the general impression is that British interests and British trade are seriously threatened. By the way, Monsieur Aubaret brings an autograph letter and presents from his Imperial Majesty. The frequency of these epistolary assurances "of the most perfect consideration" is significant, and his Majesty of Siam might profitably take to heart the hacknied quotation, slightly altered, "*Timeo Aubaret et dona ferentes.*"

STRAITS OF MALACCA.

SINGAPORE.

The *Free Press* complains of "the expense of living" at Singapore, which, it avers, has become a question of serious import to the community. "We do not (it says) refer particularly to the mere necessaries of life, though they are expensive enough; but to all the requirements of a household. There is some satisfaction in knowing that this grievance is not, however, solely confined to our settlement, as we learn from others who have resided in different parts of the East that the same gradual advance in the value of everything connected with house-keeping is everywhere noticeable."

The transfers following have been made in the officers of the Police Department:—

Mr. K. B. S. Robertson, Deputy Commissioner of Police, Singapore, to Province Wellesley.

Mr. C. B. Waller, Deputy Commissioner of Police, Prince of Wales' Island, to Singapore.

Mr. P. W. Earl, Deputy Commissioner of Police, Province Wellesley, to Prince of Wales' Island.

Digitized by Google

The two batteries of the 17th Brigade R.A., at present stationed at Singapore, will be relieved in August by the two batteries of the 5th Brigade R.A.

A wooden pile pier 600 feet in length and 24 feet in breadth will shortly be built in front of Messrs. Low, Poh, Jim and Co.'s new godowns at Sandy Point, and at the end of the pier will be a wharf 200 feet long and 24 feet wide, alongside of which, when completed, the Siamese steamer *Chow Phya* will lie, to discharge and take in cargo; the cost of this undertaking will be about $16,000.

The British steamer *Henriette* has been sold for the sum of £3,000, and will be placed under Dutch colours and called the *Betsy*.

Marine Constable Richards arrested six European seamen belonging to the British barque *Oribe*, for embezzlement of cargo, and the case was tried before the Marine Magistrate. The men were sentenced to be imprisoned in the House of Correction for four weeks with hard labour, and also to pay the value of the cargo they embezzled, viz.: $125, which amount is to be eventually deducted from their wages. The second officer of the same vessel was also brought up charged with neglect of duty in allowing the seamen to embezzle the cargo. His worship, after having heard the whole of the evidence, cautioned and discharged him.

A somewhat exciting scene took place at New Harbour on the 3rd June just as the Messageries Imperiales steamer was about to sail. It appears that among her passengers was a certain Chitty named Caliapah, who was about to abscond from this settlement with about $4,000 in money, and some ingots of gold valued at $2,000; he was also accompanied by two or three others, who between them had managed to defraud people in Singapore of a large sum of money. The creditors arrived, and a search was instituted for the delinquents; but on the pursuers being asked to produce their warrants to apprehend the swindlers, they were unable to do so, and none could be obtained, owing to the day being Sunday. The Chitty and his companions were therefore perforce permitted to proceed, as there was no power to detain them.

The case of conspiracy brought by Ex-Duffadar Nullapermal against Isaac Aaron Pillay, Simon Aaron Pillay, and Pakere, was called on for hearing before W. W. Willans, Esq., and Lieut. H. Burn, magistrates, and after a lengthened investigation the defendants were committed for trial at the next Criminal Session, to be held on the 9th July.

Under date Singapore 5th June, Messrs. Maclaine, Fraser and Co. notify:—The interest and responsibility of Mr. Robert Bain in our firm and that of Messrs. Fraser and Co., Penang, ceased on the 31st December, 1865.

H.M.S. gunboat *Forester*, Commander Stokes, from Hong Kong, *via* Saigon, arrived on the 11th June.

A beacon painted red has been placed on the outer end of the small spit projecting from the eastern side of the Syrang sand, in the south channel, Penang Harbour. The bearings from the beacon are as follows:—

Pulo Kra from S. 25° E. to S. 33° E.
Pulo Jerajah from S. 15° W. to S. 33° W.
No. 3 beacon S. 22° W. about 500 yards distant.
No. 4 beacon S. 38° E., No. 5 beacon south, and the fort point north.

PENANG.

The new waterworks are progressing rapidly and most satisfactorily. About half the distance has already been laid down, which is by far the most difficult part. The water was let on for trial a few days ago and everything worked admirably; the stream flowed with great velocity, and as copiously as the size of the pipes would admit. It is calculated that in about two months more the pipes will have reached Pulo Tikus. At a meeting held on the 14th June the Municipal Commissioners decided upon extending the new main to town, and having additional piping for distributing water to the houses were desired.

The *Agamemnon*, the first of the new line of steamers to run between Liverpool and China, arrived here yesterday evening (says the *Gazette* of the 16th June), having had a run of 57 days from Liverpool, being two days only beyond the time she was expected here. This is a highly satisfactory result, and will be productive of public confidence in the company. The convenience of having a direct line of steamers from England will be of immense benefit to the Straits and China, especially if such good passages are to be made; in such a case the advantages are so manifest that it is superfluous to allude to them. She conveyed about $5,000 freight to China from Penang.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

Castilla—On the 24th May, at Ningpo, Mrs. Diaz de Castilla, of a son.
Love—On the 10th June, at Shanghai, Mr. Joseph Love, jun., of a son.
Wheeley—On the 8th June, at Shanghai, Mrs. A. A. Wheeley, of a son.

MARRIAGES.

Drucker—McLellan.—At Shanghai, at the residence of her brother-in law, the Rev. Mr. Lambuth, by whom the ceremony was performed, H. Drucker, Esq., to Miss McLellan.

Glover—Finlay.—On the 1st June, at Nagasaki, by the Rev. Wm. V. Lloyd, Chaplain of H.M.S. Scylla, Alexander J. Glover, Esq., to Annie, youngest daughter of the late Mr. David Finlay, Craig-house, Newhills, Aberdeenshire.

DEATH.

Elles—On the 8th August, at Wimbledon, Ethel Mary, the infant daughter of Jamieson Elles, Esq.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Nagasaki.—June 29, Eagle (steamer), from London (reported by telegram *via* Kiachta).

At Shanghai.—June 8, from London, Star of China; June 13, from Sunderland, Abbot Lawrence.

At Yokohama.—May 31, from Liverpool, Eclipse.

At Singapore.—June 27, from Newcastle, Paul Johan; from Liverpool, Chili, 28, from Glasgow, Edinburgh Castle; from London, Frederica.

At Shanghai.—(Received Aug 8, per M. T., from Liverpool):—Helen Nicholson, from London.

PASSED ANJER.

From China to England.—June 16, Far East (str.); 17, Erl King (str.); 19, Fiery Cross; 19, Whiteadder, and left 22 for Algoa Bay; 20 (A.M.), Ariel; 20 (P.M.), Taeping. The Whiteadder had on board over 300 troops, besides women and children.

THE NEW SEASON'S TEA.

The screw steamer *Erl King*, which left Foochow on the 5th June, arrived at Mauritius for coals on the 27th, and sailed for England. She may be expected to arrive at any moment now. The passage of twenty-two days to Mauritius was remarkably good. The following vessels cleared the bar at Foochow as follows, and may be expected about the middle of September:—*Fiery Cross*, May 29th; *Serica*, 30th; *Ariel*, 30th; *Taiping*, 30th; *Taising*, 31st. The *Ariel* is the new vessel, and in betting circles is rather the favourite.

THE LAMENT OF SHANGHAI.

(*North China Herald.*)

It has been suggested that a calculation of the amount of capital sunk in the various unremunerative speculations, which may be seen in the course of an afternoon's pull on the river or stroll through the settlement, would be interesting. Some little patience and perseverance would be required; but the partial explanation which the result would afford of recent monetary distress would quite repay investigation; for had the amount of capital thus locked up and lost to use been available, the crisis of 1865 would have been tided through with much less difficulty. Gloomy reflections might be excited on the mutability of human affairs, as exemplified in the change from lavish expenditure to dead-lock and abandonment; but compensation might be found in caution learned. Beginning at the lower reach, the premises of the Shanghai Brick and Saw Mill Company invite attention, and an item of Tls. 100,000 would be entered by the calculator under the head of dead loss, with a memorandum in the column of "remarks," that an effort was being made by a new company who had purchased the premises for Tls. 18,000, to work them with better success. Bewildered while passing up the river, by successive ranges of empty or half empty godowns, he would vaguely set down a million or two as the number of lost taels represented; and dwell for a moment with a smile of pity on a small structure of corrugated iron which the owner once wildly hoped to see filled with coal. The names of both architect and proprietor have sunk into oblivion; but the present age gazes with wonder on an edifice betraying as much simplicity of execution as of conception, and in itself so apt an illustration of the height and depth to which expectations rose and have fallen. At the time this and many other godowns were erected, the river contained 270 ships instead of twenty-seven, and the demand for godown accommodation largely exceeded the supply. Cool consideration might have suggested the impossibility that this could last; that a supply so enormous must cause a glut to be followed by reaction. But no such reflection was acted on; the demand for storage existed and the erection of warehouses offered an apparently profitable opportunity of investment. Godowns and wharves were constructed in an excess corresponding with the excessive arrivals of goods; and now that the arrivals have ceased the godowns are empty and the wharves idle. Such was the state of affairs which almost justified a hope of extorting profit from the small corrugated iron edifice on which we have been moralising, and such is the explanation of its forlornness. When the Shanghai Wharf Company alone contained 12,000 tons of coal, the proprietor of even this small godown might hope to catch some of the crumbs falling from the rich men's tables, and to derive profit therefrom. The Pootung point and its monument next claim attention, and illustrate the powerlessness of individual enterprise when opposed to the dense stupidity of a whole population. Undeterred by warnings, and relying on that indomitable Anglo-Saxon energy which has overcome so many obstacles, the projector of the line of telegraph of which the Pootung monument was to be a terminus, engaged boldly in his task; but the Feng-shui were unpropitious, and the scheme failed. Money, labour and material were forthcoming in abundance; but just as every obstacle appeared to have been overcome, the spirits, intangible and unseen "influences" interfered, and superstition overthrew the work. Making an entry of an unknown sum in his note-book, the calculator would now cross to the Shanghai side, jotting down silk steamers lying idle, cargo-boats doing little or no business, and unremunerative vessels of various descriptions, in the transit; and thinking gloomily on the Club and the Carting Company, would wend his way through streets of untenanted houses to the old racecourse. Here again his mind would wander amid a maze of figures, and he would wildly write a string of ciphers to express his sense of overwhelming loss.

But however sad the contemplation of immense loss, comfort is to be found in the reflection of inevitable amendment. As certainly as the Yangtze continues to flow to the sea, so certainly must Shanghai be an entrepot for the commerce of the vast country which it drains. And this commerce is only yet in its infancy; the iron mines of Anhwei and the copper districts of Szechuen have yet to be developed by foreign enterprise. Delay there may be more or less; but the result is inevitable. The Chinese may throw what petty obstacles they choose in our path, refuse to admit silk steamers on their rivers, and issue edicts against the employment by their countrymen of foreign vessels on the coast; but the end of all this must come. Not perhaps in the present generation of Shanghai residents, but at no very distant date, the words of the ninth article of the Treaty of Tien-tsin will be interpreted in their proper sense; and British subjects will be allowed "to travel for their pleasure or purposes of trade to all parts of the interior," without let or hindrance.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, August 7.

The armistice agreed to by the belligerent Powers came into operation on the 2nd inst., and is to last four weeks; but it is generally believed there will be no more fighting, and that long before the expiration of that period, definitive treaties of peace will have been signed, as the preliminaries, containing the general principles of the arrangements for the future, if not actually signed, have, it is understood, been verbally settled. It must be confessed that Prussia played a most dangerous game in taking up the cudgels against all Germany single-handed, for the co-operation of the half-dozen little States that joined her afforded no material assistance. She staked her very existence on the result, but appears to have had the greatest confidence in her needle-gun rifled cannons, and military organisation, and by her promptness and energy has won the game. Had she lost she would have been cut up and partitioned between Austria, Hanover, Saxony, and Hesse, with perhaps a slice on the Rhine to Hesse-Darmstadt and Bavaria. But it is idle to speculate on what might have happened from a reverse of fortune, and more to the purpose to look a little into the future from the stand-point of the present posture of affairs. Prussia having overrun all the North of Germany will incorporate with her dominions Hanover, Electoral Hesse, Nassau, Frankfort, Saxe-Meiningen, the Duchies of Schleswig and Holstein, and parts of Hesse-Darmstadt and Bavaria. The only sovereign that will be restored, if indeed he be willing to accept the conditions offered, is the King of Saxony; but if so will have to give up part of his territory, including Leipzig, and abandon the right he has hitherto enjoyed of having his own standing army and diplomatic agents abroad, besides which Prussia will take into her own hands the railroads, telegraphs, and post-office; so that, shorn of these attributes of royalty and independence, he can be nothing more than a titular monarch and in reality a satrap of Prussia. It appears to me very questionable whether he can be induced to accept such a position, and if he would not rather prefer to abdicate altogether and retire into private life. The Elector of Hesse, now detained as a prisoner of State in the fortress of Stettin, has always been such a tyrant and made himself so hated by his subjects, that they heartily rejoice to get rid of him and become a Prussian province. The King of Hanover was not much more popular with the mass of his subjects, and it is only the nobles and the bureaucracy that supported him in his whims. Hitherto he could also rely on his army, but that is now totally destroyed and disbanded, and a feeling of deep embitterment at their humiliation from the King's insane policy and wavering indecision would prevent any of the officers from again offering to serve could the army be reorganised and the King reinstated on his throne. Thus the dynasty falls to the ground unregretted, having outlived its former glorious history, and his possessions pass into the hands of the conqueror.

HOUSE OF COMMONS.

MORTALITY AMONG THE TROOPS IN CHINA.

(Aug. 2nd.) Col. NORTH gave notice that early in the next Session he would call the attention of the House to the report of the committee on the mortality among our troops in China, and also to the utterly inadequate pay of the officers serving in China.

EAST INDIA COMMUNICATIONS.

(2nd.) Mr. CRAWFORD asked the Secretary to the Treasury whether Her Majesty's Government would take into their early consideration the recommendations of the Select Committee on East India communications.—Mr. HUNT said the recommendations of the select committee came under two heads—viz., telegraphic and postal communications. As to the former, he was not able to give the hon. member any information at present; but, with regard to the postal communications, the matter had been under the consideration of the Government, and it was proposed as soon as possible to give notice to determine the existing contracts with the view of carrying out the recommendation of the committee.

TRANSIT DUTIES IN CHINA.

(2nd.) Colonel SYKES asked the Secretary of State for Foreign Affairs whether it had come to his knowledge that in the provinces in which and adjoining to which the treaty ports were situate, in the north of China, the local mandarins for the last two years had been in the habit of exacting heavy illegal transit duties on merchandise, to the great injury of import and export trade of those ports particularly Ningpo; that the navigation of inland waters by British vessels had been interdicted; and that a shed for drying silk cocoons, built by the agent of Messrs. Jardine, Matheson, and Co., on the Great Canal had been pulled down,—all in breach of treaty obligations; and whether action would be taken with the Imperial Government to insure the fulfilment of the terms of existing treaties.—Lord STANLEY said in answer to the first question of the hon. and gallant member that he had himself searched and caused search to be made as to the allegations that heavy illegal transit duties had been imposed upon merchandise by the local mandarins, and he could obtain no information on the subject, nor did he believe that any existed in the department. With regard to the second question, as to the navigation of inland waters by British vessels having been interdicted, it was undoubtedly true that the Chinese Government had forbidden such navigation. The matter had been brought before Sir R. Alcock, the English Minister, who was of opinion that the Chinese Government were not acting contrary to the treaty. On receiving that information, Her Majesty's Government thought it better to refer the question to the law officers of the Crown, and their opinion being in accordance with that of Sir R. Alcock, the Government felt themselves compelled to express their concurrence with it. With respect to the third point, all he knew was contained in a private letter received by the last mail a few days ago. That was an *ex parte* statement, and of course no action could take place upon it until they had fuller information.

EXCHANGES IN JAPAN.

(3rd.) Colonel NORTH asked the Chancellor of the Exchequer when the report made by Mr. Arbuthnot, of the Treasury, on the question of the exchanges in Japan, promised by the late Chancellor of the Exchequer on the 27th of February last, would be laid upon the table, and to state if the arrangement, also promised, had been carried out for the crediting of all profits arising out of such exchanges to the public account.—The CHANCELLOR of the EXCHEQUER: It is very true that my predecessor in office did promise to lay on the table a copy of the report made by Mr. Arbuthnot—that is to say, he intimated that there would be no objection to produce it if my hon. and gallant friend moved for it. I may add that if my hon. and gallant friend should now think fit to do so I shall take care that a copy of the report is placed on the table. In answer to the second part of his inquiry, I may state, in the first place, that he is under an erroneous impression in supposing that the right hon. gentleman opposite made the promise which it indicates. Independent of his own assurance to the contrary, it would be clearly impossible to enter any such arrangement, because, under the system which at present prevails there certainly is a loss on the exchanges, so that there are no profits to credit to the public account.—Colonel NORTH said it was the noble lord the member for King's Lynn (Lord Stanley) and not himself who had asked the question on the subject on a former occasion.

STRAITS SETTLEMENTS BILL.

(3rd.) On the order for considering the report of amendment to this Bill, the Earl of POWIS called the attention of his noble friend the Secretary of State for the Colonies to the necessity of securing some adequate provision for the troops in these settlements. In 1863 a commencement was made to erect infantry barracks, the total cost of which it was estimated would be £150,000. These barracks, however, had never been completed. It would be hard to expect the settlement to incur a debt for the accommodation for a larger number of troops than was required for the settlement itself, if such a number was to be stationed there for Imperial as well as colonial purposes.—The Earl of CARNARVON: My noble friend has referred to two very important points. It is, of course, essential that the troops stationed in the settlement should be sufficiently accommodated; and this, after all, is a question of expense. But, as regards the question of revenue, I am not prepared to enter into minute details, because at the present moment the settlement is in a rather anomalous position. Its affairs neither belong to the India-office nor are they exactly within the province of the Colonial Department. From 1858 to 1861 there was some doubt as to whether the revenue of the settlement was equal to the expenditure; but in the latter year a report was made under the direction of Sir H. Robinson, which showed the estimated revenue to be £200,000, and the estimated expenditure £198,000, leaving £2,000 of a surplus. It is to be observed, however, that Sir H. Robinson's calculation for military expenditure was £63,000, while a subsequent arrangement with the Treasury fixed it at £59,300, which raises the surplus of revenue to £5,700, and the revenue of the settlement is a growing one. With respect to the troops, the military force hitherto stationed at Singapore has been about 1,650 men; the force to be permanently stationed there and chargeable to the colony will be—artillery, English, 212 men; Ceylon Rifles, 668; making 880 in all. The wing of the European regiment will be stationed there only to meet the convenience of the military authorities. There is at present accommodation at Singapore for about 1,600 men. About £100,000 has already been spent on barracks by the Indian Government; and a paper laid before Parliament states:—"At both Singapore and Penang there are already good barracks for European troops, while in the first of these places the stone-built, well-raised, and well-ventilated convict barracks, on the removal of their present occupants, will accommodate 2,000 European soldiers should it at any time be necessary to assemble so large a force." On the whole I see no reason to apprehend that the revenue of the settlement, which, as I have already observed, is a growing one, will not be amply sufficient to cover all its expenses, civil as well as military. (Hear, hear.)

CRUELTIES IN CHINA.

(3rd.) Colonel SYKES called the attention of the House to the rendition by the acting Governor of Hong Kong, Mr. Mercer, in May, 1865, of a Chinese inhabitant of Hong Kong to the mandarin authorities at Canton, on an accusation of piracy, and his subsequent barbarous execution. He also called attention to a Parliamentary paper relating to the surrender to the mandarin authorities by Her Majesty's naval officers in the China seas of alleged pirates, and asked the Secretary to the Admiralty by what instructions naval officers surrendered to the Chinese authorities the crews of junks whom they deem to be pirates without the intervention of the British Consuls, the duly constituted channels of communication with the Imperial Government. He narrated the circumstances of the case that had come before Mr. Mercer. A Chinese gentleman had settled in Hong Kong, and opened a shop there. One day a stranger called upon him, and said that if he did not get a large sum of money he would denounce him to the authorities as a pirate. The shopkeeper refused the money on the ground that he knew nothing of the stranger or the charge he made. The latter being baulked of his object gave the information he threatened to the authorities. The shopkeeper was arrested, and on the perjured evidence of a stranger was handed over to the Chinese officials, by whom he was cruelly executed as a pirate, his head being cut off, and his heart being taken out and eaten. This was surely a case demanding inquiry. The hon. and gallant gentleman concluded by moving the adjournment of the House.—Mr. NEATE, in seconding the motion, said his hon. and gallant friend deserved the thanks of the House for bringing the matter forward. The Chinese authorities having given us the guardianship of their waters, had no right to claim the prisoners.—Mr. WATKIN rose to order, and asked whether it was competent to the hon. and gallant gentleman to move that the House do now adjourn, instead of moving the adjournment until Monday.—The SPEAKER said that supply not being on the paper, there was nothing irregular in the hon. and gallant gentleman moving that the House do now adjourn.—Lord H. LENNOX said everybody would be ready to do justice to the motives of his hon. and gallant friend in bringing the painful subject before the House. Whilst admitting the horrors referred to, the difficulty was in suggesting how they were to be put an end to. As the first part of the question referred to the conduct of Mr. Mercer, the Governor of Hong Kong, it should be addressed to the Secretary for the Colonies rather than to the Secretary to the Admiralty. With regard to the second part of the question, the answer was that the officers of the army and navy acted under distinct orders, called station orders, which had been approved of and founded on the opinion of the Queen's Advocate and other high authorities in 1855; and one of those orders stated that pirates taken within Chinese waters must be handed over to the Chinese authorities. With reference to the suggestion that the prisoners should be sent to Bermuda, it would lead to jealousy on the part of foreign Powers. The Government would give their attention to any practicable plan which might be suggested, with the view of preventing the occurrence of barbarities which they must all deplore. (Hear, hear.)

GRIEVANCES OF INDIAN OFFICERS.

(6th.) Lord CRANBORNE (in reply to Major JERVIS) gave a general explanation of the measures contemplated by the India Office to remedy the grievances of the officers of the Indian Army. With regard to the Staff Corps grievance, they proposed, instead of restricting that corps to officers who had served on the Staff, to permit any officers to enter it who had joined the Indian Army before the amalgamation; and the bonus system grievance they proposed to remedy by appointing a committee in each Presidency, which, as each officer retired, would inquire into his case, and would ascertain how much he was out of pocket by payments to officers for retirement. Whatever that loss might be the Government would make good to him, and the cost, he anticipated, would be an average of £8,000 a year for twenty years.

STRAITS TRANSFER BILL.

(7th.) The Lords' amendments to this Bill were assented to.

"THE TIMES" ON THE MORTALITY AT HONG KONG.—In a leading article on the Report of the Mortality Committee, *The Times* says, after a recapitulation of the evidence:—"There is no necessity to comment upon such facts as these. They tell their own story. But we may draw attention to one point which comes under the consideration of the select committee in connection with the hardships and sickness which so much beset the European soldier in the East. The Asiatic troops were withdrawn from China when the military reasons which had caused them to be sent there ceased. 'But,' says the committee, 'it is to be regretted that successive Secretaries of State did not, when the military reasons for the Asiatic troops had ceased, advert to the very beneficial *sanitary* results from their presence to the European troops stationed there.' Lord De Grey urges a financial, or rather constitutional, objection to the employment of Asiatic troops on these stations—viz., that 'it removes the allowances of pay and the allowances of the officers and men from the control of the Imperial Parliament.' But the committee reminds Lord de Grey that 'the withdrawal of these troops and the substitution of a purely European garrison ultimately resulted in an increased expense to the British Government.' And if this is the case may not the theoretical constitutional question be very well allowed to yield to the vital practical claim of the soldiers' health? Why should our Eastern possessions kill more than they need do? If the Asiatic soldier there can relieve the oppressive and unhealthy life of the European soldier without injuring his discipline, the gain will be great indeed. But we are hopeless of any good result if such men as General Guy are intrusted with commands."

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A Register is kept of the addresses of all persons connected with the Far East and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in China, Japan, Singapore, *and other parts of the* Far East, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the Far East.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, THURSDAY, AUG. 9, 1866.

POSTAL AND TELEGRAPHIC COMMUNICATION.

We are glad to find that the report recently issued by the Select Committee on East India communications is not likely to share the fate to which so many reports of Parliamentary Committees are doomed, that is to furnish matter for an unreadable blue-book and then become a dead letter. In reply to a question asked by Mr. Crawford in the House of Commons, Mr. Hunt, the Secretary to the Treasury, stated that with regard to the first portion of the Report, namely, that treating of telegraphic communication, he could not at present give any decisive information; but that the other portion of it, regarding the postal service, was already under consideration by Government, and that notice would be given as soon as possible to put an end to the existing contracts in order that the recommendations of the Committee might be carried out. The first portion of these recommendations, advising the establishment of a weekly mail service to Bombay alone, abolishing the Madras and Calcutta lines and using Bombay as a central point from which to distribute the mails for all the Presidencies, embraces the plan we have always advocated and will meet with unanimous approbation. But the other portion, which deals with the China and Australia services is by no means so satisfactory. Clause 6 of the recommendations proposes that Government should enter into a contract for the conveyance of mails fortnightly, or twice a month to Ceylon, Singapore, China, and Japan, in connection with a monthly mail to Australia, "*having* "*regard* to the service now performed by the *Messageries* "*Imperiales*." The meaning of this last clause is vague in the extreme. In what sense are the words "having regard" to be taken? If the Committee mean to recommend a semi-monthly direct English mail to the above-named places, only "having regard" to the French mails so far as to prevent the dates of departure clashing one with another, well and good. We have reason to believe however that this is not the meaning intended to be conveyed, and that by "having regard" to the *Messageries Imperiales* the Committee positively mean to recommend that their steamers should be availed of for the conveyance of one of the proposed fortnightly mails, leaving only a monthly service to be performed by the English company. This will of course have the effect of reducing our means of communication with the Far East from three times to twice a month, and such a step will we feel sure be met by a formidable opposition on the part of the merchants and others engaged in the trade. It is to be regretted that the Committee did not call on members of some of the principal China firms to give evidence on the subject, which might advantageously have been embodied in their Report.

Captain Tyler, of the Royal Engineers, at the request of the Board of Trade, has completed his second tour through Italy, and after noticing the ports of Genoa, Naples, Reggio, Taranto, and Otranto, concludes that there is no port so eligible as Brindisi. We have therefore the pleasure to confirm, under official support, the account which we gave on the 28th May of the "Brindisi Route." From negotiations with the Italian authorities he states that the harbour and other general improvements, including the railway over Mont Cenis, will be completed by the 1st June next. From an examination of the tunnel works, Captain Tyler finds it difficult to give any decided opinion, but if the works are continued vigorously, he thinks it quite possible to complete it by 1871. The Italian Government are prepared to enter into a convention for the conveyance of our India, China, and Australian mails, either to and from Brindisi or to and from Alexandria. Amongst other arrangements it is of course stipulated, that a special train shall always be provided within two hours after the arrival of the steamer from Alexandria. Having now a competent opinion that the port of Brindisi, as well as the railway from London to that port, is fit for the conveyance of the mails, the Postmaster-General has to decide whether he will, in the new contracts about to be entered into adopt this route by which a saving of forty-eight hours can be effected, or whether he will abide by our old and tried port of Marseilles. We think the safest course—considering that the lines to Brindisi are for the most part single lines—will be to divide the service, say two mails per month *via* Brindisi and two *via* Marseilles. It will never do to ignore this more expeditious and agreeable route, but we think it would be very imprudent to abandon the port of Marseilles which has served us so well for thirteen years. Captain Tyler cannot refrain from recommending what he has always supported, viz., the Euphrates Valley and Persian Gulf route to India, which should be used as an alternate route with the Red Sea.

THE ICHIBOU EXCHANGE QUESTION.

The Arbuthnot papers are still wanting. Their production was asked for early in the present Session by Lord Stanley, and distinctly promised by the then Chancellor of the Exchequer; nothing however having been heard about them, Col. North took occasion on the 3rd instant to ask the present Chancellor whether the promise of his predecessor would be fulfilled or not. In reply to this Mr. Disraeli stated that Mr. Gladstone had not actually promised to produce the papers, but had merely intimated that "there would be no objection on "the part of the Government to their being laid on the table." It thus becomes evident that advantage has been taken of a technical quibble to delay the publication of Mr. Arbuthnot's report, doubtless in order that by giving time for public curiosity on the matter to die out, a very unsavory question might be allowed to blow over. The plea that Mr. Gladstone's promise was informal, is an idle one. He not only undertook to lay the papers on the table, but distinctly recommended the House to rely on them for a thorough knowledge of the question; thus publicly recognising their importance and utility, and rendering quite inexcusable his subsequent neglect of the matter. At the same time, he stated that for the future all profits arising out of the Exchange would be credited to the public accounts. Col. North now asks Mr. Disraeli whether this promise also has been kept or not; and is told that it has not, because under the present system there is no profit, but on the contrary a loss. What is the nature of the "present system" we should like to know? We know that by the "old system" the officers in the civil, military, and naval services made large profits. However, we will reserve further comments until the papers are produced.

CHINA AND JAPAN.—A CONTRAST.

We have not only to deplore the slow progress made by the Chinese in assimilating their social and political system to that of more civilised countries, but have from time to time to record an absolutely retrograde movement, by which some important step that has been taken in the right direction is retraced, and the work of perhaps years of patient diplomacy and persuasion scattered to the winds. Of such a nature is the recently issued prohibition by which the navigation of the inland waters of China by foreign vessels is interdicted. This coming together with news of the demolition—apparently by order of the native authorities—of a building erected by Messrs. Jardine, Matheson and Co., on the banks of the Grand Canal, for drying cocoons, offers sad evidence of a renewed opposition on the part of the native Government to all our endeavours to enter into closer relations with the people of the country. With regard to the navigation question the treaty appears to be so framed that we have no redress. Sir Rutherford Alcock has already given it as his opinion that the Chinese Government had a right to issue the prohibition, and in reply to a question asked by Colonel Sykes in the House of Comm Lord Stanley said that the matter had been subsequentlyo

Digitized by Google

mitted to the law officers of the Crown, who had endorsed that opinion; so that Government are bound to support it. In cheering contrast to this unsatisfactory news from China, we hear from Japan of what is justly termed by a local paper "a great stride towards the ultimate freedom of the people "of Japan." It consists in the entire abrogation of that law which has hitherto kept the subjects of the MIKADO close prisoners in their own islands, with the exception of the select few who have recently visited Europe as emissaries of the TYCOON and the Prince of SATSUMA. Henceforward, by complying with certain very reasonable and indeed necessary regulations, all classes of Japanese will be enabled to leave and return to the country at their own free will and pleasure; a privilege which will doubtless be eagerly embraced by great numbers whose curiosity regarding foreign lands has been stimulated but far from satisfied by the scanty rumours that have reached them through the all but impenetrable barrier of exclusiveness that has so long surrounded them. This concession on the part of the GOROGIO is the more gratifying to us as it does not appear to have been in any way urged upon them by the representatives of foreign Powers, and is, therefore in all probability quite spontaneous.

THE MO-WANG CASE—TORTURE IN CHINA.

THE untoward circumstances attending the rendition of the so-called MO-WANG by Acting Governor MERCER, have been the subject of a short discussion in the House of Commons which originated—as no few of the China debates do—in a question from Colonel SYKES. The gallant Colonel asked the Secretary to the Admiralty a string of questions regarding the instructions under which British officers in China surrendered Chinese prisoners to the native authorities, concluding his speech with a sketch of the manner in which the MO-WANG was delivered up for torture and execution. Under our Parliamentary intelligence Colonel SYKES' speech and the reply of Lord HENRY LENNOX will be found *in extenso;* and as our readers are already acquainted with our views, both as regards the merits of the case itself, and Mr. MERCER'S action in it, we have no object now in renewing the discussion. But out of this as of many other evils good is likely to come forth; for we are credibly informed that it has been made the ground by Sir RUTHERFORD ALCOCK of a representation to the Chinese Government, requiring them to abstain from torturing any criminals or prisoners who may in future be handed over to their authorities by ours, and that his very just demand has been fully acceded to. Whether this undertaking will be fairly and honestly carried out, or whether like so many other engagements it will be so successfully evaded as to become practically a dead letter, remains to be seen; at present the apparent willingness with which the concession has been made leads us to hope for the best.

THE HONG KONG DOLLAR.

IN our last issue we were enabled to announce that new and powerful machinery was being dispatched for the use of the Hong Kong Mint with the view to the production of a more perfect coin than that about which so many complaints have been made. We are glad to be able to state that in addition to this the present mail conveys to Captain KINDER an entirely new set of dies, not only for the dollar but for the smaller coins belonging to the series, and having had the pleasure of inspecting a set of proofs struck from them, we can state without hesitation that they are a great improvement on those first sent out. The Queen's Head, which as we have before stated is no fancy portrait, but an authentic likeness of Her MAJESTY, stands out in bold relief, the elaborate tracery on the reverse as well as the lettering is sharp, well raised, and clearly defined, and the milling of the edge is in the proofs we have examined quite perfect. With these improved means and appliances we have little doubt that the Hong Kong Mint will very shortly produce a coin which if not entirely free from all the objections which have been urged against the pattern will at all events serve the required purpose, and reflect no small amount of credit on those concerned in its production.

THE MANILA CONSULATE.

MR. H. T. RAINAIS, whose appointment to the Consulate at Manila has already been noticed in a previous issue, proceeds, we understand, by the first mail in September to his post. The antecedents of Mr. Rainals are as follows:—

Was Admiralty agent for the British fleet in the Baltic from 1854 to 1856; was appointed Vice-Consul at Copenhagen, Feb. 16th, 1859; was employed on special service for the purpose of instituting inquiries into and reporting upon the state of affairs in the Duchy of Sleswig in December, 1860, and January, 1861; and was appointed Consul at the Danish Island of St. Croix, in the West Indies, June 18th, 1863.

THE TUMONGONG OF JOHORE.

THE visit of the Tumongong of Johore will terminate in September, his Highness having secured a passage to Singapore by the mail leaving on the 26th of that month. The Tumongong has just visited Liverpool, where he first inspected the shipbuilding yard of Messrs. Laird Brothers, at Birkenhead, and after a brief trip on the river landed and lunched with the mayor at the Town-hall. He then paid a visit to St. George's-hall (where Mr. Best was engaged at the usual Saturday organ performances), went through the Free Library and Museum, and afterwards made a longer excursion on the river. His Highness, who is rather fond of nautical matters, expressed both delight and astonishment at the magnitude of the shipping attached to the port, and the perfect appliances for its accommodation. A portrait of the Tumongong has appeared in the *Illustrated London News.*

By the Bombay papers we see that the Central Bank of Western India (which has a London office) is about to be dissolved, having lost at least half its capital besides all reserves. This bank had agencies in China.

THE SAN FRANCISCO, JAPAN, AND CHINA LINE.

We lately noticed that the contractors for this line—the "Pacific Mail Company"—had, in common with the public interested in the trade, urged on the Government the desirability of making the line direct without calling at Honolulu, and to organise a distinct service for that place. We find the following on the matter in the *New York Herald*:—

As the time approaches when the line of steamers between San Francisco and the coasts of Japan and China is to go into active operation, the public and the press have not only the right but the duty to subject to a thorough examination everything pertaining to this great enterprise. Like the Atlantic cable, which will very soon stretch its wires across the ocean to accomplish the large girdle of telegraphic communication around our globe, the China mail line is destined to close up and accomplish a second great girdle of communication around our earth, of a different but not less important character. The first will be the great high road of the spiritual commerce of mankind, sending the human thought over its wires from continent to continent with the swiftness of lightning; the second will be the great highroad of the practical material commerce of the nations, sending passengers and freight around our planet with the speed of steam locomotion. Indeed, the California-China steamer line is only the last link in the great chain of steamers which stretches now already from Europe to China on one side, and from Europe over our continent to the Pacific coast on the other side. By crossing the Pacific Ocean it fills up the gap which separates still the two ends of this chain, and accomplishes the "great circle of steam navigation."

The Peninsular and Oriental Steam Company, connecting in regular trips Southampton with Spain, Malta, Egypt, Bombay, Ceylon, Calcutta, Singapore, and Hong Kong, is the first link in this chain; the numerous steamer lines between England, Germany and France and our Atlantic ports constitute the second link; our Pacific Mail between New York, Panama and San Francisco the third link; the China Mail will connect the first with the third, and so complete the great circular highroad for the practical commerce of mankind.

It is, indeed, consoling that our legislators in Washington, in the midst of a wild partisan warfare, and among the mean squabbles about the eternal negro and the big jobs of speculators found not only some moments of leisure for the consideration of this vast enterprise, but really took it in hand with that high spirit and that imperial generosity by which the American people are distinguished in all questions of high practical interest. The appropriation of a yearly subvention of $500,000 dollars for this mail service will therefore find the general and unanimous approval of the nation. But it seems to us that, in the generous plan for the promotion of this object, some practical questions connected with it have not been subjected to that close investigation of facts and circumstances on which very often depends the business success of a new enterprise.

The three chief questions in regard to a steamer line are always and everywhere—first, quickness of communication; second, cheapness of transport of passengers and freight; third, possibility of successful competition. In the projected Bill, lying before Congress, regulating the China mail service, these three necessities have not been sufficiently considered. Besides, some less important articles of this Bill, to which we will call attention on another occasion, the paragraph making Honolulu, Sandwich Islands, a coal station of the line, will prove completely impractical, and may, at least in the beginning, render the enterprise a business failure.

The island of Honolulu is situated twenty-one degrees nineteen minutes north latitude; San Francisco, thirty-seven degrees forty-nine minutes North; Yokohama, in Japan, thirty-five degrees twenty minutes North. We perceive, therefore, at once, that a course via Honolulu is sixteen to seventeen degrees further south of the straight line between San Francisco and Yokohama, and that this deviation, being on the equator side, is much greater than an equal deviation on the pole side of the same straight line. Indeed, a course taken in a northerly direction as far even as to the forty-fifth degree of north latitude, is one thousand and fifty miles shorter than a course via the Sandwich Islands. Counting an average speed of eleven to twelve knots per hour, the route over Honolulu would therefore take four to five days, and a round trip nine to ten days more than the northern

Digitized by Google

course. Besides this difference, it should be taken into account that on the southern course north-eastern winds prevail, while, for the greater part of the year, between the parallels of thirty and fifty degrees north latitude, north-western winds prevail. Continual headwinds on a long voyage are, even for a powerful steamer, a very serious drawback, and would certainly retard the passage for from one to three days, so that the loss in time on a round trip via the Sandwich Islands would amount to ten or eleven days, and including twenty-four to forty-eight hours for coaling and passing the bar, to twelve or thirteen days.

Such a heavy loss in time will entail the following consequences:—First, twenty to twenty-five per cent. more running expenses; for coal, wages, wear and tear of ships, &c., amounting in all per year to at least $150,000. Second, a loss of five days, and on a round trip to ten or twelve days for every passenger. Third, increase of interest on all freight goods, which on this line will be exceedingly valuable, consisting of gold, silver, silk, tea, &c. Fourth, increased premium of insurance. This will amount to a heavy sum yearly, because the course via Honolulu is not only longer, but also not as safe as the more northern course. Fifth, impossibility of competition against the overland mail steamers between England and Hong Kong.

If we lose on the passage from San Francisco to Shanghai, in China, these five days, we will always receive our Japan and China news two or three days quicker from England than by our own China mail line, supposing the Atlantic telegraph will be accomplished, which probably will be down before the new line goes into operation. The news is now sent to us in the following way:—From Hong Kong to Calcutta, by the Peninsular and Oriental steamers; from Calcutta, per Red Sea telegraph to Alexandria (Egypt), to Malta, Italy and France to London, and from London respectively to Liverpool and New York.* In this way we can have Hong Kong news, when the Atlantic cable is in operation, in twenty-three days; but if the San Francisco China mail steamers take the northern course (say forty-five degrees north latitude), and are ships of powerful engines (and therefore of great tonnage), we can have it via San Francisco in twenty-one days, and could in all instances, when our steamers leave Shanghai on another day than the Oriental steamers leave Hong Kong, furnish to England and Europe the China news by the Atlantic cable. This will be impossible if we lose five days by taking the course via Honolulu.

But there is still a greater drawback against this line. For the service in the Pacific Ocean steamers of the largest size, from 4,000 to 5,000 tons are desirable, if not necessary, for the sake of safety, as well as superior speed. Now, if we make Honolulu a coal station, we cannot employ steamers of a greater burthen than 2,500 to 3,000 tons. A steamer of 4,000 to 5,000 tons, fully loaded, will draw twenty-three to twenty-four feet water; but the interior bar at the harbour of Honolulu at high tide allows only twenty-one feet at low tide eighteen feet, and our steamers, therefore, would not be able to cross the bar. The largest ship which ever entered the port of Honolulu was the *Sovereign of the Seas* (in 1852), of 2,421 tons burthen; our war steamer *Merrimac*, which registers three thousand seven hundred and twenty tons, was compelled to anchor outside. We see, therefore, that we have to give up this station, or that we have to construct steamers of medium size, say of twenty-five hundred tons, for our China mail line. This would entail a loss in safety, in speed and accommodations, and would not allow us to compete successfully with the Oriental Steamship line, via Suez to Hong Kong. The commerce in freight and passengers between San Francisco and Honolulu offers no equivalent for these losses and di-advantages, and it would be by far more profitable to start a special line of small steamers for this service than to burden with it the great China mail line.

*[We are surprised that our contemporary should be so ignorant of the route of our postal and telegraphic communication with China.—Ed. *L. and C. T.*]

THE INDIA AND CHINA MAILS.

(SPECTATOR.)

The report of the committee appointed to inquire into our communication with India has been published, and as it has been signed by men of all parties, was agreed to by Lord Stanley and Mr. Stansfeld, we trust it will be acted on at once. Mr. Crawford, the member for London, who has been the soul of the Committee, we believe drew up the report, and his exposure of the existing system is unanswerable. Our trade with Asia and Australia now amounts to one-fourth of the whole external commerce of the United Kingdom, and the communications on which that vast business depends are most imperfect. The whole is really in the hands of the Peninsular and Oriental Company, who do the work very well, having never lost an outward-bound mail, but who are so paid that they can afford only forty-eight communications a year instead of fifty-two. Instead of making Bombay, which is the external point of the Indian railway system, the centre of receipts and deliveries for the ocean post, the steamers blunder on to Madras and Calcutta, and as steam on land travels three times as fast as steam at sea, in most parts of India letters written twice a month are as useful as letters written four times, the mails *via* Bombay, say of 17th July, being delivered as soon as the mails *via* Calcutta of 18th July. This is pure waste of power, and would have been remedied long ago, but that the Post-office cannot bear to risk the slight loss of £30,000 involved in a weekly mail. The Committee, however, prove they are bound to risk it, the only loss now existing as far as India is concerned arising from a payment for the benefit of the China mails which India ought not to make. The Post-office want to meet their risk, which would be amply recouped by increased correspondence, by an absurd increase of 6d. a letter; but the Indian Government rejected the proposal, offering, rather than submit to it, to run the risk itself. The Committee, however, recommend that a weekly mail should be established, to sail of course on a fixed day, which will, we trust, be Saturday, —Friday, the day suggested by merchants, being the absolute worst for the transmission both of journals and parliamentary news,—and that this mail should be separated finally from any connection with mails going on to the Far East. India and China have no more geographical relation than India and California, or England and Iceland, and the artificial connection ought to be given up. Bombay being once made the central point, all India would be on an equality, and every station receive letters barely a month old at exactly seven days' interval, a system absolutely perfect, till the country requires, as one day it will require, a semi-weekly communication.

The remainder of the Far East, Ceylon, Singapore, China, Japan, and Australia, will then form a main line, with minor lines for passengers radiating from Ceylon to Calcutta and Madras, from Hong Kong to Shanghai and Yokohama, and so on, a line quite important enough to be self-supporting. The Committee recommend that the contracts should be let to different companies, but that we cannot support, believing that so long as the Peninsular and Oriental Company is compelled, by severe fines strictly levied, to do its work swiftly and well, its magnificent fleet forms a transport reserve such as no aggregation of petty steamers could possibly replace. As to the French Messageries, they ought not to have one shilling of English money, unless the Emperor will guarantee that their service shall not be suspended in time of war, and that they will even in war transport our artillerymen, a mere *reductio ad absurdum*. A weekly mail carried by the Peninsular and Oriental Company is the practical ideal.

The telegraphic communication the Committee condemns. It exists, but it is carried through many European countries at enormous cost, and through Turkey at excessive loss of time. A message of twenty words costs £5. 1s., and takes from one to nine days to deliver, and is then often received in an unintelligible form. The Committee therefore recommend a separate and independent line through Italy from England to Egypt, thence by land to Suakim, and thence by cable to the nearest point on the Indian continent, the whole to be in European hands. This it seems to us is only the Red Sea project over again, a project which we always approved, and which, now that the Atlantic Cable has succeeded, ought to be taken up again. A trade of £110,000,000 a year can pay anything, and the main telegraphic route ought to consist of cables laid for Asiatic service along the route known as the Southampton route, either to Alexandria, or, which we should prefer, to Seleucia, thence by land to the Euphrates, and then *down the bed of that river* to Bushire, where it joins the Persian Gulf Cable. The portion exposed would then be less than one hundred and fifty miles, which could be strictly guarded, the entire remainder of the line being within reach of the English fleet. Less than this is insufficient, and this we fully believe will ultimately be accomplished without hampering State guarantees.

A CHINESE DINNER IN CALIFORNIA.

The following amusing account of a banquet given by the Chinese merchants of San Francisco to Mr. Burlinghame and General Van Valkenburgh (the United States Ministers to China and Japan), is given by the San Francisco correspondent of a New York paper:—

On the arrival of the Hon. Anson Burlinghame, on his way to his post at Peking, the Chinese merchants of San Francisco determined to give him a dinner after the true Celestial custom. For a variety of reasons they proposed to defer it until a day or two before the sailing of the ship that was to convey the Minister and suite to their destination, making it, if possible, on the evening before the departure. The *Swallow*, with her ambassadorial freight on board, is to leave port on Monday next, and as neither Saturday nor Sunday is supposed to be the proper day for dining out, the great festival was fixed for last night. The preparations for the feast have been quite elaborate, and required several days for completion; so that notice was given at the restaurant early in the week that company might be expected on Friday, June 1.

INVITATIONS

to the following effect were distributed:—

San Francisco, May 29, 1866.

Mr. ———.—Dear Sir,—The undersigned request the pleasure of your company at a dinner to be given to the Hon. Anson Burlinghame, United States Minister to China, and General R. B. Van Valkenburgh, United States Minister to Japan, on Friday, June 1, at six o'clock P.M., at Hang Heong Restaurant, No. 808, Dupont-street, near Clay.

Tung Yu and Co.
Chy Lung and Co.
Wing Wo Lang and Co.

ASSEMBLING OF THE GUESTS.

At the appointed hour the guests assembled, some of them following the American custom of considering it six o'clock until seven, so that the party was not seated until near the latter hour.

A CHINESE RESTAURANT.

Hang Heong Restaurant is the same establishment where the dinner was given last year to Messrs. Colfax, Brass, Bowles and Richardson, on the occasion of the visit to the Pacific coast. The building is of wood, two and a half stories high, and was sent over from China in 1850. Close by its side is a building of corrugated iron, that was sent here from England; so that two antipodean structures can be seen at the same moment.

According to Chinese custom, the kitchen of the restaurant is on the ground floor, and occupies the portion to the rear, the front being devoted to a small shop, where Chinese edibles are exposed for sale, and to a desk where the manager sits to receive and give orders and to collect money that may be due from customers. The second floor (up a single flight of stairs) is devoted to the tables where patrons are served. At either end of this floor are petitions of glass that make rooms 10 or 15 feet by 25 or 30, leaving a central room 25 feet square. The tables were mainly set in the end rooms, the central one being partly used for the same purposes for which Americans maintain side tables or pantry rooms. The upper story is used as a waiting or retiring room, and was fitted up with chairs and sofas of the Chinese pattern, besides a considerable number of American chairs, that served for the unusual number of persons assembled. The Chinese chair is a hard, straight-backed affair, much like the old-fashioned kitchen chair with which all New England are familiar. This upper story was divided into two room, both being furnished in the same manner. The walls in the rooms in all parts of the house are hung with placards in Chinese, the letters being large on some and small on the others. The placards generally announce the character and price of the articles for sale,

Digitized by Google

just like the placards in an American saloon. Some of them were translated to me, and showed that the Chinese are as ready as ourselves in the use of extravagant expressions.

THE DINNER.

About seven o'clock, as we were all assembled in the waiting-room, it was announced that the tables were ready. The tables were of the round pattern, seating from six to nine persons each, and the place of each guest was previously fixed by our hosts. As my name was called I passed from the waiting-room to the one below, and was directed to a table where I found my place designated with a card bearing my name. All the guests were seated in the same manner, so that all confusion was avoided. The Chinese are very much like our English cousins in their adhesion to etiquette and ceremonial forms, and are consequently as successful as the English in avoiding perplexities on a festive occasion. It was my good fortune to have a seat by the side of the official interpreter, Mr. Charles Carvalho, who speaks English and Chinese, besides four other languages, with perfect fluency and precision. I was indebted to him for explanations of many of the Chinese customs, and for numerous bits of information about the Celestial Empire. Chy Lung, the oldest Chinese merchant of San Francisco (he came here in 1849), presided at this table. At his right was Mr. Burlinghame and at his left Mr. Karvalho, and the balance of the seats were occupied by American guests. At each table was one Chinaman, who presided over its destinies. Fung Tang, a young but prominent Chinese merchant, who speaks English and French with creditable fluency, presided at the table where General Van Valkenburgh was seated. During the evening he made a speech in English, responding to a toast, and was loudly applauded.

The number of guests was less than on the occasion of the dinner to Mr. Colfax, and the rooms were consequently less crowded. None of the Chinese restaurants in San Francisco are as capacious as those occupied by Americans, and the number of guests at dinner is consequently restricted to the space.

In front of each guest was a plate, a saucer with a short-handled spoon of China ware, a teacup holding about two thimblefuls with a saucer proportionately small, and another saucer containing soy, a very pleasant sauce resembling our Worcestershire. There was a saucer full of flowers—a sort of flat bouquet—and glasses for champagne and claret that were evidently blown in America. There was a pair of chop sticks, of white ivory, and an American knife and fork for such as preferred them. A napkin was placed over each plate, and on this plate was a printed bill of fare and the card which bore the name of the guest to which it belonged. The bill of fare was printed in English characters, and resembled in general appearance the bills of the Astor or St. Nicholas. I noticed that the one held by Chy Lung had the name of each dish written in Chinese for facility in reading. Below is the

BILL OF FARE.

FIRST COURSE.

1. Su Kie (roast chicken).
2. Chow Sang How (fried oysters).
3. Foo Young Chee (shark's fin and eggs).
4. Chich Pak Chup (roast pigeons).
5. Cum Chin Kie (chicken and ham sandwich).
6. Chun Kan (fish *a la* Burlinghame).
7. Su Ue (roast ducks, Upton).
8. Su Yu Che (roast pig, Shanghai).

SECOND COURSE.

1. In Wor (Mandarin birds' nest soup).
2. Ching Don Gee (boiled shark's fin)
3. Soo Bow Ue (Abalona soochow).
4. Chow Yow Young (mutton Van Valkenburgh).
5. Tong How See (China oyster fricassee).
6. Buck Look Kan (reindeer sinews, Peking).
7. Sut Yee (ice fungus).
8. Tong Goo (mushrooms).
9. Heu An (table rice).

THIRD COURSE.

1. Kie Dan Gaw (pound cake).
2. Ching Dan Gaw (soft cake).
3. Boe Chi (small sweet cake).
4. Far Koe (red geranium cake).
5. Far Koe (white geranium cake).
6. Hong Chew (banana cake).
7. Soo Pang (sugar soo cake).
8. Time Sum (violet cake).
9. Tong Kuong (preserved ginger).
10. Tong Cumqut (preserved cumquet).

DESSERT.

1. Bow Low (pine apple).
2. Ray La (strawberries).
3. Hong La (cherry).
4. Hong Chew (bananas).
5. Hang Yan (almonds).
6. Ping Quar (apples).
7. Hong Chung (oranges).
8. Li Chee Kon (dry Li Chee, Canton).

Oolong tea (superior quality), Rose wine, Champagne, Sam Soo, Claret, China wine, and Cigars.

At the Colfax dinner last year there were twice as many dishes as on the present occasion, but no one could complain of a lack of food had the number been far less than we found it. The first article on the list—roast chicken—was brought in a bowl holding a quart or more. The chicken had been cut, after roasting, into pieces about half an inch thick by an inch and a half square, and consisted of none but the choice pieces of that famous bird of America. All the dishes, of whatever character, were thus cut up and brought in similar bowls. Sometimes two dishes were brought at the same time, but they were always served in their order "according to invoice."

CHINESE WINES.

Before the eating began the little cups were filled with Chinese wines, and the opening ceremonies of drinking took place. Each cup holds but a single swallow, so that a practical American speedily finds himself looking like Oliver Twist after his dish of mush. The Chinese sip rather than drink their wine, and this custom holds good with reference to all liquids. The Chinese take their wine hot, but the first cupful was cold, though immediately followed by hot wine. This wine—Sam Soo—I found to be a not unpleasant beverage, quite sweet, and with a bouquet flavour, somewhat like Santa Cruz rum. Those that have tested its qualities say that it is "powerful, intoxicating." It is a product of the rice and sugar cane, and is a favourite among the Chinese. In drinking our host led off by bowing to Mr. Burlinghame and then to each guest in turn. It is a custom among the Chinese while drinking to bow to each individual of the party, instead of making, as the Americans do, only a nod or two for an entire assemblage.

THE CHOP STICK.

The preliminary drink being taken, our host took his chop sticks and assisted Mr. Burlinghame to a piece of the first dish, performing the same service for each person at the table, and closing with himself. I had practised with the chop sticks for a minute or two after we were seated, and determined to "do as the Romans do," by eating the entire meal with them. It was necessary to use the knife for cutting the food into small fragments, and the chop sticks were the only means for conveying it into the mouth. It was surprising how soon one could become accustomed to their use, but the mistakes and awkwardness while learning were very amusing. Frequently a piece would slip from the stick for three or four times in succession, and it did not always stop short of the floor. Out of courtesy to their company the Chinese ate with the knife and fork, only using the chop sticks while serving their guests. I noticed that they were nearly as awkward with those things as were the Americans with the chop sticks. "How use doth breed a habit in a man!"

THE COOKERY.

The roast chicken was good, though there was too much oil used in its preparation to suit the stomachs of most Americans. The second dish (fried oysters) was excellent, and most of the guests allowed themselves to be helped a second time. The oysters were of California production and fried in batter, very much as they might be fried at a New York restaurant. Shark's fin, the third dish, was toothsome to an extent that agreeably disappointed the novices, and the comments upon it by those around me were highly eulogistic. I cannot say positively how it was cooked, but supposed it had been boiled till very tender and then fried with eggs. Up to the present time I have always entertained a prejudice against the shark, on account of his interfering with my bathing amusements while at a certain place by the sea side. Having eaten of his fins I forgive him all his evil intentions towards me, and will henceforth declare that I love him as a true Feejeean loves an English missionary. The delicacy of the Chinese manipulation was evinced in the fifth dish (chicken and ham sandwich). On one side was a slice of lean ham and on the other a slice of fat, while between the two was a neat stratum of chicken. The sandwich altogether was not larger than a slice from a good sized cucumber, and must have required great care in its preparation. As there was no bread accompanying it, I did not enjoy it as I would an American sandwich. The roast duck and roast pigeons were cooked much like the chicken with which the dinner was commenced. The fish *a la* Burlinghame had been chopped fine and mixed with meat and vegetables, so that it was difficult to say what particular article formed the basis of the composition. Speaking for myself, I can say that there was too much oily substance in this, as in many of the dishes, to allow me to enjoy it. I fancy that a native of the "hog and hominy" portions of America might find Chinese cooking to his taste, and I know that some of the guests last evening were well pleased with the very feature that failed to satisfy myself. You know the Latin adage, "*de gustibus*," &c., and I know of no better place to prove its truth than at a Chinese dinner.

DINNER CUSTOMS.

After roast pig, which was simply roast pig cut up like the chicken, and washed down with claret and champagne, which were furnished in abundance throughout the dinner, we were supplied with cigars and requested to leave the tables, that they might be prepared for the second course. A half-hour was passed in the smoking room, and we were then summoned below. This custom of an intermission in the course of a meal for the purpose of smoking and aiding digestion is purely Oriental, and, far from being objectionable, though a fancy, the Americans will not be likely to adopt it, as it savours too much of a deliberation to suit our fast age and people.

BIRD NEST SOUP.

The second course opened with the famous bird nest soup, which I found quite palatable, though not as delicious as it is described by some of the guests. The glutinous matter which comes from the bird nests is like a hard jelly, and with the other ingredients of the dish made a very good soup. I found it lacking in flavour, and am of an impression that a French or American cook would be able to improve it. Like everything fashionable it is very expensive, being sold for its weight in silver, and consequently only indulged in by the wealthy. The quantity in market is quite limited, as the article is very difficult to procure, and is only found in places difficult of access. In this country it is only brought out on State occasions.

BOILED SHARK'S FIN

was good but tasteless, and evidently boiled for a long time, until its better qualities were gone. It may be proper to state that the abalona is a species of shellfish brought from China in a dried state. Mutton *a la* Van Valkenburgh was—roast mutton; and the China oyster fricassee was lacking taste. Like the abalona, it is dried for transportation, and consequently loses some qualities that might be excellent in the early days of its capture. I am told that this oyster is of a kind unknown here, it having but a single shell on one side. One would judge that the life of such an oyster would be very monotonous. Reindeer sinews were good—something like boiled pig's feet, though more delicately prepared than pork trotters usually are. Ice fungus was a stew of Iceland moss, and the mushrooms did not differ materially from mushrooms everywhere. Then, with some boiled rice, champagne, claret, and tea of very superior quality, which is drank from little cups very hot and without milk or sugar, we ended the second course and returned to the retiring room, where cigars were called into requisition.

THE SPEECHES.

By this time a very fair quantity of champagne had been swallowed, and it was the most natural thing in the world that the company should engage in making and hearing speeches. The rules of the State Department forbid a foreign minister making speeches while *en route* to his post, and so the parties to whose honour the dinner was given could not be heard after the ordinary manner; but they consented to an informal talk, in which diplomatic matters were to be ignored. Several gentlemen, residents of San Francisco, made speeches of greater or less brevity, and, as no one ever heard of a dinner speech that was not applauded, it was thought best not to vary from the established custom, and therefore everybody was cheered to his heart's content. China and America joined hands, and the guests all agreed that the Chinese residents in California deserved a more kindly treatment than they have hitherto received.

An informal resolution was made for the American merchants of San Francisco to give a dinner to the Chinese merchants on the occasion of

Digitized by Google

the departure of the first steamer of the China line. Cheers were given for the Ministers to China and Japan, for the Russian Minister in China, and for Sir Frederick Bruce, the former British Ambassador at Peking. Cheers were also given for the Chinese merchants of San Francisco and for the Pacific Mail Company and the new line to China.

CHINESE PASTRY.

This second intermission lasted about an hour, when we again proceeded to the dining room. This time we found plates of white porcelain instead of the figured ware from which the first and second courses were eaten. As will be seen by the bill of fare, this course consisted of cake, all of which were excellent, and nearly all of it new to most of our eyes and palates. The Chinese pastrycooks have several little arts that might be learned to advantage by our own. After the course was finished, dessert was brought, and the feast came to an end.

Naval and Military.

With regard to the Report of the Committee on the mortality of troops at Hong Kong, the *Army and Navy Gazette* says:—"The Select Committee of the House of Commons appointed to investigate the circumstances attending the late mortality of troops at Hong Kong have brought their deliberations to a close, and the report will be presented in the course of a few days. We may at once say that its general purport is that nobody is particularly to blame. We believe it will be found, however, that much difference of opinion prevailed among the members constituting the committee, and a prolonged contest was maintained by those who sought to inculpate the War Office, and those who attempted to throw the blame on General Guy and the local authorities. On the one hand, it was contended that Lord de Grey ought to have foreseen that the steps directed by him to be taken, as regards the withdrawal of the Indian troops and the substitution of Europeans, would be followed by the lamentable consequences which did ensue; on the other, it was maintained that the local military authorities had sufficient discretionary power to enable them to deal with the sickness in such a way and at such an early period as to prevent much of the mortality which took place. In the end it would appear that neither of these views was pushed to a successful issue; and the report of the committee may be looked at somewhat in the light of a pairing-off. If we are not mistaken it will also be found that the evidence tended to give another illustration of the confused and unsatisfactory character of the relations between the Secretary for War and the Commander-in-Chief, and the difficulty of discerning where the authority of each begin and terminate. When the report and proceedings of the committee come out, they will of course afford an excellent opportunity for founding an opinion upon these important matters; but until the information to be thus gained is before us, fair play demands an absence of comment."

The following is expected to be the mode of distributing the large amount realised from the Banda and Kirwee booty—viz., about £700,000. From the above amount must first be deducted the law expenses so recently incurred to establish the rights of the several claimants.—The law costs have been estimated at about £50,000. The authorities of Chelsea Hospital have addressed the India Office to ascertain when the latter would be prepared to recommend the Treasury to pay over the balance due to the Queen's troops. The distribution will take place, it is stated, in accordance with the subjoined scale—viz., 1. Lord Clyde, Commander-in-Chief, one-twentieth part of the whole prize fund. This would give the estate of the late Lord Clyde £35,000, subject, it is presumed, to the deduction for proportion of law costs. 2. General Whitlock, seventy-five shares, the value of each share being calculated at £100. 3. Lieutenant-colonels, seventeen shares. 4. Majors, sixteen shares. 5. Captains, twelve shares. 6. Subalterns, six-and-a-half shares. The non-commissioned officers and troops included amongst the claimants will probably receive at the rate of two shares per head.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of June, and for the six months ended the 30th June, do not exhibit a progress commensurate with what might have been hoped for from the earlier returns of the present year. Still they continue to show an increase, which, it is clear, has been checked in its growth by the untoward effects of the panic and the high rate of interest maintained by the Bank. The total declared value of exports for the month of June was £14,630,120, against £13,227,062 in 1865, and £13,978,526 in 1864, which is an increase of £1,403,058 over the former period, and of £651,594 over the latter. For the six months of the present year the total declared value was £92,857,830, against £74,128,638 in 1865, and £78,047,586 in 1864; showing an increase of £18,729,192 compared with 1865, and of £14,810,244 as contrasted with 1864. Of imports, the total value of those enumerated is £92,029,657 for the five months ended 31st May, against £59,933,184 in 1865, and £77,111,991 in 1864; giving an increase of £32,096,473 over 1865, and of £14,917,666 over 1864. The trade with the Far East, as exhibited in these returns, shows a gratifying and steady increase. The figures are as follows:—

EXPORTS TO CHINA AND HONG KONG.

	Quantity for the Month ended 30th June. 1864.	1865.	1866.
Cotton yarn	147,600	71,300	247,200 lbs.
Cotton manufactures	6,889,484	10,974,598	13,843,521 yds.
Worsted stuffs	1,373,069	1,623,633	2,203,819 „
Woollen & Worsted cloths.	88,742	133,977	142,734 „
Lead	169	1	361 tons

	Quantity for the Six Months ended 30th June. 1864.	1865.	1866.
Cotton yarn	948,972	868,862	2,524,426 lbs.
Cotton manufactures	36,892,096	55,443,842	85,781,896 yds.
Worsted stuffs	6,462,870	8,240,445	10,902,616 „
Woollen and worsted cloths	837,762	794,394	957,737 „
Lead	3,687	930	4,083 tons.
	Value for the Six Months ended 30th June.		
Cotton yarn	£114,032	£82,217	£255,027
Cotton manufactures	1,022,244	1,245,853	2,155,377
Worsted stuffs	417,225	622,739	737,633
Woollen and worsted cloths	140,674	141,174	159,851
Lead	81,354	20,419	89,725

The Cotton Manufactures forwarded from the United Kingdom to other ports and countries in the Far East during the month of June, and their value for the six months of the respective years, are stated to be as follows:

	Quantity for the Month ended 30th June. 1864.	1865.	1866.
Ceylon	1,507,833	1,165,923	3,002,503 yds.
Singapore	2,210,763	6,755,397	3,187,675 „
Java	2,220,249	4,863,609	9,340,032 „
Philippine Islands	1,721,933	1,846,732	3,619,606 „
	Value for the Six Months ended 30th June.		
Ceylon	£236,718	£141,566	£277,818
Singapore	479,502	556,159	608,398
Java	389,179	343,442	676,846
Philippine Islands	332,091	375,829	312,468

Of Cotton Yarn the quantity exported to Singapore during June was 31,720 lbs., and during the six months 559,370 lbs., against 853,390 lbs. in 1865, and 512,308 lbs. in 1864. To Ceylon 219,824 lbs. were sent in June, and 344,978 lbs. during the six months, against 98,192 lbs. in 1865, and 104,100 in 1864. The value of the export for the six months is as follows:—

	Value for the Six Months ended 30th June. 1864.	1865.	1866.
Ceylon	£16,430	£8,390	£43,025
Singapore	61,803	79,667	60,609

IMPORTS.

The supply of Raw Cotton continues on the increase, though China still remains unregistered as an exporting country during the present year. The figures following exhibit the returns regarding this important raw material:—

From	Quantity for the Month ended 30th June. 1864.	1865.	1866.
Egypt	117,568	109,663	68,287 cwts.
British India	360,898	209,951	728,646 „
China	111,205	4,390	—
Total from all parts	790,304	471,831	1,677,672 „
	Quantity for the Six Months ended 30th June.		
Egypt	708,244	769,871	619,538 „
British India	1,608,773	1,135,842	2,378,199 „

FREIGHTS AND CHARTERS.

In outward freights we have but little change to notify; in charters there is now not much inquiry taking place, but a good many vessels have been taken up of late.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel. For Hong Kong: £43. For Galle: £35 10s. For Singapore: £33. For Shanghai: £53. For Saigon: £50. For Manila: £14. For Yokohama: £50. For Batavia: £1 12s. 6d. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Manila: £2. For Galle: £1 13s. For Singapore, £1 12s. 6d. For Yokohama: £2 8s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Batavia: £1 10s. For the Philippine Islands: £2 2s. 6d.

CASUALTIES.

The Singapore, Holjes, from Liverpool to Singapore, which sunk in Formby Channel on the 9th January last, and which was a short time back raised and beached half a mile higher up, has again been lifted and now lies dry at low water, but sustained considerable damage during the gale which prevailed on the 29th July.

According to advices from Pernambuco it is reported that the Severn (Brit.), bound from Newport to Shanghai, has foundered, and that the master and part of the crew were landed there 12th July, six seamen missing; also that the Lubeck vessel, Emma Mathilde, from Havana to Macao with coolies, had been lost near Rio Grande de Norte; no lives lost.

The Statesman, from Cardiff to Shanghai, which put in at Rio Janeiro on the 22nd May leaky, has been sold,

MISCELLANEOUS.

At Mauritius.—July 2, Erl King (st.), from Foo-chow-Foo (June 5th), and left 3 for London; July 1, Far East (str.), from Hong Kong, and sailed 7 for Algoa Bay.

Launches.—At Dumbarton, on Tuesday afternoon, Messrs. A. M'Millan and Son launched from their shipbuilding yard a splendid composite ship of 1,100 tons. This vessel has been built for John Kerr, Esq., Greenock, and was named the Ceylon by his daughter, Miss Isabella Kerr. The Ceylon is intended for the East India trade, and is to be commanded by Captain Colin M'Leod.—On Wednesday morning Messrs. Wm. Denny Brothers launched from their lower building yard a handsome iron screw-steamship, built for the Austrian Lloyd's Steam Navigation Company. She is 1,670 tons register, and is to be supplied with engines of 250 horse-power by Messrs. Denny and Co. This vessel is to be in all respects the same as the Apollo—built for the same owners by the Messrs. Denny—and was named the Diana.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility or REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and he works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessel tores, &c., when requiring to discharge them.

Amoy, March, 1865.

Now ready, 8vo, price 12s.

RUTTER'S METRIC SYSTEM OF WEIGHTS and MEASURES compared with the British Standard Weights and Measures in a complete Set of Comparative Tables; also, Tables of Equivalent Prices under the Two Systems, and of Chinese and Indian Weights compared with Metric Weights, &c.

By HENRY RUTTER,

Author of Exchange Tables and Arbitrations of Exchanges between England, India, and China.

Now ready, Ninth Edition, revised and enlarged, price 25s., cloth lettered,

RUTTER'S EXCHANGE and BULLION TABLES; being a complete Guide to Exchange Operations between England and the East, in sterling rupees, and dollars, extended so as to meet the requirements of Shanghae rates under any possible variation. To which is now added an Appendix, containing a guide o the negotiation of short-sighted Bills; with other information relative to Exchanges between England, India and China.

By HENRY RUTTER, late Agent of the Commercial Bank of India, Hong Kong.

London: Effingham Wilson, Royal Exchange.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a New Series of his useful productions, which, for Excellence of Temper, Quality of Material, and above all, Cheapness in Price, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing onegross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his Warranted School and Public Pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York; and 37, Gracechurch-street, London.

CODEIA LOZENGES.

THESE Lozenges have a remarkable effect in allaying Cough and Irritation of the Throat and Chest.

Prepared only by T. and H. SMITH and Co., 21, DUKE-STREET, EDINBURGH, and 69, COLEMAN-STREET, LONDON. In boxes at 1s. 1½d. and 2s. 9d. each.

HOLLOWAY'S OINTMENT and PILLS.—Outward Sores.—Daily experience confirms the fact which has triumphed over opposition for thirty years, that no means are known equal to Holloway's remedies for curing bad legs, sores, wounds, diseases of the skin, erysipelas, abscesses, burns, scalds, and, in truth, all cases where the skin is broken. To cure these infirmities quickly is of primary importance, or the compulsory confinement indoors weakens the general health. The ready means of cure are found in Holloway's Ointment and Pills, which heal the sores and expel their cause. In the very worst cases this Ointment has succeeded in effecting a perfect cure, after every other means had failed of giving any relief. Desperate cases beat discay its virtues.

WALKER'S CRYSTAL CASE WATCHES.

PRIZE MEDAL, 1862.

JOHN WALKER,

CHRONOMETER, WATCH AND CLOCK MAKER

(BY APPOINTMENT), TO THE

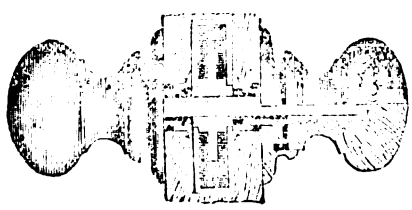
English, Indian, Foreign, and Colonial Railways,

68, CORNHILL, AND 230, REGENT STREET, LONDON.

J. W. SOLICITS the attention of Military and Naval Officers and the Public of China to his CRYSTAL CASE WATCHES, as they are especially adapted for foreign use.

The CRYSTAL CASE WATCH is so constructed that it entirely obviates the necessity of a Hunting Case Watch, as it is much stronger and cannot so easily get out of repair. Description Pamphlets with List of Prices on application.

THOMAS PUGH & CO.'S NEW PATENT ECONOMIC SELF-ADJUSTING MORTISE AND RIM LOCK FURNITURE.



J. B. SCAMMELL & CO.,

(Late THOMAS PUGH & Co.)

WHOLESALE IRONMONGERS,

13, KING-STREET, SNOW-HILL, LONDON.

We invite particular attention to the PATENT LOCK FURNITURE, which we do not hesitate to say is the most perfect article now manufactured, great improvements having been recently made in it. It has been extensively used in Public and Private Buildings, in Her Majesty's Pavilion and Camp at Aldershott—alone, many hundred sets without one single failure. It is applicable to all Locks and Latches, both Rim and Mortise, and effects a most secure fastenings without any screw in the neck of the knob.

New rich Designs in Glass, China, Brass, Bronzed, Gilt, Carved Woods, Inlaid, &c., &c., or to any Design.

THIS FURNITURE MAY BE HAD WITH PLATES OR NUTS.

A most complete and extensive stock of

SUPERIOR LOCKS, LATCHES, BRASS FOUNDRY, AND IRONMONGERY,

Required for Buildings, of the best quality manufactured, at the lowest wholesale prices.

☞ *Illustrations and Particulars sent on application.*

SCREWS, NAILS, PIPES, GUTTERS, AND BUILDERS' CASTINGS.

PATENT MORTISING MACHINES AND FLOORING CRAMPS.

Foreign and Colonial orders accompanied by a remittance, direct or through a London agent, receive the best attention

PEACOCK & BUCHAN'S COMPOSITION FOR IRON SHIPS.

THIS is now established as the best and cheapest Composition known for keeping the Bottoms of Iron Ships CLEAN and free from Corrosion or GALVANIC ACTION. Apply to the Manufacturers direct, at SOUTHAMPTON, or to their accredited Agents at all the principal sea ports of the world.

From Captain John Ralph Engledue, Managing Director of the Thames Iron Works Ship Building, Engineering, and Dry Dock Company, Orchard-yard, Blackwall:—

"The Thames Iron Works, Ship Building, Engineering, and Dry Dock Company (Limited),
"Orchard-yard, Blackwall, E., September, 26th, 1865.

"Messrs. Peacock and Buchan.

"Gentlemen,—I shall at all times have much pleasure in bearing testimony as to the value and superiority of your Compositions for Ships' bottoms.

"I have used the No. 2 extensively for the last fifteen years, more particularly on the bottoms of the iron ships belonging to the Peninsular and Oriental Steam Navigation Company, and in every instance successfully. It is easily applied, economical, keeps the bottom CLEAN, and also has the property of preserving the iron.

'I visited, in dock, an iron SAILING vessel, called the 'Chile,' a few weeks since, and found her bottom perfectly clean, which had been coated with your Composition for upwards of twelve months, having made a voyage to New Zealand and back, and in salt water the whole time.

'I have also used your No. 1 Composition for the bottoms of wooden ships, coppered, and found it most advantageous, making the copper last double the usual time, and then only taken off to recaulk.

"I have at various times tried preparations of copper on iron ships, and in every case found the iron and rivets damaged.—I am, Gentlemen, yours faithfully,

"(Signed) J. R. ENGLEDUE."

"Egyptian Navigation Company, Azeeziah Mussriah, 61, Mark-lane, 7th July, 1865.

"Messrs. Peacock and Buchan, 39, Upper East Smithfield.

"Dear Sirs,—I have received orders to send to Egypt three tons of your patent Composition for ships' bottoms, same as supplied me in July, 1864. I now wish to know the soonest time you could have this packed and ready for shipment, as there is one of the Company's steamers leaving London about the end of next week. Please reply by return, and state price.—I remain, yours obediently,

(Signed) D. ABDUL HAMID BEY,
"I. FRICKEN."

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms: a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Is a less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

DINNEFORD'S FLUID MAGNESIA

THE Medical Profession for Thirty Years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Headache, Heartburn, Gout and Indigestion; and as a mild aperient it is especially adapted for ladies and children. Prepared by

DINNEFORD & CO.,

CHEMISTS, &c.,

172, NEW BOND-STREET, LONDON

And sold throughout the world by all respectable Chemists

CAUTION.—See that "Dinneford & Co." is on each bottle and red label over the cork.

Per P. and O. steamer, from Southampton, Oct. 12.—To Ceylon: Sir John Cheape, Mr. Cheape, Capt. Allfrey.

Per P. and O. steamer, from Southampton, Oct. 20.—To Hong Kong: Mr. R. M. Stephenson, Mrs. Carnegie, Miss Kate Smith.

Summary of News from the Far East.

JAPAN.

Various contradictory rumours come to us regarding the impending civil war in Japan. The latest of these asserts that Choshiu had finally rejected the Tycoon's terms, being supported in that course by Satsuma. A telegram dated 13th July from Yokohama has been received in Paris which distinctly states that "Prince Nagato (Choshiu) has accepted the conditions imposed by the Tycoon." This date is just a month later than our mail news, and in that interval the position of affairs may easily have undergone a considerable change.

YOKOHAMA.

From this port we have only three days' later news, namely, to the 14th June. No events of importance had transpired in this short interval, and the state of affairs is thus briefly summed up in an "Extra" to the *Japan Times*:—

"We only publish the present sheet to draw the attention of our readers to the movements in the import trade. It is to be remarked that the deliveries now reported more than equal those of the whole of the last month. So long as the services refrain from exchanging, and the demand for native coin required for silk-egg buyers keeps up, ichibous are likely to be firm at our quotations, if they do not indeed advance in value, and prices of imports being broken down, we expect soon to have to report considerable sales, which though made at a great loss to the importers, will have the effect ultimately of restoring a healthy tone to our market. The Committee of the Chamber of Commerce are understood to be discussing the currency question. We formed an opinion long ago that there is but one course open to reformers of the existing abuses—the establishment of a mint and the adoption of the native coinage in our trade with the country. But due notice must be given of the change. The shock which would be felt by the immediate establishment of the new mint—or, what would be equivalent—fixing the rate of exchange for dollars into ichibous, until the new coin, whatever is to be its denomination, is ready—would be far too sudden and too great to be safe. We hear that some members of the committee, however, are in favour of such a course; we shall take an immediate opportunity of stating the views of the opposition.

"Troops, at the rate of two hundred a day, are pouring down the Tokaido to reinforce the Shogoon. The general commanding here, Kabuto Sentaro, is in Yedo despatching these forces. One of his colonels has already left and another is going immediately. Our report of a skirmish in which the Shogoon was worsted has been confirmed. There is no doubt now whatever that Satsuma is assisting Choshiu, both with men and money. In fact, it would appear that the Shogoon has been forced to fight, much against his will. No local incident of any importance has occurred since the departure of the French mail." General van Valkenburgh, the United States Minister to Japan, was daily expected, the vessel in which he took passage from San Francisco being overdue. The same ship conveys the Hon. Anson Burlinghame, United States Minister to Peking.

CHINA.

TIENTSIN.

From this port our latest advices are to the 13th June. The following is from Messrs. Platt and Co.'s Monthly Report :—

Since our last report we have received the English mails of the 10th and 26th March, and the 10th April, with telegraphic advices to the 28th idem, *via* India. *Via* Kiachta, telegrams have throughout the month come to private hands bearing later European dates than those received here from the south. By the Russian post we have communications with Kiachta four times a month.

Piece Goods.—Native merchants during the whole of last month forced sales in order to meet the bills drawn against their Shanghai purchases, which, together with the unfavourable telegraphic advices, occasioned falls in price day by day, and with few exceptions led foreigners to withdraw from the market.

Grey Shirtings.—As a daily fall in price led the way, natives having sold recklessly many of the large number imported, and as advices from the interior fairs are by no means encouraging, we fear our spring trade will close without any marked improvement in price.

Raw Cotton.—Export to date 75,205 piculs. The brisk trade going on at date of our last has now almost ceased, and as the want of water in the rivers prevents the forwarding of medicine and other native exports from the interior, the vessels now discharging cargoes of sugar find difficulty in procuring outward freights.

HANKOW.

A body of Mahomedan rebels are said to have made an irruption into Kansuh and captured and burned its capital. The Futai of that province has sent an officer to Hankow to purchase large supplies of arms and ammunition from Shanghai, to enable him to arm a force to oppose them. The *Hankow Times* mentions the opening of a new Roman Catholic Church at Woochang, at which a sermon was preached by an octogenarian Chinese priest, and a latin oration commemorative of the event was recited by one of the scholars.

SHANGHAI.

From Shanghai we have dates to the 23rd June, five days later than those brought by the French mail. Telegrams had been received *via* Kiachta from England to the 22nd May.

These telegrams, says the *North China Herald*, amply confirm the grave commercial intelligence brought by the French mail, and justify the apprehensions which were entertained that the failure of Overend, Gurney and Co. would prove a prelude to still more calamitous events. That a suspension for such an enormous sum as £15,000,000 should involve other banks in the crash was expected ; but the announcement of a crisis so serious that the Government should have deemed it necessary to suspend the Bank Act, surpassed the worst anticipations. An almost total cessation of business here must no doubt ensue. But this result will not be an unmixed evil. There is strong ground for congratulation that the crisis has occurred so early in the season, before the mercantile community here had had time to commit itself by large purchases of tea and silk at the exorbitant prices at which the markets opened. Persistence in buying at those prices could hardly have failed under any circumstance to entail heavy losses ; but large purchases, followed by such a crisis as the present, would have involved a crisis in Shanghai as great proportionately as that which has now produced a dead lock in London. As it is, those who were rash enough to purchase teas at the high prices at which the Hankow market opened, will probably be heavy losers ; but of these again a proportion are, we believe, houses which were rash enough to send high limits to their agents. Some of these will have strong reason to congratulate themselves on the loss of the *Guinevere*. Probably about sixty chops were bought at the absurd rates which ruled at the outset ; but of this half, a sixth have no doubt found a better market at the bottom of the Yantsze than would have awaited them in England. As it is, they have probably realised a small profit ; as it might have been, they could hardly have failed to realise a heavy loss.

The silk market has been opened in Shanghai with the purchase of No. 4 Nanzing Tsatlee at Tls. 425. A small parcel of No. 2 Kia-shing has also been settled at Tls. 375. It is inconceivable how, in face of so gloomy prospects, such excessive prices can have been given. If the news of the depreciation in silk which was received by the French mail, had failed to check the almost unprecedentedly high prices at which some 1,500 bales of the new season's produce had been bought in the interior, the subsequent telegrams should at least be effectual. Chinese officials and producers will both be disappointed in the brilliant hopes of squeezes and profits which the opening transactions must have awakened.

The present mail brings further particulars regarding the loss of the *Guinevere*. It appears that she was being towed astern by the *Glengyle* when she sheered on to a rock which stands about eighteen feet above the water opposite Wuchang-hein, and sank immediately. Only a portion of the stern remained above water, from which about 1,000 packages were recovered and placed on board the *Glengyle*. They were sold at auction by Messrs. Little and Co. on the 20th June, and realised their full values ; the sound lots averaging about 37 taels per picul, and the damaged chests proportionate amounts. The *Guinevere*, however, has been by no means singular in misfortune. The *Highflyer* grounded, both going up and coming down, and has returned to Shanghai and discharged her teas preparatory to going into dock. About fifty packages were more or less injured by her rolling while on shore. The *Min* also dragged her anchors a few days before leaving Hankow, and drifted on to the *Coulnakyle*, causing the latter such damage that she has been obliged to return to Shanghai empty for repairs, and is now in dock. The *Min* only lost her bowsprit, and left Woosung on the 14th. H.B.M. Consul at Hankow has, we hear, decided that each ship should pay for her own repairs. The *Sir Lancelot* will also, we understand, have to come to Shanghai to repair damages sustained through collision with the *Rona*, while the latter was attempting to take her in tow. It had been arranged that the *Fire Queen* should bring her down, but the latter's shaft which has recently been repaired is again out of order, and she was unable to carry out the intention. The *Sir Lancelot* may be expected by the first ship capable of towing her.

Up to the departure of the present mail, nine ships had gone up to load tea at Hankow, and five of these have thus already come to grief, the *Eliza Shaw* being, so far, the only one which has got safely down the river and sailed on her homeward voyage without accident. These facts have at last opened the eyes of the underwriters to the dangers of the river, and the rates have been at once raised from 1 per cent. to 2½, making the total rate from Hankow to London 6 per cent., or 1¾ per cent. higher than on teas brought down the river in steamers and transhipped at Shanghai.

The chairman of the Shanghai Chamber of Commerce has published a letter addressed to him by the Director-General of telegraphs in India, regarding the transmission of messages from China to England *via* Galle. All such messages, it is stated, must be prepaid ; and no inconvenience is anticipated from this rule as "most firms employing the line have correspondents at Galle." We differ from the Director-General. Very few firms in the north of China, at least, have correspondents at Galle ; and the inconvenience experienced in transmitting messages is therefore great. The only remedy would be to establish an agency at Shanghai, were charges could be prepaid.

The new tariff of taxes imposed by the Municipal Council of 1866 seems to weigh very heavily upon native shopkeepers, and may yet have to be abandoned. At the meeting held in May last to discuss the Municipal Budget, some of the proposed taxes were strongly objected to, but M. Morel assured the meeting that the Chinese to whom the new taxes would apply, were not only willing but anxious to pay the proposed sums. Doubts were expressed as to the correctness of the Council's information ; but the "extraordinary" Budget was passed notwithstanding, and measures have been taken to collect the sums voted. The result has been made apparent by the closure of nearly all the native shops in the concession, each and every shopkeeper declaring his inability to meet the impost, and his determination to leave if it were enforced. The crisis is rather a serious one, but it appears there can be only one of two solutions. Either the new taxes must be abandoned, or a greater or less exodus, and a serious depreciation of property, must ensue.

A new scale of wharfage dues has been adopted by the Municipal Council. To avoid confusion and difficulty in consequence of the varying value of merchandise, a fixed tariff of values of all the principal articles of trade at the port has been fixed upon by the Municipal Council and Chamber of Commerce in consultation, on which the 1-10th of 1 per cent. will be charged during the current year. In order to avoid all possibility of dispute, the lowest possible scale of values has been adopted ; opium, for instance, being assessed at taels 400 per chest, silk at taels 300 per bale, and tea at taels 30 per

Digitized by Google

picul. In case, however, either they or any other goods should undergo a material change in value, the tariff will be revised, and if necessary amended, at the close of every municipal year. Any articles not enumerated in it will of course be assessed on the value declared at the Custom-house.

A blow has been dealt to the system of excessive taxation on produce in the interior, which can hardly fail to prevent for the future the illegal squeezes that have so long been levied. Notwithstanding the provision in Art. XXVIII of the Tientsin treaty, that any foreign subject may convey produce purchased inland to a port, on payment of a single duty, calculated at 2½ per cent. *ad valorem*, and the further arrangement that this duty shall be paid at the port itself or the barrier nearest it, squeezes far in excess of this rate have been systematically levied and tacitly submitted to. In the solitary case of silk, we believe, have the stipulations of this article been adhered to, while in the case of tea and shirtings, notoriously, they have been utterly ignored. Efforts have been made at intervals to protest against the system, but without avail; the usual replies, that the case was under consideration or had been referred to Peking, having been the only satisfaction obtained. Especially during the season of 1864, the squeeze was energetically contested by Messrs. Little and Co. at Kiukiang, but without avail. In the present instance they have been more successful, for it is again to the same gentlemen that merchants are indebted for having, this time successfully, fought their battle. The facts of the case are simply these. Messrs. Little and Co. sent a Chinese agent, with duly signed transit certificates, to purchase teas in the neighbourhood of Hoochow. The teas were bought, and the agent started with them on his return to Shanghai. Arrived at Wokong, the first Customs' station he had to pass, he produced his transit certificates and claimed to be allowed to pass under them; but the officials refused to recognised the teas as English property, ignored the certificates, and insisted on levying the regular squeezes. Remonstrances were of no avail; the various sums of taels 12.5, tales 0.6, taels 0.4, and taels 0.134, amounting in the aggregate to taels 2.78, and equivalent to taels 3.50 on the net weight of the teas, had to be paid; and the name of the Chinese agent was inserted in the receipt, in lieu of that of the foreign hong. Having paid this double duty, the boats passed on until arriving at Namtao, where they were again stopped by the foreign Customs agent, and a further squeeze of taels 0.4 was demanded if the Chinaman passed them as his own, or the regular transit tax of taels 12.5 if they were declared foreign property, besides the rendition of all the receipts for the duties paid at Wokong. Pending compliance with both these demands, the boats were detained. Being now at Shanghai, however, the agent of course sought instructions from his employers before complying, and the latter referred the case to H.B.M. Consul. It is difficult whether most to admire the cool ignoring of the treaty rates and the transit certificates in the interior, or the consummate impudence of the demand at Namtao for rendition of the proofs of these illegal taxes, under pressure of detention. So palpable a breach of the twenty-eighth article of the treaty afforded an excellent opportunity for remonstrance; and, armed with the vouchers which the Customs agents had been so anxious to obtain, H.B.M. Consul wrote to the Taotai demanding the refund of the excess already levied over the stipulated rate, and the release of the teas which his agents at Namtao were detaining. Knowing, however, the skill in procrastination which the Chinese are capable of developing under such circumstances, Dr. Winchester determined to follow up the written remonstrance by a personal visit; and the result was completely successful. Beaten from point to point, confronted by written proofs of the exactions, the Taotai was compelled, after a sharp argument, to admit the illegality, and eventually consented to refund the sums extorted. The thanks of the community are due to the gentlemen who again agitated this matter despite previous disappointment, and especially so to H.B.M. Consul for the energetic determination with which he has pressed it to a conclusion. Now that the principle has been vindicated, we may hope not only that this important article in the treaty will not again be ignored, but that a correct interpretation will be insisted on, in respect of every other article of commerce brought from, or sent into, the interior

An amusing attempt at forgery came to light in the form of a cheque for tls. 81.25 on the Mercantile Bank, made out in the name of a foreigner, and purporting to be signed with his name Esq., payable to himself Esq., and endorsed on the back in the same way. This document being considered upon presentation as a little unusual, the person holding it was given in charge, and will be brought up before the mixed Court. It is not improbable that the forgery was the work of some office boy, who adopted this means of getting money out of some unsuspecting native banker or shroff who could read nothing more than the figures, and probably recognised the cheque as that of the Mercantile Bank. It should, however, be a warning to people to be careful with their cheque books.

Mr. Anson Burlinghame, the United States Minister to China had not arrived, but was expected daily, as the vessel by which his Excellency had taken passage from San Francisco to Yokohama was overdue at the latter port.

Intelligence has been received to the effect that Tseng-kwo-fan, who according to the last accounts, was in a perilous position in consequence of the Nienfei having almost succeeded in surrounding him, made a raid against them and encountered a band of some 4,000 strong not far from Tsing-kiang-pu in Khangsu, near the mouth of the Yellow River. The Imperial troops completely routed the Nienfei, and a large quantity of arms and accoutrements was seized. Accounts generally go to show that the war now being carried on in the North is entirely of a guerilla nature. The success seems to fluctuate, from day to day, and no decisive action has either taken place or appears to be contemplated on either side. Each party seems content at present to keep the other at bay.

Since the last European mail arrived, says the *Friend of China*, over two millions of dollars have been shipped south; and if there is to be a similar exodus of coin after the next arrival, such a vacuum will be created as to require the whole yield of the Hong Kong Mint; or, equally as useful in small change way, huge rolls of the Hong Kong and Shanghai Bank's new one-tael notes—the handiest media in local exchange ever seen.

Mr. M. C. Morrison, who lately performed an overland journey from Tientsin, has safely arrived and leaves for England by this or next mail.

The United States flag ship *Hartford* has arrived from Amoy. She is a vessel of 21 guns, and has no less than 400 men on board. The advantage which will be gained by the presence of the American naval force will no doubt redound equally to the advantage of other nations in China; as the moral effect upon the Chinese cannot fail to be productive of good, and tend to make them more desirous to respect the rights of all foreign subjects.

Two men named Johnson and Treasure have been convicted of robbing a Chinese boat up the country and have been sentenced to three years, hard labour in Hong Kong gaol. It is to be hoped the severity of the punishment will have the effect of checking the doings of rowdies up the country.

HONG KONG.

The dates by the present mail are to the 29th June. The latest mail outward was that of 17th May, arrived on the 28th June. On the arrival of the news of the stoppage of the Commercial Bank an unseemly conflict took place between the manager of the Commercial and Mr. Anderson, the manager of the Agra, which is thus noticed in the *China Mail*:—

"A novel incident in the history of banking occurred shortly after the steamer bringing the London mail of 10th May had anchored in the harbour, in a personal struggle between the representatives of these two banks in the portico of the Hong Kong Club for the possession of a bag of notes value $20,000. Efforts have been made to throw responsibility and blame on the Commercial, which we, having witnessed the whole affair, and knowing more than many of the surrounding circumstances, think entirely unmerited. Prompt determination, ready action, and manly vigour were displayed on either side at a most trying moment. Each was well assured that he was in the right, and forget in his haste that both were prompted by the same excited desire to do the best for those by whom they had respectively been placed in trust. Whilst blame and responsibility may possibly in the end rest upon either side which shall seek to make a quarrel of the matter, the credit of neither has been thus far injured, rather the reverse; each may rest satisfied with his relative position, and respect the other's mettle."

"We publish the following account of the Commercial and Agra Bank matter, as given by the gentlemen interested on the side of the former. We beg our readers to understand that we do not identify ourselves with either side of the question, and the legal proceedings about to be taken will doubtless satisfy the public mind as to the rights of the affair. "A lac of dollars was payable to the Agra Bank and a cheque given

Digitized by Google

in the forenoon in payment. A delay was caused in paying the amount owing to the refusal of the Agra Bank to accept the notes of the Hong Kong and Shanghai Bank. In the interval the mail arrived bringing news of the suspension of the Commercial Bank. When such information reached Mr. Anderson's ears he called at the bank and going into the Compradore's room was informed that part payment was being offered in Hong Kong and Shanghai Bank notes. He came to the office counter and addressing the clerk said that such notes would not be taken, and at that moment the compradore was instructed to stop all payments. Mr. Anderson, on being informed of this by the Commercial Bank's compradore asked one of the assistants if such information was true and on being referred to the manager went into his room, and afterwards rushed out through the office into the compradore's room and seized a quantity of notes lying on the counter, beside the Commercial Bank's compradore, that had been before refused by him, and made off with them. On the manager being informed of such proceedings on the part of Mr. Anderson a chase was made and Mr. Anderson was caught in the act or entering the club and compelled to give up the notes he had unlawfully possessed himself of. Mr. Anderson certainly resisted and a little force was used, but when he agreed to hand over the money to the police no further violence was used. Mr. Anderson was only compelled to give up by force what he had taken by force." [Mr. Anderson perhaps little thought how soon his own bank would follow the example of the Commercial.]

At the meeting of the depositors and others, creditors of the Commercial Bank Corporation of India and the East held, according to advertisement, at the office of said Corporation at Hong Kong, June 23, the following resolutions were adopted :—

"That in view of the satisfactory local statement which has now been laid before the meeting, it is for the interest of both the Commercial Bank Corporation and its creditors that no action be taken by individual creditors until the receipt of letters conveying information of the course determined on in London, and that in the meantime such funds as may be in the bank's hands be placed on deposit with the Honk Kong and Shanghai Banking Company." Proposed by G. Sharp, Esq., seconded by J. Mencke, Esq. ; carried by majority with only two dissentients.

"That in the event of any creditor taking legal proceedings against the bank, seeking priority of payment, the agent and legal adviser of the bank be requested to take such steps as may be necessary for preserving the assets of the bank for the general body of creditors." Proposed by A. Booth, Esq., seconded by D. Lapraik, Esq. Carried unanimously.

The first meeting of the Hong Kong Fire Insurance, under the management of Messrs. Jardine, Matheson and Co., has been held, at which it was determined to begin business at once, the Hong Kong and Shanghai Bank being appointed treasurers.

The Bank of India have closed their business in Hong Kong.

A new daily paper, styled the *Hong Kong Mercury*, has been established. We are not aware of its proprietorship or editorship, but it appears to be very creditably produced. This is the third daily paper and we doubt if there can be room for three in Hong Kong.

A farewell address was presented to Captain Nolloth, R.N., senior naval officer, on his departure for England. An extract says :—"During the five years which you have passed amongst us, your unvarying urbanity and kindness, both in your official capacity and in private, have alike conciliated our regard and won our esteem, whilst the anxious desire to promote the welfare of the seamen, whether belonging to the mercantile or to the naval branch of your profession, by which you are so eminently distinguished, will ever cause you to be held in remembrance by those who have enjoyed your acquaintance."

(FROM OUR OWN CORRESPONDENT.)

Hong Kong, June 28.

The arrival of the last mail, with dates from London to the 10th of May, and telegrams to the 30th, has not done more than inspire an intense feeling of uneasiness in the colony, without bringing sufficient data on which to base calculations of the actual losses which are known to impend. A telegraph which breaks off short in the midst of the crisis or catastrophe is almost worse than no news at all, and the feeling of uncertainty is further heightened by the alleged existence in the colony of conflicting messages, part of a highly gloomy nature and the remainder more encouraging. Up to the present, the only patent result of the news has been the suspension of the Commercial Bank, which took place immediately after the arrival of the steamer on the 21st inst., and which was marked by a curious fracas between the managers of that agency and of the Agra Bank, of which full particulars appear in the local papers.

Murder and piracy have been even more rife than usual during the fortnight, and the barbarous assassination of Mrs. Meyer, a young German female, with her child, in broad daylight, for the sake of obtaining possession of the paltry sum of $150, has filled the entire colony with horror and indignation. By an unusual display of activity on the part of the police the murderer was apprehended almost immediately.

Three audacious acts of piracy took place last week, the victims of which were a Hanoverian brig, the Danish schooner *Karl*, and the British barque *Cæsar*. All these vessels were plundered within fifty miles of Hong Kong by junks which were seen leaving the harbour just before the departure of the *Cæsar*. I have had some conversation with the captain of this vessel—a highly intelligent young man—who expresses the greatest mortification at having been captured and plundered of everything by "a set of miserable wretches," and attributes the disaster entirely to his having been unprovided with a proper number of rifles and boarding pikes. The two six-pounder guns he had on board were quite useless, as the junk, by her superior handiness, kept under his stern until close alongside, when she sheered around upon the barque's quarter and drove the crew from the deck by means of the inevitable stinkpots. Once able to board, the pirate's superior numbers of course enabled him to overpower the crew of the barque.

I am happy to be able to add that an Ordinance has been drawn up by Sir Richard Macdonnell, which is about to be submitted to the Legislative Council, with the view of putting an end to that astonishing system of encouragement to piracy which has prevailed at Hong Kong up to the present day. Every Chinese junk entering the harbour is hereafter to report herself to a harbour-master's station, to give an account of herself, her cargo and armament, and, if called upon, to find security for good behaviour, before receiving a permit to anchor. Your readers will, doubtless, in many cases express astonishment that only now should such a measure be proposed ; but the fact is undeniable that in the absence of all supervision and control the pirate junks have made Hong Kong their headquarters for a quarter of a century past, obtaining both information respecting the movements of vessels and all necessary supplies of ammunition within hail of Her Majesty's "vigilant" gunboats. In the case of the *Cæsar*, the captain assures me that he recognised several of the pirates as having come on board his vessel while she lay in Hong Kong on some pretext or other, undoubtedly with the view of acquiring an idea of her cargo and armament.

The Chinese authorities are, I hear, fortifying the island of Pak-shui, the occupation of which piratical haunt I mentioned in my last, and intend maintaining a permanent garrison there. Relieved as they now are from the incubus of universal rebellion, it is to be hoped that they will take some measures for raising their military system from the depth of inefficiency to which it has sunk, and the success which has attended the drilled corps of Chinese and Tartar troops, who were sent against the rebels north of Newchwang, will most probably go some way towards convincing the Central Government of the advisability of extensive reform. No sooner, however, has alarm subsided in the extreme north than the note of distress comes pealing from the western boundaries of the empire. The province of Kan-su is now declared to be overrun with Mahommedan banditti, who have taken and sacked the chief city, and bid entire defiance to the authorities. Thus in one division of the empire after another the military system breaks down on the first strain, requiring the lapse of years and the expenditure of countless treasure before "order" is restored by the help of enormous levies of useless irregulars.

One symptom of improvement which is beginning to be talked about is the institution of a squadron of Chinese gunboats in connection with the Government of each of the maritime provinces, which has probably been the result of the remonstrances of Sir Rutherford Alcock at Peking on the subject of piracy. The Chinese Government, however, appear wisely to have determined to avoid any approach to the Sherard Osborn scheme, by retaining the vessels to be employed under the distinct control of each provincial governor. Steps are already being taken in this matter at Foochow, and will, doubtless, soon be instituted at Canton also.

The Hong Kong Mint continues at work, although numerous difficulties have interposed since its opening. The late financial pressure has led to no small amount of the bullion already sent in for coining being removed by the banks. The dollar is not yet issued as currency.

PHILIPPINES.

MANILA.

The correspondent of the *China Mail* writes, under date June 6:—You might not be aware that a couple of months ago these islands were honoured with a visit from a real live Royal Prince, viz., the Duke of Alencon, who although only a grand nephew of poor King Louis Philippe, and without hopes of being any one more important than he is at present, still has royal blood coursing through his veins. This young Prince (for he is only 22 years of age) came out here to see these rich but sadly neglected islands, as some say; others are of opinion that his intention in paying us a visit was to have an engagement with some of the Moros or Malays inhabiting Mindanao and other islands adjacent, and, certain of victory, by this means to gain a certain decoration—the St. Hermegildo cross—which only can be obtained for bravely on the battlefield. Be that as it may, about a month ago the Prince with his secretary, accompanied by the sons of our Captain-General and the second in command, left this in the *Don Jorge Juan*, and a couple of weeks afterwards we were startled by the news of a great victory having been achieved over the infidels. After a little delay, which, as some wags say, was owing to the chief of the staff not being able to find words sublime enough in which to give the highest colouring to the description of this great event, the *Government Gazette* gave us the whole particulars of the affair. It seems that we had one officer killed, but not by being shot, but by having in assaulting a kind of fort surrounded by a little ditch, slipped his foothold, and not being able to extricate himself out of the mud in the ditch quick enough, was sunstruck, and died in consequence. Some twelve of the privates were more or less hurt, but their wounds were of no great consequence, as I heard from other officers present. But anyhow, the fort or whatever the structure might be called was captured and with it a brass eight-pounder, and some three more iron pieces of two and three pounds calibre; and as the Government report has it, the duke, his secretary, the son of the general and that of the second in command covered themselves with glory. These, as you will understand, were particularly mentioned in the report; but having had a conversation with some officers of very high standing who were present, understand from them that the whole affair was a mere farce, and that regular troops ought not to have been employed in it. Certainly here in Manila it is laughed at, and caricatures of the engagements are going the rounds, although as you may imagine *sub rosa*.

"I really think that these islands are under a curse, for what with earthquakes, fires, locusts, and typhoons we have been for the last three years terribly punished. From the first of these calamities we have not quite recovered ourselves, and it will take some time before we are able to do so. Atlhough most of the private dwellings destroyed by it have been rebuilt, still a stranger will see a great many ruins yet; on inquiring he will find that they belong to Government, which, owing to the very low state of the exchequer, is unable to undertake the rebuilding of its own effices and quarters. At present Government is trying to raise three millions of dollars, the half in a kind of public loan at 6 per cent. interest, with the receipts of the Customs as guarantee, the other half in, as I may say, a forcibly-voluntary manner, viz., by deducting 10 per cent. of the pay of all military, naval and civil officials whose salaries amount to over a thousand dollars a year, for which they will likewise receive 6 per cent. interest, and by a contribution of $200,000 to be paid by all householders together, for which they are likewise to be allowed interest. But of this I will speak more at length in my next. From fires we have likewise suffered a great deal, and last year particularly. But it seems that we have not yet had enough of this terrible scourge, for on the 2nd of this month, at half-past 10 o'clock at night, the bells of the different churches informed us of a fire raging on Trozo. Living in the neighbourhood, I dressed myself and went towards the place, and found the whole village, composed of mat covered and bamboo-constructed houses, in a blaze. When I first arrived there were but few people present, and those almost all foreigners, the Indians having all deserted their own dwellings *en masse*. A splendid new brick building just about finished was then still standing, and could have been saved if we had had at the time a few axes amongst us, but none were to be obtained; and although we did our utmost in tearing down houses to save the brick building, all our efforts were in vain, and much to our sorrow we saw the fine structure destroyed. The fire continued raging till five o'clock in the morning, and on the third evening, taking a stroll through the houseless streets, I could see the embers still ablaze.

"I suppose through this fire about 30,000 people have become houseless. Government is trying in a very praiseworthy manner to banish the 'nipa and cana,' or, as you may term it, matsheds, from the vicinity of more valuable buildings, but the people here are so careless that if it is even prohibited to build nipa houses in certain situations, the owner of a brick building will not in the least interfere if an Indian erects his nipa house next door. The result of his carelessness is that in a short time he will see himself surrounded with a nipa village."

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 7th July. The London mail of the 26th May arrived out on the 28th June.

Great satisfaction is expressed at the receipt of intelligence that the Straits Transfer Bill would be pushed through Parliament during the session.

The failure of the Agra and Masterman's Bank following so rapidly upon that of the Commercial, says the *Straits Times*, has produced paralysis of trade here quite unwarranted by the experience of the past twelve months, which has exhibited even more than the ordinary measure of successful commerce. There is no doubt that the condition of mercantile affairs both in India proper and in China, and which is said to have contributed so largely to the embarrassment of the banking institutions named, has been the cause of some measure of loss to the merchants of this place; but directly, this is slight, and considering that our staple trade both in exports and imports is equally independent of India and of China, forms no sort of grounds for the apprehensions which at present exist.

The Governor left on the 5th July for Penang and Malacca, on his yearly visit of inspection.

H.M.'s steamer *Salamis*, Captain Suttee, from England *via* Galle, anchored in the harbour on the night of the 20th June, with dates from Galle to the 15th.

The Nacodah Hadjee Ishmael and crew of the Dutch schooner *Boeroeng Laut*, from Singapore to Pontianak, were attacked during the night by twenty Chinese passengers off Tanjong Niang (Linga), after being two days at sea. Only one boy, called Lanpo, escaped by swimming till daylight, although wounded, when he was picked up by the Dutch barque *Annetta*. The rest were all murdered. It is said there were ten chests opium and 8,000 dols. on board the *Boeroeng Laut*, besides other cargo. When last seen the piratical passengers were steering north. The Resident of Pontianak, hearing the news, sent H.N.M. steamer *Celebes* over to look after the schooner and sent the boy Lanpo over to the Dutch Consul at Singapore, to identify the Chinese if caught.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Bonham-Carter—On the 11th Aug., at 91, Gloucester-terrace, Hyde-park, W., the wife of Henry Bonham-Carter, Esq., of a son.

Daly—On the 8th August, at 89, High-street, Wandsworth, the wife of Mr. Robert Daly, of a daughter.

Gordon—On the 13th June, at Hankow, the wife of G. Grant Gordon, Esq. (late captain Royal Artillery), of a son.

Levick—On the 23rd July, at Hill House, Southampton, the wife of Henry Levick, Esq., H.B.M.'s Postmaster, Suez, of a daughter, stillborn.

Love—On the 10th June, at Shanghai, the wife of Joseph Love, junr., Esq., of a son.

Moyle—On the 25th June, at the Sailor's Home, Singapore, the wife of Captain J. M. Moyle, superintendent, of a son.

Preston—On the 20th June, at Canton, the wife of the Rev. C. F. Preston, of a daughter.

Roberts—On the 26th July, at Ramleh, Alexandria, the wife of W. H. Roberts, Esq., Agent of Peninsular and Oriental S.N. Co., of a son.

Sichel—On the 11th Aug., at 2, Sutherland-gardens, Maida-vale, the wife of E. F. Sichel, Esq., of a daughter.

Trollope—On the 26th July, at 19A, Grosvenor-square, the wife of M.-General Trollope, C.B., of a daughter.

Thompson—On the 14th June, at Hong Kong, the wife of George Thompson, Esq., of a son.

Varco—On the 11th Aug., at Darent-villa, Denmark-hill, Mrs. W. B. Varco, of a son.

Wilson—On the 26th July, at Wimbledon, the wife of Craven Wilson, Esq., late of China, of a son.

Wheeley—On the 8th June, at Shanghai, the wife of A. A. Wheeley, Esq., of a son.

MARRIAGES.

Bates—Aldrich.—On the 9th Aug., at St. Matthew's, Ipswich, by the rector, the Rev. C. H. Gaye, M.A., the Rev. Alfred Naunton Bates, M.A., rector of Blaxhall, in the county of Suffolk, to Emily Edith, youngest daughter of the Rev. John Cobbold Aldrich, M.A., incumbent of St Lawrence, Ipswich. No cards.

Bowra—Woodward.—On the 15th August, at Brompton, by the Rev. W. Dunford, E. C. M. Bowra, Esq., Interpreter Imperial Chinese Customs, to Thirza, daughter of the late S. Woodward, Esq., of Calcutta, and niece of Sir Edmund Temple.

Digitized by Google

CAULFIELD—MACGREGOR.—On the 26th July, at St. Luke's Church, Jersey, by the Rev. Edw. Guille, Henry Caulfield, Esq., late Royal Bengal Fusiliers, to Frances, eldest daughter of Lieut.-Colonel Malcolm MacGregor, unattached, late 21st Royal North British Fusiliers, and granddaughter of the late Malcolm MacGregor, Esq., Her B.M.'s Consul at Panama. No cards.

DEATHS.

CAROL—On the 30th June, at Singapore, suddenly, Charles Carol, well known in this place as the Tiger Hunter.

FARR—On the 24th June, on board the P. and O. steamship Ottawa, at Hong Kong, John Farr, second steward.

GLASSON—On the 22nd June, at Hong Kong, Joseph Glasson, boiler maker, late Aberdeen Dock.

GODBY—On the 20th June, at the North Barracks, Hong Kong, Louisa Godby, Royal Artillery, aged 1 year and 7 months.

HALE—On the 1st July, at Singapore, Mr. William Hale.

HARRIS—On the 22nd May, at Ellena, Kimanis River, Borneo, in the 40th year of his age, Thomas Bradley Harris, Chief Secretary of Ambong and Maroodu, and at the time of his death administering the government of that colony. A native of the State of New York, U.S.A., and for several years resident of Hong Kong.

OTTEN—On the 18th June, at the German Foundling Hospital, Hong Kong, Loisa, wife of Mr. Otten, tavern-keeper, Queen's-road, West, aged 41 years.

PRITCHETT—On the 21st June, at Spring-gardens, Hong Kong, Elizabeth, wife of Joon Pritchett, deputy-foreman Hong Kong Mint, aged 29 years.

REYHNVAAN—On the 20th June, at Mosque-terrace, Hong Kong, Clara Adelheid, the beloved wife of Mr. Reyhnvaan, aged 22 years.

SCHWAFFIELD—On the 20th June, at Hong Kong, on board H.M.S. Melville, Thomas Schwaffield, seaman, late of H.M.S. Princess Royal, aged 20 years and 6 months.

TAYLOR—On the 18th June, at Hong Kong, Louisa Mary Taylor, 20th Regiment, aged 2 years and 2 months.

WAKE—On the 11th June, at the Seaman's Hospital, Hong Kong, George Wake (mate), late of barque Jelly.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight.	4s. 6¼d.	4s 7¼d. to 4s 7½d.
At Shanghai	6 ditto	6s. 0d.	6s. 4d. to 6s. 6d.
(per Tael.)			
At Canton, At Hong Kong, At Macao	6 ditto	4s. 5d⅞.	4s. 6d. to 4s. 6¼d.
At Singapore	6 ditto	4s. 4¼d.	4s. 5d. to 4s. 6d.
At Manila	6 ditto	4s. 4d.	4s. 4d. to 4s. 5d.

At Shanghai, Bills on India, Rs. 297 per 100 taels. At Hong Kong, Rs. 216, to 217 per $100. Bar Silver at Shanghai, 111 taels; at Hong Kong, 10¾ per cent. prem. Mexican dollars at Shanghai, taels 72-3 per 100; and Exchange on Hong Kong, 27 discount. Hong Kong and Shanghai Bank Shares, par to 3 dis.; Gas Company, 20 per cent. prem.; Hong Kong and Whampoa Dock, 40 per cent. prem.; Steam Shares, 30 per cent. discount; Union Dock Company, 10 per cent. dis.

On arrival of the English mail at Shanghai the Banks refused to name their drawing rate, and one of them began purchasing private bills at 6s.; after it was satisfied a rapid advance took place to 6s. 2d. to 6s. 3d., at which a considerable business was transacted. The rate had been very unsteady throughout the fortnight, as none of the banks would draw over 6s. 0¼d. A large quantity of silver had been sent away by the last three steamers to Hong Kong, and further shipments were going forward. The latest telegrams from Shanghai are to the 18th June, giving Exchange at 6s. 4d.

The following is from Messrs. Sharp and Co.'s Bullion Circular:—

GOLD.—Since receipt of the mail news on the 21st June the price for Gold Leaf has fallen a little; the value of Bar is still maintained. The arrivals have been $240,000 worth, and the exports $580,000, inclusive of the shipments per Northam on the 13th June.

SILVER.—$1,100,000 worth has been received, and $1,280,000 sent way. A large portion of this has been in transit from Shanghai.

DOLLAR CURRENCY.—Inwards $1,330,000, outwards $3,230,000. Of the latter 9½ lakhs have gone up the Coast, and the rest to India.

We should be glad to see our own local Mint as fully at work as those of Calcutta and Bombay.

DISCOUNT AND MORTGAGES.—The effect of the commercial panic at home is being injuriously felt here at present, for though the rate of interest is not materially higher, really good securities have in many cases been refused, and loans are arranged with difficulty.

EXCHANGE.—Sterling rates remain much as last quoted, with the exception of Bank bills which have receded, a wider margin than usual being insisted on. A better business has been done than might have been expected but many drawers hold back upon the news from home. The rupee demand has been very small.

SHARES.—The transactions have been but few and mostly confined to forced sales which have tended slightly to lower rates.

COMMERCIAL REPORT.

CHINA IMPORTS.

HONG KONG.

There has been much more activity in the market for Cotton manufactures than for some time reported, although to effect sales holders have been obliged to submit to a great reduction in price; in view of such very large arrivals, however, this can only have been expected. It will be noticed that settlements both of yarn and grey shirtings are on a larger scale than have been reported for more than two months.

WOOLLENS.—There is still nothing doing and rates are rather weaker, the Chinese, however, have shown a little more inclination to become buyers.

RAW COTTONS.—A demand has sprung up among natives and large sales have been effected at slightly improved rates, Tientsin staple being principally inquired for. The stocks in Shanghai and Tientsin are now said to be exhausted, and an improved market may therefore be looked for.

METALS.—Iron continues scarce and rates are well maintained. Lead shows a considerable decline.

COALS.—There have been several arrivals during the fortnight, some for private consumption and others to supply the market, the latter however having been sold to arrive he only sales to report are of two cargoes of Formosa coal at $9 and $10 respectively—these rates fully support last quotations, but in view of a good supply near at hand the market may be called a little weaker. Very little Bristol Channel Coal is on the way however, and for this holders are very firm, while buyers are willing to offer from $½ to $1 more than for West Hartley.

CHINA EXPORTS.

TEA.—Operations continued at the high opening rates until receipt of the late monetary advices from London which instilled more caution in the minds of the exporters, and the arrivals from the country continuing large the dealers are anxious sellers, so that rates tend palpably down. From all appearances the season's yield is large and good.

CANTON.—During the fortnight a considerable business in Scented Teas has been transacted at a reduction of about four taels in favour of buyers; this is to be attributed to the very discouraging news which came to hand by the London mail of the 26th April, which caused a sudden cessation in operations on the market; the leaf had been accumulating, and consequently the teamen became anxious to place their teas, thus within a week they gave way, and so the decline above mentioned was established.

AMOY.—The prices asked now by teamen are somewhat lower but are still considerably above home values. Arrivals to date are:—10,834 packages Congou, 2,459 packages Oolong, and 160 packages Orange Pekoe, against 5,294 packages Congou, 1,472 packages Oolong, and 435 packages Orange Pekoe, to same date last year.

FOOCHOW.—After the departure of last mail an active business was done in all kinds of Congou from Common Dust at taels 8.7 to finest Kaisow at taels 46. This continued until the English mail of 26th April arrived bringing the news of a monetary crisis in London. During the following two days no business was done, but on the third, when the teamen showed a disposition to accept a reduction of four taels on finest teas, and nearly as much on the lower kinds, there were many eager buyers; and the prices speedily rose to within about 2 taels of their former level. Settlements of common teas have been largely made for Australia and little good Common remains on offer. The market has been cleared of the finest grade for England.

SHANGHAI.—The London mail of 26th April with telegrams to 16th May, arrived on the 11th instant. The news received, reporting war imminent between Austria and Prussia, the failure of Overend, Gurney and Co., and of two banks not named, and a general panic necessitating the suspension of the Bank Charter Act, has had a very serious effect, and the market for new tea remains unopened. The export of teas from this port and Hankow to Great Britain is about 1,000,000 lbs., and to America 1,500,000 lbs. below last year's to same date. Black Teas: No settlements have taken place, the majority of credits being for the moment unavailable. The usual bank facilities having been withdrawn, holders cannot obtain advances on their stocks, and it is expected that a low range of stocks, and it is expected that a low range of prices will be shortly established. Only about 15 chops are on offer, none really fine, most of them are only of medium quality. Total settlements, with re-shipments from Hankow, from 1st June to date, 23,400 chests against 7,600 chests last year. Green Teas: There has been no business done in these descriptions, only 265 ½-chests have been shipped, and the stock consists of about 1,000 ½-chests. Advices from Ping Suey state that the yield is a large one, but as packers have been unsuccessful in obtaining advances for the purchase and preparation of the leaf, very few firing hongs are engaged, and it is supposed that a large quantity of tea will not be gathered. Good average crops are said to cost tls. 40 proportion laid down here. Arrivals may be expected in about three weeks. Total settlements: with reshipments from Kiukiang from 1st June to date, 265 ½-chests, against 3,600 ½-chests last year.

HANKOW.—Transactions had continued to a large extent on the same scale as opening rates, some 40,000 chests finding buyers at taels 34 to 41½ for Oopack, and taels 24 for Oonams.

KIUKIANG.—Black Teas: On the 2nd instant two chops of flavory Hohow (Kaisow kind) were purchased at 32 tls. per picul, but no settlements of Ningchow took place until the 12th, when three parcels found a buyer at 33½ tls. proportion. Since then 10 chops had been settled at at from 33 to 40 tls.; prices about 8 tls. higher than last year's opening rates. The leaf is considered inferior to last season's but the liquors show a decided improvement. The mail news of 26th April had put a stop to purchases. Arrivals had been small, but large supplies were shortly expected. Settlements for the fortnight, 3,200 chests at the following prices:—Hohow, fine to finest, 28 to 32 tls.; Ningchow, fine to finest, 29 to 40 tls.

YOKOHAMA.—Since the departure of last mail no very great amount of business has been done in the Tea market. In New Teas about 440 piculs have been settled at from $30 to 31 per picul, the grade is good medium to fine; after most of these settlements were made, the teamen advanced their ideas as to price, and several parcels were withdrawn, which checked any large operations on the part of foreigners, while the stock, which is increasing each day, is likely to exceed the demand, and consequently no advance in rates is looked for. In Old Teas about 160 piculs have been settled on rather easier terms.

RAW SILK.—The quantity of raw silk taken to Europe by the present mail is 1,649 bales, 1,341 bales for Southampton, and 308 for Marseilles.

CANTON: The news from Europe has been so discouraging to buyers that no transactions in the new crop are reported to have taken place since operations ceased on the part of Parsee houses, and prices are gradually declining. The second crop is now coming forward, and a still further reduction is looked for. The quotations are: Loong-kong, No. 1, $470 per picul.

SHANGHAI.—This market cannot yet be said to be thoroughly opened, though a few small purchases are reported, at a price equal to 420 to 430 tls. for No. 4 Tsatlees. Settlements must amount to from 1,500 to 2,000 bales since the 1st instant, being composed almost entirely of contracts, country purchases, and shipments on native account. Chop Tsatlees are costing in the country about 450 tls., and are offering on this market at about the same price, but buyers are not inclined to operate at over 420 to 430 tls., and at these rates not to any large extent. Kah hing-Taysaam, No. 1, is quoted at 400 tls., and Haining, No. 1, at about 420 tls. nominal.

YOKOHAMA.—The downward tendency of the prices of certain classes

Digitized by Google

of silk, and subsequently the news brought by the mail of the 10th of April, had caused some animation on the market when the arrival on the 8th of the French mail of the 17th April had the effect of almost entirely stopping business. It appears that, owing to the partial failure both of the silk worm's eggs reproduced at home and of a large portion of those which were exported last year from this country, the expectation which was hitherto entertained of a largely increased crop in Europe will to a great extent be disappointed. However, the probability of a war in Europe too heavily counterbalances the weight of such conclusions as may be derived from the above facts, not to induce buyers to suspend their operations until news of a more definite character reach this port. Settlements during the past fortnight amount to about 300 piculs, and the unsold stock may be estimated at from 700 to 800 piculs. The Japanese persist in their report that the frost at the beginning of May, and the continuance of inclement weather ever since, will be found to have had a damaging effect on the crop of this year, chiefly in the districts of Joshiu and Sinchiu. They will decline entering into contracts for Silk-worm's eggs, and expected very high prices for the articles which, probably, will not appear on this market in any large quantity before the 15th July. Settlements since the 1st July amount to 11,250 bales, against 16,150 bales same time last year. The quotations, which are quite nominal, are as follows:—Ida, inferior, 580 dols. to 620 dols.; Mybash and Sinchiu, medium, 700 dols. to 740 dols.; inferior, 650 dols. to 690 dols.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Liverpool: May 31, Eclipse. Reported per telegram from London: Isles of the South.

At SHANGHAI.—From London: June 8, Star of China. From Liverpool: 19, Vigil. From Sunderland: 13, Abbott Lawrence; 18, Knight of Snowdon. From Newcastle: 20, Maggie Leslie. Reported per telegram: From London: Westminster, Dunkeld, Dartmouth.

At HONG KONG and CANTON.—From London: June 20, Ellen Roger, Seawfell; 21, Mary Nickelson; 26, Melbreck; 27, Kelso. From Liverpool: 21, Avon; 27, Veronica, Corrientes. From Cardiff: 16, Royal Minstrel; 20, Bella. From Swansea: 20, Visceta. From New York: 26, Golden State. From England: Douglas (str.).

At MANILA.—None.

At SINGAPORE.—From England: June 20, H.M.S. Salamis. From London: 24, Florence Nightingale; 28, Frederika. From Liverpool: 22, Addison; 27, Chili. From Sunderland: 21, Castilian. From Newcastle; 24, St. Oswin; 25, Gesine Brous, Holland; 27, Paul Johan. From Glasgow: 28, Edinburgh Castle. From New York: 25, Varuna (str.).

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London: June 20, Ethiopian.

From FOOCHOW.—For London: June 6, Ada, Belle of Southesk; 7, Falcon; 12, Yangtsze; 14, Tamana; 19, Feronia.

From HONG KONG and CANTON.—For New York: June 24, May Queen.

From MANILA.—For London; June 7, Oithona. For New York: 6, Castleton.

From SINGAPORE.—For London: June 27, Winona. For Bordeaux: 24, Immaculee.

From PENANG.—None.

VESSELS LOADING.

At YOKOHAMA.—None.

At HANKOW.—For London: Hoangho (engaged full), Napoleon III., Fire Queen, Gossamer.

At SHANGHAI.—For London: City of Aberdeen (under despatch), Cinderella, Burdwan, Fusi Yama, Pakwan, Illimani, John R. Worcester, Vigil, Coral Nymph, Star of China.

At FOOCHOW.—For London: Laurel, Lennox Castle (full), Dewa Gungadhar, Scindia, Amber Witch, Orante, Sovereign of India. For Liverpool (expected), Everest.

At HONG KONG and CANTON.—For London: Alma, Island Queen. For New York, Music.

At MANILA.—For Falmouth: Zwaan, George Every. For Cork, Equinox, Theresa. For New York, Sailor Prince, Sooloo, White Swallow.

At SINGAPORE.—For London: Yuh Shing, Dovercourt. For Liverpool River Eden, Harry Puddemsey, Edinburgh Castle.

At PENANG.—For London: Balaklava, Oribe, Benvenue.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and Tea £2 10s. to £3 per ton. Silk: £4 to £4 10s.

At HANKOW.—To London: The rate is £6 10s. per ton of 50 cubic feet.

At SHANGHAI.—The Ethiopian and City of Aberdeen both get £5 per ton to London, but the rate for other vessels is £4. For coasting purposes there is less demand and rates have declined.

At FOOCHOW.—To London: £3 to £4 per ton.

At HONG KONG and CANTON.—In home freights nothing of importance has occurred, the Alma takes the berth at Whampoa at £3 10s. per ton; for the coast rates are low with little doing. The circular of George Holmes estimates the number of disengaged vessels in harbour at 90 (exclusive of Siamese), representing 43,557 tons.

At MANILA.—To United Kingdom, £3 5s. for unclayed sugar. To New York the White Swallow takes 500 tons clayed sugar at £2 5s., and fills up with hemp on owner's account.

At SINGAPORE.—The freight market generally is dull. To England rates remain unchanged at £2 per ton dead weight, £2 10s. light cargo. Produce for shipment scarce.

VESSELS PASSED ANJER.

From ENGALND and CONTINENT to CHINA, &c.—Caldew, from Sunderland to Hong Kong; Stanley, do.; Runnymede, do.; Favourite, London to Hong Kong; Vicksberg, Shields to Hong Kong; George Raynes, do.; Ceylon, Liverpool to Hong Kong, William Mitchel, Cardiff to Hong Kong; Congress, Newport to Hong Kong; Edith Banceilor, from Liverpool; Ocacia, London; Pauline, Arabia, Cardiff, Toderte-linde, and Newcastle, all to Shanghai; Chili, Liverpool; Florence Nightingale, and Frederica, London to Singapore; Lorton, London; Recife, Liverpool to Yokohama; 20, Joven Thomas, Newport to Hong Kong; St. Peter, Landberg, Liverpool to Batavia; 22, Pacahontas, Cardiff to Hong Kong; 23, Nagasaki, Rotterdam to Samarang.

From CHINA, &c., to ENGLAND and CONTINENT.—June 22, Serica, Taitsing, Foochow to London; 24, Patriot Queen, Singapore to Liverpool; Kung Mun, Macao to London; County of Renfrew, Sourabaya to Rotterdam; 26, Martinho de Mello, Macao to Lisbon; 29, Alfred Ray, Singapore to Bristol.

From UNITED STATES to CHINA, &c.—June 20, Ocean Rover, Boston to Batavia; 22, Supply, New York to Macao; Christopher Hall, New York to Hong Kong.

REPORTS, CASUALTIES, &c.

HONG KONG.

The steam ship Douglas left Aberdeen on February 26th, and on the 3rd of March, while in the act of disconnecting, a sea, striking the propeller, broke the shaft; bore up for Gibraltar and arrived on the 8th, when, after a detention of twenty days and receiving a new shaft from England, she proceeded on her voyage and arrived at Singapore on the 13th June; left again on the 19th with a full cargo and 150 Chinese passengers. The Douglas is the first iron screw steamer built at Aberdeen by the well-known and long-established firm of Messrs. Hall, and is intended to run in conjunction with the steamer on the Foochow line. The Douglas is 615 tons new register, 160 nominal horse power, and has sleeping berths to accommodate 200 Chinese on her main deck, with superior accommodation for first-class passengers. She is commanded by Captain R. E. Baker, formerly of the Undine.

The British ship Ellen Rodger left London March 10th, had N.E. winds fresh, after leaving the Channel severe gales from westward, the barometer 28-70, the gales continued after passing Madeira Island, being obliged to pass 150 to the east of it. The N.E. trades very light and variable April 4 crossed the equator, long. 24 12 W. the south-east trades fresh and steady very far south. Mostly fine weather from the Sun to the Cape of Good Hope, with the exception of a heavy S.E. gale which lasted three days. April 29th pass the meridian of the Cape between the Cape and Amsterdan Island, experienced heavy gales, barometer very low at times, much lightning and thunder. Made Java-heads May 26th very light and variable wind, in the China seas fine weather.

(Reported by Telegram.)

The Fairlight, Hong Kong to San Francisco, lost on the Majacosima Group.

The Petronella, London to Sourabaya, is stranded and waterlogged near Booinjes Island.

COMMERCIAL POSTSCRIPT.

Intelligence has been received of the loss of the Bremen ship *Libelle* from San Francisco to Hong Kong, but we can find no account of it in the Hong Kong papers. She left San Franciso 23rd January.

The Erl King (str.), Foochow to London, arrived at St. Vincent, Cape de Verds on 6th August.

A clipper ship, of 394 tons, the property of Messrs. Glover Bros., of Aberdeen and Japan, named the *Kagosima*, to trade between China and Japan, was launched from the building yard of Messrs. Jno. Humphrey and Co., of Aberdeen.

The Herald, from Shields to Hong Kong, put into Port Elizabeth on the 8th June with master (Storey) dead, another master (Thorpe) has been appointed.

The Lockett, from Shanghai to Liverpool, which was spoken 16 July, 22 S., 2 E., had experienced heavy weather off the Cape of Good Hope had been on fire, and struck by lightning, without however having sustained much damage.

LAID-ON.—At Glasgow for Singapore and Penang: James Paton. At Liverpool for Shanghai: Maiden Queen.

CASUALTIES.—H.M.S Leopard arrived in Simon's Bay reports that on the 25th June, in lat. 33, S. lon. 28 E., she spoke the Dutch barque, Aqua Marina, from Cardiff to Singapore, which vessel had sprung a leak.

The following vessels, which put into Algoa Bay with damage, are discharging there: the Margaretha Simonetta, from Cardiff to Singapore; the Raleigh Dobson, from Colombo to London, cargo much damaged; and the Winklow Foster, from Sunderland to Saigon.

ARRIVALS NOT INCLUDED IN THE TABLES.—Aug. 14, off Torbay, from Batavia, Cornelis Wernard Eduard; 16, at Plymouth, from Colombo, Star of the North; at Liverpool, from Akyab, Francis A. Palmer; 18, at London, from Colombo, East Lothian; 15, at Queenstown, from Akyab, Levant; 17, from Akyab, Maritana and Astrea; from Batavia, Betty Ricker; 18, at London, from Colombo Cuban; 15, at St. Nazaire from do., Ploermel; 18, at Falmouth, from Rangoon, Pioneer; from Bassein, Catharina Cecile, John Ritson; from Akyab, Anna Helena, Julia Kelly, Corinne; at Liverpool, from Rangoon, Bayard; at Queenstown, from Akyab, Canute.

DEPARTURES.—August 17, from London, for Swansea and China, Fort Regent; 15, from Cardiff, for Yokohama, Sea King; 16, from London, for Hong Kong, Boanerges; 18, for Shanghai, Silver Eagle; 16, from Newport, for Singapore, Constance; 14, from Clyde, for Batavia, Country of Lanark; 20, from Liverpool, for Galle, Mikado; for Singapore, Sophie.

The West Wind, Blandford, from Cardiff to Shanghai, put into Mauritius on the 11th July, making much water and with loss of nearly all her sails and about 40 tons of coals thrown overboard, and was discharging.

The Henriette v. Harten, from Singapore to Hamburg, put into Mauritius 13th July, having sprung a leak and carried away rudder and bulwarks.

The Argo, Andringa, from Batavia to Holland, put into Mauritius 14th July, with loss of rudder head, bulwarks, sails and a boat.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A Register is kept of the addresses of all persons connected with the Far East and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in China, Japan, Singapore, *and other parts of the* Far East, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the Far East.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, MONDAY, AUG. 20, 1866.

THE REPORT OF THE MORTALITY COMMITTEE.

The Select Committee obtained by Colonel North to inquire into the causes of the terrible mortality among our troops at Hong Kong has issued its Report, the tenor of which we regret to say is very far from being satisfactory. This unfortunate result we are bound to say is in no way attributable to any shortcomings on the part of the gallant Colonel, whose indefatigable assiduity as Chairman of the Committee deserves the highest praise; but the remaining members, fourteen in number seem to have been almost equally divided into two parties, one of which insisted on throwing the blame entirely on the War-office, while the other was equally determined that it should rest on General Guy and the local authorities. The Committee sat nineteen times and examined a large number of witnesses, including the Duke of Cambridge, Sir Edward Lugard, Sir Hope Grant, Colonel Sankey and Captain Burland of the 9th, Colonel Jenner of the 11th, and Dr. Snell of the 99th Regiment. When the evidence had been duly considered, the Chairman and Lord Hartington each pre prepared a draft Report, and these being read at a full sitting-seven members voted in favour of each. The Chairman of course gave the casting vote in favour of his own draft, which was thereupon proceeded with, but was during subsequent sitting, altered and "amended" until it gradually lost all semblance of its former self, and, we may add, nearly all its usefulness into the bargain. The Report in its published—and mutilated—state commences with a recapitulation of the mortality statistics, with which our readers are already sufficiently familiar. It then takes up the case of the 99th Regiment, the sickness in which is attributed solely to the unhealthiness of Kowloong, and the unfitness of the huts there for habitation by European troops; but the Committee "express no opinion as to the military "necessity which, it has been stated, required that the 99th "Regiment under these circumstances should be kept there for "five months; they confine themselves to expressing their "opinion that the sanitary state described was due to the "adoption of that course." Passing on to the case of the 9th and 11th Regiments, the excessive mortality they suffered from is set down partly to the unhealthiness of the season of 1865 and to exposure to heat and malaria on duty; but chiefly to deficiency of barrack and hospital accommodation and the overcrowding which resulted therefrom. The Report however expresses no opinion as to who is responsible for this state of things. On the one hand it is urged that General Guy's instructions, gave him no alternative and allowed him no freedom of action; on the other, it is maintained that he had sufficient discretionary power to enable him to take such steps as would have at least greatly mitigated the evil. On this point opinions were pretty equally divided; no one seems to be able to define where the power of the War-office ends and that of the Commander-in-Chief begins, and between these two stools the Committee comes to the ground. As regards the employment of Indian troops we are glad to find that the Committee are unanimous in recommending it in the strongest possible terms; and this is about the only practically useful suggestion in the Report from which we expected so much. Colonel North has given notice that early next Session he will call the attention of the House to its contents, and also to the inadequate pay of officers serving in China.

SIAM.

Of the various forms of government obtaining among the countries of the Eastern Hemisphere the most remarkable is perhaps that of Japan, which to outward appearance admits of a double Monarchy; for so the separate offices of Mikado and Tycoon, or more properly Shiogoon, are generally regarded. In reality however Siam, although its institutions are not generally considered so interesting as those of the first-named country, presents in its form of government an anomaly still more curious, inasmuch as it has maintained at different periods both a double and single sovereignty, in the former case the two potentates being distinguished by the respective titles of First and Second Kings of Siam. The general impression regarding the relative positions of the two Kings, which has gained credence chiefly through statements put forward by Sir John Bowring in his well known work on Siam, is to the effect that the kingly power is really divided, although in unequal shares, between the two Monarchs; and this idea obtained additional currency through the medium of an obituary notice of the late Second King which went the round of the English newspapers shortly after his death. Somdetch Phra Pawarendr Ramesr Mahiswaresr, the personage alluded to, was the younger brother of the present First (and sole) King. He is represented by Sir John Bowring as a very distinguished man, possessing abilities of a high order combined with strong literary and scientific tastes; speaking pure English, writing a good hand, and being only surpassed by his elder brother in energy and in the greater prominence of position enjoyed by the latter. Sir John Bowring further represents the two Princes as residing together in the same palace and sharing almost equally in the pomp and ceremonies of the Court. Siam even more than Japan has been until very lately a sealed book to the inhabitants of the Western World, and therefore such erroneous impressions as here indicated are to a certain extent excusable; the few words we have to say in correction of them are however based on the highest possible authority.

The Monarchy although ostensibly a divided one is not so in reality, the titular rank held by the late Second King being merely an honorary distinction conferred on him by his elder brother. The position thus held gave him no definite share in the executive government of the country, but nevertheless resembled to a certain extent that of our own Prince of Wales, inasmuch as it indicated the highest rank in the country next to that of the supreme ruler; and had its possessor survived the First King he would doubtless have acted as Regent during the minority of his successor. Nor must it be supposed that the sovereignty, whether sole or divided, is an absolute one; the government is carried on by a Senate and a Council of Nobles presided over by the King, in speaking of whom we may now discontinue the numerical distinction hitherto in vogue, as the office of Second King is not likely at all events for the present to be renewed. The two brothers have never resided together since their childhood, their palaces and most of their Court ceremonies having been kept entirely distinct, and varying in importance and magnificence according to their relative positions. The Second King commenced his career as an officer in the army, and greatly distinguished himself as commander of an expedition dispatched against the Cochin-Chinese, then at war with Siam. The latter part of his life on the contrary was passed in retirement and inactivity except as regards the pleasures of the chase, to which he was much addicted. He had some theoretical knowledge of navigation and military tactics, and had also studied English and some other foreign languages, but had made little use of these acquirements. Shortly before his death he became a dyspeptic invalid, and having unfortunately neglected the advice of his medical attendant eventually succumbed to the disorder. The present King, who is the legitimate Sovereign by right of succession, is undoubtedly a wise and beneficent monarch. During his early youth he devoted himself entirely to study, and in the garb of a Buddhist priest spent some years in a monastery, during which time he acquired a fair knowledge of the Pali, Sanscrit, and other Oriental tongues; also of history, geography, chemistry, and astronomy, the latter being his favourite science. At a later period he acquired English and Latin. Since his accession to the throne Siam has enjoyed unparalleled peace and prosperity, amicable relations having been maintained with all foreign Powers, while slow but sure progress has been made in developing the internal resources of the country and improving the condition of its population.

NEW TELEGRAPH TO INDIA AND CHINA.

A COMPANY has been formed, and will be launched at the first opportunity after an improvement in the money market, for the purpose of resuscitating the Red Sea line of telegraph to India. It is proposed also to lay a submarine from Falmouth to Gibraltar and Malta, in order to be free from the interruptions on the present route to Malta over the Italian lines, &c. The company propose also to extend the lines on to China and Australia.

THE CHINESE MISSION TO EUROPE.

THE last outgoing French mail conveyed his Excellency PIN-TA-JIN and suite, on their return to China. Having visited Holland, Denmark and Russia, they returned from St. Petersburg by way of Berlin, Cologne and Brussels, to Paris. While at Copenhagen, the COMMISSIONER engaged a number of mining engineers and mechanics to proceed to China in the service of the Government. We understand his Excellency leaves Europe well satisfied with the reception he has met with, and trust that some good results from his visit will ere long become visible.

Naval and Military.

The Rodney, 78, screw wooden ship, 2,270 tons, 500-horse power, has been taken into dock in Sheerness-yard, where she is to be brought forward for commission and fitted up as the flagship of the China station.

Her Majesty's gun surveying vessel Nassau, 4, commissioned by Capt. Mayne for the Pacific, and under orders to proceed to the Straits of Magellan, has been detained at Woolwich for a few days, in order to undergo some alterations suggested by Capt. Mayne, such as the supply of bow stoppers for the chain cable, &c.

The recent gunnery experiments upon the turret of the Royal Sovereign and the recent engagement with the Spanish ironclad squadron at Callao have proved almost beyond a doubt that the system of revolving turrets is one which merits great attention. Such being the case, it remains yet to be determined whether the system cannot be developed on a much more extended scale than its most sanguine supporters ever expected. A plan has been recently submitted to the authorities of the Admiralty and War Department which although bold in idea to the very extreme commends itself for its simplicity. It is proposed by a civil engineer in Portsmouth that revolving ironclad forts should be erected on the foundations now in course of construction on the No Man's Land Shoal and the Spit and Horse Sands, the forts upon which are intended to defend the roadstead known as Spithead. It is perfectly clear that if three men can turn with ease one of the turrets of the Royal Sovereign, although weighing 130 tons, a revolving ironclad fort could be turned with equal ease by powerful hydraulic machinery, even though weighing as much as 4,000 or 5,000 tons. At all events, the scheme is worthy the consideration of the authorities, and might fairly be left to the turret committee or to the Chief Engineer at Portsmouth Dockyard to report upon its practicability. It is proposed that the diameter of these forts should be 213ft., being the same as that of the top course of the present foundations, having a double curvilinear sectional form, such form being, it is believed, preferable to that of a quadrant or that of an angle of 45 degrees. The forts will have two tiers of 600-pounders mounted on an upper and lower tier, each containing 16 guns, or 32 in all, and will revolve on three lines of rails with conical wheels, the wheels themselves being connected in the most powerful manner with the platform above, which, in reality, will form the foundation upon which the whole of the ironclad superstructure of the fort will rest. The guns will stand one immediately over the other upon an iron gallery, each two being separated from the others by iron divisions to avoid the possibility of accidents. The approximate weights would be as follows:—Wrought iron casing, 2,000 tons; backing, framing, &c., 1,500; 32 600-pounders, 1,000 tons; total weight to be turned by hydraulic power, 4,500 tons. Ample space will be provided within the forts for barracks, magazines, &c., but it is intended that a staircase should be erected in the centre, with an ironclad look-out tower forming its roof. We must now avail ourselves of iron, steel, or if there be any other harder and more durable metal known to keep out the ponderous shot and shell which are about to come into use.

THE TELEGRAPH TO INDIA.—At a meeting of the Liverpool Chamber of Commerce on the 8th, Mr. Horsfall, M.P., complained bitterly of the irregularity and incorrectness with which telegraphic communications were transmitted between this country and India. He mentioned one instance in which orders were sent to India "to purchase 1,000 bales of cotton;" the orders received were to "purchase 21,000 bales." Another message was sent to a gentleman in India that his wife in England "had presented him with a fine daughter." The message received by the gentleman was that "his wife had presented him with five daughters." Trouble has fallen upon the proprietors of a Ceylon newspaper, because the zeal of their editor endeavoured to make sense out of telegraphic nonsense, and, sacrificing truth to reason, committed a very serious libel. The story is thus told in a Bengal journal, brought by the last mail:—"The *Colombo Observer* received the following telegram:—'Asiatic Bank shops loss hundred and forty-two thousand sterling,' and published it thus—'Report, Asiatic Bank stops: loss £142,000.' Immediately a tremendous run on the branch banks at Colombo and Kandy ensued, and the institution has thereby sustained very serious damage. The local manager has acordingly brought an action for damages. The *Observer*, in so serious a matter, should have published the telegram word for word, as received, with remarks. It has since apologised, but the matter has been referred to the home directors." This is published as a caution. The story wants completeness, for we do not learn from it what the intended message actually was; but the practical lesson to be gathered from it is not the less valuable for that. Print the message as it is delivered, and leave the public to find out its meaning.

INDIAN MAILS.—"An East India Merchant" writes as follows: Sir,—I am not a newspaper grumbler, but because I do not always exercise it I have not given up my right to grumble and complain when an occasion arises which would, I think, justify something more than an anonymous growl. I wish to call your attention to the manner in which our Indian Mail Service is carried on, and to the inconvenience, to use the mildest of terms, to which I, and doubtless hundreds of others are subject by the non-arrival of the mails at, or at least near, the contract dates. I was informed by telegraph that considerable remittances had been sent to me by the steamer *Mongolia*, which left Calcutta on the morning of the 9th of July. The duplicates were sent on the 16th of the same month *via* Bombay, and, I learn from a telegram in *The Times*, did not catch the steamer. The "Postal Guide" informs me that the mail carried by the *Mongolia* should be delivered in London on the 13th. It did not, however, reach Suez until the morning of the 9th, is "expected" at Marseilles on the 16th, and may be in London on the 18th, but I do not hope to see my letters sooner than the 19th. This is what I want to complain of. The distance by Admiralty chart I make to be, from Calcutta to Suez, 5,200 miles. If we divide this by thirty-one it gives a run of a fraction over 167 miles a day, and by dividing again by twenty-four a trifle under *seven miles an hour*. How long would such a rate between this and America be tolerated? It is a notorious fact that the new vessels of the P. and O. Co. are beaten by the vessels of the French Company—that, in a word, they are not the P. and O. of old days, of which all used to be proud. I want to know if the penalties contained in their contract are ever enforced, and if they would be liable for any loss I might sustain by their failure to carry out their contract.

THE SUEZ CANAL.—The annual general meeting of the shareholders of the Suez Canal Company has been held at Paris, M. de Lesseps presiding. The report gave an account of the situation of the works, which were stated to be going on satisfactorily. The Viceroy of Egypt, the document declared, considered it a point of honour to facilitate in every possible manner the termination of the canal. The expenses during the last year have been a little over forty millions of francs, and the total of the sums expended to the 30th June, 1866, nearly 168 millions. The resources which the company may reckon for the completion of the works are estimated at 150 millions, a sum considered quite sufficient to support the outlay still to be made. The report was approved of, a committee named to examine the accounts, and the thanks of the meeting voted to M. de Lesseps.

THE RUSSO-AMERICAN TELEGRAPH.—The Collin's Russian Telegraph line has been completed to Frazer Lake. The work is being pushed vigorously, and the line is expected to reach "Rocher de Bouiller" on the 1st of August. Over 250 pack animals are employed in transporting wires and supplies.

CAPTURE OF THE "JACOB BELL," FROM CHINA.

(From the *Ravenna* (Ohio) *Democrat.*)

Very many Ravennians well remember Mrs. H. Dwight Williams, wife of the gentleman who was the first cashier of the Portage County Branch Bank, whose residence in Ravenna covered the time between December, 1847, and January, 1851. For some little time prior to the war Mr. Williams held the post of Commissioner of Customs at Swatow, China, one of the five ports through which commerce is admitted into the Celestial Kingdom. On a homeward voyage, about two years since, on account of her health, on board the ship *Jacob Bell*, Mrs. Williams was captured by the rebel privateer *Florida*, and robbed of all her baggage, including letters, pictures, and curiosities she was bringing to America. The rebel commander of the *Florida* was Captain N. Maffit, who a few years before the war had become the owner of some property in St. Paul, Minnesota. A complaint and prayer for the confiscation of a piece of property in that city, known as lot one, in block thirty-six, upon which stands the building used as the St. Paul *Press* office, was commenced in the United States District Court, and was heard at its session at Winona early in June last—this being the first case of the kind decided in Minnesota. As the courts of the United States make it a rule that no decree of confiscation be entered unless the acts of rebellion be proved by testimony, it became necessary to summons from New York Mrs. Williams, who was on the ship *Jacob Bell* when that vessel was captured by the *Florida*, and therefore an eye-witness of Maffit's overt acts of hostility to the Government. Her testimony before Judge Nelson, though developing nothing new on the general charge of rebellion, was quite interesting for its personal reminiscences of the noted buccaneer who commanded the *Florida*. Mrs. Williams cherishes lively recollections of the robbing of her personal effects by Maffit, and would be glad to inflict upon him adequate punishment for his crimes. She gave an account of the capture of the *Jacob Bell*, and the part taken in the transaction by Maffit. On being taken on board the *Florida*, she heard a cultivated voice saying, "Please take my arm, madam," and being surrounded by ruffians, she allowed Captain Maffit to conduct her to his cabin. She afterwards handed to Captain Maffit a list of her private property, with the expectation that it would be saved from the fate reserved for the ship and valuable cargo. Maffit told her that he could not save her property, and expressed regret at what she must suffer in seeing the destruction of so many of the nice, curious, and valuable articles which she had purchased in China. Mrs. Williams obtained permission to return to the *Jacob Bell*, and there discovered the rebel officers and crew in the act of appropriating her property to their own use, which she was powerless to prevent. The officers of the *Florida* split and broke open her packages, which contained laces, private letters, photographs of friends, and such as they did not want were cast on the deck and trodden under foot. While engaged in this business the *Jacob Bell* drifted against the *Florida*, and for a time all on board the latter were in imminent peril. But steam was got up, and the two vessels were disentangled, and soon after the *Jacob Bell* was fired and destroyed. Mrs. Williams gives Maffit a very bad character. He was outwardly civil, but if it could better have served his purpose and benefited his cause it would have cost him no pang to act the pirate to the death as he was acting it to the life. Mrs. Williams was on the *Florida* two days, when she with all the officers and crew of the *Jacob Bell* were transferred to a Danish bark and taken to Bermuda. The evidence in regard to Maffit's overtacts of rebellion being amply sufficient, Judge Nelson issued the decree of confiscation.

The San Francisco and China Line.—The first result of its establishment will be a vast increase in the Chinese population of the State of California and the adjacent territories. Eleven thousand Chinamen are now at work cutting the Pacific Railroad through the Sierra Nevada, and the number will be greatly increased next season.

Continental Intelligence.

Rotterdam, August 7.

It has created in the first place much indignation that Mr. Myer has succeeded in his endeavour to annul the Royal decree of the 5th of January, which of course has been already proclaimed in India. You will remember that this important liberal measure for the Javanese consisted herein, that it was henceforth forbidden that the heads of the native tribes (*inlandsche hoofden*) could claim personal services from the population. In consequence hereof the amount destined by Mr. Fransen van de Putte to give these chiefs compensation in money does not appear amongst the credits asked by Mr. Myer. *Ergo*, the natives must remain *la gens taillable et corvéable à merci*. The other reason why the Liberals must disapprove of the budget is, that Mr. Myer declared that he would maintain the cultures, and especially those of coffee and sugar, while the Liberals have done all they could of late years to promote free labour in India. In addition, his regulation of the sugar industry in India is such that the interest must be ruined, because it will be impossible to maintain a competition with the European manufacture of beetroot sugar.

The Minister of the Colonial Department has asked in his budget for a credit of 200,000 francs, which amount is destined for a subsidy for the steam-line between Java and Australia. This is certainly good news.

Mr. H. C. Bekking, ex-resident of Rembang, the great promoter of free labour in India, died yesterday of cholera, at Scheveningen, which bathing-place is almost totally deserted. The death of this warm Liberal will create much sensation amongst his numerous friends in India.

COMMERCIAL.

Coffee.—The market was very active since our last report; the private transactions include 1,500 b. Java, ex Cornelia Adolphina, at 43½c.; 1,100b. Macassar, ex Indus, at 37¾ to 38c.; 1,300 b. Java, ex Maria Veronica, at 42¼c.; 1,500 b. ditto, ex several ships, at 30 to 44c.; 141 b. Macassar, ex Macassar, at 28 to 34c.; 115 b. Bali, ex Lichtstraal, at 34c. The Trading Company announced its August auction, at which 116,224 b. Java and Padang will be offered. The good ordinary sorts are valued at 43c. The total stock in Holland amounts to 530,100 b., against 542,200 b. in 1865.

Raw Sugar.—Since the auction of the Trading Company, at which 55,890 mats were sold, at 2f. to 2½f. above May, the market remained very firm, but without transactions, because holders decline to operate without a further advance. In Amsterdam a parcel of 1,225 mats Passaroeang, ex Anthony van Hoboken, No. 17¾, very fine quality, was sold at ¼f. under July value. For refined the market is very lively, and important transactions were done. The unsold stock of the Trading Company amounted, on the 1st, to 49,854 mats, against 33,104 mats in 1865. The first hand private stock was 35,657 mats, while the total stock of raw sugar amounted to 56,146,109 bls.

Rice.—The market was very animated, and the imports of much importance. 2,500 b. Necranzie, ex Diana, were sold at 6¾f.; 6,800 b. Rangoon at prices which did not transpire. 16,000 b. Necranzie, ex Nevada, 5,220 b. Bassein, ex Theo and Lula; 6,700 b. do., ex Warrior, 5,120 b. Rangoon, ex Catharina, 6,000 b. do., ex Vincenzo Gianello, 2,500 b. do., for Chefoo, one cargo, ex Procymatia, are destined for our rice-mills. Per Nova Zembla arrived 9,600 b. Necranzie, but this ship was lost on our coasts.

Spices.—There is a good demand for Cloves, because nothing will be offered in the next auction. For No. 2., 28c. is offered, but holders still decline to operate. The demand for Nutmegs is also somewhat more active. No. 1 was paid with 72c. The unsold stock of the Trading Company amounted to 1,550 casks Nutmegs; 760 casks Mace, 2,477 fard. Cinnamon, 2,921 b. Pepper.

Tea firm, but without transactions.

Tobacco (Java leaves).—There is much demand for fine quality, but there is no stock. Inferior quality is very abundant, but impossible to sell. All that was offered in private auctions and by inscriptions was bought in. Manila Tobacco was much inquired for, and there was, in consequence, some improvement in prices. The first-hand stock amounted to 17,571 bales Java; 3,241 bales Manila.

Java Indigo continues to attract attention, and there is much demand for this article; the disposable parcels are, however, almost of inferior quality, and this checked the transactions, so that only 77 chests were sold.

Sapanwood.—Large quanties of very fine quality were imported, but not yet brought into the market.

Banca Tin.—The demand has been good since our last report, and the more favourable aspect of Continental politics caused a steady advance. For Banca the market improved to 47½f., but subsequently declined to 46f. Upon the declaration, however, of the suspension of the hostilities the demand became more active, accompanied by an advance to 47½f. In Billiton no business has been effected. Several fresh arrivals are reported to-day. Stock in the second-hand 109,375 slabs, against 174,007 slabs in 1865. The unsold stock of the Trading Company 117,449, against 26,640 slabs in 1865.

Arac.—Without business done. Stock 2,205 ¼ casks, and 405 ½ casks. Prices nominal.

Drugs.—Camphor very firm, and nothing can be bought without an advance. Cassia Vera: The parcels offered are not yet sold, because too high prices are demanded. Cubeben dull. Gummi Benzoin (Sumatra)—110 cases Gummi Damar: all the parcels which now arrive are sold floating. Gum Elasticum unaltered, and offered at former prices. Cutch with much demand, but no stock. Japan Wax: Parcels from the auction of the Trading Company are paid with 33½f. Turtle Shells: 4 ch., ex Cornelia Adolphina, are sold at secret prices.

Rattans dull: 1,579 bundles, ex Electra, were sold.

Hides.—750 p. Padang Kinder, and 563 p. Buffalo, offered by inscription, were sold under valuation.

Money.—Bank rate of discount still unaltered. In the open market large capitals are offered to 7 per cent. The stock market is very calm, and prices steady. Dulch Two-and-a-Half per Cents., 57¼; Three per Cents., 67⅛; Four per Cents., 90; Trading Company, 135½.

Change.—London: 3 mo., f.11.62; short, f.11.87. Paris: 3 mo., f.46.25; short, f.46.90. Hambro': 3 mo., f.34.52½; short, f.34.95.

PASSENGERS INWARD.

From Java: per S. van Heel: Messrs. A. M. M. Mathey, F. H. L. van den Dungen Grenovius, J. van Heel, H. F. Neiland, L. A. van Schie, A. H. Meelhuizen, L. D. Courlander, C. van der Linden. Per Maarten van Rossem: Mrs. Martini de Geffed. Per Albrecht Beyling: Mr. van der Zyden. Per Medea: Messrs. van de Ven and family, Gersen and family, Doerleben and family, Schindler and family, Stoepel and family, Haakman, Ermerins, Komys, Reede van Oudtshoorn. Per Hoek van Holland: Messrs. A. van Dalen, Lalassie and family, Capt. Mekern, Lieuts. Kakabeen, Slange den Brieder. Per Boni: Mr. Haarmans and family.

PASSENGERS OUTWARD.

For Java: per Bezoekie: Mr. C. A. Koks and family, A. Sturm and family, Binkhorst van Oud Carspel and Jukvedyk, J. P. Tissot, J. van Vleuten, Mrs. M. Viot, Mr. M. Koster and family. Per Doelwyk: Messrs. Van Phren, Wiese and family, Margadant and family, Hobeck and family, Th. A. Ruys, Broudsema, Lorsch, two ladies, Colenbrander, Mrs. van Haassen.

Shipping.—Arrivals.—July 30, at Brouwershaven, from Tjilatjap, Maarten van Rossem; from Batavia, S. van Heel, Albrecht Beyling; from Banjoewangie, Marinus. At Texel, from Batavia, Adriana Johanna, Hoek van Holland, Padang Packet; from Banjoewangie, Graaf Dirk III.; from Tjilatjap, Maria. 31, at Texel, from Banjoewangie, Boni, Jan van Brakel. At Brouwershaven, from Batavia, Medea. At Flushing, from Samarang, Yda Maria de Raadt. Aug. 1, at Texel, from Sourabaya, Duc de Richelieu. 6, at Texel, from Sourabaya, Roscote, Nornen.

Departures.—July 24, from Brouwershaven for Batavia, Samarang. 28, from Brouwershaven for Batavia, Doelwyk. Aug. 2, from Hellevoet for Batavia, via Newcastle, Adriana Petronella.

Rotterdam, August 15.

The meeting of the Second Chamber was not very successful. Only forty-eight members were present; the others had preferred to remain at their seats, from fear for the unhealthy condition of the Hague where the cholera epidemic, as in most other places of our kingdom, still prevails. In the sitting of last Wednesday the President proposed that the discussion about the East India budget should be opened on the next Monday; Mr. Dumbar however thought it desirable that no time should be lost, and proposed that the debate should begin at once. Mr. Blusse was not of that opinion. On the contrary, he proposed that this budget should be examined again in the sections, which as he said had become necessary by the important alterations which the Bill of Mr. Fransen van de Putte had undergone. Of course several members opposed this proposal, but after a long debate the motion was approved of with a majority of eight votes. Notwithstanding the examination in the sections had begun immediately, it has become very probable, by this new delay, that the budget cannot be brought into discussion in this sitting; so much is certain, that a fortnight will scarcely be sufficient to change the section report and the ministerial reply; and that Parliament in the meantime is prorogued till the last days of this month. This news will cause a great deal of disappointment in India. Mr. van der Maesen de Sombreff interpellated the Cabinet about the question of Limburg, and asked the Minister of Foreign Affairs if Limburg still formed a part at the German League or not, and if it was true that our Government had taken some military measures with a warlike purpose. The reply of Count van Zuylen was very satisfactory; he stated that Limburg would be liberated from the German League without any unacceptable condition, and that this was approved of by the foreign States. The Minister of War stated, in his turn, that the arming of some fortresess was only a general measure, and served for the instruction of our troops. In spite of these tranquillising words frightening rumours are still circulating about the alteration of the map of Europe. French and German papers again assert that plans exist that our province of Limburg will be annexed with Belgium, that our King's, Grand Duchy of Luxemburg will be incorporated with France, and that we are to be indemnified with the northern part of Oldenburg and Hanover. I believe that these rumours are very premature; so much is certain that nothing is known about it from a very credible source. Nevertheless it has made

Digitized by Google

so bad an impression that our Minister of War has asked a supplementary credit on his Budget for 1866 of 1,618,000f., for the construction of fortresses on the heath of Houten, in the province of Utrecht. This demand will, without any doubt meet with a severe opposition.

The projects for the definite budget for 1867 are all ready, and are sent to the Council of State for examination. The Liberal papers are of opinion that the sentence of death for this Liberal-Conservative Orthodox Cabinet is concealed in these budgets.

Mr. J. J. van Mulkend's seat in Parliament will perhaps be occupied by Mr. P. P. van Bosse, who is a candidate for Harlem. Some of the electors, however, made the ex-Minister of Home Affairs, Mr. Geertsema, candidate.

The officers J. J. Baron van Melville, van Carnbee and Reuther have started for Paris. They are charged by the Government to examine the system on which the breech-loaders are constructed in France. Some days ago trials were taken with a gun (breech-loader) offered by the North American officer Hemmington. This gun is said to be of a totally new construction, and to give the best results. I shall wait for the official report to send you the truth about this important question.

The plan to make dry land of the greatest part of the Zuiderzee (I wrote you thereabout in a former letter) becomes more and more consistent. Mr. T. J. Stieltjes is appointed to examine it, and will be aided by the corps of military engineers.

COMMERCIAL.

COFFEE.—The market remains in a very favourable condition, but transactions are unimportant because there is a want of private stock. The general opinion is that the auction of the Trading Company, which is to be held on the 15th, will give good results. The private transactions include 2,300 b. Java, ex Telanak, at 42½ to 43c.; 2,000 b. do. ex do. at 42½ c., 3,500 b. Santos, ex Salamander, 316 b. Java, ex St. Helena, 697 b. Java triage, offered in public auction were sold from 25 to 34c., and 1,390 b. Bali and 749 b. likewise offered in that sale were mostly bought in.

SUGAR—(RAW).—The market is rather flatter, and for the moment it is impossible to sell at last auction prices. No important quantities can be realised without a decline in price. 328 mats Samarang No. 16½ fine quality were sold at 33½f. The market in refined was very animated.

SPICES.—The market is totally inactive, the trade being occupied inspecting the parcels which will be offered on the 24th. The 1,545 casks Nutmegs are valued at 30c. to 72c.; the 774 casks Mace at 75c. to 90c.; 2,3400 fard. Cinnamon from 100c. to 120c. Cloves remain very firm, No. 2 is willingly paid with 28½c.

RICE.—In Amsterdam there arrived 4.737 pic. ex Norman, and here 4,200 b. Bassein, ex Mathilde, and 15,000 b. Rangoon ex Revenue. The greatest part of the quantities imported is destined for the rice mills, so that the first hand is passed.

TEA.—On the 29th will be offered in private auction 1,627 ½ and 1,519 half-chests Congou, imported direct from Foo-chow-Foo per Thurso. The valuation is, for Finest Kaisow Congou, 103c. to 118c.; fine Kaisow Congou, 83c. to 98c.; Kaisow Congou, 85c. to 94c. In waiting for this auction the market is inactive.

TOBACCO.—The market remains very dull, and is totally inactive.

DRUGS.—Camphor: Dull; 72c. is demanded for China; for Japan, 75c. Cubebs: Nominal at 40c. Cassia Lignea: Somewhat firmer, and nothing can be had under 60c. Cassia Vera: 1,192 b. ex Uncas from Padang were sold at secret prices. Japan Wax: With much inquiry, and very firm in price. Gum Elastic: Is quoted at 130f.

RATTANS.—The demand is very limited and the market consequently without animation. 20,700 bdls. ex Albrecht Beyling, 1,000 b. ex Hebe, and 960 b. ex Persia were sold.

JAVA INDIGO.—For want of stock the transactions are very unimportant. The inferior qualities brought into the market may be had at very low prices.

SAPANWOOD (BIMAS).—650 piculs fine quality were sold at very firm prices. The quotation now is 7f.

TERRA JAPONICA.—230 mats Java, floating, may be had 16½f.

BANCA TIN.—200 slabs were sold at 46¼f., and 1,200 slabs Billiton ex Adriana Johanna by inscription at secret price, but which is generally thought to be 45¾f.

HIDES.—The following parcels were sold:—544 Passaroeang, ex Three Bells; 500 Samarang, ex Kanagawa; and 500 Sourabaya, ex County of Lanark. The prices did, as usual, not transpire.

ARRACK.—Without transactions; only 61/1 and 40/2 casks Batavia ex Baltimore, were sold. The market is much depressed by the large stock.

THE STOCK MARKET was flat in the last days because of the expectation of disagreeable consequence from the position assumed by the Emperor Napoleon, and the general want of confidence. The effect of this intelligence would, however, have been worse, when it was somewhat negatived by the improved appearance of the money market. The demand for money was in the last days extremely moderate, so that it is generally supposed that the Bank rate of discount may again be shortly reduced. Dutch Two-and-a-Half per Cents., 56; Three per Cents., 66½; Four per Cents., 89; Netherlands Bank, 241; Trading Company, 134⅞; Netherlands India Trading Bank, 80.

EXCHANGE.—London, 3 mo., f.11.65; 2 mo., f.11.71; short, f.11.85. Paris, 3 mo., f.46.40; 2 mo., f.46.55; short, f.47. Antwerp, 3 mo., f.46.15; short, f.46.85. Hambro', 3 mo., f.34.52½; 2 mo., f.34.65; f.34.95.

SHIPPING.—ARRIVALS.—August 10, at Brouwershaven from Passaroeang, Acadia; 11, at Brouwershaven from Batavia, Eva Johanna.

DEPARTURES.—August 13, from Hellevoet for Batavia, Bezoekie; for Macassar, Macassar; from Texel for Batavia, Tjilingsie; Koning Willem; 11, for Sourabaya, Ida Geertruida; from Zierikzee for Melbourne, Vooruit.

PASSENGERS INWARD.

From Java, per Eva Johanna: Messrs. L. C. S. Halewyn and family; de Gray Forttman and family; Doorn and family; Stumpff and family; Hoen, Wynschenk, Mrs. Steinmetz and six children; Mrs. Hellings, Miss Paternoster du Moutlion.

PASSENGERS OUTWARD.

For Java per Tjilingsie: Messrs. F. W. H. van Straten and family; T. Roselje, G. Baron van Hoevell, J. G. Mitchell jun.; per Koning Willem II.: Messrs. J. van Stein, J. de Haas, Miss Nieuwpot and three children.

The Trading Company chartered the following five ships to convey produce to Rotterdam: Sophia Amalia, Capt. P. F. van Overklift; to Amsterdam: Alida, Capt. H. Visser; Adm. de Ruyter, W. Witting; per Louisa, T. J. Mellema; to Schiedam: Albrecht Beyli ng, Capt. C. van der Burg.

GERMANY, RUSSIA, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, AUGUST 14th.

The *Siberian Gazette* gives the following statement of the China trade at Kiachta during the year 1865. Exports: Russian produce and manufactures, value 4,908,855 Roubles; foreign do., 91.418 Rbls.; precious metals, 1,729,757 Rbls.; Russian Bank notes, 957,932 Rbls., other objects, 17,992 Rbls.; total, 7,705,964 Rbls., Imports: Chinese produce and manufactures, value 7,701,200 Roubles, European do., 1,333 Rbls., retail goods, 33,924 Rbls., Russian paper money, 340,127 Rbls., total, 8,076,584 Rbls.

The Russian *Gazette of the Academy* contains an interesting table of the value of goods sent to the Nijni Novgorod Fair every year since 1825 and the quantity disposed of, taken from official sources. I fear it is too long to give at full length, but you may perhaps find room for the following extract, showing the figures for every tenth year, which will serve to give your readers an idea of the wonderful increase in the traffic at the fair:—

Year.	Value of goods brought.	Value of goods sold.
1825	20,230,000 Rbls.	... 13,845,000 Rbls.
1835	40,740,460 ,,	... 33,418,780 ,,
1845	55,217,725 ,,	... 48,408,152 ,,
1855	62,850,925 ,,	... 57,004,725 ,,
1865	108,382,936 ,,	... 92,076,130 ,,

A very useful and important arrangement, well worthy of imitation in other countries, has just been perfected and brought into operation along the coast of Russia, opening a communication, by means of the telegraph, with vessels navigating the Gulf of Finland and the Gulf of Bothnia. For this purpose the lighthouses along the coast are connected in the usual way with the telegraph wires in the interior, and furnished, moreover, with semaphores, by means of which a communication can be opened with passing vessels and messages transmitted to any part. Signals by semaphore between the lighthouses and vessels are made without charge, and messages between the lighthouses and the nearest telegraph station are charged at the rate of fifty copecks for twenty words. Telegrams from the land to a vessel must be paid in advance, but messages from passing ships at sea to their correspondents or agents are payable by the receiver.

Several contributions have lately been received here from Hamburg gentlemen residing in foreign countries towards defraying the expenses of the interior decorations of the new *Kunsthalle* or Gallery of Art, now in course of construction, amongst which is a remittance of 590 marks banco from the Germans residing at Singapore, transmitted by Mr. Danelsberg, the Hamburg Consul at that port.

The Prussian *Handels-Archiv* publishes in German a translation of the text of the treaty of amity, trade, and navigation concluded between Spain and China. It contains 52 articles, and was signed at Tientsin on the 10th Oct., 1864, by Senor Similbaldo de Mas on the part of the Queen of Spain, and Tchung-

Digitized by Google

ho and Shin-joan for China. The ratification having obtained the consent of the Spanish Cortes it is ordered to be printed as law by Royal sign-manual of Queen Isabella, dated Aranjuez, May 11, 1866, and countersigned by Don Fernando Calderon Collantes, Minister of Grace and Justice.

The Hamburg and Bremen contingents are still in the field, bivouacking near Wurtzburg, in Bavaria. The men have suffered more from cholera than from the enemy. They are all furnished with the Prussian needle-gun; and, indeed, have been so for ten years, so that they are perfectly acquainted with the mode of handling them. The construction of the gun itself is no secret, but the composition of the charge, which ignites simply by the prick of a needle (or more properly *pin*, for the German word *nadel* signifies both needle and pin), is kept as a Prussian State secret that has hitherto never been divulged. Perhaps it was an act of foresight on the part of Prussia to furnish the Hanseatic contingents with the needle-gun, in order to make them dependent on herself for the ball cartridges. Certain it is that if the Free Cities had elected the other day to take the part of Austria and side against Prussia, their arms would have been perfectly harmless, simply by withholding from them the needful ammunition. And it would have taken a long time to provide them with other muskets or rifles, and still longer to accustom the troops to handle them with due facility.

COMMERCIAL.

Coffee.—The active demand still continues, and prices of all descriptions have advanced one-eighth of a sch. bco. per lb. Sales of the week, 30,000 bags.

Sugar.—Not so much business has been done, but the market is firm. Refined is in great request, but as the refiners are out of stock the dealings were confined to 10,000 loaves, which was all there was on hand.

Rice.—The market continues steady notwithstanding the large importations of last week (above 70,000 bags). Among the sales were 2,000 bags of Larong, 6,000 bags of Rangoon, 3,200 bags of Necransie, and 5,000 bags of Madras.

Spices.—Of Cassia Lignea 3,000 chests have been sold by the importers at 10½ sch. bco., since which the market is firmer, and no more is to be had at that figure. Pepper is more in demand, and the 1,454 bags lately to hand per *Rio Janeiro* found immediate purchasers.

Spelter.—This article wears a downward tendency, and the business was slack, being confined to a few thousand centners for late delivery at 13.5 and 13.4, and loco 13.3.

Discount. — Money continues abundant, and discount has fallen to 3 per cent.

HANSEATIC CITIES.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, August 7.

The Chinese Commissioner and party, after a visit of some days at St. Petersburg, left that city on the 22nd July by railway for Berlin *en route* for Brussels. Owing to the absence of the King of Prussia and Count Bismarck from Berlin, they made but a very short stay there, and passed through Cologne on the 30th ult., after inspecting the celebrated establishment for making cast steel belonging to Mr. Krupp, at Essen, Westphalia. When the Commissioner was at Copenhagen, before proceeding to St. Petersburg, he engaged a party of mining engineers, mechanics, and miners from Sweden to go out to Peking for account and at the expense of the Chinese Government. A few days ago a party of twenty-four of them passed through this city on their road to England, whence they will be forwarded to their destination.

In the shipping list at foot will be found the departure of the Hamburg barque *Alert* for Shanghai. She takes out a cargo of 8,000 barrels of German manufactured gunpowder for the Chinese Government, which has hitherto made use of English powder exclusively. The contract was concluded with the house of Messrs. Schabert and Mueller of this city, and it is understood that a second cargo has been contracted for and will be shipped for the same destination in a few weeks. If the quality gives satisfaction it will be a fine opening for competing with the English manufacturers of gunpowder, as the Germans can deliver it at a much lower figure.

COMMERCIAL.

Coffee.—This market is speedily recovering from the effects of the war. There has been an animated demand at rising prices, and all descriptions are higher. Sales of the fortnight 35,000 bags.

Sugar.—In the Raw market an advance of 6 to 8 Sch. Bco. has been established. Being the first rise for a long time importers are in great spirits, and hail with satisfaction the turn in the market. Among the sales were 6,000 bags Brown Manila. Refined has followed suit, but as the stocks of ready goods are but small the transactions would have been more considerable if there had been a greater selection. As it was, however, 35,000 loaves found purchasers at rising prices, a part being for delivery in September.

Rice.—There have been several fresh arrivals of rough, among which 21,400 bags of Akyab per Hermann and Emma and Honigby, 11,000 bags Rangoon ex Canadian, and 5,703 bags of Rangoon per Hermann and Theodor, besides other vessels in the shipping list at foot. Notwithstanding these new supplies the market continues in a favourable condition.

Spelter.—Owing to the near conclusion of peace and consequent discharge of the miners from active service in the army, when they will again return to their more pacific labour, the market is in a dull state, and prices have receded, as will be seen by a glance at the transactions arranged chronologically.

1,000	centners	ex warehouse	..	13	Mks.	10	Sch. Bco.
6,000	,,	for Oct., Nov.	..	13	,,	14	,, ,,

500	,,	for do. do.	..	13	,,	4	,, ,,

The present stock is 35,000 centners, against only 10,000 at the same time last year.

Discount.—Money is very plentiful, and discount has in consequence fallen to 3¼ to 3½ per cent. The bullion in the Bank of Hamburg is now 17,395,109 marks banco.

Shipping.—Arrived.—Aug. 1, Gottingen, from Akyab; Canadian, Rangoon; 2, Rio de Janeiro, Singapore; Hermann and Theodor, Rangoon; Honigbee, Akyab; 3, Juno, Rangoon; Aristides, Akyab.

Sailed.—July 25, Penguin to Singapore; 29, Madras to Singapore Alert to Shanghai.

Monetary and Commercial.

The tenders for £350,000 in bills on India took place at the Bank of England. The proportions allotted were to Calcutta £295,400, to Madras £9,000, and to Bombay £29,440. The *minimum* price was as before, 1s. 10d. on Calcutta and Madras, and 1s. 10¼d. on Bombay. All tenders at and above the *minimum* will receive in full. These results show scarcely any revival in the demand for means of remittance to the East.

The following statement refers to the affairs of the Agra and Masterman's Bank. It will be observed with satisfaction that notwithstanding the magnitude of the claims—estimated at seven millions and a half—a dividend of 5s. in the pound will be paid in about a month.

Total amount of claims on which dividend will be payable as estimated on June 7, 1866, date of suspension		£7,900,000	0 0
Deduct—Estimated amount drawn out by depositors, &c., at Calcutta after date of last accounts received in London, and before suspension at Calcutta	£200,000 0 0		
Amount paid by Paris branch to French creditors since June 7, 1866	200,000 0 0		
		400,000	0 0
		£7,500,000	0 0

5s. in the pound is 1,875,000*l.*

Total number of creditors about 10,000; of these upwards of 6,000 will take dividends in London. The liquidator hopes

Digitized by Google

to commence paying the first dividend of 5s. in the pound on Monday, the 17th Sept. next; it will take a week to pay all; 2,000 creditors will therefore have notice to call on the 17th and 18th Sept., 2,000 on 19th and 20th, and the remainder on 21st and 22nd.

The Mexican dollars brought by the last steamer have been sold at 58¾d. per oz., showing a decline of ¼d. The silver-market continues very depressed.

The draughts of Messrs. Bomanjee Framjee Cama and Co. East India merchants of London and Bombay, have been returned. The house was established about four years back and held a fair position.

The biddings for bills on India took place at the Bank of England. The proportions allotted were:—To Calcutta, 23,14,500 Rs.; to Madras, 56,000 Rs.; and to Bombay, 1,79,000 Rs. The *minimum* price was as before, viz., 1s. 10d. on Calcutta and Madras, and 1s. 10¼d. on Bombay, at which rates allotments were made in full. These results indicate only a slight revival in the demand for the means of remittance to India, for of the £350,000 of bills offered on the present occasion, only £254,950 have been sold.

The Comptoir d'Escompte has held its annual meeting in Paris. A dividend of 32f. was declared for the second half of the year 1855-6 (June 30). That of the first half-year was 31f. 50c. The two sums exceeded by 4f. 50c. the dividend of 1864-5. The report has not yet been printed.

A deputation from the Chambers of Commerce and from the East India Association of Liverpool had an interview with Sir James Fergusson, in the absence of Lord Cranborne, at the India-office, on the subject of railway and telegraphic communication between Rangoon and Western China. The deputation consisted of Mr. J. G. Livingston, Vice-Chairman of the East India Association, and one of the counsel of the Chamber of Commerce, and Mr. H. Duckworth, of the East India Association. The deputation was introduced by the following Members of Parliament:—Mr. Horsfall, Mr. Graves, Mr. J. Laird, Mr. Bazley, and Mr. C. Turner, and accompanied by Mr. V. Baines, of the Liverpool office.

Mr. H. G. Dunlop, late manager Agra Bank, Calcutta, has been appointed manager Bank of Hindustan, Bombay.

The amount of bullion by the P. and O. Company's steamer *Syria*, from Southampton on the 4th inst., was in gold, to Madras, £282; in silver, to Hong Kong, £1,710.

LOADING.

At London.—For Yokohama: Glenclune. For Nagasaki and Yokohama: Chrysolite. For Manila: Angela. For Shanghai: Silver Eagle, Jubilee. For Hong Kong and Canton: Lucerne, Shun Lee, Her Majesty. For Singapore: Petchelee, Rushing Water. For Colombo: Channel Queen. John Banfield, Avon, Granville, Thames, Frances-Frances. For Colombo, Cochin, Beypore, Calicut, Cannanore, and Mangalore, Star of Ceylon. For Penang: Champion.

At Liverpool.—For Shanghai: Magellan. For Singapore: Sophie, Chloris, Indiaman. For Manila: Cinco Hermanos, Maria y Vicente. For Batavia and Sourabaya: Engel, Helena Henriette, Jane Kilgour. For Colombo: Empress. For Galle: Mikado, Marseilles.

At Glasgow.—For Manila: Odulia. For Batavia and Samarang: County of Lanark. For Batavia and Sourabaya: County of Ayr.

FREIGHTS AND CHARTERS.

Since our last issue there has been no animation in outward freights, all export business having been of a very limited nature. Coal freights in a few instances are somewhat lower. In homeward charters we have no transactions to report.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £43. For Singapore: £33. For Shanghai: £50. For Saigon: £50. For Manila: £14. For Yokohama: £50. For Batavia: £1 12s. 6d. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Singapore, £1 7s. 6d. For Yokohama: £2 8s. For Shanghai: £2 10s. For Saigon: £2 8s. For Batavia: £1 6s. For the Philippine Islands: £2 2s. 6d.

The Admiralty have engaged freight in Her Majesty for 245 tons navy provisions, &c., from the Thames to Hong Kong, and have invited tenders for the conveyance of 3 tons measurement stores, including a few combustibles, and for 34 tons loose shell, also from the Thames to Hong Kong.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and he works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessel tores, &c., when requiring to discharge them.

Amoy, March, 1865.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by Thomas Keating, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S PILLS.—Sickness, Giddiness.—The newspapers daily disclose deaths of persons from sunstrokes, apoplexy, and paralysis, who have been exposed to the sun's rays or who have been overheated by labour. Holloway's Pills are the best preservatives against these dangerous disorders. These Pills draw the blood from the head, discharge the vessels of the brain from engorgement, cool the circulating fluid, and relieve the bowels without weakening the system or worrying the nerves. These Pills have long been noted for remedying a defective stomach, improving the digestion, and renewing strength.

"CHINA MAIL" OFFICE.

No. 2 WYNDHAM-STREET (back of the Club):—

1.—THE EVENING MAIL,

A DAILY PAPER.

Price.—2 dols. per month.

Terms of Advertising.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.

(Every Thursday Night.)

Price.—15 dols. per annum; Single Copies, 44 cents. Advertising.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents. and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 Full Pages, and consisting of a reprint of the articles in the Evening and China Mails, with Summary of News and Commercial Summary.

Once a Fortnight.

(The Morning of the Mail's despatch.)

Price.—To Subscribers to the Weekly issue, 8 dols to Non-subscribers, 12 dols. Single copies, 50 cents.

Advertising.—The same as in the Weekly. All "Notices of Firms" appearing in the Weekly will be inserted in the *Overland*, and charged for, unless otherwise ordered.

MESSRS. COLLARD & COLLARD

FIND it NECESSARY to CAUTION the Public against the EXTENSIVE FRAUDULENT USE of their NAMES in the COLONIES, and urge on Purchasers the necessity of Examining very Carefully the NAME-BOARD of any INSTRUMENT they may be Buying; but especially they recommend that in all cases Respectable DEALERS or PROFESSORS of MUSIC should be CONSULTED for GUIDANCE.

A Certificate of Authenticity accompanies every Instrument sent abroad by Messrs. COLLARD and COLLARD.

16, GROSVENOR-STREET, and 26, CHEAPSIDE, LONDON.

PRIZE MEDAL,
INTERNATIONAL EXHIBITION, 1862.
AWARDED TO
F. MORDAN,
FOR
IMPROVEMENT IN WRITING MATERIAL

F. MORDAN'S EVERLASTING GOLD PEN is now established in reputation as the most beautiful, useful, and truly economical Pen ever manufactured. Thirty years' experience has only increased the estimation in which it is held, and tested the value of the warranty given with it. F. MORDAN can now proudly point to a sale of upwards of 90,000.

F. MORDAN'S PATENT PNEUMATIC INKSTANDS, the most useful and simple ever offered to the public, perfectly protecting the ink from dust or evaporation.

F. MORDAN'S WRITING, COPYING, BLUE, BLUE BLACK, BLACK, COLOURED, and MARKING INKS, in bottles of new and useful designs, with patent spouts and stoppers. These bottles are rapidly superseding all others, there being no increase of price for these improvements.

F. MORDAN'S PERFUMED MAUVE INK for Ladies' writing.
F. MORDAN'S SCENTED SEALING WAX in fancy colours; also HARD INDIA WAX for warm climates.
F. MORDAN'S LIQUID GLUE, for mending Glass, China, Wood, Metals, &c.
F. MORDAN'S PREPARED LIQUID GUM, for Office use, and general purposes.

Merchants and Shippers can obtain Illustrated Catalogues on application at the Manufactory,

ALBION WORKS, 326, CITY ROAD, LONDON.

PEACOCK & BUCHAN'S COMPOSITION FOR IRON SHIPS.

THIS is now established as the best and cheapest Composition known for keeping the Bottoms of Iron Ships CLEAN and free from Corrosion or GALVANIC ACTION. Apply to the Manufacturers direct, at SOUTHAMPTON, or to their accredited Agents at all the principal sea ports of the world.

From Captain John Ralph Engledue, Managing Director of the Thames Iron Works Ship Building, Engineering, and Dry Dock Company, Orchard-yard, Blackwall:—

"The Thames Iron Works, Ship Building, Engineering, and Dry Dock Company (Limited),
"Orchard-yard, Blackwall, E., September, 26th, 1865.

"Messrs. Peacock and Buchan.

"Gentlemen,—I shall at all times have much pleasure in bearing testimony as to the value and superiority of your Compositions for Ships' bottoms.

"I have used the No. 2 extensively for the last fifteen years, more particularly on the bottoms of the iron ships belonging to the Peninsular and Oriental Steam Navigation Company, and in every instance successfully. It is easily applied, economical, keeps the bottom CLEAN, and also has the property of preserving the iron.

'I visited, in dock, an iron SAILING vessel, called the 'Chile,' a few weeks since, and found her bottom perfectly clean, which had been coated with your Composition for upwards of twelve months, having made a voyage to New Zealand and back, and in salt water the whole time.

'I have also used your No. 1 Composition for the bottoms of wooden ships, coppered, and found it most advantageous, making the copper last double the usual time, and then only taken off to recaulk.

"I have at various times tried preparations of copper on iron ships, and in every case found the iron and rivets damaged.—I am, Gentlemen, yours faithfully,

"(Signed) J. R. ENGLEDUE."

"Egyptian Navigation Company, Azeeziah Mussriah, 61, Mark-lane, 7th July, 1865.

"Messrs. Peacock and Buchan, 39, Upper East Smithfield.

"Dear Sirs,—I have received orders to send to Egypt three tons of your patent Composition for ships' bottoms, same as supplied me in July, 1864. I now wish to know the soonest time you could have this packed and ready for shipment, as there is one of the Company's steamers leaving London about the end of next week. Please reply by return, and state price.—I remain, yours obediently,

(Signed) D. ABDUL HAMID BEY,
"I. FRICKEN."

ENGLISH GARDENS IN THE EAST.

THE Fourth Season has now confirmed the complete success of Mr. CHRISTY'S Cases for conveying Fruit Trees, Vines, Plants, Flowering Shrubs, and Seeds, to the East, when shipped in the holds of Steamers like ordinary Case Goods. Mr. John Waterer, junr., the American Nursery, Bagshot, Surrey, or Mr. Christy, 28, Pall Mall, London, are prepared to execute orders for gentlemen in the East, and beg to call attention to the list of prices and conditions. FRUIT TREES, including PEARS, APPLES, PLUMS, CURRANTS, GOOSEBERRIES, PEACHES, NECTARINES, APRICOTS, CHERRIES, and QUINCES, per case, 10 Guineas.

	Guineas.
20 FRUIT TREES, with Ten venes, per case	14
ROSES of the best kinds ... ... „	15
RHODODENDRONS and AZALIAS, &c.	15
GARDEN SEED (various) ... ... „	5 upwds.

The number depends on the size of the roots; the cases average 30 plants each.

All the above prices include freight, insurance, and all charges to any port where the P. and O. steamers call. The season for shipment commences about September and ends in January. All orders must be accompanied by a remittance or orders for payment. The name of the agent at the port of arrival must be furnished, to prevent delay in forwarding.

THE LONDON AND CHINA TELEGRAPH.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, ated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

No. 22, Great St. Helen's, E.C.

STEAM to CHINA from LIVERPOOL.—The undermentioned SCREW STEAMERS are intended to be despatched, with cargo and passengers, at their respective dates, for Mauritius, Penang, Singapore, Hong Kong, and Shanghai:—

Name.	Tons.	Captains.	Sailing Dates.
Achilles	1670	Russell ...	Sept. 29.
Agamennon ...	1672	Middleton.	December —.
Ajax	1670	Kidd ...	To follow.

Cargo will be received for the Achilles until the 26th September, but not later (if not sooner full and by special agreement). Each steamer has good accommodation for passengers, and carries a surgeon and stewardess.

Apply to ALFRED HOLT, 1, India-buildings, Liverpool.

With quick Despatch.

FOR HONG KONG and WHAMPOA, the splendid new river-built clipper SHUN LEE, A 1 fourteen years, 640 tons register, JOHN JAMES MILBANK, Commander; lying in the West India Dock. Has superior accommodation for passengers.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

FOR COLOMBO, CEYLON, Direct, will meet with very quick despatch, having a large quantity of her cargo engaged, the beautiful clipper ship AVON, A 1 thirteen years, 645 tons register, JOHN EDMOND, Commander; loading in the West India Docks. This splendid vessel has a full poop, with superior accommodations for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

FOR COLOMBO, CEYLON, Direct, to follow the "Avon," and will have quick despatch, the well-known clipper ship THAMES, A 1 thirteen years, 444 tons register, O. J. H. ARNOLD, Commander; loading in the West India Docks. This beautiful vessel has a full poop, with every accommodation for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

COLOMBO LINE OF PACKETS.

Will meet with the usual quick despatch.

DIRECT for COLOMBO, the magnificent nearly new clipper ship CHANNEL QUEEN, A1 eleven years, 609 tons register, H. MARQUAND, Commander; West India Docks. This splendid vessel (built in 1864), has proved herself to be one of the fastest afloat; she has been specially selected for season goods, and shippers may rely upon her being punctually despatched.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

COLOMBO LINE of PACKETS.

Will meet with the usual Quick Despatch.

DIRECT for COLOMBO, the favorite clipper ship, FRANCES. A 1 thirteen years, 310 tons register, J. HIGGS, Commander, West India Docks. This splendid vessel is well-known for her very rapid passages; has recently returned from Colombo, making the fastest passage of any ship sailing at the same time, thus offering a first-rate opportunity to shippers.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

A Regular Trader.

Will meet with the usual Quick Despatch.

DIRECT for COLOMBO, the splendid clipper-built ship FRANCES, A 1 thirteen years, 489 tons register, FRANCIS HILL, Commander, lying in the West India Docks. This fine vessel, well known in the Colombo Trade for her quick passages and sound delivery of cargo, is recommended to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will have the usual quick dispatch.

DIRECT for COLOMBO, the splendid high-classed clipper ship GRANVILLE, A 1 15 years, 696 tons register, G. GALLICHAN, Commander; lying in the West India Docks. This very high-classed vessel, well known in the Ceylon trade, is confidently recommended to shippers.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

A REGULAR TRADER.

To follow the "EXCELSIOR," with Quick Despatch.

DIRECT FOR COLOMBO, COCHIN (BEYPORE or CALICUT), CANNANORE and MANGALORE, the beautiful British-built clipper ship, STAR of CEYLON, A 1 ten years, 399 tons register, A. MATTHEW, Commander; lying in the St. Katharine Docks. This fine little ship, well-known in the trade, offers a first-rate opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's Bishopsgate-street, E.C.

Per P. and O. steamer, from Southampton, Sept. 20.—To Hong Kong: Mr. John Brown. To Ceylon: Mr. L. Carey, Mr. and Mrs. Strachan, and three daughters.

From Marseilles, Sept. 28.—To Singapore: His Highness the Tumongong of Johore and two friends, Mr. T. Scott.

Per P. and O. steamer, from Southampton, Sept. 27.—For Hong Kong, V.B.: Mr. Peter Orme. To Singapore (V.B.): Mr. T. Steel. To Yokohama (V.B.): Mr. James Bisset.

Per P. and O steamer, from Southampton, Oct. 4.—To Shanghai: Miss J. T. Blackwell. To Hong Kong: Mr. A. Zinnern, Mr. A. J. Macleod. To Shanghai: Reverend D. Perkis.

From Marseilles, Oct. 12.—To Singapore: Mr. and Mrs. Cumming.

Per P. and O. steamer, from Southampton, Oct. 12.—To Ceylon: Sir John Cheape, Mr. Cheape, Capt. Allfrey.

From Marseilles, Oct. 20.—To Ceylon: Mr. T. Shelford.

Per P. and O. steamer, from Southampton, Oct. 20.—To Hong Kong: Mr. R. M. Stephenson, Mrs. Carnegie, Miss Kate Smith.

From Marseilles, Oct. 28.—To Shanghai: Mr. W. Watson, Mr. G. Hughes. To Singapore: Mr. T. Scott. To Ceylon: Mr. G. Yule. To Hong Kong: Mr. Robertson.

Per P. and O. steamer, from Southampton, Nov. 4.—To Yokohama: Mr. E. Trotter. To Hong Kong: Mr. E. Bigg, Mrs. F. B. Johnson and two children, Mrs. D. O. Clarke and child.

From Marseilles, Nov. 12.—To Hong Kong: Mr. P. J. Forbes, Mr. E. Cunningham. To Shanghai, Aug. 29 (via New York and San Francisco), John A. Sandilands, Esq.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have dates to the 28th June. The mails of 26th April arrived out on the 16th June, conveying also telegraphic advices from London to the 15th May.

The principal item of news is the signing of the new convention and tariff, which has already been briefly announced by telegraph. The convention will be found in full in another column, together with an abstract of the tariff.

The *Japan Herald* says: — "In our own political world a work has been completed, almost equal to the signing of another treaty. The tariff has been settled, and the convention that makes it law signed by the representatives of the Tycoon of Japan and of the Treaty Powers, and the new system comes into operation on the 1st July. Both the tariff and the convention are given in our present mail issue, and we are of opinion that the latter will be read with very great interest, and its provisions meet with approbation. The Japanese Government, it will be seen, have yielded to the necessity of the bonded warehouse system. This virtually makes the open ports entrepots, and as our suggestion of free ports was not admitted (in which case the merchants would have had the goods in their own godowns under their own care), we consider the next best thing has been done. The question of drawbacks the Japanese authorities will positively not entertain, but much has been gained in the establishment of the bonded warehouses; and as the Chamber of Commerce so pertinaciously refused to have our scheme, they will now have the satisfaction of paying as before, and storing their goods in their own godowns, or taking advantage of the bonded warehouses and consequent facility for re-export, and paying warehouse charges to the Japanese Government, whilst their own warehouses are empty. The change, however, is a great advance, and the 8th, 9th, 10th and 11th articles are such as are calculated to assist the expansion of trade to an unlimited extent. The representatives of the four Powers had, we learn, the greatest difficulty in obtaining all that the convention yields, but their steady combination and unity of action, aided by their clear and convincing arguments, availed at last, and we see the result. The ground of complaint against the Tycoon that the Daimios may have before had is taken away, and not only they, but any of their people may trade freely at the

Digitized by Google

open ports, or in any port in the world, in anything but war vessels, without the interference of Government officials. The 7th clause, too, is a most important one, and if such regulations can be made as lead to the prevention of the constant irritation arising from the conduct of business by the petty Japanese officials, we shall indeed be thankful. Since reading and weighing the various articles of the treaty, we are more than ever convinced that every scheme that has been proposed for settling this tariff question had difficulties. We still like our own scheme best, and are pretty certain that before six months pass over us every member of the Chamber of Commerce that has a godown will think with us. But the easiest scheme is decidedly that which has been actually arranged; and if it had been possible to attach the drawback system to it, as at home, merchants would find it all that they could desire. Practically, however, we do not think that under the Japanese Government this could be worked, except with attendant annoyances that would keep Japanese and foreign officials always in hot water. As a whole, the Convention will be admitted to be a very admirable one; and although its more political provisions may be slow in taking effect, their ultimate advantages to Japan and its tradal and sociable developments are certain."

The depression caused by the intelligence conveyed in some of the later telegrams, of the disasters in the money market and the suspension of Overend, Gurney and Co., and other banks, discount houses, finance associations, large contracting and mercantile firms, is very great, and much anxiety is felt as to the details that will come by the next mail.

The position of affairs in the south is without improvement. H.M.S. *Cormorant* (says the *Japan Times*) arrived on the 27th June, from Nagasaki, and by her we have news from Shimonoseki. Our informant, who has lately been at that port for some time, reports that Chiosiu, considering the demands of the Shogoon absurd (the cession of a large part of his territory and his own disgrace), has definitely and positively refused them, and is perfectly ready to maintain his position by force of arms. He is, it is now well known, supported by Satsuma. The following document, purporting to be addressed by that Prince to the Shogoon, has been placed in our hands, and though we cannot vouch for its authenticity the source from which we obtained it renders it difficult for us entirely to discredit it. It runs thus:—

"Some years ago, on the occasion of a bad harvest in my dominions, I borrowed 3,000,000 bags of supplementary rice (or rice to supplement my wants) from Matsudaira Daigen no Daibu (Chiosiu). The said person has now fallen under Imperial (your) displeasure, and must suffer much inconvenience. I wish, therefore, to purchase 'in all the ports and harbours and convenient places,' 3,000,000 bags of rice to return his kindness with. This report is therefore made."

We do not in the least degree believe that Satsuma ever borrowed the above-mentioned rice, but the document is interesting as a specimen of Japanese diplomacy. The Shogoon has already paid a million and a-half of dollars as a penalty for the fault of Chiosiu in firing on foreign ships in the Straits of Simonoseki; it would be heaping Pelion on Ossa if he were now to allow himself to be taken in by this shallow artifice and permit Satsuma to provision the Prince of Nagato with rice purchased at his enemy's ports.

Intelligence has been received from Hiogo to the effect that an enormously rich merchant named Takadaya Kiubei has been arrested, and the whole of his property confiscated for the offence—it is alleged—of selling rice for exportation to France. We had heard of this previously, and from so many different sources as to compel our belief that, at all events, there is some truth in the report.

A collision has recently taken place between the Russians and Japanese on the island of Saghalien, north of Yesso. From good Japanese authority we (*Japan Times*) learn that the facts of the case were as follow:—Eight Japanese were driving out in sledges drawn by dogs, when they came unexpectedly upon a Russian outpost, into whose encampment they rushed, not being able to restrain their dogs. The Russian soldiers were offended at this rudeness, and began to beat the Japanese for it. The latter attempted to explain and apologise; but as neither party could understand the other's language, the Russians continued their blows until the Japanese could bear it no longer, and drew their swords, and having killed five of the Russians, withdrew. A complaint was made to the Japanese authorities at Hakodate, and the result was that all the eight Japanese who had been engaged in the affray were arrested and thrown into prison. Our informants cannot say in what part of the island this took place, but it is not unlikely that it occurred in the neighbourhood of the new Russian settlement at the southern extremity of Saghalien. We had previously been told by the Japanese that the Russians landed 500 troops there last spring. Thirteen years ago they had a settlement and small fort there, but did not keep it long, and now they have again taken possession of the same place.

CHINA.

PEKING.

From Peking we learn that matters in the North are in a very disturbed state. Kansuh is apparently hopelessly lost to China, and a Mahomedan rule is established there. Brigandage continues rife in Manchuria, and Wen Seang with his disciplined troops has gained no great success. The rebels are well mounted, and flit about amongst the hills, keeping out of his way, and creating the greatest confusion in that part of the empire. The Mongolian frontier, especially towards Ku-pei K'ou, is also infested by banditti, which renders travelling in that part of the country extremely unsafe.

We regret to learn that small pox is prevalent in Peking. One European, viz., Mr. Henning, Student Interpreter at the Russian Legation, had died of it. No other deaths amongst the foreign residents are recorded.

The weather in Peking has been extremely warm, the thermometer ranging about 100 Fahrenheit.

(FROM A CORRESPONDENT.)

The *Peking Gazette* often throws a glimpse of light upon the little known affairs of Tartary. The Lama hierarchy has during four centuries attained great power among the Tibetians and Mongols. It is the policy of the Chinese Imperial Government to patronise the great Lamas and to keep them in check. The way to keep Tartary quiet is to keep the princes and great Lamas in pay, to show them a studied external respect, and to keep a tight rein on their necks should they evince any tendency to independent action.

Each Mongol tribe has its living Buddha, a great Lama, who when he dies is succeeded by a boy Lama, into whose body the soul of the deceased is believed to have transmigrated. The great Lamas are called Gegen, "enlightened ones," or Hutuktu, "those who have attained rank." There are perhaps 200 Gegens in Tartary. A few among these receive the higher title, Hutuktu.

The *Gazette* states that one of these spiritual dignitaries now in Peking has requested permission to go to So'ning, in the province of Kansu, for the purpose of fighting the Mahomedan rebels. The temples of the Lama religion there need to be defended, and what the Hutuktu offers to do is to head a large body of Mongolian and Sifan Lamas, and lead them out against the Mohomedans now in insurrection; or he is willing to go in the train of a Chinese general. The Emperor refuses him permission, and directs the board for managing the affairs of Tartary to examine the title of this Lama to wear a yellow gown embroidered with dragons, said to have been presented to his fifth predecessor by the Emperor Kanghi. The Mahomedan rebels have retired lately from Shensi, and prospects have improved in that part of China.

NANKING.

The Nienfei have assembled in considerable force in the upper portion of this province, and are even said to have penetrated within sixty miles of the northern bank of the Yangtsze, opposite Chinkeang. This, if it be correct, is a rather serious announcement, as it implies their presence in the heart of the salt districts. It had been considered that Lihungchang, with his disciplined troops, possessed sufficient force to crush any rebel army that could assemble against him, and that, though much damage might have been done before the arrival of his troops at the scene of action, their success was certain. The event, however, has not justified these anticipations. Whether well or ill disciplined, his troops are commanded by men who are utterly ignorant of the simplest word of command, and the defeat which they have incurred was, under these circumstances, inevitable. They have lost several guns and a large number of Enfield rifles; the prestige of the rebels has advanced correspondingly, and the confidence of the population in their protectors has been shaken.

SHANGHAI.

Dates hence are to the 6th July. The outward French mails of May 17, conveying also telegrams from London to the 5th June, arrived on the 3rd July.

Digitized by Google

There is no news of any importance. Regarding the effect of the recently received intelligence of the crisis in London, the *Japan Herald* says:—

"The arrival of the English mail of the 10th May, with a telegraphic summary of each day's events to the 30th idem, removed a portion of the anxiety regarding the progress of the commercial crisis in England, caused by the uncertainty of the previous fortnight. The French mail, with papers to the 17th May, and telegrams to the 5th June, indicating improving prospects, arrived on the 3rd; but rumours of unfavourable advices to a latter date, received at Chefoo *via* Kiachta, continue to create uneasiness, though they are not credited. The establishment of the Indo-European and Kiachta lines of telegraph enables the receipt of so late advices, that the intelligence brought by the papers is always far in arrear. In effect, details of the numerous minor failures which the suspension of the banks and large houses named must have caused, have yet to arrive; the names of the principal only are given in the *London and China Express* of the 17th May. The suspension of the Commercial Bank, and the announced determination to wind it up, must of course cause some distress. The instructions, however, are, we learn, not to press realisation; and this wise order will no doubt prove advantageous to the bank's estate, and modify the inconvenience which the sudden suspension here, as well as elsewhere, cannot fail to create.

The collection of the taxes on the French concession, to which, as we mentioned in our last issue, the Chinese so strongly object, has been suspended until further data regarding them can be arrived at. The blame for the recent deadlock is thrown on Mr. Ortmans, the late Secretary, on whose assurance that the Chinese were delighted at the anticipation of the coming imposts the Council seem to have relied; whereas no steps, apparently, had been taken to ascertain their feeling on the subject, or to forewarn them of the intended measure. The consequence was that an exaggerated impression of the tax got abroad, and all the shopkeepers in the settlement, conceiving themselves menaced, combined to resist payment. They of course gained their object; the taxes have been temporarily abandoned, and the excitement has been partially allayed. The Council have, however, determined to make a new assessment, with a view to their re-imposition on a more equitable basis. We cannot but think it would be better to leave the recusants alone for a while. A visit by the municipal officers so immediately after the late *fracas* will renew an excitement which should be allowed to completely subside before any further steps are taken.

The adjourned meeting in the bankruptcy of Jarvie, Thorburn and Co. took place on the 4th July, when it was explained that the accounts were not yet prepared, and the meeting was in consequence further adjourned to Friday, 10th August, with, however, liberty to apply for hearing at an earlier date if the accounts should be ready.

Two of the men concerned in the robbery of the dollars from Messrs. Waller and Co.'s boat are sentenced to stand their trial before the Supreme Court.

The French barque *Guaiara* has been put up to auction at Mr. Nils. Moller's, and realised tls. 1,700.

A Naval Court was held at H. B. M. Consulate on the 2nd inst., to investigate into the state of discipline on board the *Highflyer*, and the Court gave their opinion that there were no ground for the rumours of laxity of discipline, and that Mr. Owen, the present master, is fit to continue in command of the vessel.

There is a rumour among Chinese of pirates having captured the Chinese war steamer *Maun-le-yun* (formerly the *Nora Creina*), somewhere near Wanchew—and that they murdered the three foreigners on board, namely, the captain (Parker), gunner, and an engineer. The report is said to have come overland to Ningpo.

A claim has been brought by Mr. Fraser, official assignee in the estate of J. Clifton, against the London Assurance Corporation for $8,344.03. The defendants, Messrs. Dent and Co., agents for the company, admitted the debt, but claimed to pay it by a draft on the secretary in London. The Court, however, ordered immediate payment, with interest from the date when the claim became payable. Judgment has been given in the case of the Comptoir d'Escompte *versus* Frazer and Co., in favour of the defendants. The plaintiffs claimed a lien against a shipment of sugar from Messrs. Williams and Co., Hong Kong, to Messrs. Frazer and Co. here. A bill had been drawn upon the latter firm but had been refused acceptance, and the plaintiffs alleged that it was secured by the shipment. The evidence however failed to prove that the bill had been covered by the shipment in question. A discharge has been given in the matter of Hugh Rose Innes, bankrupt.

HONG KONG.

Our advices from this port reach to 12th July. On the 4th July the London mail of May 26th arrived out with telegraphic news to June 12th, announcing suspension of the Agra and Masterman's Bank. The *Overland Trade Report* has the following account of the panic that ensued:—

The suspension of the Agra and Masterman's Bank on the 30th of June, following that of the Commercial Bank on the 22nd, which was noticed in the last *Trade Report*, has caused intense excitement in Hong Kong during the past fortnight, and created for a time amongst the Chinese such complete want of confidence that there was more or less of a run on all the banks. The Chartered Bank was literally besieged on Saturday, the 30th ultimo., and kept open its doors till ten o'clock, a measure which restored the confidence of Chinese note holders to some extent. The local efforts which ensued from the suspension of the two banks have been considerably mitigated by the fact that previous rumours of an unfavourable kind were brought on by successive steamers before the actual intelligence of the failures in London induced the managers here to close their doors. In this way note holders and depositors were enabled to realise, and they availed themselves of the opportunity to a very large extent. The average amount of notes of the Agra and Masterman's Bank in circulation during April was $213,400, during May it was $274,443, but when the bank actually stopped, on the 30th of June, the amount had been reduced to less than $50,000. The larger portion of the deposits, moreover, had been withdrawn, and it has been stated that the deposits which remained in hand at the moment of suspension did not exceed a sum of $20,000. The Commercial Bank had $180,000 of notes in circulation during April, and $120,000 in May. The local liabilities at the time of suspension had not been reduced to so low an ebb as in the case of the Agra and Masterman's Bank, but were much more than covered by the local assets. These assets were, in accordance with a motion passed at the meeting of creditors, paid into the Hong Kong and Shanghai Bank, and it was also agreed at the time by a resolution moved by Mr. A. Booth, that no individual creditor should commence an action against the bank on his own account to the prejudice of other creditors. As was pointed out in an article contained in the last *Trade Report* this arrangement seemed a very strange one, since if the creditors were all entitled to bring actions against the Bank and obtain judgment for their separate debts nothing could have harmonised with their interests better than such a line of action, since the abundance of the assets would have enabled the manager to meet every claim in full, provided a judgment of the court here empowered him to liquidate any of the obligations at all. Some doubt, however, appears to exist here as to the real state of the law on this point, for in spite of the resolution passed at the meeting, a considerable number of actions have been commenced by independent creditors. These cases came on before the Supreme Court, and the judge decided that no concerted action on the part of a body of creditors can bar the right of any individual creditor to put the law in motion on his own behalf.

During the panic the Chinese holders of notes offered them at enormous discounts, an opportunity eagerly availed of by some speculators. Some of these persons, chiefly Portuguese, who went about amongst the Chinese must have made a good harvest, for the natives altogether lost their presence of mind, and parted with their bank paper on almost any terms. In one case it was stated that a 100-dollar note on one of the suspended banks was sold for 20 dols., and during the run on the Chartered Bank which took place on Saturday, 30th of June, one Chinawoman brought a note on the Agra Bank begging that it might be cashed at half its nominal value, a request which for her own sake was of course refused. Even notes of the Chartered Bank were sold during the run at heavy discount by Chinese who could not reach the counter, owing to the crowd at the doors, although it was publicly announced that the bank would remain open as long as there were any applicants requiring notes cashed.

The Mint appears to be making satisfactory progress, the dollars latterly turned out, even from the old dies, showing a great improvement on the earlier specimens. The *Daily P...* says:—

Digitized by Google

"The peculiarities of the coin are very numerous, and as we have before explained the difficulty of producing it, owing to the fact that it was designed by artists having no practical familiarity with the art of minting, were embarrassing in the extreme. While the metal of which the dollar is composed is a far harder alloy than that from which shillings and half crowns are struck at home, the device is one which, if the metal were the same, would require an immensely greater pressure. When the Mint here first began to work, the dollars were coined with a pressure of seventy tons. This pressure, however, was found not to be sufficient, and it was augmented. The dollars are now struck with a pressure of ninety tons. This enormous pressure naturally condenses and hardens the metal, so that there is an advantage derived from it beyond the neat and finished appearance which it gives to the coin. The milling, by the way, is admirable now, and the relief of the design is slightly greater than it was, so that the new dollar is mechanically perfect at last."

(FROM OUR OWN CORRESPONDENT.)

HONG KONG, JULY 11, 1866.

The mail of May 26th, so anxiously expected here, arrived, surprisingly early, a week ago, and on the whole calmed the excitement which had prevailed pending the arrival of its advices, although the utterly unexpected news of the suspension of the Agra Bank created a monetary panic, chiefly among the Chinese holders of bank-notes. A run which will be long remembered in the colony took place on all the banks, but principally on one or two which were falsely reported as shaky, and it was only by keeping open doors until ten at night, and paying away as fast as some score of hands could shovel out dollars that the excitement among the natives was allayed. Notwithstanding this proof of solvency, the credit of European banks in general has received a severe blow, the Chinese not unnaturally feeling their own inability to discriminate or to obtain early and accurate intelligence, and there is difficulty in passing notes of even small value, whilst at Canton, I hear, the large circulation of Hong Kong bank-notes is entirely suspended.

In other respects the colony stands better than was imagined it would by this date; but we have still to "weather the storm" that will be occasioned in two or three mails' time hence, when the unaccepted bills begin to come back from abroad. At this moment of writing we are still ignorant whether war has actually broken out in Europe or not.

Locally, there is not much of interest to record. Sir Richard MacDonnell continues to carry on the necessary labour of "stirring up" his subordinates, but the Augean stable has so many stalls and so few outlets that even the colonial Hercules appears puzzled to know where to begin sweeping. It is unfortunate that, although respected for his energy and official determination, the new Governor should by a very decided brusqueness of manner and assumption of superiority tend to become privately unpopular. Such, however, seems to be the case. His Excellency does not apparently understand the *suaviter in modo* so well as the *fortiter in re;* and, as local writers have complained, he appears a little too fond of reminding his "subjects" that he is the "representative of the Queen." The feeling of loyalty is too faint in this cosmopolitan emporium to allow this consideration to become overpoweringly impressive.

A violent gale, probably the outrider of a cyclone, passed over Hong Kong on the 7th and 8th, but with the exception of knocking down some twenty-five yards of the sea wall, which was apparently built as a gauge for the force of the wind and waves, no damage of consequence was done. This is the third time the "Bowring Praya," or a portion of it, has been demolished by gales, and what its fate will be in a violent typhoon is confidently predicted. So utterly defective is this costly embankment that some time ago the local Government proposed doing the whole work over again (after a lapse of barely three years since its completion), but the landowners abutting on the roadway, who had already paid one assessment and had built, for the most part, handsome houses along the frontage, declined to bear the expense as they were requested. It cannot be long, however, before the sea-wall must be replaced, no matter who pays for it; and this will only be one of the many financial difficulties of which Sir R. MacDonnell has promised to lay a statement before the Legislative Council.

The political news from the coast of China contains the usual modicum of victories over the Nienfei rebels, who, however, are as difficult to extirpate as the Fenians (who are only Nienfei reversed, as somebody ingeniously observed the other day), and for the same reason, that they have no tangible organisation. Mere hosts of pillagers mounted on hardy ponies and unencumbered with baggage of any kind, these banditti march twenty miles to the Imperialists' one. Unlike the Taipings, they profess no political aim (which is an undoubted blunder on their part), nor do they seek to retain possession of any of the towns or villages they occupy and plunder. Hence, in the absence of superior strategy, flying artillery, and, above all, of mounted troops, the task of "pursuing" these pests of the northern provinces is well-nigh performed on paper only.

Some attention has already been excited here, and not without reason, through the publication of what appears to be a convention recently entered into between the Chinese Government and the French Minister, by which the control over Chinese converts to Roman Catholicism is virtually handed over to the missionary priests by whom the entire country is overrun. The political tendencies of such an arrangement are not to be mistaken. It is impossible, however, to conceive the working of the scheme for a single month without cause for quarrel. It is notoriously only the lowest class of Chinese, who have something to gain and nothing to lose, who listen, as a speculation, to missionary propagandists; and if, as appears from the regulations already published here (translated from Chinese proclamations on the mainland), every official charge against Chinese subjects who choose to call themselves Roman Catholics is to be investigated in the first instance by the missionary priests, it is easy to conceive that the authority of the native officials will be completely set aside. A case was only recently reported here, in which a Chinaman, who had been imprisoned on a charge of kidnapping in the interior was successfully claimed by a resident priest as a Roman Catholic convert, and allowed to walk scatheless. Unless I am mistaken, the stability of China has more to apprehend from this source than from the Nienfei.

Such of your readers as are interested in commercial statistics will be glad to hear that the annual reports of the Custom's employés at all the open ports have been published at Shanghai, giving a complete summary of the movement of trade during the past year. With the exception of one or two of the reports, which fall into the prevailing sin of the day, even on the subject of camlets and grey shirting — fine writing—the bulk are extremely sensible, terse statements of the local conditions of each port. From a summary appended to the pamphlet it appears that the total amount of duties collected on behalf of the Chinese Government in the five years ending June 30th, 1865, amounted to 32,559,482 taels, or say nearly £11,000,000. The total amount of imports for the same period is estimated at £30,000,000, and the exports at £120,000,000 sterling.

SIAM.

BANGKOK.

His Excellency the late P'raya Montree Suriwongs is succeeded by a half brother, P'raya Palat, who was formerly Governor of Pichabury—a clever and intelligent man. Political affairs are quiet for the present, and people are getting accustomed to the idea of the return of the "irascible Frenchman," especially since it has been carefully spread about that he is coming full of good intentions and determined to be a good boy. It is sincerely to be hoped that this may prove true. A French company, composed of great names, has asked to be allowed to make a ship canal across the Peninsula at a point not named, but modestly stipulating for a strip of country twenty kilometres on either side—only a small belt of twenty-five miles breadth, through the centre of the Siamese possessions. It is said that the British Consul has done his duty and pointed out the disadvantages to Siam which such a concession would entail.

The question about Chiangmai is decided in favour of Siam. The King's seal has been asked for in confirmation of the Northern chief minister's edicts, and it has been affixed, thereby settling the *vexata questio* as to the point whether Chiangmai was tributary to Siam or Burmah.

The Siamese Government has received definite news, says the *Bangkok Recorder*, regarding M. Aubaret's return to Bangkok. There appears to be no doubt about that gentleman assuming his official post in July or August. He is to be the bearer of an autograph letter from H. I. Master to H. S. M.

The French corvette *C. Mange* had arrived on an official

Digitized by Google

visit, and to acquire passes for the French exploring party who propose travelling up the Mei-cong river, from Saigon through Siamese, British and Chinese territories, as far as Yang-tse-Kiang to Hankow. The corvette left again on the 14th June, having obtained the passes requested.

JAVA.

The Governor-General has once more left Batavia on a tour of inspection, when he will visit the following places—Japara, Koedoes, Pattie, Rambang, Sourabaya, Modjokerto, Kedirie, Madioen, Ngawie, Soeracarta, Karang-Padan, Djocjocarta, Brossot, Ambal, Poerworedjo, and Tjilatjap.

The latest news from Pontianak (west coast of Borneo) is more favourable, and it is confidently expected that the native chiefs will soon come under submission.

The latest news from the expedition to the Pasoemah countries is to the effect that the troops are still before the fortified place Moetar-Alam, trying to force the natives to surrender the place by continual firing of grenades, and the cutting off of all supply of food. Reinforcements have arrived from Java.

The ship *Peter Johannes*, from Koetie, with a cargo of coals to Amboina, has been totally destroyed by fire, in sight of the last-named place. This is the second ship (the *Gustav Adolph*, mentioned in our last, being the first) belonging to the same owner, lost through the same cause. The coals from Koetie seem to contain much gas, which explodes and ignites easily, making the transport very dangerous.

The directors of the Java Bank have raised the rate of discount to 9 per cent. till further notice.

At the auction of tin, on the 9th June, 273 piculs Banca, quoted at 22 cents, were sold at average price of fl. 48.61.

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 20th July. The London mail of the 11th June arrived out on the morning of the 14th July. Telegraphic advices had been received down to the 29th June.

The news of the outbreak of war on the Continent combined with the continued depression in commercial circles, exercise a very destructive influence upon the trade of the place (observes the *Straits Times*). In face of the mutual stipulations of the belligerents against the capture of merchant ships, insurance offices here begin to look narrowly to the nationalities of the vessels upon which they take risks, and most Prussian traders have already changed their flags. The monetary crisis which has extended from Europe to the East, and which we alluded to in our last, has not produced here any very disastrous effects; a few bankruptcies in the native Bazaar—consequent upon the almost entire interruption to credit sales—being the most that can be reported as yet. Nor, as far as can be seen at present, is it likely that any more serious result will ensue.

The fortnight has been barren of events of local interest. The quarterly Criminal, Session which commenced on 9th July, was brought to a conclusion the same week, and Sir Benson Maxwell, the Penang Recorder, had disposed of a vast amount of accumulated civil business which had been standing over owing to the delay in the appointment of a successor to Sir Richard M'Causland. The Governor continues at Penang. Two houses in town fell down, burying ten or twelve Chinese, all of whom were recovered alive, though one has since died from injuries received. The weather has continued broken throughout the fortnight, and we have had copious rains—somewhat unusual at this period of the year.

The following, from the *Friend of India*, had excited considerable interest. It is suggested by the local journals that a list of the unclaimed states alluded to as belonging to the Straits ought to be published simultaneously with the yearly Government report:—"The draught of a Bill appears in the *Gazette of India* to empower the Government of India to transfer to the public Treasury sums amounting to nearly Rs. 6,70,000 in Government securities and cash, now in the High Courts of the three Presidency towns, deposited in the course of suits instituted in the late Supreme Courts, and funds under similar circumstances in the Supreme Court of the Straits Settlement. These sums have been unclaimed for more than twenty years. The proceeds of certain estates administered by order of the Supreme Court of Straits Settlement, have also been unclaimed for fifteen years. The transfer will, of course, be subject to any claims which may hereafter be established to the satisfaction of the Court from which it is made."

We are glad to learn that the Messrs. d'Almeida have succeeded in withdrawing their estate from the Insolvent Court, and have arranged to pay a composition of twenty-five per cent. We believe that from first to last they have encountered no opposition, but on the contrary have received the support and sympathy of their creditors.

During the course of the Criminal Session, in the case of conspiracy brought by ex-Duffadar Nulla Permal against Pakerce and two others, the petit jurors brought in a verdict of "not guilty," there being insufficient evidence.

A new line of telegraphic wire is being laid between town and Tanjong Paggar.

The French barque *Barnave* has been sold privately for $4,000.

It was rumoured last year that the Cama Free School had been abandoned owing to the failure of the house of B. H. Cama and Co., at Bombay, but we are happy to state that such is not the case, and that the school at Tanjong Paggar is still being carried on under the same tutor as formerly, and that, the number of scholars is at present one hundred and twenty.

The Marine Court of Inquiry into the circumstances attending the stranding of the British barque *Marina*, Mr. James Maclaren, master, found as follows:—

That the *Marina* left Sydney on the 19th April, 1866, with a cargo of coals, bound to Point de Galle. That, from the evidence brought before us, the *Marina* was stranded at 3 p.m. on the 25th May, 1866, on a small coral patch, about 16 feet square, in the E. end of Prince of Wales' channel, Torres Straits, off which she floated, subsequently sunk in deep water, about a cable's length to the N.W. of the reefs. This small coral patch does not appear on the latest chart of Torres Straits, or in the one used by the master of the *Marina*, and from the bearings taken at the time ship struck, viz.: Double Island, S. ¼ N.; Ince Point, S.W.; Traver's Island, N. ½ W.; we would fix its position in about latitude 10 28' S.; longitude 142·22' E. As the master of the *Marina* appears to have taken every precaution in navigating the vessel, and done his best to save her after she stranded, we fully acquit him of all blame for the loss of the ship. As this coral patch appears to lie in the fair way, and in the course recommended in the chart through Torres Straits, we would suggest the immediate publication of its supposed position.

The *Straits Times* conceives hopes of renewed prosperity for nutmeg cultivation. It says:—

There is a feature at present observable here among the old decaying nutmeg plantations which we think should be the subject of careful inquiry and perhaps experiment. A close observer who may lately have had occasion to pass close to any of these abandoned plantations must have been struck by the improved appearance of many of the trees. The sickly whitened branches which have been bleaching half dead in the sun for as many as two or even three years, will be found to be clustered over with young healthy shoots completely concealing in many instances, the trunk and larger branches. A complete revival of the tree is not possible, for the nature of the disease or blight has been such that the extremities of most of the branches have rotted away and fallen off, but otherwise the revival now observable is so marked as to lead to the belief that if progressive it prove to be lasting, and be judiciously encouraged, many plantations now abandoned and lying waste might be rendered remuneratively productive.

We will not have long to wait to ascertain whether this improvement be accidental, due to some exceptional variation of the year's climate, or be of a permanent nature produced by the departure of the blight, or by the unnoticed accession of certain conditions favourable to the growth of the tree. But there is a danger that what is, perhaps, really an effort of nature towards a permanent revival may, in the absence of any encouragement or attention, again subside without having accomplished an effectual remedy. It is more than likely that the indications now noted to be successful require to be seconded by artificial aid more or less active; and the end in view is surely worthy the serious attention of very many here. As far as can be gathered at present, it seems that the trees which have been revived to the greatest extent are those around which a dense but not high scrub has accumulated—effectually shading the ground at the roots from the sun, and at the same time permitting the access of air and ventilation to the tree itself. Shade and coolness to the roots, therefore, combined with perfect ventilation, are conditions enjoyed by the now reviving tree which it did not possess under our system of cultivation, and the secret of the improvement probably lies here. In support of this, an instance occurred not long ago:—A road had to be made through what had been a nutmeg plantation, and at one part a small embankment had to be raised which covered up a decaying nutmeg tree about three feet above the original level of the soil; the tree was not cut down—the lower branches being

Digitized by Google

merely cut away to give it its original shape. In the course of seven or eight months a decided improvement was observable in the condition of this tree, which had been little more than a skeleton, and at the present moment it is so surrounded by fresh twigs and foliage as to completely hide all indications of blight, and is moreover in full bearing. We can do little more in such a matter as this than to point to the facts, and leave to those whose interest dictates and whose experience warrants the proper treatment of them. The revival of the nutmeg growth of this place would be, however, a matter of such importance to us that every stimulus should be given to the regard of symptoms such as we have pointed out.

The following corerspondence has been made public by direction of the Singapore Chamber of Commerce :—

To the Secretary to Government, Straits Settlement.

Chamber of Commerce, Singapore, June 18, 1866.

Sir,—The Chamber of Commerce will feel much obliged by your bringing to notice in the proper quarter the fact that the ship *Hurry Puddemsey*, which left Liverpool on the 22nd of February last, and arrived here on the 6th of June inst., was cleared out at the Liverpool Custom-house for Bombay, and that no notice of the change of destination appears to have been afterwards given.

As far as the Chamber are aware, the *Hurry Puddemsey* was not compelled by stress of weather, or other inevitable cause, to bear up for Singapore, and the misstatement as to her destination at the Liverpool Custom-house would appear to have been wilful, and intended to mislead as to her real port of discharge.—I have the honour, &c.,

A. Logan, Secretary.

From the Master Attendant, Singapore, to the Master of the British ship *Hurry Puddemsey*.

Sir,—I have the honour to request that you bring your manifest of cargo, and any instructions you may have received from the owners of *Hurry Puddemsey* to this office and at the same time afford an explanation why you brought the ship to this port and discharged the cargo here while you cleared at the Custom-house Liverpool for Bombay.—I have, &c., H. Burn, Lieutenant, Master Attendant.

Singapore, 21st June, 1866.

To H. Burn, Lieutenant, Master Attendant.

Sir,—According to your request in your letter of yesterday, I hand you herewith manifest of the ship *Hurry Puddems y's* cargo, and beg to say, that all instructions I receive from my owners regarding the ship's business I look upon as intended for my private perusal only. I further beg to inform you that my reason for coming to this port was, that I received orders from my owners to do so when ready for sea, and to receive further orders from my consignees here as to the further disposal of the cargo, and by these gentlemen I was instructed to land the cargo at this port.—I have, &c., J. B. Poole.

Master of the ship *Hurry Puddemsey*.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

DEATHS.

Bate—On the 28th June, at the Government Civil Hospital, Hong Kong, Henry Bate seaman unemployed.

Berthier—On the 14th July, at High-street, Singapore, Mr. Antoine Berthier, for many years inspector of police, aged 53.

Cathcart—On the 1st Aug., very suddenly, at Gibraltar, Hugh W. M. Cathcart, Lieut. 32nd Lt Infantry, second son of Sir John and Lady Eleanor Cathcart, aged 26.

Clayton—In Jun 1st, off Chinkiang, on the ship Highflyer, Captain John Thackwell Clayton, second son of the Rev. John Clayton, M.A., vicar of Stratford-on-Avon.

Cowie—On the 14th June, from an accident, while crossing a mountain torrent in Cashmere, Henry Cowie, Esq., second son of the late John Cowie, Esq., of Calcutta, in the 31st year of his age.

Crawford—On the 1st July, at Hong Kong, Fenton Robert Archibald, infant son of D. R. Crawford, Esq., aged 8 months.

Horn—On the 8th June, on board the P. and O. steamer Madras, on a passage to Australia, for the benefit of his health, William Horn, Esq., of Ceylon, C.E., only son of the late Robert Horn, Esq., of Roker, Bishop Wearmouth, Durham.

Jameson—On the 22nd June, at Hong Kong, Henry Charles, youngest son of Mr. and Mrs. Jameson, Gough-street, aged 4 months and 8 days.

Lessler—On the 10th July, at Bangkok, Siam, Max Elliot, only son of Paul Lessler, Esq., aged 8 months and 6 days.

Moyle—On the 16th July, at Singapore, Alfred George, son of Mr. J. M. Moyle, aged 21 days.

Michell—On the 23rd Aug., at 76, Portland-place, General Sir John Michell, K.C.B., Royal Artillery, in his 85th year.

Simon—On the 4th July, at the Government Civil Hospital, Hong Kong, James Simon, a citizen of the United States of America.

Zinggeler—On the 22nd July, at Yokohama, Augustus Zingeeler, of Waedensweil, Canton, and of Zurich, Switzerland.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama . . .	6 months sight.	4s. 6·d.	4s. 7½d.
At Shanghai .	6 ditto	6s. 2½d.	6s. 4d. to 6s. 4½d.
(per Tael.)			
At Canton . .	6 ditto	4s. 6½d.	4s. 7d.
At Hong Kong . .			
At Macao . . .			
At Singapore . . .	6 ditto	4s. 4½d.	4s. 5½d. to 4s. 6d.
At Manila . . .	6 ditto	4s. 0d.	4s. 0·d.

At Shanghai, Bills on India, Rs. 297 per 100 taels. At Hong Kong, Rs. 217 to 218 per $100. Bar Silver at Shanghai, 111.2 taels; at Hong Kong, 11 per cent. prem. Mexican dollars at Shanghai, taels 71.8 per 100; and Exchange on Hong Kong, 28 discount. Hong Kong and Shanghai Bank Shares, 2 to 4 dis.; Gas Company, 15 per cent. prem.; Hong Kong and Whampoa Dock, 40 per cent. prem.; Steam Shares, 30 per cent. discount; Union Dock Company, 10 per cent. dis.

The following is from Sharp and Co.'s Bullion Circular:—

GOLD.—The receipts amount to $480,000 worth, and the exports to $350,000, including the shipments per Ottawa on the 29th ult., and excluding those to leave to-morrow.

Not much Gold has been purchased for the outgoing steamers.

SILVER.—The arrivals have been $630,000 value, and the amount sent away $260,000. Both Sycee and Bar Silver have been in good demand for this and the Calcutta steamers leaving shortly.

DOLLAR CURRENCY.—The preponderance of exports over imports still continues, notwithstanding large receipts from Shanghai, where speculators in clean Mexicans have had to give way under the pressure of 12 per cent. interest. 1,120,000 dols. have been received, and 1,970 000 dols. sent away coastwise and to India, to which latter place large remittances are in process of shipment by the present mail. The new Hong Kong dollars can hardly yet be spoken of as "in circulation." Some of the banks are "chopping" their clean Mexicans upon the principle of thinning out the grapes, that those left may grow finer.

DISCOUNT AND MORTGAGES.—Money is still difficult to be obtained except on very good securities, on which, however, there is more disposition to lend than lately.

EXCHANGE.—The business of the mail has been materially lessened by the indisposition of the banks to purchase bills except at a wide margin from their selling rate. In rupees next to nothing has been done; the orders from India being peremptory to remit no bank drafts whatever.

SHARES.—The 1st July settlement in bank shares passed off satisfactorily with one or two exceptional defaulters.

On the announcement of the failure of the the Agra and Masterman's Bank our local shares slightly receded; but on its afterwards becoming known how fully secured was the Hong Kong and Shanghai Bank from any loss on that account, the stock quickly rallied to our last quotation.

Other sales have been quite unimportant and rates remain unaltered.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The startling news from home could not but have the effect of checking to some extent the extravagant purchases of tea which went forward when the season opened, at all the ports. In the face, however, of the intelligence from Europe the impulse revived in the course of a few days, and prices have again been paid for teas up the country which only enable the purchasers to lay them down at the coast ports at about London rates. This policy moreover is pursued in spite of an unprecedentedly large export to Great Britain, which up to the 1st July amounted to more than thirty million pounds.

CANTON.—There is only a very limited business to report; the few transactions effected again showing a slight decline in favour of purchasers. Country Congous: Seven further chops have arrived, and thus the stock now amounts to ten; for which, as yet, no offers have been made that are at all likely to lead to business. These Teas, with a few exceptions, consist of the medium grades of the first crop Teas, and the teamen at present are asking absurdly high rates for them. Canton-made Teas: During the fortnight attention has chiefly been given to Scented Capers, of which about 11,000 boxes have been taken at from 21 to 31 taels, prices being somewhat irregular. Some 6,500 boxes Scented Orange Pekoes have found buyers at from 22 to 36½ taels, and we consider both kinds of Scented Teas again show a slight decline in prices. The settlements quoted for Canton Packed Congous and Gunpowders are intended for the Australian market.

AMOY.—Some excitement has been caused by the price of two contract chops of fair cargo Oolong having been settled at $28½ to $32 per picul. Otherwise the market remains closed, but we fear these extreme rates will tend to raise the already absurdly high notions of the teamen. Arrivals to date are—Congou 17,048 pkgs., Oolong 12,279 pkgs., Pl. Or. Pekoe 244 packages. Same date last year—Congou 11,217 pkgs., Oolong 3,403 pkgs., Pl. Or. Pekoe 951 packages.

FOOCHOW.—Congou: Since the date of the last circular a considerable business has been done, principally for the colonies. Latterly, most Australian orders having been satisfied, and arrivals from the country having been moderate, transactions have been smaller, and the market closes quietly. A rise of one tael on the lower grades is noticed. The second crop Teas are now coming in, and, so far, but poor in quality Souchong. The market is said to have been just opened at 48 taels for two good chops of the burnt tarry kinds. Two or three other parcels have it is said been shipped, but without prices having been arranged. Pekoe: One chop settled. It is fine but very mixed in leaf. Oolongs: Nothing has been done, and prices asked are at present far too high for American buyers. Pekoe: 100 chests at taels 29.5 for mixed leaf. Scented; 660 boxes at taels 10 to 10.5 for dust, 5,027 boxes at taels 24 to 32 for fair to good, 4,100 boxes at taels 35 to 40 for fine to even wiry leaf.

NINGPO.—Five chops have gone forward to Shanghai, consisting of 6,935 packages Pingsueys, but no sales at that port have as yet transpired. Prices in the country still rule very high, though quotations thence show a decline of from taels 2 to 5 per picul from highest point. Good average chops could now be laid down at about taels 35 in Shanghai. Exports, of Leaf Tea pls. 174.

SHANGHAI.—The export from this port and Hankow to Great Britain is about 1,000,000 lbs. above, and to America 1,500,000 lbs. below last year's to same date. Black Teas: A very limited business is to be reported for the fortnight, buyers having been holding off for the French Mail advices, which did not arrive until last night. The market can scarcely yet be said to have fairly opened, the only settlements being one chop of fair Oonam at tls. 25, three chops of flavoury Hohow (Kaisow kind) at tls. 28 to 34, and a small parcel of fine Ningchow at tls. 36½—prices which lay down the Teas at about their London value. The above show a very heavy loss on Hankow cost. There has since been more disposition to operate, and several offers at the equivalent of home rates are likely to be accepted. Arrivals have been numerous, but a large quantity of Teas will probably be shipped on owner's account rather than be sacrificed here. Settlements 2,360 chests (as above). Re-shipments, 21,800 chests. Stock 40,000 chests. Total settlements with re-shipments from Hankow, from 1st June to date, 47,600 chests, against 24,100 chests last year. Green Teas.—Supplies of Pingsuey are beginning to arrive, and musters of three chops were placed on the market on the 3rd. High prices are demanded, but it remains to be seen what opening rates will be. The make and colour of the leaf are not at all good, but the liquors are pale, sweet, and delicate. One chop has been reshipped. The stock of 1,000 hf.-chests of old Tea still remains on offer, and about 3.000 hf.-chests of Pingsuey. Total settlements with re-shipments from Kiukiang, from 1st June to date, 1,200 hf.-chests, against 4,500 hf.-chests last year.

HANKOW.—Advices are to the 30th ultimo. Contrary to all expectation, the Mail news of 26th April did not have the effect of reducing prices. For a few days buyers held off, but a slight concession on the part of teamen led to an active demand, and a good business is reported at about previous quotations. Medium and fine grades had been chiefly selected, and first crop Teas with quality were nearly exhausted. The second crop Oopacks were expected in about a week. Five ships had been despatched for London, leaving only the Lauderdale on the berth. Settlements for the fortnight were 32,100 chests, at the following prices: Oonams: Common to fine, tls. 19 to 29½ per picul. Oopacks: Fair to fine, tls. 26 to 35½ per picul.

KIUKIANG.—From this port advices are to the 2nd inst. Black Teas: The market was reopened by the purchase of five chops at a fall of tls. 3, and total settlements for the fortnight reached about 4,500 chests Ningchow at tls. 25 to 31 and one small chop Hohow at tls. 24. At the latest date the market was again closed, though there were nearly 3 00 chests in stock. The teamen generally were very hard pressed for funds. Prices had been, Hohow: Fair, tls. 24 per picul. Ningchow: Fair to fine, tls. 25 to 31 per picul. The Napoleon III. took in 2,100 packages at Kiukiang, and went on to Shanghai to fill up. Green Teas: First arrivals are looked for towards the end of August.

YOKOHAMA.—There is no new feature to note in the Tea market since the departure of the French Mail on the 12th inst.; the market having been opened by a few purchases made early in the fortnight has since relapsed into a state of almost complete stagnation, and buyers, influenced by the unfavourable advices received both from England and America, are holding off in the hope of obtaining the tea at easier rates; the holders are, however, firm in their demands, only showing some little inclination to barter their produce against Cotton goods at a low price; stocks are rapidly accumulating and as there is a great scarcity of money on all sides, we may reasonably expect a concession. The settlements comprise about 970 piculs of New Tea at about previous quotations, the description is good medium, with one or two parcels of fine kinds; these have been made for the American market.

RAW SILK.—The quantity of Raw Silk taken by the present mail amounts to 1,859 bales, of which 1,567 are for Southampton and 292 for Marseilles. There are also 56 cases for Southampton.

CANTON.—There has been but little done in silk for Europe up to the present time, owing to the serious news received from home by the last two mails, and the only settlements of importance have been re-reeled Cumchucks and Lacklows for the American market. This has forced up prices for all kinds, helped by an impression on the minds of a few Chinese speculators that immediately buyers for Europe enter the market rates will gradually advance as they did last year, and they have bought up all the first and second crops, and stored it in the country. The reported settlements therefore are slightly under present quotations, but as few orders are left open and stocks increase, prices will again decline. The third crop is expected in about three weeks, and will probably be fully as plentiful as the second. Reported settlements and prices are as follows:—Tsatlee Nos. 1 and 2 104 bls. $490 to 520 per pcl. Loong-Kong, Nos. 1 and 2, 50 bls., $470 to 480 per picul.

NINGPO.—Hanins ruled as high as 460 tls. laid down in Shanghai for Nos. 1 and 2. Shouhings (long reels), 390 tls. for Nos. 1, 2, and 3. Hangchows, No. 1, 435 tls. per picul laid down in Shanghai. These are the higher points, and on which there is now a decline of 30 tls. per picul for the first two kinds. Foreigners have done but little in the article, and rates have been maintained by the inquiry for native use. The very high cost of mulberry leaf, which caused great numbers of silkworms to perish,

Digitized by Google

compel the native growers to ask much higher rates than they otherwise would. The crop will fall very much short of what was at first expected.

Shanghai.—About 300 bales Chinas have been purchased on this market since the departure of the last mail, which, with the addition of about 1,000 bales received from the country on European account, and 194 bales from Japan, make up the settlements for the fortnight to about 1,500 bales. Prices have advanced about tls. 30 per picul on all fair to fine Silks offering on this market, and about tls. 50 in the country, where the chop No. 3 Tsatlees are costing about tls. 500. It is now generally believed that the crop this season will not be larger than that of the past one, and that the proportion of good Silk will be much smaller. Settlements of Silk from 1st June to date amount to about 4,100 bales, against same time last season, 18,000 bales.

Yokohama.—The mail of the 28th April reached this port on the 16th inst. The news she brought reduced to a very few the number of buyers. Though the settlements for the fortnight hardly amount to 150 piculs, they have been enough to keep up prices, and quotations remain almost unaltered. The resistance of native holders is further encouraged by the reports from the interior, which represent the cropas progressing unfavourably under the influence of wet and cold weather, and a few parcels of common and inferior Ida, Oshio, and Etchesan have been shipped by this mail through foreign houses on Japanese account. Whilst last year at this date some new Silk had already appeared on the market and prices were opening at $700 for best Mybash, this year, what little remains of medium old Mybash is held at from 700 to 740, and merchants are still waiting for the new Silk. The unsold stock is now reduced to about 500 or 600 piculs of common and inferior sort. Total settlements since the 1st of July amount to 11,500 bales against 16,500 bales same time last year. As regards Silkworm's eggs the Japanese decline making contracts, and talk of enormous prices and that the season being decidedly late, large arrivals are not expected before the end of July.

CHINA IMPORTS.

HONG KONG.

The only arrival has been the steamer *Agamemnon* from Liverpool. Part of her cargo was discharged here. There has been a good inquiry during the past fortnight, and although many importers have freely met the demand, prices of many descriptions have gradually hardened. Cotton Yarn and Grey Shirtings are in best demand, but the general activity has in some degree extended to the other descriptions of Cotton manufactures, and to Woollens. Recent advices, both from the Northern Ports and England, are more favourable, and it is hoped that the present is but the commencement of a good business.

Raw Cotton has had a fair amount of attention during the past fortnight, and prices have been well maintained, although no advance is apparent. Quotations are—Bengal, $18 to 20½ per picul; Tientsin, $21 to 22 per picul; Shanghai, $21 to 22 per picul (nominal); Ningpo, $22 to 24 per picul. Sales about 9,000 bales.

Cotton Goods.—Cotton Yarn: Just prior to the departure of last mail some sales of No. 16 to 24 were effected at a considerable reduction on the previous quotations for this description, and these were soon followed up by others on a similar scale of prices lately; however, rates have advanced somewhat, and for very best quality $200 per bale has been paid. Ordinary to good qualities, however, may be quoted worth $185 to 195 per bale. For medium and finer descriptions there has been some demand, but quotations for them remain unaltered. Grey Shirtings: 8¼ lbs. have been in good request at gradually improving prices, and best makes may now be quoted worth 3.90 dols. to 3.95 per piece, although for a few pieces as much as 4 dols. per piece has been paid; 7lbs. are still very scarce, and have only found buyers to a very moderate exent. White Shirtings: The lower descriptions are in small request, but prices are low and unsatisfactory. Grey T-Cloths: 8lbs. 36 in. have been inquired for to a small extent, and prices have ruled very irregularly, ranging from 3.90 dols. to 4.55 per piece. The lighter weights attract but very little attention at the moment. Dyed and Fancy Cottons: Are in moderate request, and a fair amount of business has been done in them.

Woollens.—Long Ells: The accounts from Shanghai about these goods are favourable, and several purchases for that port have been made. Camlets: Must again be quoted lower, sales of SS having been effected at $19.50 to 20 per piece, but there is more inquiry. Lastings: Settlements are trifling, and prices unaltered.

Metals.—Nail Rod Iron continues in demand, and higher rates are now current. Lead is in moderate request at former prices. Tin Plates and Quicksilver: No sales.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Yokohama.—From London: June 23, Broadwater; 26, Isles of the South. From Cardiff: 23, Clara R. Sutil.

At Shanghai.—From London: June 26, Helen Nicholson; 26, Westminster. From Cardiff: 26, Blencathra; 27, Persia, Minister Pahud. From Hamburg: Manila.

At Hong Kong and Canton.—From Liverpool: June 29, Eagle; 29, Acapulco; July 1, Favorite; 30, Ceylon. From Newcastle: 29, Reindeer. From Sunderland: 30, Caldew; 9, Stanley. From Hamburg: 9, Arber.

At Manila.—From Liverpool: June 28, Eulalia. From Glasgow: July 2, Union. From Cardiff: June 21, Isaure.

At Singapore.—From Newcastle: Graafstroon. From Cardiff: Onward, Emma. From Shields: Yeavering Belle. From New York: Powhattan.

At Penang.—None.

DEPARTURES.

From Yokohama.—None.

From Hankow.—For London: June 21, Hoangho; 24, Sir Lancelot; 25, Napoleon III.; 28, Fire Queen; 30, Gossamer.

From Shanghai.—For London: June 23, City of Aberdeen; 30, Burdwan.

From Foochow.—June 26, Laurel; 27, Lennox Castle; July 1, Sovereign of India; 2, Amber Witch.

From Hong Kong and Canton.—For London: July 6, Island Queen; 9, Taymouth Castle; June 28 (*via* Macao), Alma. For New York July 6, Music.

From Manila.—For Falmouth: June 22, George Avery. For Cork: 30, Zwaar; July 3, Theresa.

From Singapore.—For London: July 11, Yuh Shing. For Liverpool: 16, Activ.

From Penang.—None.

VESSELS LOADING.

At Yokohama.—For London: Conference. For United States, None.

At Hankow.—For London: Lauderdale.

At Shanghai.—For London: John R. Worcester (full), Pakwan (full), Cinderella, Coulnakyle, Fusiyama, Illimani, Coral Nymph, Star of China, Vigil, Helen Nicholson, Antipodes, Lansdown, Peterboro'; for United States, None.

At Foochow.—For London: Dewa Gungadhar, Scindia, Devana, Maitland, Ornate, Zingra, Naomi, Philomela. For Liverpool, Everest.

At Hong Kong and Canton.—For London: Valdivia, Solent, Cedars, Victoria, Don Ricardo.

At Manila.—For Cork: Prudhoe, Equinot. For New York, Rangoon, Rattler, Sailor Prince, Sooloo, White Swallow.

At Singapore.—For Liverpool: River Eden, Edinburgh Castle, Blandina Dudley. For London, Benvonlich, Dovercourt, Gananoque.

At Penang.—For London: Oribe, Benvenue, Balaklava.

FREIGHTS AND CHARTERS.

At Yokohama.—To London: Cotton and tea, £2. 10s. to £3; silk, £4 to £4. 10s. per ton.

At Hankow.—The rate to London is £6 per ton of 50 cubic feet.

At Shanghai.—There are a large number of vessels on the berth for London, but no charters are reported. The rate is £4.

At Foochow.—To London: £2 to £3 per ton.

At Hong Kong and Canton.—In home charters direct nothing has been done. For London The Cedars and Valdivia have been laid on at Whampoa, and the Don Ricardo to load here, calling at the Cape. The rate at Whampoa is still £3. 10s. per ton, but lower rates will have to be accepted shortly. The circular of George Holmes shows 98 vessels in harbour disengaged, representing 52,251 tons.

At Manila.—The Rangoon has fixed for New York at £2. 5s. for 600 tons clayed sugar, and £4. 5s. for hemp per 20 cwt. The Prudhoe loads for a port in the United Kingdom a cargo of clayed and unclayed sugar at £2. 17s. 6d. and £3. 10s. respectively. The Rattler has engaged hemp for New York at £4. 5s. per 20 cwt.

At Singapore.—Vessels on the berth for England are filling up slowly at £2 per ton dead weight, £2. 10s. light cargo.

VESSELS PASSED ANJER.

From England and Continent to China, &c.—June 23 Nagasaki, Rotterdam to Samarang; Gebroeders, Amsterdam to do. 30, Polmaise, London to Shanghai. July 1, India Packet, Amsterdam to Batavia; Aurora Australis, London to Shanghai; Gresham, London to Hong Kong; Adelia Carleton, Liverpool to Hong Kong. 5, Caduceus, Shields to Shanghai. 6, Red Deer, Cardiff to Shanghai.

From United States to China, &c.—June 22, Christopher Hall, New York to Hong Kong. 30, Samuel Russell, New York to Shanghai.

From China, &c., to England and Continent.—June 24, Kungman. 24, Patriot Queen, Singapore to Liverpool. 29, Alfred Ray, Singapore to Bristol. 29, Black Prince, Foo-chow to London. 30, Aurelia, Singapore to Bordeaux. July 3, Ziba, Foo-chow to Liverpool. 5, Falcon, Foo-chow to London.

COMMERCIAL POSTSCRIPT.

Arrivals not included in the Tables.—August 22, off the Lizard, from Rangoon, Prince Waldemar; 27, at Liverpool, from Rangoon, William Prowse; at Falmouth, from Akyab Freya, from Rangoon, Wilhelmina.

Departures.—August 25, from London, for Colombo, John Banfield; for Hong Kong and Canton, Shun Lee; for Singapore, Petchelee; 23, from off Dover, for Batavia, Lichstraal; from Cardiff, for Galle, Nonantum; from Liverpool, for Manila, Cuico Hermanos.

Spoken.—Heroes of Alma, London to Japan, July 15, 11 N., 27 W.; Nereus, Sunderland to Singapore, June 29, 20 S., 29 W.

IMPORTS.

From Foo-Chow-Foo to London, per Erl King, entered August 2nd, 2,553 chests 1,146 half-chests 250 boxes 15,373 packages tea—Order; 4 cases preserves—J. Byles; 11 cases tea 3 cases cigars—Captain.

THE JAPANESE CONVENTION AND TARIFF.

CONVENTION.

The Representatives of Great Britain, France, the United States of America, and Holland, having received from their respective Governments identical instructions for the modification of the Tariff of Import and Export duties contained in the Trade Regulations annexed to the Treaties concluded by the aforesaid Powers with the Japanese Government in 1858, which modification is provided for by the VIIth of those Regulations:—

And the Japanese Government having given the said Representatives, during their visit to O-saka in November, 1865, a written engagement to proceed immediately to the Revision of the Tariff in question, on the general basis of a duty of 5 per cent. on the value of all articles Imported or Exported:—

And the Government of Japan being desirous of affording a fresh proof of their wish to promote trade and to cement the friendly relations which exists between their country and foreign nations:—

His Excellency Midzuno Idzumi no Kami, a member of the Gorojiu and a Minister of Foreign Affairs, has been furnished by the Government

Digitized by Google

of Japan with the necessary powers to conclude with the Representatives of the above named four Powers, that is to say:—

Of Great Britain.

Sir Harry S. Parkes, Knight Commander of the Most Honourable Order of the Bath, Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary in Japan.

Of France.

Monsieur Leon Roches, Commander of the Imperial Order of the Legion of Honour, Minister Plenipotentiary of his Majesty the Emperor of the French in Japan.

Of the United States of America.

A. L. C. Portman, Esq., Chargé d'Affaires *ad interim*.

And of Holland.

Monsieur Dirk de Graeff van Polsbroek, Knight of the Order of the Netherlands Lion, Political Agent and Consul-General of his Majesty the King of the Netherlands.

The following Convention comprising Twelve Articles:—

Article I.

The contracting Parties declare in the names of their respective Sovereigns that they accept, and they hereby do formally accept as binding on the subjects of their respective Governments, and the citizens of their respective countries, the Tariff hereby established and annexed to the present convention.

This Tariff is substituted not only for the original tariff attached to the Treaties concluded with the above-named four Powers, but also for the special Conventions and arrangements relative to the same Tariff, which have been entered into at different dates up to this time between the Governments of Great Britain, France, and the United States on one side, and the Japanese Government on the other.

The new Tariff shall come into effect in the port of Kanagawa (Yokohama) on the first day of July next, and in the ports of Nagasaki and Hakodate on the first day of the following month.

Article II.

The Tariff attached to this convention being incorporated from the date of its signature in the Treaties concluded between Japan and the above-named four Powers, is subject to revision on the 1st day of July, 1872.

Two years, however, after the signing of the present convention any of the contracting parties, on giving six months' notice to the others, may claim a readjustment of the duties on Tea and Silk on the basis of 5 per cent. on the average value of these articles, during the three years last preceding. On the demand, also, of any of the contracting parties the duty on timber may be changed from an *ad valorem* to a specific rate six months after the signature of this convention.

Article III.

The Permit fee hitherto levied under the VIth Regulation attached to the abovenamed Treaties is hereby abolished. Permits for the landing or shipment of cargo will be required as formerly, but will hereafter be issued free of charge.

Article IV.

On the first day of July next at the Port of Kanagawa (Yokohama), and on and from the first day of October next at the Ports of Nagasaki and Hakodate, the Japanese Government will be prepared to warehouse imported goods on the application of the importer or owner, without payment of duty. The Japanese will be responsible for the safe custody of the goods, so long as they remain in their charge, and will adopt all the precautions necessary to render them insurable against fire. When the owner or importer wishes to remove the goods from the warehouse, he must pay the duties fixed by the tariff, but if he should wish to re-export them, he may do so without payment of duty. Storage charges will in either case be paid on delivery of the goods. The amount of these charges, together with the regulations necessary for the management of the said warehouses, will be established by the common consent of the contracting parties.

Article V.

All articles of Japanese production may be conveyed from any place in Japan to any of the ports open to foreign trade free of any tax or transit duty other than the usual tolls levied equally on all traffic for the maintenance of roads or navigation.

Article VI.

In conformity with those articles of the treaties concluded between Japan and Foreign Powers which stipulate for the circulation of foreign coin at its corresponding weight in native coin of the same description, dollars have hitherto been received at the Japanese Custom-house in payment of duties at their weight in Boos (commonly called Itchiboos), that is to say, at a rate of three hundred and eleven boos per hundred dollars. The Japanese Government being, however, desirous to alter this practice, and to abstain from all interference in the exchange of native for foreign coin, and being also anxious to meet the wants both of native and foreign commerce by securing an adequate issue of native coin, have already determined to enlarge the Japanese Mint so as to admit of the Japanese Government exchanging into native coin of the same intrinsic value, less only the cost of coinage, at the places named for this purpose, all foreign coin or bullion in gold or silver that may at any time be tendered to them by foreigners or Japanese. It being essential, however, to the execution of this measure, that the various Powers with whom Japan has concluded treaties should first consent to modify the stipulations in those treaties which relate to the currency, the Japanese Government will at once propose to those Powers the adoption of the necessary modification in the said stipulations, and on receiving their concurrence will be prepared from the 1st of January, 1868, to carry the above measure into effect.

The rates to be charged as the cost of coinage shall be determined hereafter by the common consent of the contracting parties.

Article VII.

In order to put a stop to certain abuses and inconveniences complained of at the open ports, relative to the transaction of business at the Custom-house, the landing and shipping of cargoes, and the hiring of boats, coolies, servants, &c., the contracting parties have agreed that the Governor at each open port shall at once enter into negotiations with the foreign Consuls with a view to the establishment, by mutual consent, of such regulations as shall effectually put an end to these abuses and inconveniences, and afford all possible facility and security both to the operations of trade and to the transactions of individuals.

It is hereby stipulated that, in order to protect merchandise from exposure to weather, these regulations shall include the covering in at each port of one or more of the landing places used by foreigners for landing or shipping cargo.

Article VIII.

Any Japanese subject shall be free to purchase either in the open ports of Japan or abroad, every description of sailing or steam-vessel intended to carry either passengers or cargo; but ships of war may only be obtained under the authorisation of the Japanese Government.

All foreign vessels purchased by Japanese subjects shall be registered as Japanese vessels on payment of a fixed duty of three boos per ton for steamers, and 1 boo per ton for sailing vessels. The tonnage of each vessel shall be proved by the Foreign Register of ships which shall be exhibited through the Consul of the party interested, on the demand of the Japanese authorities, and shall be certified by the Consul as authentic.

Article IX.

In conformity with the Treaties concluded between Japan and the aforesaid Powers, and with the special arrangements made by the Envoys of the Japanese Government in their note to the British Government, of the 6th June, 1862, and in their note to the French Government of 6th of October of the same year, all the restrictions on trade, and intercourse between foreigners and Japanese alluded to in the aforesaid notes have been entirely removed, and proclamations to this effect have already been published by the Government of Japan.

The latter, however, do not hesitate to declare that Japanese merchants and traders of all classes are at liberty to trade directly, and without the interference of Government officers, with foreign merchants, not only at the open ports of Japan, but also in all foreign countries, on being authorised to leave their country in the manner provided for in Article X. of the present Convention, without being subject to higher taxation by the Japanese Government than that levied on the native trading classes of Japan in their ordinary transactions with each other.

And they further declare that all Daimios or persons in the employ of Daimios are free to visit on the same conditions any foreign country, as well as all the open ports of Japan, and to trade there with foreigners as they please, without the interference of any Japanese officer, provided always they submit to the existing police regulations and to the payment of the established duties.

Article X.

All Japanese subjects may ship goods to or from any open port in Japan, or to and from the ports of any foreign Power, either in vessels owned by Japanese or in the vessels of any nation having a treaty with Japan. Furthermore, on being provided with passports through the proper department of the Government, in the manner specified in the proclamation of the Japanese Government dated the twenty-third day of May, 1866, all Japanese subjects may travel to any foreign country for purposes of study or trade. They may also accept employment in any capacity on board the vessels of any nation having a treaty with Japan.

Japanese in the employ of foreigners may obtain Government passports to go abroad on application to the Governor of any open port.

Article XI.

The Government of Japan will provide all the ports open to foreign trade with such lights, buoys, or beacons as may be necessary to render secure the navigation of the approaches to the said ports.

Article XII.

The undersigned being of opinion that it is unnecessary that this convention should be submitted to their respective Governments, for ratification, before it comes into operation, it will accordingly take effect on and from the first day of July, one thousand eight hundred and sixty-six.

Each of the Contracting Parties having the approval of his Government to this Convention shall make known the same to the others and the communication in writing of this approval shall take the place of a formal exchange of Ratifications.

In witness whereof the above-named Plenipotentiaries have signed the present Convention, and have affixed thereto their seals.

Done at Yedo in the English, French, Dutch, and Japanese languages this 25th day of June one thousand eight hundred and sixty-six.

(L.S.) Harry Parkes,
Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary in Japan.

(L.S.) Leon Roches,
Ministre Plenipotentiaire de S. M. L'Empereur des Francais, au Japon.

(L.S.) A. L. C. Portman.
Charge d'Affairs, a. i. of the United States in Japan.

(L.S.) D. De Graeff van Polsbroek,
Politick Agent en Consul General der Nederlanden, in Japan.

(L.S.) Midzuno Idzuni no Kami.

TARIFF.

The following is an abstract of the tariff, giving the principal articles:—

IMPORTS.—Class I.	Boos.	Cts.
Canvas and Cotton duck, 10 yds.	0	25
Cotton, Raw, 100 catts....	1	25
Cotton, Manufactures—		
Shirtings, grey, white, and twilled; white, spotted, or figured; drills and jeans; white brocades; T cloths, cambrics, muslins, lawns, dimities, quiltings, cottonets. All the above goods dyed, printed cottons, chintzes, and furnitures:—		
A not exceeding 34 in. wide 10 yds.	0	7½
B „ 40 „	0	8¾
C „ 46 „	0	10
D exceeding 46 „	0	11¼
Taffachelass, not exceeding 31 in.	0	17½
Exceeding 31 in. and not exceeding 43 in. ...	0	25
Fustians—as Cotton Velvets.		
Velveteens—Satins, Satinets, and Cotton damasks, not exceeding 40 in. ...	0	20
Ginghams, not exceeding 31 in.	0	6
Ginghams, not exceeding 43 in.	0	9
Handkercbiefs, per dozen	0	5

Digitized by Google

Cotton yarn, plain or dyed, per 100 catties	5	00
Flints	0	12
Glass, Window, box of 100 square feet	0	35
Rhinoceros' Horns, 100 catts.	3	50
Ivory, Elephants' teeth of all qualities	15	00
Linen, all qualities, 10 yds.	0	20
Matting, floor, roll of 40 yds.	0	75
METALS.		
Copper and brass, in slabs, sheets, &c., 100 catties	3	50
Yellow metal, Muntz; do., Sheathing nails	2	50
Iron, manufactured, rods, bars, nails	Boos. 0	Cts. 30
Iron, Pigs	0	15
„ Kentlidge	0	6
„ Wire	0	80
Lead, Pigs	0	80
„ Sheets	1	00
Spelter and Zinc	0	60
Steel	0	60
Tin „	3	00
Tin Plates, box not exceeding 90 catties	0	70
Quicksilver 100 catty	6	00
Rattans „	0	45
Rhubarb „	1	00
Sandal Wood	1	25
Sapan Wood „	0	40
Sugar, brown and black	0	40
„ White	0	75
„ Canday and loaf	1	00
Tobacco 100 catties	1	80
Vermilion „	9	00
Woollen manufactures, broad, habit, medium, narrow, not exceeding 34 inches 10 yards	0	60
55 „ „	1	00
exceeding 55 in. 10 yds.	1	25
Spanish Stripes	0	75
Cassimeres, flannels, long ells	0	45
Camlets, Dutch long ells	0	75
„ English „	0	40
Lastings, crape lastings and worsted crapes, Merinos and all other woollen goods not classed under		
A not exceeding 34 in.	0	30
B exceeding 34 „	0	45
Woollen and cotton mixtures not exceeding 34 inches	0	30
exceeding 34 inches	0	45
Blankets and horsecloths 10 cat.	0	50
Woollen Yarn, plain and dyed 100 cat.	10	00

CLASS II.—(DUTY FREE GOODS.)

All animals used for food or draught. Anchors, chain cables, coal, foreign clothing not being articles named in this tariff, gold and silver, coined and uncoined, grain, flour, saltpetre, printed books, salt meat, tar pitch, tea-lead and travelling baggage.

CLASS III.—(PROHIBITED.)

Opium.

CLASS IV.—(SUBJECT TO AD VALOREM.)

Numerous articles, as: Arms, watches and clocks, cutlery, gold and silver lace, jewellery, wines and spirituous liquors, and other unenumerated goods.

NOTE.

According to the VIII. Article of the Convention of Yedo, a duty will be charged on the sale of foreign vessels to Japanese of three boos per ton for steamers, and one boo per ton for sailing vessels.

EXPORT TARIFF.

			Boos.	Cts.
Coal, per 100 catties			0	04
Cotton (raw) per 100 catties			2	25
Coir	„	„	0	45

Wax, Vegetable			1	50
„ Bees'			2	50

CLASS II.—(DUTY FREE GOODS.)

Gold and Silver coined, Gold, Silver, and Copper uncoined of Japanese production, to be sold only by the Japanese Government at public auction.

CLASS III.—(PROHIBITED GOODS.)

Rice, Paddy, Wheat, and Barley Flour made from the above. Saltpetre.

CLASS IV.—(GOODS SUBJECT TO AN AD VALOREM DUTY OF 5 PER CENT. TO BE CALCULATED ON THEIR MARKET VALUE.

Bamboo ware, Copper utensils of all kinds, Charcoal, Ginseng, and unenumerated drugs, horns (deer) young or soft, Mats and Matting, Silk dresses, Manufactures or Embroideries, Timber, and other unenumerated articles.

RULES.

RULE I.—Unenumerated Imports, if mentioned in the Export List, shall not pay duty under that list, but shall be passed *ad valorem*, and the same rule shall apply to any unenumerated exports that may be named in the Import List.

RULE 2.—Foreigners resident in Japan, and the crews or passengers of foreign ships, shall be allowed to purchase such supplies of the Grain or Flour named in the list of Exports as they may require for their own consumption; but the usual shipping permit must be obtained from the Custom-house before any of the aforesaid Grain or Flour can be shipped to a foreign vessel.

RULE 3.—The Catty mentioned in this tariff is equal to one pound and a third English avoirdupois weight. The yard is the English measure of three feet, the English foot being the eighth of an inch larger than the Japanese Kani shaku. The Boo is a silver coin weighing not less than 131 grains Troy weight, and containing not less than nine parts pure silver, and not more than one part of alloy.

We understand that Lieutenant-General Sir Sydney Cotton, K.C.B. is about to publish a work entitled "Fifty-three Years in Harness in the East: Structures on Our Military Occupation of the Indian Empire, its Past, Present, and Future," which, coming from the pen of an officer of so much experience in Indian affairs, will doubtless prove highly interesting.

Literature.

International Policy: Essays on the Foreign Relations of England. Vol. I.—London: Chapman and Hall.

This work consists of a series of cleverly written essays by different writers on the policy of our Government with regard to various foreign countries. The first essay treats of "The West," that is, Western Europe; the second is devoted to "England and France;" the third to "England and the Sea;" the fourth to "England and India;" the fifth to "England and China;" the sixth to "England and Japan;" and the seventh to the "Uncivilised Communities," especially as regards the Cape of Good Hope and New Zealand. In the present review it is with the fifth and sixth of these only that we have to deal; but first it is necessary to allude to a short preface to the work, wherein we find this exposition of the views on which all the writers base their opinions:—

"There are three positions upon which the writers are agreed:—First, that the international relations of mankind are a fit subject for a systematic policy. Secondly. That such systematic policy is to be based on the acceptance of duties, not on the assertion of rights; that it ought to have a moral, not a political or purely national foundation. All questions, therefore, concerning the interest, power, or prestige of any particular nation are secondary and subordinate. All appeals to motives drawn from such considerations are consistently discarded; all arguments which ultimately involve the doctrine of the rights of such nations are put aside as irrelevant and futile. Thirdly. The arguments advanced are in all cases drawn from considerations of a purely human character, as alone susceptible of legitimate and profitable discussion."

It must be admitted that these views are somewhat peculiar, and it is perhaps hardly fair to judge a work avowedly based upon them by any ordinary standard of criticism. That the international relations of mankind are a fit subject for a systematic policy must be readily admitted, and no one will deny that the more generous in its character such policy can be made the better. But we do deny the possibility of adopting any national system of policy which has not a political foundation. For how can we separate the very terms—policy and politics? Is not the policy pursued by the Government of any country necessarily a manifestation or exposition of its politics? And are not the internal politics of a nation and its foreign policy so bound up together as to be inseparable in practice if not in theory? Again, we maintain that an argument which puts aside all consideration of the rights of any particular nation as irrelevant and futile must be faulty in the extreme, for if we entirely suppress the question of international rights, what benefit can possibly accrue from discussing international policy? In a work starting with such a very singular and strongly marked profession of faith as this the reader would reasonably be led to expect above all things entire consistency throughout; an expectation which, in the present case, would certainly not be fulfilled. Commencing with the essay on "England and China," and taking a general view of its tenor, we find the action of our Government with regard to that country most unsparingly condemned, while the policy of exclusiveness and obstruction persistently adhered to by the Chinese Government is in all cases upheld, and their perpetual efforts to break off the intercourse so ardently desired by a great mass of the Chinese population as well as by our own mercantile classes, defended on the ground of their rights; in fact, all through the essay the *right* of the Chinese Government to impose whatever restrictions they pleased upon our relations with them is perseveringly insisted upon. So, after all, the only rights put aside by the writer as irrelevant and futile, are our own. The only conclusion to be derived from this very one-sided argument is that in the writer's opinion all the dignity and power of a great nation should be sacrificed in order to practise a Quixotic degree of self-denial; that, in point of fact, the strong should bow down before the weak, and civilised nations become subservient to semi-barbarians. For it is very certain that the line of policy here advocated would amount to this, and nothing less.

The essay on China commences with an outline narrative of the events which led to the war of 1840-42, generally known as the opium war, a narrative which is historically correct in every particular. The share taken by Lord Napier in these events is, we need hardly say, a subject of special animadversion. We are by no means prepared to assert that the line of action adopted by Lord Napier was in all respects irreproachable, but it must be remembered that very onerous duties and responsibilities devolved upon him, and the field in which he operated was nearly, if not quite, a new one to English diplomacy. Under these circumstances it seems rather hard to say that—

Digitized by Google

"He was the first that gave the sanction of Government to the spirit of brutal greed and violence, the expression of which had hitherto been confined to our merchant princes. He, as far as in him lay, vitiated the moral sense of the nation as to our duties with China, and paved the way for the iniquitous war which ultimately followed."

It would occupy far too much space to discuss here all the incidents of the long chain of events that led up to this war, which in its turn became the first of a series of collisions between the two nations; but we cannot pass over this part of the story without taking exception to the words "brutal greed and violence," here applied to our merchants, as exhibiting an animus which unfortunately pervades the entire essay. A little further on we read (with reference to a cool request for the withdrawal of the British Minister)—

"While these were the *modest and reasonable* demands of the Chinese Government, the leading merchants of Canton, including names like Jardine, Matheson, Turner, and others of the highest commercial standing, were petitioning the King in Council for a repetition on a far larger and more aggressive scale, of Lord Napier's mission. . . . It is desirable to remark that on this, as on almost every other occasion, it is the mercantile class which has taken the initiative in recommending measures of violence. Our Chinese and Japanese wars are not due solely, or even primarily, to our aristocracy. What our Governments have done is blindly to follow a lead given elsewhere; to submit with culpable weakness to the unscrupulous greed of our great mercantile firms; submission to which the difficulty of preserving order at home and of finding employment for our crowded manufacturing population has no doubt (as Lord Palmerston frankly confessed) largely contributed."

Wherever British merchants are alluded to, such terms as these—"brutal greed," "violence," "unscrupulous avarice," are scattered broadcast; and poor Lord Napier, for supporting the cause of these miscreant traders, is denounced as a buccaneer and a pirate. The immediate causes of the commencement of the "Opium War" are thus described:—

"In March, 1839, Lin, Imperial High Commissioner of the Peking Court, arrived at Canton with special orders to put the law into execution. He at once issued an order, addressed to 'foreigners of all nations,' to the effect that the foreign merchants were at once to deliver up to Government every particle of the opium on board their storeships. This order was issued on the 17th of March; three days were given for its fulfilment. It was treated with silent contempt by those to whom it was addressed; and the only effect it produced on Captain Elliott was that he communicated with a British vessel of war that was stationed at Macao, with the view of taking 'prompt measures to meet the unjust and menacing dispositions of the Chinese authorities.' The three days having elapsed, Commissioner Lin placed a cordon of armed boats round the foreign factories of Canton, informing their inhabitants that they would not be allowed to leave them until the opium stored up in the ships at Lintin had been delivered up. No personal violence was offered. Coolies under strict surveillance were allowed to pass through the barrier of boats, and bring them food and necessaries. On the 27th of March Elliott took upon himself the responsibility of ordering the merchants to give up the opium to him for delivery to the Chinese Government, 'holding himself responsible in the most full and unreserved manner, for and on behalf of Her Majesty's Government, to all and each of Her Majesty's subjects surrendering the same British-owned opium into his hands, to be delivered over to the Chinese Government.' These orders were obeyed. The opium, in all 20 283 chests, valued at from two to three millions, was surrendered and destroyed in the course of the next two months; and with the completion of the delivery the blockade of the factories was discontinued. Such was the cause which the war of 1840 was undertaken to avenge. As a stain upon European civilisation that war is perhaps unparalleled. Of unjust wars history is full to overflowing, but not of wars undertaken by civilised nations in defence of rapacious and lawless buccaneers."

As these extracts sufficiently show, the writer has no mercy for those in any way concerned in the opium trade. The Home Government, its naval and diplomatic representatives, and the English merchants are represented as being one and all banded together to force opium down the throats of the unfortunate Chinese, under penalty of wholesale slaughter on the least resistance. Whether this statement of the case is quite a fair and reasonable one we may leave to our readers to decide, without opening up the much-vexed question of the morality of the trade itself. One thing is certain; that wherever a great want exists, means will be found to supply that want. And the demand for this drug by the population of China is as confirmed and constant as the demand for alcoholic beverages among Western nations; England is not the only country whose traders minister to it, and even were all external sources of supply closed, the production of native-grown opium, already large, would be rapidly developed to whatever extent might be requisite to supply the deficiency.

Having carried his narrative up to the point of the Treaty of 1842, by which Hong Kong was ceded to Great Britain, the writer proceeds to comment, with justifiable severity, upon that disgraceful mismanagement of the colony which caused it to become a perfect nest of thieves, pirates and malefactors of all descriptions.

"The refuse of Oriental populations had always haunted the Chinese waters. The refuse of European population now joined them. It is probably no exaggeration to say that i no place and at no period in the history of the world has smuggling, piracy, and every intermediate shade of nautical crime obtained such dimensions and flourished with such impunity as in the Chinese waters for the last twenty years. Let us see what English policy has done to modify or to favour this result. The Island of Hong Kong, at the time of its acquisition by Great Britain in 1842, contained two or three hundred inhabitants; it now contains 70,000 or 80,000, the great bulk being Chinese. Its growth is thus comparable to that of Singapore, and it is due, doubtless, in part to the same cause, namely, its being a free port. Commercially speaking, the colony has more than answered the expectations of its founders. Sir John Bowring, the hero of free-trade, and the professed enemy of offensive war, was appointed its governor. Morally, the results have been less promising. The Chinese who flocked to the new colony were naturally men of a class to whom the removal of every restriction imposed by their own social and political system operated as a strong attraction. Speaking broadly, and with due allowance for exceptions, the population of Hong Kong contained and contains the basest and most lawless of the Chinese race. Free from the surveillance of their own police, and subject to a lax Government, whose total law and gospel was the advancement of British commerce, they found at Hong Kong singular facilities for prosecuting every species of unlawful trade. Registers were given to any Chinese shipowner who happened to be resident within the colony, authorising him to carry the British flag, and to avail himself of all the impunity which it offered. The evils of such a system forced themselves upon the most unwilling eyes. 'A vessel,' says Sir J. Bowring in 1855, 'no sooner obtains a register than she escapes colonial jurisdiction, carries on her trade within the waters of China, engages probably in every sort of fraudulent dealings, and may never again appear to render any account of her proceedings, or to be made responsible for her illegal acts.' Yet the very man who said this was himself instrumental in the very same year in which he said it in passing a special ordinance for the registration of colonial vessels at Hong Kong."

The following extracts from a despatch written by Sir Hercules Robinson, the late Governor, afford evidence of the highest possible character that these statements are not in the least exaggerated:—

"Machow Wong, a native of the city of Namtao, in Sunon, became leagued with the pirates of the coast, was denounced to the Mandarins, and fled here shortly after the formation of the colony. Soon after his arrival he became known to Mr. Caldwell, and for years was Mr. Caldwell's principal and most relied upon informant. His influence and intimacy with Mr. Caldwell invested him with immense power; he was a terror to the bulk of the community, and tyrannised over the lower orders of Chinese without their daring to complain. Public repute pronounced him to be an extortioner, a recipient of bribes from gambling-houses, a confederate of pirates, and a receiver of stolen goods. That Machow Wong had been for many years before his conviction intimately connected with pirates and piracy, was notorious throughout the colony. He was the known protector of pirates and other ruffians resorting to the island. At last justice overtook this notorious offender; he was arraigned at the August criminal sessions of 1857, upon two charges of confederation with pirates, and was sentenced to fifteen years' transportation. Such was the man with whom Mr. Caldwell admits he had a long and intimate connection."

This Mr. Caldwell is described as

"An Anglo-Chinese half-caste, who settled in Hong Kong, and for twenty years enjoyed the confidence of Sir John Bowring, Sir Michael Seymour, and other high officials of the colony, to an extraordinary degree. He held the positions of 'Protector-General of Chinese' and Registrar-General, and was a Justice of the Peace. Sir Hercules Robinson goes on to state in this despatch that Caldwell not merely assisted Machow Wong in his difficulties, but that he was joint owner with him of a well-known piratical lorcha, registered at Hong Kong, and therefore carrying, like so many others, the British flag, and that he had in his employ a certain Beauer, one of the most notorious pirates in the Chinese waters. The power that he wielded over the British navy appears to have been limitless. 'Mr. Caldwell was intrusted with the power of obtaining, on his own authority alone, the services of men-of-war to proceed in search of alleged pirates; for nothing further was required of him than to say that he had received information of an act of piracy, and that with no greater formality than this he should apply personally to the senior naval officer for the assistance of one or more ships of war, embark himself in one of them, describe the place to which they should proceed, and point out the vessel or place to be attacked.'"

What became of Mr. Caldwell? is the question that will naturally be asked.

"The same punishment was inflicted upon him that was inflicted upon Mr. Anstey for having annoyed the colony by exposing him. He was dismissed from the public service. In one respect his punishment was lighter than Mr. Anstey's. Mr. Anstey's disgrace, after such ample proof that it was unmerited, has not been cancelled. He has never been restored to office. Mr. Caldwell has been more fortunate. He practises at this moment, or at least was practising a few months ago, as official arbitrator in the small causes court at Hong Kong."

Such a tale of iniquity as this may well excite indignation. In truth, it was a very Augean stable that Sir Hercules Robinson—aptly so named—entered when he went to Hong Kong. He did much towards purifying it, but there is more work still to be done, and his successor already finds the office no sinecure. The last inward mail brought the gratifying news that Sir Richard MacDonnell has drafted an ordinance specially adapted to bring all native craft entering Hong Kong waters under proper supervision; and we entertain strong hopes that this will prove one of a long series of reforms that will enable us at no distant date to regard the colony as a credit, instead of a standing disgrace to the Crown.

(To be continued.)

LONDON, MONDAY, AUG. 27, 1866.

TEA SHIPS AT HANKOW.

When, some three or four seasons ago, it was proposed to ship teas at Hankow direct for foreign ports and thus avoid the risk attendant on transshipment at Shanghai, the suggestion was eagerly hailed and immediately adopted. But the system thus inaugurated soon shared the fate which has befallen so many of the schemes set afloat in China. English owners were really ignorant of the Yangtsze navigation, or wilfully ignored the statements regarding it made in the Shanghai and Hong Kong journals. The number of vessels consigned to agents in Shanghai under orders to proceed up the Yangtsze and ship teas at Hankow increased year by year, until at length the supply of shipping now exceeds the demand which, in view of the state of the home markets, should legitimately exist. But after braving the risk of loss on the ever-shifting shoals of the Yangtsze, and incurring the expense of tonnage, the Hankow agents of Shanghai firms are compelled to find cargo, and thus the presence of the tea fleet directly influences the market. The agents find themselves in a pitiable position, for they are compelled to supply such a portion of the required cargo as will furnish forth a flooring, and having provided this they have to contend with no small amount of competition. It is almost needless to say that foreign merchants in China have not yet learned that grand secret of combination to which the Chinese owe their success in all mercantile dealings with Europeans. To the jealousy and distrust of one another existing among foreigners may be attributed the failure of many proposed protective measures, such for example as the "short credit system." But besides the elements of difficulty that we have enumerated, there is one which may be said to include the rest, namely, the absolute necessity of filling up with cargo and despatching the vessels within a specified time. The waters of the Great River remain but for a short period at their maximum elevation, and then begin to fall with far more celerity than that wherewith they before rose. Hence as the ships must wait for a certain condition of the river before they can ascend, and must in like manner descend before a certain condition sets in, the duration of their stay at Hankow is necessarily limited. Each day's delay after the water has commenced to fall is fraught with additional risk to ship and cargo, and it will thus readily appear that the Hankow consignees or agents of a clipper ship are literally bound hand and foot; compelled on the one hand to find or supply cargo, and on the other, to get rid of their responsibilities before the advance of the season converts them into actual risks. We do not desire to undervalue the results of shipping tea at Hankow, but it is matter for serious consideration whether those results are not out-balanced by the occasional loss of such ships as the *Guinevere*. Our Shanghai advices per French mail of 18th June report, besides several minor casualties, the total loss of this fine vessel, together with more than seven thousand chests of tea. By her wreck the insurance offices both in England and China suffer deeply, the navigation of the Yangtsze is impeded, and the owners of ship and cargo are put to indescribable inconvenience. Whether, therefore, we take the general question of trade or the merely local and personal one of the loss of particular ships, we have good reason to doubt the advisability of the plan thus indiscriminately adopted.

There is another light in which the "river system" may be viewed. The manner in which contracts are made with the native teamen is well-known, and we need not therefore enlarge on the prudence of keeping down the opening rate of the market. But so soon as a clipper intended for the tea trade arrives at Shanghai she is discharged in all haste, and sent up the river as quickly as circumstances and the height of the water will permit, whether the season be or be not actually upon the point of opening. The dealers hail the arrival of each vessel as an additional pledge of the inability of foreigners to oppose their demands, and accordingly exorbitant prices are asked and obtained for the first chops brought down. An "opening rate" having been thus established, the foreign purchasers are delivered into the hands of their enemies, and the Chinese reap the benefit of enhanced rates and immediate sales. To divert some of this undue profit into the coffers of the merchants should be the aim of all Europeans, whether shipowners or not, who are interested in the tea trade. If the present system be continued, each year must swell the catalogue of casualties in the Yangtsze, and each year also must add to the list of losses in consequence of rash speculation in tea; considerations which are amply sufficient to reconcile us to the all but prohibitive rates of premium now imposed by the local underwriters on vessels loading at Hankow.

NEWCHWANG.

Mr. Thomas Taylor Meadows, the able and energetic English Consul at the port of Yangtsze (Newchwang) has lately issued a notification which reveals strange facts regarding the apathy of the foreign residents under his jurisdiction. It will be remembered that in December last much excitement was caused by the excesses of certain outlaws known as "sword-racks," and at the instance of the Consul the settlement was fortified and a military organisation set on foot among the residents. Subsequently an American gentleman, Acting-Consul for the United States, was attacked in the streets, and an *emeute* was the result in which several natives were killed and wounded, one foreigner killed, and two or three slightly injured. There was therefore good ground for alarm, more especially as in addition to the "sword-racks" whose outrages were confined to the city and neighbourhood, rebels began to pour into the province, and there seemed to be every probability that the existing Government would, for a time at least, be overthrown. Newchwang was eventually seized by the rebels, but was recaptured within a week by the Imperialists. Meanwhile, the security of the settlement was imperilled by the presence of resolute and unscrupulous outlaws on the one hand, and Nienfei troops or the equally barbarous Tartar cavalry on the other. Mr. Meadows is prone to take "an earnest view" of passing events, and it is therefore possible that his fears were somewhat unfounded, and that the danger which impended over the foreign residents was not quite so imminent as he represented it to be. However, if he erred he erred on the right side, for to his timely precautions and formidable preparations may be ascribed the total immunity of the foreigners from attack or annoyance within their proper limits. As soon as the immediate danger passed by people began to laugh at their previous fears, and the Consul came in for a large share of unfriendly criticism. "Such precautions as were taken were "perfectly needless," was the common cry, but it was forgotten that to those very precautions was due the apparent needlessness of preparation. The rebels were afraid to attack a position which had been carefully fortified, therefore the fortifications were unnecessary. Such, in other words, was the argument triumphantly used by Mr. Meadows' opponents, and it is not strange that, while still keeping a careful watch over the progress of events, the dignity of his office, whereof Mr. Meadows possesses a strong sense, compelled him (to use his own words) "to maintain a passive and silent attitude." But the temporary withdrawal of his active superintendence was not without its effect, for we learn that after the capture of Newchwang, when an attack on the settlement was anticipated, the community was thrown into a state of bustle, clamour, and confusion which did not cease for a couple of hours. On this occasion, says Mr. Meadows, in the notification to which we have already referred—

> Notwithstanding the advantages afforded by a calm and bright moonlight night, the want of unity and preparedness disclosed convinced me that an attack made by superior numbers of men no more resolute and no better armed than are the rebels and associated ruffians of this town, could hardly have failed to be disastrous to the whole foreign community.

The interests at stake in such a settlement as Newchwang are not of overwhelming importance, but wherever the British

Digitized by Google

flag is hoisted it is the duty of the British Consul to maintain its honour. Much more than the personal safety of each individual is in question. Were the foreign residents compelled to fly ingloriously, a portion at least of our prestige would be lost, and it may be of the most vital importance to our interests in China to possess ever so small and comparatively insignificant a stand-point on the borders of Manchuria as our foreign settlement at Yangtsze.

THE EUPHRATES VALLEY ROUTE TO INDIA.

THE importance of this route has again been brought to the notice of the public through the report of Capt. TYLER, who appears to be quite in favour of its adoption. Starting from Brindisi the steamer would proceed to a port on the coast of Syria, say Seleucia, which would be connected by railway with Aleppo. From Aleppo the rail would run to Tabor Castle, Bagdad, and Bussorah at the head of the Persian Gulf. A line of steamers has been for some time running between Bussorah and Kurrachee, and also between Bagdad and Bussorah, on the river Tigris; and the distance from Seleucia by Aleppo and Tabor Castle to Bagdad is about 550 miles. If therefore the railway could only be completed so far as Bagdad, in the first instance, the line could be opened, and the line of steamers on the Tigris be given up, when the rail should be completed the entire distance. While the subject of our communication with India is under special consideration and revision we trust the present Government will not be indifferent to the great importance of the Euphrates Valley route, which after all is not entirely out of compass to guarantee in some shape or other. This route has received of late increased attention in consequence of the notice by Capt. TYLER, whose report on the Brindisi route we noticed in a late issue. We believe the entire land distance from Seleucia on the coast of Syria to Bussorah is under 1,000 miles, and that a rail could be laid with comparative ease. With regard to the cost there is of course a difference of opinion, but from all the information that has been obtained it would appear that the cost would not exceed £8,000 per mile. There is no denying that passengers would hail a change of route even at an increased cost. The distances would stand thus :—

From London to Brindisi	1,504	miles
From Brindisi to Seleucia, by steamer	900	„
Seleucia to Aleppo, by rail	90	„
Aleppo to Tabor Castle	60	„
Tabor Castle to Bagdad	400	„
Bagdad to Bussorah	350	„
Bussorah to Bombay, by steamer	1,690	„

which might easily be accomplished in 15 days against 25 days by the present route *via* Red Sea and Marseilles. The following is the extract from Capt. TYLER's report above noticed :—

"As I have intimated at the commencement of this report, the question to be now solved is solely that of communication through Europe to the east of the Mediterranean. But in saying so much concerning the postal routes to the East, I would ask your Grace's permission to touch also upon the still more important saving of time and distance that may be obtained hereafter by avoiding the passage of the Red Sea, when a railway shall be constructed from the coast of the Mediterranean along the Euphrates Valley to the Persian Gulf. By this route many hundred miles of distance and many days of time might be saved between London and Bombay, which will become within the next two years (when the railways to Madras and Calcutta are completed) the principal port of India. The navigation by the Persian Gulf to Bombay will be far preferable to that *via* Suez and the Red Sea to Bombay, and even that amount of navigation may ultimately be avoided by the connection together of Bagdad and Bombay by railway. But in the meantime the Euphrates Valley scheme has been for many years almost in abeyance. The mere guarantee of the Turkish Government has not been found sufficient even to render the construction of the first portion from the coast to Aleppo practicable, and the financial state of that empire renders progress now all but impossible. But I have so strong a conviction of the important bearing that the construction of such a railway would have, commercially and strategically, upon the British Empire, that I could not but take this opportunity of recommending the subject to the serious consideration of Her Majesty's Government."

Mr. W. P. ANDREW, who is largely connected with Indian railways, and is the recognised leader of the Euphrates Valley route, writes to *The Times* :—

Sir,—May I beg the favour of your giving insertion to the concluding paragraph in the report of Captain Tyler, R.E., to his Grace the Duke of Montrose, Postmaster-General, with reference to the conveyance of the Eastern mails, lately ordered by the House of Commons to be printed, as the paragraph in question not only gives official sanction and approval to the views which I advocated more than nine years ago in your columns regarding the Euphrates route, and which then received, as I trust they will continue to receive, your powerful support? But, irrespective of this, I am anxious that the opinion of so trusted and responsible an officer of Government as Captain Tyler on one of the greatest questions of the day, should be known as widely as possible.

On which *The Times* says :—

Subjoined is a communication on the Euphrates route, which, like the Nicaragua transit, is one of those projects that may be delayed but can never be extinguished. There is a great difference, however, between the two, because the Nicaragua transit scheme may now be left to its inevitable fulfilment from the demands of commerce, whereas the Euphrates railway, no matter how great may be its commercial prospects, must be chiefly important from its national bearings, and no body of shareholders would be so blind to their own rights as to offer to construct a line that would reduce our time and distance from India to one-half, and not only save hundreds of thousands annually to the British and Indian Treasuries, but also be of vital political importance, without obtaining some guarantee from the Government upon whom these advantages would be conferred. Commerce would be greatly benefited by the line, but commerce can wait for it. Meanwhile it is for the Indian and home Governments to consider whether they can wait for it also. Should they decide in the negative, they must be prepared to make fair arrangements. If the line would pay commercially, there could be no loss from a guarantee. If it would not pay commercially, but would yield great pecuniary gain to the State, the State should not encourage individual capitalists to contemplate its construction without aid, and to ruin themselves for the gain of the public.

A writer, signing "C. E.," says :—

It is now twenty years since that I was directed by Her Majesty's (then) Government to examine for the purposes of a railway route the valleys of the Euphrates and Tigris from the Persian Gulf to the Black Sea, in other words, from Bussorah to Trebizonde, and from the Bay of Iscanderoon, on the Mediterranean *via* Aleppo, into the Euphrates Valley; and having obtained at Constantinople the necessary firman from the Porte (through the British Ambassador), I proceeded with an assistant and the other necessary protectors to discharge the duties confided to me by the Government. This occupied a period of ten months, during which I examined and laid down the best available route with great precision, and drew up in fullest detail a report thereon. This survey and report may yet be of service to the country. At any rate, if still preserved, it must have become "fully mature." I believe, Sir, that the first to draw attention to this as a route to India was the late Lieutenant Waghorn. Since then others have drawn attention to it, such as Mr. Andrew and General Chesney; and I believe that partial surveys of various parts of that route have from time to time been made, but I believe that my own is the only survey made of the route throughout by order of Her Majesty's Government. I may only remark, *en passant*, that the Euphrates Valley is well suited for a line of railway of easy and cheap construction, and that apart from its suitability as a line to India, it would collect a vast amount of traffic which would be led towards it from Persia, Kordistan, and other Asiatic countries.

THE ANGLICAN BISHOPRIC IN CHINA.

The following correspondence has recently taken place between Bishop Smith and the Colonial-office authorities respecting the vacant bishopric of Victoria at Hong Kong; from which it will be seen that the supposed legal difficulties are terminated, and that the immediate appointment and consecration of a new Bishop of Victoria has been apparently decided upon :—

TO THE RIGHT HON. THE EARL OF CARNARVON.

3, Haddo-villas, Blackheath, S.E.

MY LORD,—Your predecessor at the head of the Colonial-office is understood, in his communications with the Archbishop of Canterbury and others, to have grounded the reason of his long delay in the appointment of my successor in the Bishopric of Victoria on the unsettled state of the law in regard to the Colonial Episcopate, and the expected early legislation of the Imperial Parliament on the colonial church.

As this latter expectation is now terminated, for the present year at least, I beg leave earnestly to press upon your lordship the following considerations in favour of your immediate nomination of a bishop of Victoria, and a termination of the present serious injury to Church of England interests in China, caused by the long vacancy of that see since my formal resignation thereof was completed a year and a half ago, viz., on January 14th, 1865 :—

1. After the first China treaty, an Act was passed by the British Legislature in 1843 empowering the Crown to pass Orders in Council for the better government of British subjects in China.

2. An Order in Council was passed in 1849, constituting the Bishopric of Victoria at Hong Kong, and subjecting to the jurisdiction of the bishop thereof all persons in Holy Orders within the five Consular cities and elsewhere in the dominions of the Emperor of China, and on board of any vessel within 100 miles of the coast of China.

3. The above-mentioned Act of Parliament, and the Order in Council grounded thereupon, are quoted in the preamble of the bishop's letters patent issued in 1849.

The above three facts seem to give a quasi-parliamentary title to the Bishopric of Victoria. Beyond this,—

4. Hong Kong is a Crown colony; its Legislative Council is not an independent local Parliament, and its bishopric is consequently in a great measure unaffected by the recent Privy Council judgments.

5. There is an average number of twenty Anglican clergy (missionaries and chaplains) in China, needing supervision and control.

6. Six of the English clergy now in China are only in deacon's orders and have been for some time amid inconvenience awaiting the arrival of a bishop to admit them to full orders. Three missionaries, of the Church Missionary Society, are also about to embark for China in the next month, now only in deacon's orders.

7. The Bishop of Victoria is *ex-officio* resident warden and sole trustee (under the visitorship of the Archbishop of Canterbury) of St. Paul's College at Hong Kong, and the only authorised receiver of a local rental of £500 a year, constituting its endowment. The appointment of tutors is in the bishop's sole hands; and the college, founded for the Christian edu-

Digitized by Google

cation of native Chinese youths, is suffering great detriment from the absence of its official head.

I might add to the foregoing facts many other considerations which will doubtless suggest themselves to your lordship's own mind as to the urgency of the case, and the pressing claims of the Church in China on your immediate attention. Remonstrances and complaints have constantly reached me from China respecting the long delay in the arrival of my successor. Some of the lamentable effects are thus described in a letter written to me by a Government chaplain from China, on his arrival in England some months ago. . . . . .

I desire in conclusion to submit to your lordship that there are no obstacles in the way of your consenting to the early consecration of a bishop by Royal Mandate, without Letters Patent, which in my opinion are not essential or of any great value to the China bishopric. The endowment, £1,000 a year, is secured in the Colonial Bishoprics Fund, and was principally contributed by private donors (whose names are known to me), viz., a "Brother and Sister," who are prepared to claim the repayment of the money given by them, if the Victoria bishopric is suffered to lapse and remain unfilled by a new appointment. The stipend has been accumulating for a year and a half in the hands of the Colonial Bishoprics Trustees.—I remain, my Lord, your Lordship's obedient humble servant, George Smith,

19th July, 1866. (Late Bishop of Victoria).

TO THE RIGHT REV. BISHOP SMITH.

Downing-street, 17th August, 1866.

My Lord,—I am directed by Lord Carnarvon to acknowledge your letter of the 19th July, suggesting that the consecration of a Bishop of Victoria should be authorised by Royal Mandate, without Letters Patent. Lord Carnarvon directs me to state that he is now in communication with his Grace the Archbishop of Canterbury in reference to a clergyman qualified and ready to undertake the office of Bishop of Victoria, and that his lordship does not anticipate any difficulty in supplying fitting authority for the consecration.—I have the honour to be, my Lord, your Lordship's most obedient humble servant, J. Fredk. Elliot.

We are authorised to state that there is no foundation for the report announced in some of the London papers, to the effect that Bishop Smith has accepted the incumbency of Camden Church, Camberwell, lately vacated by the Rev. Daniel Moore.

Downing-street, August 17.—The Queen has been pleased to appoint John Dent, Esq., to be a Member of the Legislative Council of the Colony of Hong Kong.

TPADE WITH THE FAR EAST.

(*Continued.*)

TAIWAN.

The following is Mr. Swinhoe's Report on the trade of Formosa for the year 1865 :—

I have been called away with so little notice to relieve Mr. Pedder at Amoy that I have not been able to devote so much time and attention to the trade returns as I could have wished. I must therefore ask your Excellency's indulgence for any shortcomings that may be apparent.

The employment of British bottoms is on the increase, but not to such an extent as one could hope. The total foreign tonnage shows a fair increase, as also does the foreign trade, notwithstanding that the prohibition on the export of rice has continued in force throughout the year, exception having been only made in favour of vessels provided with passes from the high authorities at Foo-chow.

The high tone I assumed towards the mandarins against their determined embargo on rice was not approved of at Peking, so I had to slide out of the false position I had been gradually carried into; and I fear that, on this question, the mandarins have been since taking an unjust advantage of our leniency. The present chief civil authority of Formosa, Ting Taoutae, bears an implacable hatred towards foreigners, and is immovable by courteous diplomacy. He trembles, however, as I have already apprised your Excellency, at the sight of a large man-of-war. I have in all matters found him a hard man to deal with. I trust my successor will manage more successfully. I have contested long for British interests in Formosa, and not entirely without fruits; but the want of a harbour at Taiwan, and the distance of Taiwan city from Takow have presented serious difficulties, to battle with which requires a person endowed with a stronger constitution than I can boast of; to make the frequent passage between Takow and Taiwan, the Consul should be a sailor, and to make the journey overland by chair or on horseback he must be able to leave without fear of bad effects of a tropical sun. The climate of South Formosa is hot for nearly the entire year.

At Taiwan, large and storied hongs are procurable by Europeans at a low rental, but at Takow the residents are wretchedly housed. This is, however, being gradually remedied.

The currency of South Formosa, I neglected to state in my last year's report, is at 6·8 or 680 taels for every 1,000 dollars, the dollars, moreover, being weighed in what the Chinese call "small scales," or at about 1 per cent. short of the 6·8 full weight according to the Canton Government scales. Merchants tell me that a loss is always quoted from Amoy on dollars exported thither.

Hemp.—Under this head are classed both grass-cloth fibre and jute, the former being a much more valuable article than the latter, and yet the same rate of duty is charged according to the tariff for both. This unjust levy leads the Chinese shippers of jute to engage for its freight Chinese junks, thereby escaping duty altogether, greatly to the detriment of the interests of foreign vessels. The Customs Commissioner at Takow is, I believe, applying to his chief to try and obtain a reduction in the duty on jute.

Cassia Lignea.—I have seen specimens of a species of cinnamomum from the mountains interior of this neighbourhood. The natives use the branches of the tree for fuel, not having yet learnt apparently the market value of the bark.

Before closing this somewhat hurried report on last year's British trade in South Formosa, I must point to the wealth stored in the little known mountainous interior. I have not long returned from a ten days' visit into the heart of this country. Passing through Petaon (the city of Fung-shan-hien), I struck the bank of the Tiung-kung River, and then followed up the river in a north-north-west direction towards the centre of the island. The mountains attained by this river are covered with timber, and abound with huge masses of out-cropping blue slate. On a hill side not far from the river's bank I visited a hole which emitted inflammable gas, thus probably indicating the presence of petroleum at a depth beneath the soil. Coal, I am told, also occurs in the same neighbourhood. The hills round about appear to me eminently fitted for the cultivation of coffee, and on this score I have some right to an opinion, as I took particular pains to observe the requirements of coffee planting when visiting the plantations at Candy (Ceylon) on my way out from England in 1863. The river supplies, by means of rafts and boats of light draught, an exit to the sea about thirteen miles below Takow. It would too greatly expand this despatch, and indeed I have not now the required time, to give a detailed sketch of this visit of inspection and observation into the charming interior of this green clad island. I will, however, at some future date endeavour to lay before your Excellency the information I have gained. A French gentleman, about the close of the year, travelled from Taiwan to Tamsuy overland and returned. When asked what he thought of Formosa, he shrugged his shoulders, and replied that "it might be covered with a handkerchief." He spoke of the cultivated plains and the lower hills; he had not seen the mountains.

YOKOHAMA.

Mr. Myburgh's return from this port is accompanied by the following observations from Sir Harry Parkes :—

I have the honour to forward a very interesting report by Mr. Consul Myburgh on the trade of the port of Kanagawa for the year 1865, which, when compared with the returns for the previous year, shows the highly satisfactory result of an increase in the import trade of nearly 100 per cent., and in the export trade of 60 per cent.

Considerable difficulty has been experienced in the preparation of these returns, owing to the imperfect character of the data supplied from the Custom House. Though drawn up and forwarded to me at the end of March, the discovery of material errors rendered entire reconstruction of the returns necessary; and it thus happens that, though Mr. Myburgh's report is dated the 28th March, it reached me in its present form only yesterday.

To enable your lordsihp to compare at a glance the trade of all the ports of Japan for the last three years, as conducted both in British and in foreign vessels, I have caused the four additional returns, which I have now the honour to enclose, to be prepared in this office.

The great expansion of the import trade is attributable to a steadily increasing demand for foreign manufactures in this country, which, having no redundant population, as is the case with China, can obtain clothing more cheaply from foreigners than from its own cottage looms. Under this aspect, therefore, Japan promises to furnish a very satisfactory market for British manufactures.

The increase in the exports is owing chiefly to the great rise in the value of Japanese silk, the shipments of 1865 being not greater but rather less in quantity than those of 1863, although costing nearly a treble price. All inquiry has hitherto failed to furnish a satisfactory solution of the problem at present observed here of exceedingly high prices failing to secure increased supplies. The largest export occurred in the year 1862-63, and there is reason to believe that this is attributable to the sudden demand caused by the foreign trade having led to the sale of horded stocks, and that the supplies forwarded to market since that date represent the portion of the ordinary annual production that can be spared for foreign exportation.

The tea trade, owing to imperfect preparation of the leaf, increases less rapidly, and the quality is more suited to the American than the English market.

A remarkable feature in the export trade of this year is the shipment from all the ports of upwards of 1,500,000 sheets of silk ova, which, if successfully reared, will go far to make good the terrible ravages occasioned by the disease in the European silkworm. Should these anticipations be realised, a signal instance will be thus afforded of the benefit derivable from the extension of commercial relations with this remote country, as, although only recently participating in the trade of the world, Japan is already clothed to a considerable extent by foreign looms, and seems destined to turn to be the means of reviving a most important branch of European industry.

The returns of foreign trade are interesting, as showing how large a proportion is conducted in British vessels, although the cargoes thus carried cannot in every case be regarded as British-owned.

The following is Mr. Myburgh's report :—

Shipping.—During 1865 the entries numbered 168 vessels, of 74,083 tons; the departures 168 vessels, of 75,486 tons. Compared with 1864, this shows in entries a decrease of four vessels and 1,372 tons, and in clearances the same decrease of four in the number of ships, but an increase in the tonnage of 2,890 tons. There was a considerable decrease under the British flag as compared with the previous year, of entries, 28 ships, and 15,296 tons; clearances, 27 ships, and 11,147 tons.

American entries show an increase of five ships, of 4,430 tons, for 1865; the clearances an increase of four ships, of 3,335 tons. French shipping shows a very marked increase. The entries exceed those of the previous year by ten ships, of 9,158 tons. This is chiefly owing to the establishment of a branch line of steamers by the Messageries Impériales Company, running once a month between this port and Shanghai, in connection with the main line thence to Marseilles. Though the Dutch show a decrease of three and four ships in arrivals and departures respectively, there is a slight increase in the tonnage over that of the preceding year.

The decrease in British shipping may be ascribed in part to the cessation in the shipment of cotton from this port, not only to England but to Hong Kong. While in the previous year thirty-three vessels, of 14,723

Digitized by Google

tons, left direct for Great Britain and twenty-nine vessels for Hong Kong, principally with cotton, the number for the year 1865 reached only six ships, of 3,048 tons, which sailed for Great Britain, and sixteen vessels for Hong Kong.

But this fact loses somewhat in significance when we compare the return of the direct trade from Great Britain during the present year with that of the preceding, for in 1864 the arrivals numbered only eight vessels of 2,638 tons, whilst in 1865 they increased to twenty-six vessels of 11,300 tons; of these there were only three of 1,630 tons which brought coals, the remaining twenty-three carried bale goods and general cargo.

IMPORTS.—The total value of imports computed from the returns amounted to 12,913,024 dollars. Compared with the previous year it shows an increase of 7,469,430 dollars. The value of the imports brought in British vessels alone amounted to 10,687,015 dollars. The past year was marked in particular by a sudden and extraordinary increase in the demand for cotton manufactures. It has been calculated that in October and November alone somewhere about 3,000,000 dollars worth had been disposed of. This included partly the cargoes of several vessels which were on their way out sold to arrive at a very fair profit. It would, I conceive, however, be too sanguine to expect a similar demand to repeat itself during the current year. Two causes it would appear give to the past year an exceptional character in this respect, and conduced to occasion the immense demand. The first and most obvious was the high price which raw cotton fetched in the market, as much as 34 dollars per picul in 1864, which naturally drained the country of every available pound of this commodity, and which had to be replaced during the past year by foreign manufactured goods, The other is the failure to a great extent of the cotton crop in Japan for 1865.

ARMS.—There seems to have been a considerable increase in the import of arms, the quantity being more than double that of the preceding year; but they have ceased, however, to realise the enormous prices which they used to command in former years. Much of what has been disposed of was at a loss, and large quantities still remain unsaleable in the hands of the foreign merchants.

METALS.—There was a considerable falling off in the quantity of lead imported. It fell from 18.785 piculs in the preceding year to 13,678 piculs in the past year. Indeed, towards the latter part of the year a large portion was re-exported to China where higher prices were obtainable. The same may be said with regard to spelter, none having been imported, while in the previous year there were 8 676 piculs. Tin-plates fell from 15.282 boxes in 1864 to 11,541 in 1865. In fact all metals were in little request during the past year, doubtless owing to the market having been over-stocked by the large quantities that were imported and sold in the previous year to meet the then existing demand.

EXPORTS.—The total value of these amounted to 17,467,728 dollars, which gives 8,470,244 dollars more than the preceding year.

SILK.—The returns show that 16,235 bales were exported, of which 14,636 left in British ships. It was a prevailing opinion that over speculation in tea and silk during the latter part of 1864 and the beginning of 1865 would be attended with great losses, and a consequent re-action. The result, however, has not verified the prediction, for the enormous rise in the value of Japan silk in the European market has left those who ventured on buying at what was considered in the beginning of the year an enormous price, a very handsome profit. It gradually continued to rise in value till the beginning of the new silk season (1st July), and it is calculated that from that date until the end of the year upwards of 7,000 bales have been exported, which at an average of 800 dollars per bale would give nearly 6,000,000 dollars in six months. Thus, though a smaller number of bales as compared with the corresponding period of the preceding year has been exported, the enhanced price of 800 dollars gives a larger total value. In 1864 nearly all the silk came into the market in the fall of the year, and subsequent to the visit of the fleet to Yedo in the beginning of October; whereas in 1865 it came in continuously throughout the whole year according as the demand arose, and it is satisfactory to observe that the restrictions which formed so many grounds of complaint in the preceding year ceased to embarrass the operations of the merchants, and seemed to have wholly disappeared. It may be remarked also that in 1864 during the same period the value of the dollar might be taken at about 5s., whereas in the past year it may be taken at about 4s. 4d., and has touched as low even as 4s. 1d. The merchant thus getting his money cheaper was enabled to make his purchases at a larger figure. It is worthy of notice that this enhanced value has not brought about such a corresponding extension and growth of the silk trade in the country as might reasonably have been expected. Probably the capabilities for producing silk are limited. A considerable quantity also is reserved for clothing a large mass of the population. I conceive there can be little doubt too that a great deal of the silk exported during the earlier years was a surplus quantity which had been accumulating in the country for a long time prior to the opening of the port. The quantity of silkworm eggs exported rose from 200,000 cards to 1,320,321.

TEA.—A considerable stimulus was given to the export of tea by the termination of the American war, several British ships having been loaded direct for New York and Boston. It is estimated that the quantity actually exported amounted to 7,899,733 pounds, which gives an increase of nearly 5,000,0 0 pounds over the preceding year. No export of cotton worth noting took place.

The duties collected by the Custom House amounted to 452,305 dollars 80 cents, of which 242.254 dollars 32 cents were on imports, and 310.051 dollars 48 cents on exports.

I should observe, in conclusion, that I consider there is every reason to be satisfied with the commercial importance to which this port has already attained. And it is not too much to say that with its steadily advancing prosperity it bids fair to become one of the foremost among the great trading emporiums of the East.

The comparative tables accompanying the report show the following as the course of trade during the past three years:—

Year.	Imports—Value in Dollars.	Exports—Value in Dollars.	Total.
1863 ...	2.717.590	.. 6,226 590	.. 8,944,180
1864....	6.851 287	.. 10.572.222	.. 17.423,509
1865....	14,194,771	.. 18,490,230	.. 32,685,001

The total of 1865 is very nearly four-fold that of 1863; and of this large trade about six-sevenths has been carried in British ships.

NEWCHWANG.

The following is a brief abstract of Mr. T. T. Meadows' report on the trade of 1865:—

SHIPPING AND NAVIGATION.—In my last report (that of the 21st April, 1865) I showed that the North German tonnage had, during the three previous years, not only been greater than the British, but that the disproportion had been annually increasing in our disfavour. In 1865 there has been a marked change in our favour. The comparative table shows that while British shipping has continued rapidly to increase, the amount of our tonnage in 1865 being nearly double that of 1864, the North German tonnage has decreased. I should, however, have had to report a still greater increase of British tonnage, and probably little decrease of North German tonnage, but for certain prohibitive measures taken at Shanghai about the middle of the season by the old mandarins of that port and of the province in which it lies. They not only prohibited Chinese merchants from themselves shipping in foreign vessels, but they also prohibited them from purchasing from foreign merchants produce brought by these latter in foreign vessels from this port. Whether this last proceeding was open or covert, I have, at this distance, not been able to ascertain, but it has been most effectual.

As to the duration of the season of open navigation and that of the ice-bound period, the experience of five years shows us that a cold of sufficient severity to cover the river with heavy masses of floating ice may occur at any time between the 15th of November and the 27th of March. Thus, as regards the closing of the navigation in 1865, the thermometer stood, at daybreak on the 15th November, at 17 degrees of Fahrenheit; on the 16th, at 15 degrees; on the 17th, at 7 degrees. Several vessels which were still in the river on the 15th November got seriously damaged by floating ice, and one nearly became a total wreck within the port. With respect to the future, however, I may observe that the increased use of steamers at the beginning and towards the close of the open season, together with the construction of permanent jetties, rendering the foreign craft as independent of cargo-boats as now are the junks, might prolong the total period of open navigation from two to three weeks for foreign merchants.

TRADE AND COMMERCE.—The following table of the principal imports produced or producible by the British Isles and India shows the amount of importation in each of the two years last past:—

Names of Articles.		1864.		1865.
Cotton fabrics	pieces	30.137	..	55.154
Iron	lbs.	465.413	..	1,969.229
Lead	„	77.908	..	219 609
Tin	„	37.357	..	168 504
Glass	„	93 600	..	291.763
Opium	„	73,442	..	203,618

The following table shows the amount of the great exports of the district in foreign ships for the two years last past. They are all sent to the middle and southern provinces of China:—

Names of Articles.	1864.		1865.
Peas and Beans	108,832 632	..	119.875.811
Bean Cake	112,288 768	..	114.450 144
Bean Oil	974 890	..	1,468 353

The results shown by these two summaries are satisfactory, inasmuch as they prove an increase in all the principal articles of trade as conveyed by foreign vessels. So far as the imports are concerned, the increase shown denotes, moreover, an increase of the whole trade of the port, and not a mere substitution of foreign tonnage for junks. But as regards the exports, the increase denotes merely such a substitution, for we know that a less quantity of peas and beans have come from the interior to this port during 1865 than came in 1864.

MOUNTAIN SILK.

With respect to the production of the mountain silk, which has of late attracted some little attention in the silk trade, I subjoin some particulars. They were gathered by myself in a visit made by me to some silk valleys in August and September last, and are partly corrective of statements on the subject made in my last report, and which were chiefly based on second-hand Chinese information. There are two crops of the mountain cocoon, a "chun" or spring crop, and a "tsew" or autumn crop. The latter is collected in the last half of September and in October, and the cocoons are brought to market during this latter month. At this period the silk growers pick out the best of the cocoons for the production in spring of the butterfly and worm for the spring crop. They are preserved in baskets, which are hung up in the Chinese dwelling rooms. These almost always face the south, thus opposing a blank back wall to the cold northerly winds prevalent in winter, and getting from their southerly windows the full advantage of the sun in that season, when, during nine days out of ten, there is a clear blue sky. Besides this, the dwelling rooms are partially heated by the warmth emanating from the surface of the keng, a brick bench which occupies about one third of the room, which serves as a sleeping place at night, as seat, &c., during the day, and inside which is a winding flue, with an aperture at one end, in which a fire of millet stalks is occasionally lighted. In spite of all this, however, the temperature of a Chinese dwelling in the mountain silk district is during the greater part of the winter considerably below the freezing point. The worm, being indigenous, could doubtless stand the cold of the winter's nights in its cocoon on the bushes on which it forms these latter; but, apart from theft, destruction by wild animals, insects, &c., it is probable that in nights of unusual severity only the strongest and best inclosed might escape perishing from cold.

The natural heat of spring suffices to bring the chrysalis out of the cocoon in the butterfly shape. The butterflies then couple and in about four or five days after impregnation the female lays eggs. They are laid on native paper spread on mats, tables, &c. In about five or six days from each of these eggs is produced, a small worm of about the size of a black ant, and which is black in colour. This is about the time when the buds on the oak bushes have begun to make their appearance. This must be in the last half of April. The young leaves are forced by twigs being

Digitized by Google

cut off from the bushes and placed in water, in pools of the mountain streams, or in tubs in houses. From these the young tender leaves are taken, and scattered over the paper, as the worms appear from the eggs. The worms are thus nourished for some days, when they are transferred to the youngest, most tender-leaved, oak bushes on the hill slopes. They are then about an inch in length, but are still black in colour. The transfer of the whole does not take place in one or two days. There is during the whole existence of the animal in its worm stage a difference of eight or ten days in the backwardness or forwardness of individuals. After some days the worm has its first sleep or torpor, at the close of which it changes its skin, and re-appears green in colour and larger in size. It has in all four of these sleeps or torpors, each of which lasts about two days. It changes its skin and becomes larger after each torpor, but retains after the first the same bright green colour. For its next, or fifth sleep, it prepares by spinning itself into a cocoon, in which it assumes the chrysalis shape, then bursts out as a butterfly and lays eggs, from which the small black worms are produced, when the processes just described are gone through again. These processes are, in the spring season, more rapidly performed than the similar processes in the autumn. The silk growers told me that those of spring required about sixty days, those of autumn about a hundred. In each season, as fast as the worms consume the leaves on one bush, they are removed by the attendant silk cultivators to another, the youngest bushes being used first. I was in some of the silk valleys from the 29th August to the 12th September, and had an opportunity of observing the autumnal worms in their last stages. The most advanced began weaving their cocoons around them on the 2nd September, but at this time a large proportion of the worms were still in the stage between the third and fourth sleeps, while others, which had cast their skins for the last time, were feeding hard, in preparation of the work of cocoon spinning. On the 12th Sebtember fully one-half were enclosed in, or busy, with their cocoons, while the most backward had all changed their skins for the fourth time.

Just before spinning its cocoon, it is a bright green-bodied grub or caterpillar of 3½ to 4 inches in length, with a light brown head. On its pale brown face there are six or eight small black specks. Its body has twelve joints. On eight of these, it has on each a pair of claws, five pairs of what I shall call back claws on the hinder part of the body, and three pairs of front claws on the forward part. The hindermost, or tail joint, has a pair of the back claws; then there are two joints without claws; then come four joints, each with a pair of the back claws (one on each side); then come two joints without claws, and then the three foremost joints, each with a pair of the front claws. The five pairs of back claws are less developed as claws than the front ones, being, to outward appearance, of the same soft green matter that the body is composed of, and merely tipped with a small piece of hard substance of the same light brown colour as the head. The three pairs of front claws are, on the other hand, curved, and are entirely composed of the hard light brown substance. The five pairs of back claws serve as feet, by means of which the animal holds on to the twig or stem part of the leaf, while the front claws serve as hands, by means of which it twists round the edge of the leaf to its mouth. When the grub is in one of its torpid periods, it holds on to the twig solely by means of the five pairs of back claws, the foremost five joints (three with claws and two without) being altogether detached from the twig in the air. A little above the claws on each side there is, on each joint or segment, a bright blue speck, out of which two or three hairs grow. A little above those blue specks there is on each side, down the last or tailmost nine joints, a brownish streak, which two streaks widen and join together as a brown band on the tail joint. On the eighth and ninth of the joints, counting from the tail end, there are on this brown streak two silvery or white-metallic coloured spots on each side. The brown band does not extend to the foremost three joints; on the other hand, each of these joints has two blue specks on each side, one above or higher up than the other. The animal is thickest about the second and third joints, counting from the head, and tapers off somewhat towards the tail.

When the worm begins to make its cocoon, it selects two or more oak leaves more or less facing each other, and lower than the twig from which they proceed. These leaves it joins together by a network of its silk thread, which thread keeps issuing from its mouth as it moves its head from the one leaf to the other. It holds on, in the meantime, by its back claws to the twig. When the leaves are sufficiently joined to form a sort of cup or basket under the twig to which it is holding, it loosens its hold and drops into the receptacle it has thus formed. The hindermost seven joints of the body are then, with the tail joints slightly curled in, drawn together, and, remaining in a state of torpid inaction, serve, I presume, merely as a store from which the silk thread matter is drawn. The work of further self-inclosure the animal does with its head and the foremost five joints of the body. It first quite surrounds itself with the loose flossy-like silk which forms the outer portion of the cocoons as they come to market, and through which its green body remains for a time visible. It then gradually forms the dense, hardish, skin-like substance which constitutes the inner portion of the cocoon. On opening a cocoon which had been recently formed, and was to outward appearance quite finished, I found inside a complete green worm curled up in the way I have described as to its hind part, and with the fore part in the condition in which it is when the animal is in one of its sleeps on the bush. After a while the fore part began to move and the animal to spin silk, which it attatched at each turn of its head to the surface of a table on which I had placed it. It seemed to be labouring to increase the thickness of its cocoon, being doubtless roused to the necessity of so doing by the feel of the open air to which it was again exposed. I judged that if the cocoon had not been opened the animal would, after a sleep in it, have proceeded to thicken the inner surface by further thread spinning, and have gone on so doing till its bulk was sufficiently decreased for its turning into the chrysalis shape. The yield of the spring crop is said to be much less than that of the autumn crop, 1,000 cocoons of the former giving no more than 500 of the latter. But the quality is said to be greatly superior, finer, whiter in itself, and more capable of taking dyes; but black, with various shades of reddish-brown or purple, seem to be the only dyes that either kind will take. The chrysalids which are not kept for breeding are used by the Chinese as an article of food. The mountain silk remains as yet the one article which this district is likely to furnish to England. My explorations of last summer convinced me that I did not, in my last Report, over estimate the extent of country in which it is produced when I said 150 miles by 100. On the other hand, instead of saying that "not one-fourth part of the hill sides" suitable for the oak bushes is planted with them, I should now say that not one-tenth part is so planted. Viewing the nature of the article and the quantities that are now, and that could be furnished, the trade could be developed into one of appreciable importance even for our great manufacturing interests, unless exactions and jealousies of the local mandarins interposed to repress it.

RAILWAYS IN MANCHURIA.

There are now probably few places left in the world where a railway of 130 miles in length would pay so certainly, and prove so beneficial to the country through which it ran, as would a railway between this port town and Moukden. A closely-cultivated and populous plain extends throughout the whole distance, yet there is not, and never would be, any canal or river-boat competition. Moukden serves now, to a large extent, as the entrepôt between this port and the country which forms the northern portion of this Consular district, both as regards imports and exports. With a railway it would become still more so. Three cities—the city of Newchwang, with the more considerable ones Hae-ching and Leaou-yang—could be touched on the way; and a branch from a point between Leaou-yang and Moukden to the Pun-se-hoo coal mines would probably not be more than 20 miles long, nor require any tunnelling. These mines, rudely worked and accessible only by the hill-roads and with the carts which I have described, now send their coals 100 miles to this town on the south, and to cities at similar distances in the north. Worked by the aid of steam machinery, and accessible by railway, the carriage of these coals would of itself soon become an appreciable item in the success of the latter undertaking. The goods traffic, whether of manufactured or raw produce, takes place chiefly in the cold season, when smaller steamers are frozen to the ground, and marshy places become as hard as stone, and when, agricultural field labour being stopped by the frost for several months, a number of draft animals and their drivers are freed for carrying work. At that season the carters drive as much on the fields by the sides of the above-described roads as on the latter; and as the first few that pass crush down all lesser inequalities, the plains soon become almost as easy of traverse as is England with its macadamised roads. The traffic is facilitated during that period by the construction of bridges over the larger mountain streams whose deeper and rapid current prevents their freezing so as to offer a safe passage over the ice. These bridges are made of wooden piles, which bear a single roadway, consisting of a framework of timbers, on the surface of which are laid transversely bundles of millet stalks. During about 100 days of each cold season 60,000 large carts, drawn, probably, by about 300,000 draught cattle, and accompanied by 130,000 men, discharge their loads at this port town.

As the frost gives, and the ground begins to soften in the month of March, the large cart traffic gradually decreases, and from April to November it may be almost said to cease in a commercial sense. A team which in the frozen period will draw upwards of a ton with ease, has difficulty in the warm period in drawing five cwt.; and after rains, large portions of the plains become altogether impassable for days and weeks. The cultivation of the fields then compels the carters to keep constantly in the low-level roads above described, and there the horses and mules are almost always up to their knees, often up to their bellies, in mud or water. Toward the close of last autumn, I, as accompanied by small carts carrying my baggage and servants, took four days to perform a distance of 26 miles.

BANK NOTES IN MANCHURIA.

One of the chapters of the report is devoted to the currency of the province, and may be read with additional interest at the present time, when our monetary system is so much canvassed. The notes (says Mr. Meadows) are in their size and main features much like English bank notes. They have an ornamental border, purposely made very elaborate in order to prevent forgery. The name of the issuing house, together with the unvarying portions of the date (with blank spaces left for the exact month and day of each) are printed in large characters. Instead, however, of receiving their final validation from a manuscript signature it is given them, in accordance with Chinese official and trading custom, by means of elaborately carved seals, with which red ink is used. These notes are not issued solely, or even in large part, by the money-changing houses, which to a certain extent take the place here of our banks. Each commercial establishment and largish retail shop can issue notes. Formerly this was done only to the extent of one-tenth of the capital which the issuing house satisfied the great Guild of the port-town that it had invested in its business, and after it had entered into an engagement for mutual guaranteeing. But for two years past the Guild appears to have given up the attempt to regulate the paper currency, and at present there are 123 houses at this town which seem to issue notes at pleasure. The notes each promise to pay on presentation a certain number of teaous. The smallest at this port-town are for two teaous, the largest for fifty teaous; at other towns and cities I have seen them for 100 teaous. A teaou, which in the south of China means 1,000 of the above-mentioned copper alloy coins called "tseen" by the Chinese and "cash" by foreigners, means here 1,000 Kwang-tung seaou tseen—*i.e.*, 1,000 of the small cash of Kwan-tung. Kwan-tung signifying "east of the passes"—i.e., east of the great wall and its gates, corresponds to what I have called the Newchang Consular district, as composed of the three provinces of Manchooria and the settled portion of eastern Mongolia. Each city and large town of this region has its own circulation of these seao tseen peaou, or small cash notes; the notes of one city passing with difficulty at the next adjoining city, though on an average only thirty miles distant, and not passing at all beyond distances of forty to fifty miles. There is no coin corresponding to the name of Kwantung small cash; and a teaou or 1,000 of them are only equal to 160 of the general copper-alloy "cash" of China. The latter are, in consequence, throughout this district strung on twine by means of the centre hole in sums of 160 cash, each of which sums is then called a teaou. Although the notes profess to be payable on presentation, in fact, each issuer is by custom bound to give in exchange only one-fifth in copper alloy "cash," the balance in notes of other issuing houses; to which the holder must then repair to repeat the process, so

Digitized by Google

that when a man changes a note say for 50 teaous, the value of which is little more than £2 sterling, he has usually to visit about six or eight issuing houses in succession, some of which may be a mile distant from each other. The rate of exchange between the notes and silver bullion alters daily in each city, and is fixed by the body of money changers who meet every morning at daybreak to settle it. The rate during the past five years at this port town has averaged about 9 teaous for 1 tael, and has ranged from 7 80-100 teaous to 10 teaous.

MANUFACTURE OF BEAN CAKE.

Preparations are now being made by Messrs. Thos. Platt and Co., British merchants at this port, for the establishment of a bean cake and oil steam factory in connection with an experienced practical engineer, who has inspected the existing manufactories, and who is now in England engaged with the new steam machinery. At present, the beans are first crushed by means of a huge granite wheel running on a circle or ring of granite stones, and drawn by animals, nearly all mules, but with a few horses. The crushed beans, resembling irregularly shaped wafers, are then steamed for about five minutes ; after which they are made up into round packages of equal weight by being enveloped each in two grass bundles laid in a peculiar manner, and held together by two iron hoops. Five of these packages are then put into a press, from which they are taken as five cakes, and the oil expressed from which has flowed down into a receiver below each press. The rim of each cake is then pared by hand, when it is ready for exportation. The pressing is effected by two wooden wedges in each press, driven in by two men with heavy stone hammers. When the factories are kept working night and day, which is quite usual, thirteen men and about twenty-two mules or horses are required for each pair of crushing stones. There are now here 102 pairs of crushing stones and 204 presses kept in operation by about 1,330 men, and 2,250 mules and horses. They are making from 20,000 to 24,000 cakes in twenty-four hours. The factories are usually kept in full operation during the warm season. During the cold season there is generally a pause, owing to the fact that the frost prevents an equal quantity of oil being expressed from the beans, and renders the steaming more expensive. It requires but a slight consideration to see that European machinery driven by steam might be brought with advantage to bear on this branch of industry. By a little ingenuity the same fuel that supersedes the mule and man-power in the crushing and pressing operations might without additional cost be made to supersede the steaming fuel, and by a suitable arrangement of the fires, boiler, and machinery in one and the same double windowed building, the temperature might, again without additional cost, be maintained at a height suitable for expressing throughout the winter.

FOOCHOW.

The following is the report of Acting-Consul Carrollon the trade of Foochow for 1865 :—

BRITISH SHIPPING.—The figures in this return compare very favourably with those of the same return last year (1864), both in regard to the number of vessels, the tonnage, and the value of import and export cargoes. The total of duties and tonnage dues also shows a slight increase, the falling off in the import duty being more than compensated for in the higher amounts of export duty and tonnage dues.

The following table will illustrate the above statement :—

	1864.	1865.
Number of vessels arrived ...	325 ...	365
Tonnage of ditto	131,123 ...	170,794
Number of vessels departed	325 ...	370
Tonnage of ditto	131,541 ..	172,441
Value of Imports	£2 207.674 15 0 ...	£2.454.228 3 0
Value of Exports	3,890.889 5 0 ...	4,811,750 5 0
	Taels M.c.c. ...	Taels M. c.c.
Import duties	224,928 9 0 8 ...	217,283 2 4 8
Export duties	1,152.576 8 4 3 ...	1,225.136 7 0 9
Tonnage dues	16.028 1 7 5 ...	17,071 1 0 1

IMPORTS.—The principal and most important items in this return are cotton piece goods, and opium. I will, therefore, treat these specially. As regards piece goods, there has certainly been a revival of demand consequent on the reduction of cost. A further cause of the improvement of trade in cotton piece goods is found in the comparative failure of the native cotton crop in the North of China, and the consequent falling off in the quantity of cotton goods produced in the country, and imported to the southern provinces. In the sale of opium, a slight falling off will be observed as compared with the returns of 1864. This, I am of opinion, is not to be attributed to a decrease of consumption, which I should say has rather increased than otherwise ; but to the fact of a large quantity being smuggled into the province by the Chinese, probably in a prepared state, and which, in consequence, does not appear in any returns. On this subject, however, it is of course very difficult to obtain any reliable information or conclusive evidence, and my opinion is therefore open to correction.

This portion of the trade of Foochow (the import trade) is, I am sorry to state, still hampered to a very prejudicial extent with the inland and local taxes levied on the goods imported. Offices for the collection of these taxes are established at a few yards from the doors of the warehouses of foreign merchants, and in some cases in such a manner as to damage the interests of some in favour of other houses.

EXPORTS.—The only important export from Foochow is tea, and I shall therefore confine my remarks to this article, the trade in which has been unusually large during the past year, and at prices which promise to show a result exceedingly favourable to the foreign merchant. The market for congou, which is the staple for the London market, opened at apparently full rates, but, owing to lower rates of exchange and freight, the actual cost was in general considerably less than it was in 1864, and in many cases a profit of 40 or 50 per cent. may be hoped for. This result is mainly due to the increase in the consumption of tea throughout the United Kingdom since the last reduction of the duty and to the cessation of hostilities in America, though at the same time it is partly attributable to the disturbed state of the southern portion of the province, which has caused a part of the tea, which usually found shipping at Amoy, to be brought to this port for export. In this branch, as in the import trade, great pressure is felt from the local exactions, and, could these be removed, there can be no doubt that we should have a far larger supply, and a consequent reduction of price.

AMOY.

Mr. Consul Swinhoe's returns from this port are unaccompanied by any detailed report, his short term of office there not having allowed time for one. The returns are entirely in a tabular form, and show that during the year 1865 802 vessels entered, and 780 vessels cleared from the port. The total value of the imports was estimated at 12,974.724 dollars, and of exports at 2,699,286 dollars (exclusive of treasure). Of the tonnage entered inwards and outwards nearly two-thirds was British.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, AUGUST 24.

A general confusion has prevailed in Parliament. It was supposed, as I wrote you in a former letter, that the Second Chamber would be prorogued as soon as it was decided that the India Budget for 1867 ought to be again examined in the sections, and the influential journals asserted, on apparently good authority, that this important Bill would not be discussed during this sitting. The fact that only about fifty members were present at the Hague made this statement credible. In the meanwhile the Second Chamber continued to have its business regulated by the order of the day. Several Bills of local interest, and amongst them that to alter the Excise duty upon sugar, and that authorising Government to take vigorous measures where rinderpest prevails or breaks out again, were approved of. An extraordinary calmness—a *laisser aller*—was however predominant till Mr. Fokker interpellated the Cabinet as to the fact of our Minister of Foreign Affairs having made useless concessions to Belgium. In consequence of the Minister's reply, he proposed that the House should declare that it regretted that the Minister had yielded to the claims of Belgium.

The fact is that Belgium protested, some time ago, against the damming up of the Easter Scheldt, which is necessary for the construction of the Zealand-Limburg Railway. Without any question the water belongs to our territory alone ; no treaty binds us towards Belgium ; and as charity begins at home, the former Cabinet did not care for the protests of the Belgium Ministry, and ordered that the public works should be constructed. In the meantime Count van Zuylen became Minister of Foreign Affairs, and the Belgian Cabinet, profiting by the fresh delay, succeeded in obtaining that an international commission should be appointed to examine their claims. It needs no explanation that this opportunity was a promising one for the Opposition. The Ministerialists however succeeded in inducing the Chamber to consent that this motion should not be discussed until after the papers had been laid before the members. Of course the danger was frustrated for the moment. The Belgian engineers have arrived already and will begin their examination to-day ; and the States-General will have to vote against a *fait accompli*.

COMMERCIAL.

COFFEE.—The market is very firm ; but the holders declining to operate without an advance, the transactions are of little importance. They only include 1,158 b. Native Ceylon, sold in auction at 40 to 40½ c. ; 4,850 b. Santos ex Coques; 316 b. Java ex St. Helena, and 596 b. ex St. van Heel.

SUGARS.—The tone of the market is improved but is still inactive, because holders decline to operate at the actual prices. The fall of the discount at the Bank of England had a very favourable effect upon the market of refined, and for several trade-marks an advance of ¾f. to 1f., was paid.

TEA.—Firm. On the 27th will be offered in private auction 4,444 ¼-ch. 245 ½-ch., 1,015 1-12th ch. Java tea ; viz., 230 ¼-ch. Boey, 704 ¼-ch. Congou, 109 ¼-ch. 240 ½-ch. Kempoey, 2.744 ¼-ch. Souchong, 125 ¼-ch. Pouchon, 11 ¼-ch. 33 1-12th ch. Pecco Kempoey, 183 ¼-ch. Pecco Souchong, 137 ¼-ch. 938 1-12th ch. Pecco, 29 ¼-ch. Tonkay, 17 ¼-ch. 21-12th kn. Schin, 146 ¼-ch. Hysant, 9 ¼-ch. 5 ½-ch. 10 1-12th ch. Uxim, 32 1-12th ch. Joosjes.

RICE.—The only lot sold was 2,500 b. Necransie (dam.) ex Nova Zembla, at 6¼f. There is much demand for qualities of 8¼f. to 8½f., but there is no stock.

SPICES.—In waiting for the auction, which will be held to morrow by the Trading Company, the market was inactive. Cloves, by want of stock, with much inquiry ; nothing can be bought under 29c. for No. 2.

TOBACCO—Java Leaves : The market is very dull. On the 13th of September most of the first-hand's lots, amounting to about 18,000 b., will be offered in public sale.

HIDES.—Several parcels ex-Marinus, Three Bells, Adriana Johanna were sold, but prices not made public.

JAVA INDIGO, with a lively demand, closes the market firm. The 300 chests arrived per Eva Johanna are to be brought soon into the market.

BANCA TIN.—The market is much improved ; 100 slabs were sold at. 46¼f. ; 260 ditto at 46½f. ; 1,200 slabs at 47f., and 500 at 48f. Nothing is offered now under 48½f.

DRUGS.—Camphor unaltered. Cassia Vera : The 212 piculs offered are not yet sold ; too high prices are required. Gum Elastic : Some parcels

Digitized by Google

were sold foreing. Japan Soya: 130 chests were offered in auction and partly sold at 36c.; the rest was bought in at 50c.

Rattans.—500 bundles ex Duc de Richelieu at unaltered prices.

Cochineal.—Dull by want of inquiry.

Arrack.—61 casks and 40 ¼-casks, imported per Baltimore, were sold at prices which did not transpire.

Shipping—Arrivals.—August 17, at Brouwershaven, from Batavia, Cornelis Wernard Eduard; at Texel, from Banjoewangie, Nederland and Oranje; 18, at Texel, from Batavia, Zeenimph.

Departures.—August 19, from Hellevoet, for Batavia, Karel August; Diana (via Newcastle), from Texel, for Batavia, Landbouw; for Singapore, Maria Catharina (via Newcastle); for Batavia, Generaal Michiels (via Sunderland); 20, from Texel, for Singapore, Cornelis Smit (via Swansea); 21, from Brouwershaven, for Batavia, Licht Straal; for Singapore Johannes Martinus.

The Trading Company chartered the Anna, the Souburg, the Diana, he L. J. Enthover, to convey coals from English to Indian harbours.

PASSENGERS INWARD.

From Java.—Per Cornelis Wernard Eduard: Mrs. Lammersvan Torrenberg and family; Jaspers and family; Kruseman and family, Smulders and family, Benier, Stockens, Miss Sanger, C. Perler, Scholl and the youth W. Ruys. Per Zeenimph: Messrs. C. H. Bogaerd; J. C. Joekes; E. L. Elmle, G. Herwaarden, D. Nuysinck, Zyll de Yong and family, Rudolf, Mr. Welmers and three children.

PASSENGERS OUTWARD.

For Java.—Per Landbourn: Mr. G. H. K. Zadelhoff and family, C. J. Kraus and family, H. Kuneman and family, and A. J. Elliot. Per Lichtstraal: Mr. P. B. Buyn van Rozenburg and family, F. J. van Oppen and family, A. O. Rehm, J. B. G. van Baer, J. van Ek, W. G. van der Hell, Mr. F. G. Wieriky and daughter, A. C. Harms and P. J. Linden.

CONTINENTAL TRADE WITH THE FAR EAST.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, August 23.

Letters have been received here annnouncing the total loss of the Bremen barque *Libelle*, on her voyage from San Francisco to Hong Kong, on an uninhabited island in the Chinese seas called Wake Island. After remaining there for three weeks exposed to great privations, the crew embarked in their boats to endeavour to reach the nearest inhabited island. After knocking about for a whole fortnight one of the boats with twenty-two of the crew, under the command of the chief mate, succeeded in reaching the Marianne or Ladrone Islands, where they were most kindly received by the Governor, and amply supplied with food and clothing. Of the fate of the other boat with eight men, commanded by the captain, nothing has yet been ascertained; but the Governor had sent out a schooner to look for them, and bring away the money buried on Wake Island by the passengers, among whom were the members of an English dramatic company bound for China, where they intended to perform.

The *Siberian Gazette* gives the following statistics of the present value of landed property in East Siberia:—1. The Government of Irkutzk: the city of Irkutzk, 5,134,448 Roubles; Nijne-Udinsk, 36,425 Rs.; Kiralak, 25,372 Rs.; Venshansk, 24,422 Rs. 2. Government of Yenissei: Krasnoyarsk, 717,165 Rs.; Yenisseisk, 357,665 Rs.; Atchinsk, 112,136 Rs.; Kansk, 60,000 Rs.; Minoussinsk, 150,000 Rs.; Touroukhansk, 300 Rs. 3. Government of Yak: Yak, 118,034 Rs.; Olekminsk, 13,470 Rs.; Kolinsk, 2,432 Rs.; Vilioisk, 1,200 Rs. 4. Government of the Transbaikal: Tchita, 191,960 Rs.; Nertchinsk, 70,000 Rs.; Verchne-Udinsk, 245,955 Rs.; Selenginsk, 60,000 Rs.; Troitzkozafsk, 83,000 Rs.; Kiachta, 135,000 Rs.; and Bargouzine, 40,000 Rs. The rapid development of Tchita is especially remarkable, it being the youngest town in Siberia (having been founded only in 1854), and now taking the fifth place among the other towns as regards the value of its landed property.

The *East Coast* contains the following:—"As far back as 1863 thirty families emigrated from Corea, and settled in the new Russian territory, bringing with them their cattle and other movable property, and the Commandant gave them land to cultivate in the Bay of Possiet. In the two years just elapsed they succeeded so well that others were induced to follow, and the Commandant has now received intelligence that more than a hundred additional families from the same quarter are on the road and may be expected to arrive in the course of the present summer. If the Government continues to encourage this movement and afford these emigrant the usual facilities, it cannot but be highly advantageous for the development of the newly acquired territory, as the Coreans are an active, intelligent, and vigorous race. The Chinese Government has no power to interfere and prohibit this emigration, as Corea is only nominally subject to Chinese rule, but virtually totally independent."

COMMERCIAL.

Coffee.—A good opinion continues to be entertained for this article, and prices are steady at the late advance. Sales of the week, 21,000 bags.

Sugar.—The market for raw is not so active as it was, but prices are not lower. The sales of refined were limited to 10,000 loaves, there being no more ready goods in the market.

Rice.—A lull has taken place in the demand, but there is no alteration in values.

Spices.—Cassia Lignea continues in favour; Flores has been sold a shade cheaper. There is again more inquiry for Pepper at previous rates.

Spelter.—There is no improvement to report either in the demand or the prices, the market being in a complete state of stagnation. Silesian in slabs can be bought at 13 mks. 4 sch. banco, both for delivery and loco, but there are no purchasers, nor are any transactions reported.

Discount.—Money continues plentiful, and discount is between 3½ and 4 per cent. The vast quantity of money released by the late reduction in the rate of discount in London, Berlin, and other financial circles and requiring investment has given an impetus to the stock and share market, and there is an improvement in the value of most of the German railway shares, it being also instinctively felt that with the return of peace an increase in the traffic both for goods and passengers must inevitably ensue.

Shipping.—Arrived.—August 20, Titania, from Bassein.

Sailed.—August 22, Martha, to Hong Kong.

In addition to providing the finest fleet of transports hitherto built for the conveyance of troops, it is intended to erect a commodious hospital at Suez for the reception of any invalid soldiers who might require rest and medical treatment after the passage from India and before undertaking the run across the desert; and if, on arriving at Alexandria, any man should be found too ill to embark immediately, arrangements have already been concluded with the authorities of a foreign hospital by which the doors of their establishment will be thrown open for the reception of our sick people.

THE EAST INDIAN EXPORT TRADE.

The following letter, published in *The Times*, relates to the manner in which the financial arrangements in connection with our East Indian export business are carried on, and the way in which in difficult times they are certain to lead to difficulties:—

"Sir,—At a time when 10 per cent. is accused of having wrought all the injury lately inflicted upon trade, it may be opportune to refer publicly to some of the details of business which, unsound in themselves, have combined to hasten the last powerful corrective, now cutting so deeply while making its cure.

"The subject is a very wide one, but in the present letter I will confine my remarks to an ordinary operation in East Indian export business, and I shall be glad if discussion may suggest such improvement as shall modify the elements of fiction and self-deception more or less inherent in the finance attending such transactions.

"Let us suppose that A, B, C, and Co. are about to ship 100 bales of yarn to Madras. The first step is to order the yarn in Manchester from a buying firm who have confidence in the solvency and honesty of the London and Madras houses. The yarn is duly bought and shipped. The next step is to arrange that Manchester shall be paid without London really parting with coin until Madras has sold the yarn and remitted the proceeds. This realisation cannot be relied on under nine months from date of the ship's sailing. The payment, then, has to be arranged upon the joint credit of Manchester and London, with a letter of guarantee from the latter to the former that the specific funds to come from Madras shall, when received, be applied to the ultimate payment for the yarn.

"None can deny that with two solvent English houses and an honest Indian firm to sell and remit, the capitalist should run no undue risk in advancing his money to assist this operation until its conclusion, nor would the other two parties concerned accept more than ordinary business risk in the transaction.

"But now begins the mutual customary misrepresentation.

"Manchester draws on London at six months' sight for value received at say, '5 per cent. discount, with money easy.' The first fiction consists in Manchester and London directly promising that the bill shall be paid in six months, and the capitalist, who discounted the bill, pretending to believe that it will be paid at the end of six months.

"All the parties to the operation knew well that the representative coin cannot possibly be in hand at the date stipulated, and that the bill must be renewed, or that serious consequences may happen to all concerned.

"Time, always correctly measured by the due date of bills, brings the nevitable maturity of the Manchester draught, and possibly finds discounts at '10 per cent. with money tight.' Capitalist pretends to expect payment, while Manchester and London cannot do that which they never intended to do, and for which they did not expect to be called upon to provide.

"With possibly much trouble, and with certainly great loss of discount, Manchester and London renew their bill for three months at 10 per cent. The capitalist now; as eager to get back his money as he was before to part with it, augments the risk by the naturally increased danger of the Manchester and London names in a panic money market, and the fiction is thus extended to nine months.

"I need not trouble your readers by sketching the results of failure on the part of either London or Madras to fulfil its obligations in the yarn transaction, but I will assume that within the nine months funds in some legitimate form reach London, and that the Manchester draught is duly paid, and the transaction closed. 'All is well that ends well!'

"In ordinary times, and for generations past, this financing has been found to fulfil its general purpose; it is, however, unsuited to the present day of monetary and commercial activity. The important item of export business to India should be so conducted as to give it a legitimate credit character, for to the full extent of the *bona fide* credit so employed would be diminished the dangers, anxieties, and uncertainties to which that trade is, among others, exposed when the Bank rate is raised to 10 per cent.

"Let 'value received' when coupled with an undertaking to pay a given sum upon a given day be no longer looked upon as a formal fiction, but let every firm that signs its name under that assurance be called upon by the capitalist discounter to give some reliable assurance that representative value exists for the due fulfilment of the obligation undertaken. Nothing

Digitized by Google

would be easier than for every export bill of exchange to specify and to give lien upon the goods it represents.

"Were this change insisted upon by capitalists, six months' bills, immature and showing nothing but the signatures of their makers, would give place to nine and twelve months' bills against declared securities. Capitalists would thus escape much risk, sound and good trading would be rather helped than otherwise, and one element of derangement would be modified in our financial and commercial world.

"While able men are studying capital, currency, &c., it may be worth inquiry if there be not important elements of danger (justified by custom) more or less directly interfering with the true action of the laws by which our money world is governed, and which, in their bearing upon our necessarily complicated system of world finance, may have greatly helped to bring upon us our late severe pressure.

"If you think, Sir, that what I have above written is sufficiently important for a place in your columns I may refer in a future letter to the unsuitability of existing finance practices as applied to the carrying on of he import trade from India.—Your very obedient servant,

'Aug. 20." "SEMYD.

CHINESE MOHAMMEDANS.

(PALL MALL GAZETTE.)

The last mail from China announces that the Mohammedans of that country are again giving trouble, having made an irruption into Kan-suh and then burned the capital. They must have come out of Shen-si, where they abound; and the immense province of Kan-suh, or "Voluntary Reverence," into which they have gone is for the most part a howling wilderness of sand and snow, extending over about 400,000 square miles, beyond the Great Wall and the Yelland River, over the deserts of Gabi to the confines of Songaria and Thibet. A portion of it, however, which lies on the south side of the Yelland River, is tolerably fertile, and in that is the capital Lan-chan, which is said to have been taken by the disciples of Islam. The population of Kan-suh is almost entirely Buddhist.

This movement has most probably arisen, not from any particular success on the part of the Mohammedans in China, but from their having been hard pressed by the Imperialists in their own peculiar province, where for some years they have been in a state of more or less insubordination. In the recent disordered state of the Flowery Land and weakened condition of the Imperial Government, it was to be expected that the adherents of a creed so fierce, proselytising, and uncompromising as that of El-Islam would try to assert themselves and to throw off the rule of a Government which, while it tolerates all forms of religion, will allow no interference with the Celestial Emperor's sacred will in matters of the State. Indeed, it is remarkable that so fanatical a sect should for centuries in China have held in complete abeyance the command of their Prophet that those who will not accept the faith should be put to the sword; but in India we have also seen how the most bigoted Mallahs will accommodate themselves to the material necessities of their position. In 1862 the Mohammedans of Shen-si rose in a somewhat formidable insurrection, and captured the most important cities in the province, amongst others the capital Si-gnan, which is dear to the Chinese as having been the seat of the Tang dynasty, under which passed a glorious period of the national history, and of the great Emperor Tai-tsung, who established the system of literary examinations, drew up the Celestial Code pacified the whole country, and extended his sway so that, westward, it was, only limited by a line stretching from Behar in India to the Caspian Sea. This revolt was put down partly by force, partly by arrangement, as a similar one was managed in the the last century by the Emperor Kien-lung; but there has ever since 1862 been some difficulties in that portion of China, as indeed, there had been frequently before.

The relationship between China and Mohammedanism began at a very early period, for so early as the reign of the Kalif Walid, about 708, an embassy was sent to China by way of Kashgar, and on a tablet in the Mohammedan Hiang Fang or "Echoing Tomb," at Canton, it is stated that there were disciples of the Prophet settled in Shen-si in the reign of the Emperor Wu tsung, 842. In one Chinese native work, the statistics of Kwangchau, it is even stated that Mohammed himself sent a maternal uncle to trade with China in the sixth year of the Hejira. Be that as it may, we know that in the ninth century Wahab and Abuzaid, the Arabian travellers, wrote an account of the Flowery Land; and about 1330, Ibn Batuto found wealthy Mohammedan merchants in all the great Chinese cities. The Arabs do not seem to have any difficulty in getting on with the easy-going Celestials, and it was not till Mohammedanism got some hold over the rough tribes of the north-west frontier that it began to cause trouble. As that frontier of the empire now expanded, now contracted, according to the vigour and good fortune of the Government, the Mohammedans in that reign were naturally left in some dubiety as to how far it was necessary or expedient to acknowledge the Emperor. Hence they have every new and then shown a disposition to rise, and in 1827 Le Hangis caused the Government some anxiety by his insurrectionary movement. The Chinese say that it is useless to be particular in observing politeness and ceremony towards the Mahommedans, because they imagine that they are feared and become arrogant, whereas, when they are treated with severity and rudeness they are impressed with respectful fear and become manageable. But it is not only in Shen-si that Mohammedans are to be found. There are small communities of them at Canton, at Tientsin, at Peking, and scattered elsewhere over China. Except in the north-west they are not in the least formidable, and do not scruple to pass the Government examinations and worship the memory of Confucius, and take office when they can get it. They have become Celestialised, but not to the same extent as the Jews who established themselves in China many centuries ago, and who, while retaining a few rules of the Pentateuch, have lost all the peculiarities of their race and faith, thereby vindicating a remarkably penetrative judgment of the philosopher Kant, who said in his "Religion innerhalb der Grenzen der blossen Vernunft," that it was the opposition of Christianity and of Mohammedanism which had kept Judaism alive and preserved the Jews as a peculiar people, and who predicted, as it seems rightly, that in a state of society where they would not be exposed to such opposition, it would be found that both Judaism and Jews would rapidly disappear.

Monetary and Commercial.

Bank shares have been in demand, with a rise in prices. Chartered of India, London, and China, Chartered Mercantile, and Oriental have been in special request.

The *Surat*, with the mails for Calcutta and China, took on the 20th inst. only £526 in specie. There is still no demand whatever for silver for the East, while the inquiry for the Continent is very limited. The quotation for bars is 5s. 0¼d. per ounce, and for Mexican dollars 4s. 10¾d.

At a meeting of Overend, Gurney, and Co. (Limited) the liquidators, Messrs. Turquand and Harding, made a call of £10 per share. Many objections were offered by the proprietors present, including one to the effect that the shares had been taken on the faith of the prospectus, which guaranteed shareholders against all loss from the old firm. An application in Chancery was made on behalf of a shareholder for leave to examine all books and documents connected with the formation of the company, and the decision was that this privilege could not be accorded to a single shareholder, but that an applicatioy from a number of shareholders on behalf of the general bodn would probably be granted. The application will therefore be renewed in a modified form on the 28th inst.

The report of the Comptoir d'Escompte de Paris is published. The net profits of the year amounted to 5,096,939f., and the sum distributed for the year will be 63f. 50c. per share, equivalent to about 12 7-10ths per cent. The prudence with which the directors have managed the affairs of the company during the late crisis is highly commended.

Messrs. Sillar and Bateman have received telegrams from Hong Kong to the 29th July, giving exchange at 4s. 5½d., and export of tea for the fortnight 12,000,000 lbs.

The accounts received by the Agra and Masterman's Bank from the Calcutta branch are considered favourable to the prospects of the liquidation. The High Court in full bench have decided that the Court has no jurisdiction to order the winding up of the Calcutta branch, and the liquidation of this portion of the business may now, therefore, be conducted in harmony with the proceedings in London. The Calcutta agent has meanwhile made advances to the indigo cultivators to enable the crops to be saved on which the bank has a lien, and the report of the probable outturn is satisfactory.

The screw steamer *Erl King* reached Gravesend on the 22nd from Foochow, after a passage of seventy-seven days, with the first cargo of the new season's tea. The ships *Fiery Cross*, *Serica*, *Ariel*, *Taeping*, and *Taitsing* may be expected to arrive from the same port very shortly.

MANCHESTER MARKETS.

The market has remained quiet both as regards shipping and home trade. Sellers have been disposed to ask higher rates, but buyers show little disposition to enter the market. Quotations are:—Grey Shirtings, 7 lb., 11s.

Digitized by Google

3d. to 11s. 9d.; 8 lbs. 4 oz., 13s. 9d. Yarns, Nos. 16-24, 1s. 6d. to 1s. 7d.; 28-32, 1s. 8d. to 1s. 9d.

PRODUCE MARKETS.

Tea.—The steamer Erl King arrived in dock on the 23rd with a cargo of Foo-chow teas, a portion of which have been placed on the market, but at present the sales made have not been large. A few Congous and Oolongs have found buyers, the Congous from 2s. to 2s. 3d., and the Oolongs from 2s. 2d. to 2s. 5d. Broken-leaf and dusty kinds of Congou have sold rather low at public auction. Hankow siftings at 6½d. to 6¾d., and Kaisow siftings at 7¾d. to 8d. per pound. Those with leaf continue in request at full prices. Fair to good common remain at 1s. to 1s. 0½d. per lb. Fair to good flavoury kinds, at public sale, have sold at rather better prices. Good Kaisows have sold 1d. per lb. lower, also fine to finest of old seasons. Common to fair black-leaf kinds have sold ½d. per lb. lower at public sale; privately, they are difficult to move. Good to fine have sold at rather lower prices. In new-make Canton kinds business has been limited, and prices are rather in the buyer's favour. Amoy kinds have sold at about 1s. per lb. for fair quality. Common to fair Oolongs show no alteration; good to fine are scarce, and the sales of new season have been at fair prices. Souchongs show no alteration. Flowery Pekoes are only saleable at very low prices. Common to fair Scented Capers fully maintain former value. In good to fine transactions are small. Foo-chow Scented Orange Pekoes have sold rather lower. In Canton-make there has been but little done, and prices are unchanged. Uncoloured Japans are rather lower. There has been an export demand for Green Teas, especially for Moyune Young Hysons and Imperials, and prices for these show an advance of fully 2d. per lb., whilst prices for nearly all descripts have ruled rather higher. Hysons are still in over-supply, and prices still depressed. Canton Gunpowders remain difficult of sale, and prices about ½d. to 1d. per lb. lower. The public sales, which began on the 21st inst., comprised 27,848 packages, of which 26,711 packages were sold, the whole being without reserve.

Silk.—During the last fortnight much business has been done in all kinds of silk, and prices have gradually advanced till the quotation is 31s. for new No. 3 Tsatlee, and at this price much of the new silk expected in London early in the week has been placed "to arrive." Japan (Mybash) is very scarce, there are no good parcels to be had, and mixed and inferior are worth 33s. The high price at which the market for the new silk has opened here will make business very difficult, and we can hardly expect much active business will continue at these rates; fortunately the new silk is not coming forward rapidly as it did last year, or we should soon find our stocks accumulate to a heavy extent.

Cotton.—The market opened dull last week, and prices had a downward tendency until the 23rd, when the reduction of the Bank rate to 7 per cent. excited a slightly improved feeling, and the quotations, which are about ¼d. per lb. below those of the 17th, are more readily obtainable. During the week 1,290 bales Tinnivelly were sold at 10d. to 11d., fully fair to fully good fair. Quotations at Liverpool—Middling upland 13¾d.; fair Egyptian 21d.; fair Dhollerah 9¾d.; fair China 9¼d. Afloat to Europe on the 24th, 8,797 bales China, and 50 bales Japan. Stock of cotton in Liverpool on the 24th 865,650 bales, against 430,070 same time last year.

Sugar.—The market closed firmly on the 24th, useful descriptions being at an advance of 6d. per cwt. on the currency of the previous week. Privately, on that day, 16,000 bags low clayed Manila were sold at 27s. 6d. to 28s. During the week, also privately, 22,000 bags clayed Manila were placed at 27s. 6d. to 28s. 6d., and 5,300 bags unclayed at 24s. 3d. to 24s. 6d.

Coffee.—The market had a steady appearance at the close of business on the 24th; the Plantation Ceylon brought to public sale, amounting to 840 casks, 406 barrels and bags, went off without variation from rates varying from 75s. to 89s.; as also 479 bags Native, good ordinary at 66s. 2,259 bags Singapore were about one-third taken, ordinary mixed 44s. 6d. to 50s. 6d., pale 66s. to 68s.

Rice.—663 bags Rangoon (mostly damaged), at auction on the 24th, sold steadily; and 276 bags Paddy realised 8s. 6d. Two small floating cargoes Rangoon, together 950 tons, have been sold for the Continent at 10s. 6d., which is again dearer for this description.

Cardamoms.—In good demand, at a slight reduction in terms; of 28 cases Malabar at auction, one-fourth sold at 4s. 3d. to 5s. 6d. per lb. for ordinary to good; 36 cases Alleppy sold at 4s. 6d. to 4s. 11d. for fair to good; of 26 bags Madras, a few sold at 2s. 8d. for ordinary; and 20 bags Ceylon sold at 3s. 8d. to 3s. 9d. for good, and 1s. 7d. to 1s. 9d. low and lean.

Camphor.—Quiet, and without buyers upon former terms; small sales effected in Japan at £6 7s. 6d. per cwt.

Cassia Lignea.—Firm, with moderate trade privately; no auctions. Buds: Continue to sell slowly within our quotations of £9 to £9 10s.

Cinnamon (Ceylon).—We quote 1st sort, 1s. 9d. to 2s. 8d.; 2nd, 1s. 8d. to 2s. 5d.; 3rd, 1s. 3d. to 2s. 1d.; and 4th, 5th, and Jungle, 11d. to 1s. 6d. per lb.; moderate business at the currency of the late Quarterly Sales.

Cocoa-nut Oil.—Demand shows further improvement, and the upward tendency in prices is sustained. Good business done, especially in Ceylon. 128 casks Cochin, 116 casks Ceylon, and 651 casks Sydney at auction.

Drugs—Cubebs.—Very flat: 119 bags at auction, all retired. Dragon's Blood: Remains firm, but quiet; 9 cases at auction, retired. Galangal Root: Flat: 70 bags at auction, retired. Rhubarb: Cheaper, and very dull; of 669 chests at auction only one-fifth sold at 2s. 3d. to 5s. 4d. per lb. for ordinary to good flat and round, and 10d. to 1s. 9d. low trash to inferior.

Gums.—Benjamin: Steady; of 105 cases Sumatra at auction one-third sold at £13 per cwt. for good seconds, and £6 15s. to £6 17s. 6d. good thirds. Damar: Quiet; 162 cases at auction, retired. Gamboge: Continues very scarce; 3 cases at auction, retired.

Gutta Percha.—Very dull, and most difficult of sale; 16 tons and 181 baskets offered at auction, and a few of the latter only placed at 5¼d. to 6d. per lb. for ordinary reboiled; fine genuine scarce.

Hemp (Manila).—Quiet; 340 bales at auction, all retired. Privately about 250 bales are reported sold at £40 for very ordinary, and £46 good.

Horns.—Buffalo: firm; 15 tons Madras, 10 tons Calcutta, and 1 ton Siam at auction, sold at 38s. to 41s. per cwt. for 2lb. average, and 27s. for 1½ lb. Deer: Very firm; and 24 tons Madras and Ceylon sold at auction at 56s. per cwt. for 1½ lb. average, and 41s. to 43s. 6d. for 3 to 2½lb.

India Rubber.—Business unimportant, owing to paucity of supply; 33 baskets Penang at auction retired.

Japan Wax.—Recent importations, 1,215 packages, brought to auction, and about half sold at 49s. 6d. to 64s. per cwt. for ordinary, watery saucers; good and fine very scarce, and much inquired for.

Oils.—Anniseed: In improved demand; fair business on the spot and for arrival up to our higher quotation of 9s. Cassia: Of 60 cases at auction half sold at 7s. 6d. per lb., at which moderate price it is still offering. Cinnamon: Quiet; of 16 cases at auction one-third sold at 1s. 2d. to 2s. 6d. per oz. for inferior to middling, being rather cheaper. Citronelle: Quiet; of 34 cases at auction half sold at 3½d. to 3¾d. per oz. Lemon-Grass: Abundant, and quiet; 5 cases at auction retired.

Pepper.—Black: Is again rather better; of 1,169 bags Singapore, and 3,055 bags Penang at auction, two-thirds of the former sold at 3¼d. to 3½d. per lb., and three-fourths of the latter at 3¼d. to 3⅝d.; moderate business done privately upon similar terms. White: Had been very flat, but a reduction in terms has led to improved demand, especially for arrival, in which a fair extent of business has been done at 6¼d. to 6½d. per lb.; 188 bags Singapore, and 70 bags Penang sold at auction at 6¼d. to 7d.; 30 cases Tellicherry sold well at 9¼d. to 1s. 5½d.

Spices.—Cloves: Penang flat; of 84 cases at auction, one-fourth sold at 1s. 0½d. and 1s. 1d. per lb. for good: Zanzibar steady, and of 357 bags at auction a few sold at 3½d. for fair. Mace: Very flat; 5 cases Penang sold at auction at 3s. per lb. for good palish, and 2s. to 2s. 1d. middling reddish; 5 cases Singapore sold at 1s. 3d. to 1s. 4d. for low lean. Nutmegs: In better demand, and dearer; of 111 cases Penang and 17 casks Batavia at auction one-fourth sold at 1s. and 4s. 2d. per lb. for low small shrivelled to fine bold; sales also effected privately at higher prices.

Sago.—Steady; 979 boxes and bags at auction sold at 17s. to 18s. per cwt. for middling to good small, and 17s. middling large. Flour: Quiet; nothing of any interest doing.

Terra Japonica.—Cutch, Pegu: Fine quality commands £2 per ton in retail; 2,560 bags at auction all retired. Gambier: Again dearer; good business done on the spot and for arrival up to our higher quotation; of 1,748 bales at auction, three-fourths sold at 30s. to 32s. per cwt. for cubes.

Tin.—This market has at length undergone a great change for the better; prices have rapidly risen £7 per ton, large business has been done, and the metal remains very firm, the latest prices being (cash) £84 to £85 per ton Banca, and £83 10s. to £84 Straits.

Miscellaneous.—Blacklead: Rather cheaper; and of 827 barrels at auction, one-third only sold at 15s. to 18s. per cwt. for fair to very good lump; and 7s. 3d. to 10s. 3d. dust. Ebony Wood: In increased demand; 92 tons Ceylon at auction mostly sold at £7 10s. to £14 10s. per ton. Galls: Turkey in rather more request, upon fully former terms; China rather dearer, and Japan very scarce: of 359 boxes China at auction one-third sold at 64s. to 65s. per cwt. 55 boxes Japan retired. Musk: Rather cheaper; of 72 caddies Tonquin at auction, rather more than half sold at 19s. 6d. to 26s. per oz. for middling rough to good, and 17s. pickings; 7 tins Cabardine sold at 11s.; and 2 tins Grain retired. Rattans: Remain very flat; transactions at auction and privately too unimportant for reference. Sapanwood: Continues dull; of 76 tons Ceylon at auction one-third sold at £8 10s. to £10 15s. per ton for middling to good; 24 tons Manila, 5 tons Siam, and 6 tons Batavia, all retired. Mother-o'-Pearl Shells: Remain very scarce, and firm, with inquiry. Soy: Quiet; nothing doing. Star Anniseeds: Flat, again cheaper; 112 boxes at auction sold at 75s. to 76s. per cwt. for good; moderate business accomplished privately upon similar terms. Sticklac (Siam): Very flat, no auctions. Tortoiseshell: Without change; of 4 cases Manila at auction, two sold at 14s. 6d. per cwt.; of 3 cases Penang, two sold at 13s. 6d. and 11s. per cwt., and 3 cases Sydney retired. Vermilion: Quiet; 20 boxes at auction retired.

ARTICLES OF EXPORT.

Iron.—The quotations in London are for Welsh bars £6 5s. to £6 10s.; nail rod, £8 10s. to £8 15s.; hoops, £9 10s. to £10; sheets, single £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 5s to £6 10s.

Steel.—Swedish keg, £15 15s.

Copper.—Sheet and Sheathing, £86 per ton; yellow metal, 7d. to 7¼d. per lb.

Tin.—£85 for block; £86 for common bars. Tin plates, best charcoal, I.C., 32s. to 33s.

Lead, &c.—English pig, W.B., £22 15s.; shot, patent, £23 10s. to £24; sheet, £21 10s.; spelter, £19 to £19 10s.; zinc, English sheet, £27; quicksilver, £7.

The following is from the Circular of Messrs. French and Smith:—There is some little improvement in this market, and as at length the Bank rate has gone back to 8 per cent., we may confidently expect still further improvement. Iron remains quiet. Copper is more in demand. Tin: English is not so much pressed, although there are still sellers much under official quotations. Foreign, Banca is firmer. Straits is scarce in the market, and we expect higher prices. Tin Plates very firm. Lead also very firm, and a fair business is reported. Spelter quiet.

EXPORT OF BULLION TO CHINA &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

The various loading berths for the East are well supplied, but there is little inquiry for coal ships from the outports. In homeward charters we have no transactions to report.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £43. For Singapore: £30. For Shanghai: £50. For Saigon: £50. For Yokohama: £50. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Singapore, £1 6s. For Shanghai: £2 10s. For Saigon: £2 8s. For Batavia: £1 6s. For the Philippine Islands: £2 2s. 6d. For Manila: £2.

The Admiralty have invited tenders for the conveyance from the River Thames to Colombo of about six tons light measurement stores; to Hong Kong of about eight tons light measurement stores and 33 tons loose shell; and to Trincomalee of 22 tons naval masts and spars and 54 tons stores.

The Granville has been ordered to be surveyed for the conveyance of troops (about 4 officers, 1 sergeant, 79 rank and file, and 6 women and 9 children) from the River Thames to Colombo, and freight has been engaged for the conveyance of stores to Hong Kong by Her Majesty.

CASUALTIES.

The Schelde, Hoffman, from Newport to Singapore, put into Simon's Bay, 15th June, leaky, and would probably have to discharge before repairing.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, Eastcheap, E.C. Sole Manufacturer.

TO IMPORTERS.

The undersigned beg to remind Importers of Wearing Apparel, and Boots and Shoes, of the many advantages which their long experience as Manufacturers and Shippers, their vast resources, and their intimate knowledge of the requirements of Foreign and Colonial Markets enable them to offer.

Assorted Sample Cases forwarded on receipt of remittance or order on London Agent.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessel stores, &c., when requiring to discharge them.

Amoy, March, 1865.

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.

(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents. ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents. and 10 cents.

The "China Mail" has been permanently enlarged in size namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.

(The Morning of the Mail's despatch.)

Soda, Potash, Seltzer, Carrara, Lithia, Magnesia, and Tonic Waters, &c.

Lemonade, Ginger Beer, Orangeade, Gingerade, Nectar, and Champagne Cider.

It was on the success of the SODA WATER MACHINE supplied to the 7th Dragoon Guards that Sir Hugh Rose based his recommendation that these Machines should be established in every Regiment. This Machine was made by SAMSON BARNETT, expressly for that Regiment.

Full Directions for preparing ALL the above Drinks are sent with each Machine.

SAMSON BARNETT, 23, Forston-street, Hoxton, London,

Above Twenty Years Foreman to Messrs. TYLOR,

FROM 30 years' manual practice in the above branch, and having constructed most of the Machines now at work in various parts of the world, is enabled to offer the most complete and durable machinery and by confining his manufactory to only two branches, namely, SODA WATER MACHINES and DIVING APPARATUS, and his whole attention being given to these branches, it must be obvious that every part has been the subject of his most careful study, so that any derangement of parts can hardly occur. All the Machines made by S. BARNETT are constructed under his own superintendence, and proved to four times the pressure they are ever required to be worked at. S. B., being so well aware of all the requirements of persons using Machinery where MECHANICAL ASSISTANCE CANNOT BE OBTAINED, has paid full attention to this point, as the great number of testimonials in his possession will prove. He has also lately introduced larger condensers, and more powerful frames than those previously in use, while his prices have not been increased.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

Now ready, 8vo, price 12s.

RUTTER'S METRIC SYSTEM OF WEIGHTS and MEASURES compared with the British Standard Weights and Measures in a complete Set of Comparative Tables; also, Tables of Equivalent Prices under the Two Systems, and of Chinese and Indian Weights compared with Metric Weights, &c.

DINNEFORD'S FLUID MAGNESIA

THE Medical Profession for Thirty Years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Headache, Heartburn, Gout and Indigestion, and as a mild aperient it is especially adapted for ladies and children. Prepared by

DINNEFORD & CO.,
CHEMISTS, &c.,
172, NEW BOND-STREET, LONDON

And sold throughout the world by all respectable Chemists

CAUTION.—See that "Dinneford & Co." is on each bottle and red label over the cork.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S PILLS.—These Pills are better for strengthening a debilitated constitution than any other medicine in the world. Persons of a nervous habit of body, and all who are suffering from weak digestive organs, or whose health has become deranged by bilious affections, disordered stomach, or liver complaints, should lose no time in giving these admirable Pills a fair trial. Coughs, colds, asthma, or shortness o breath, are also within the range of the sanative power of this remarkable medicine. The cures effected by thes Pills are not superficial nor temporary, but permanent and complete. They are as mild as they are efficacious, and may be given with confidence to delicate females and young children.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, ated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE. —See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

Per P. and O. steamer, from Southampton, Sept. 27.—For Hong Kong, V.B.: Mr. Peter Orme. To Singapore (V.B.): Mr. T. Steel. To Yokohama (V.B.): Mr. James Bisset.

From Marseilles, Oct. 4, V.B.—To Shanghai: Mr. T. A. Cowderoy.

Per P. and O steamer, from Southampton, Oct. 4.—To Shanghai: Miss J. T. Blackwell. To Hong Kong: Mr. A. Zinnern, Mr. A. J. Macleod. To Shanghai: Reverend D. Perkis.

From Marseilles, Oct. 12.—To Singapore: Mr. and Mrs. Cumming.

Per P. and O. steamer, from Southampton, Oct. 12.—To Ceylon: Sir John Cheape, Mr. Cheape, Capt. Allfrey, Mr. G. Paterson.

From Marseilles, Oct. 20.—To Ceylon: Mr. T. Shelford.

Per P. and O. steamer, from Southampton, Oct. 20.—To Hong Kong: Mr. R. M. Stephenson, Mrs. Carnegie, Miss Kate Smith.

From Marseilles, Oct. 28.—To Shanghai: Mr. W. Watson, Mr. Lobscheid. To Singapore: Mr. Braddell. To Ceylon: Mr. G. Yule. To Hong Kong: Mr. Robertson.

Per P. and O. steamer, from Southampton, Nov. 4.—To Yokohama: Mr. E. Trotter. To Hong Kong: Mr. E. Bigg, Mrs. F. B. Johnson and two children, Mrs. D. O. Clarke and child. To Ceylon: Mr. Justice Thompson.

From Marseilles, Nov. 12.—To Hong Kong: Mr. P. J. Forbes, Mr. E. Cunningham, Mr. D. King, Junr. To Shanghai: Colonel Raikes.

Per P. and O. steamer from Southampton, Nov. 20.—To Ceylon: Mr. Winter. To Singapore: Mr. Meldrum.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our dates by this opportunity reach to the 12th July The outward mails of 10th May arrived on the 2nd July, and of 17th on the 9th. The following summary of news is from the *Japan Herald*:—

The interval since the departure of the P. and O. steamer *Nepaul* with the European mail, on the 28th June, has been rendered of interest principally by the new tariff coming into active operation. It was only signed on Monday, 25th June, published on the 27th, and was in force on the 1st July. Already, however, many of the provisions of the Convention, and the valuations on which duty is to be paid on some important staples are loudly complained of, and the Chamber of Commerce complains of Ministers disregarding their opinions, and receiving them without even the courtesy of acknowledging them. Our own opinion is stereotyped and well known. The open ports — entrepots into which all goods might come freely, and duty on their exit, either for the interior or for export, be paid by the foreign merchants, we still maintain would have been by far the best settlement, seeing that it was clearly declared from the first that the Japanese would not even entertain the suggestion of drawbacks. It is said now by many of the merchants that this is a mistake—that if the Ministers had made "drawbacks" a *sine qua non* they would have yielded. It may be so, but the foreign representatives evidently do not see it in the same light. We hear that a strong protest is to be made. Our own idea is, that the Chamber of Commerce having been most earnest in discussing the subject at several meetings (committee and general) came to conclusions without definitely making them known to the Ministers, and consequently did not afford them the assistance that might have been expected, and only finally wrote to them their objections to any system that did not include drawbacks, just as the Conventions were on the point of actual signature. The misunderstanding is regrettable, as we fear that the law is now for some years like the laws of the Medes and Persians. Our readers must, however, remember distinctly that we particularly and repeatedly laid stress on the fact that the Japanese absolutely refused to treat of drawbacks. Their eyes seem to have been blinded, for they would not see; and the consequence is they have got all that has been secured by the Convention of 25th June, 1866, and no more. In point of fact, no arrangement that could be come to was free from difficulty in the working. The easiest is undoubtedly that which we have got; but it has the disadvantage either of rendering the large merchants' warehouses useless, or worse—a burden, or leaving duty to be paid on all goods as heretofore, except those that there may be a strong probability will be required for re-export; and, if the Japanese resolutely reject drawbacks, there is no system but that proposed in the *Japan Herald*—of course pro-

Digitized by Google

perly considered and carefully modified so as to perfect its adaptability—that can realise all that the merchants desire.

We are glad to hear that the Japanese have found two most intelligible gentlemen, one an Englishman and the other an American, to assist them in carrying out the bonded warehouse regulation—Mr. B. Seare and Mr. Hogg. In this selection they have, we are given to understand, been guided by their own judgment, and not by ministerial nomination. There is a talk of a third gentleman of another nationality being engaged, but, as yet, this is not settled.

His Excellency Sir Harry Parkes left for Nagasaki in H.M.S. *Argus* immediately after the arrival of the mail on the 2nd; Lady Parkes accompanied him. It is probable that their absence will not be prolonged beyond a month. Sir Harry Parkes's visit to Nagasaki has nothing to do with the Choshiu question. He has been anxious to get there since April, but the discussion on the Tariff and other important business prevented him.

There is to be called a meeting of the Daimios at Kioto, that the Government may lay before them the agreement entered into with the foreign representatives respecting the opening of Hiogo; and those who object will be called upon to give their views in writing, that it may be clearly displayed to the Mikado on the one side, and to the foreigners on the other side, who their friends really are. This meeting need not delay the return of the Tycoon to Yedo, as members of his Gorogio can act as well as himself.

We hear that the Belgian treaty will be concluded in a few days. An Italian frigate, the *Magenta*, has arrived, the captain of which is accredited with powers from King Victor Emmanuel to enter into treaty with Japan.

At Sinagawa, the rowdy suburb of Yedo—there has been a serious rice-riot. Three hundred men, not ronins, commonly so called—armed with staves, axes, and such like weapons, entered the place and broke into no less than 41 rice-stores; the police and soldiery captured about 50 of the rioters, and it is expected that through them all may be discovered. Rice has fallen 2 boos per picul in Yedo within the past day or two, and the people talk very hopefully of the effects of the cessation of the Choshiu rebellion.

Minutes of a Meeting of the Municipal Council held at the Council-room, at 3 p.m., 10th July, 1866.

Present:—The Chairman presiding, Hon. Secretary, Messrs. Lejeune, Bruyn, Marshall, Marks, Stearns, Carriere, Boyle, Morrison, McDonald, Winstanley, Hughes, Malcolm, Hegt, and Brower.

Before reading the minutes of the last meeting Mr. Carriere rose to say that, a question put by the chairman at the commencement of last meeting had escaped him at the time and he wished now to refer to it, and he accordingly would first inquire what was meant by a land-renter.

The Chairman replied that a land-renter was one who owned land in the foreign settlement and who paid rent to the Japanese Government for the same.

Mr. Carriere then proceeded to say that among French residents there was no distinction; that he had been elected by a large majority of them, and his election had been approved by the French Minister and French Consul, and under these circumstances, although not a land-renter in the sense of the chairman's definition, he considered himself elected and should continue to act as such.

A correspondent, under date July 8, says:—"Business is very dull, ichibous are at 300, and all imports are unsaleable except at heavy losses. We wait most anxiously for further news from London.

"You will have heard all about the new Convention and the revise of the Tariff as well as the introduction of bonded warehouses. The Tariff has not given general satisfaction to the community here. The duties on silks and some other staples being affixed far too high and contrary to the recommendation of the Chamber of Commerce, the members whereof consider they have been sat upon. The bonded warehouses is doubtless a good system, but how it will work in detail is uncertain. The charges are far too high I think.

"Our restless and energetic Minister is off on a cruise to Nagasaki (and elsewhere) in the *Argus*, and will probably be away six weeks or so.

"The French are still pursuing a mysterious game with the Japanese, and have now in hand some docks for them down the Bay. The Japanese Government are awfully hard up for money, and I am very much afraid that a large portion of the season's silks will find its way to France without passing through the market. We are all on the *qui vive* about it, however, and don't mean to stand it quietly.

"The Tycoon has not yet attacked Choshiu, and I don't think he quite likes the attitude of certain Princes in the South. Choshiu, as far as I can learn from his officers, is firm, and intends to stick out against the Tycoon's demands."

COMMERCIAL.

IMPORTS.—The principal feature in our import market since our last report appears to be the continued desire of some holders of cotton goods to move off their stocks, and sales have been made showing a reduction upon last quotations. The last intelligence from Europe and China brought here by the French mail, with telegrams to the 5th June, would have strengthened our market very much, were it not that the disturbed state of the money market reported from all quarters had counterbalanced its effect. Many parcels, however, of Grey Shirtings and Cotton Yarn appear to have been withdrawn for the present, and a considerable quantity of Grey Shirtings is reported under shipment to China by next mail, which will to some extent relieve our market. Camlets remain very dull; a sale, however, is reported at a very low price. Very little has been done in other manufactured goods. In Metals we hear of the sale of a parcel of lead on the spot, and pig iron to arrive. The value of native coin has not improved; money remains very scarce amongst native dealers, and deliveries of goods have only been small. Several auction sales of damaged Shirtings have taken place during the fortnight. Arrivals since last report are:—Tiptree, Chaa-sze, and James Longton, from London; Vanda, from Liverpool; and Inez, from Bordeaux.

EXPORTS.—SILK.—The new season begins unusually late this year. The weather has been unpropitious, and the crop is reported to be very inferior in quality to that of last year. Of its quality we cannot express our opinion. Only 30 bales of New Silk have appeared on the market during the last few days. They were Mybash of the medium sort, most of them much mixed in quality, size and colour, and having the defects of silk reeled in rainy weather. The price paid for them was from $710 to $720. The news brought by the mail of the 19th May has done little to relieve us of our uncertainty about the prospects of the home markets, and settlements during the past fortnight amount to only 100 piculs, leaving an unsold stock of silk properly speaking of 150 piculs, most of it Old Silk of common and inferior qualities. The stock of the several sorts of Waste is about 300 piculs. The export of Silkworm's eggs this year will be much inferior in quantity to that of last year, and we have good reasons to expect that the quality will be much more reliable. No large arrivals are likely to take place before the beginning of August, and the Japanese merchants, who with a very few exceptions have steadily declined to make contracts for this article, expect unusually high prices.

TEA.—With July we commence a new season. In reviewing the past year, we notice that in June, which was the commencement of last season, prices opened at about $20.50 to $26 for good medium to fine teas, without any great extent of business being done; however, in July a demand sprung up for America consequent upon the closing of the war, and purchases were made at an improved rate. The demand continued, and prices advanced steadily, until in January as high as $48 per picul was paid for fine tea. At this period, however, advices were received of a considerable decline both in London and America, and prices declined here $5 within a fortnight, remaining steady at about $31 to 42 per picul until the end of May. The total amount exported this last season compared with the previous one is very greatly in excess, as will be seen from the tables, and the price of tea in native currency, of the first purchases of the new crop, would compare thus:—For fine teas last year, 60 ichibous per picul; this year, 100 ichibous—the relative price in dollars being 26 and 24. Such an advance as this must stimulate production, and a large increase in export must result ultimately, although as yet we have hardly had the full effect of foreign trade, as the tea plants, planted about six years ago, have only this year reached their prime. Since our last report the uncertainty of finances at home has induced buyers to hold off, and the native merchants being short of money and holding a large stock, gave way, and prices declined irregularly about $3 to 4 per picul; since French mail arrived there has been a disposition to purchase. The crisis at home has been unprecedentedly severe, but by last advices more confidence displayed. Settlements have been made more freely, and present prices do not show much alteration. The settlements amount to 980 piculs. Here there is a stock of about 1,300 piculs of old tea, but no demand now for export.

THE REFRACTORY DAIMIOS AND THE TYCOON.

(FROM A CORRESPONDENT.)

The first conditions upon which the Tycoon offered to remove the stigma of "Choteki" (enemy of the Mikado) from Chosiu, and to restore to him the title of "Daibu" were—first, that a yearly fine of 100,000 kokus should be levied upon his territories until such time as the Mikado thought proper to remit it; and secondly, that the two Daimios, father and son, should retire into perpetual seclusion, and be succeeded by a nominee of the Tycoon. These terms Chosiu refused to accede to; and after much deliberation and consultation, the terms of the ultimatum were in so far commuted that the father only was required to retire into seclusion for a time, the remainder of the sentence to stand as before. Ongasawara Ikinokami, a member of the Gorojio, was sent to Göshin with directions to send for Mori Daiza (the Prince of Chosiu), and to deliver this ultimatum to him in person. His emissary, however, refused these terms in his master's name, and stated that on no account would Chosiu meet the Tycoon's envoy. The next event will probably be the

Digitized by Google

commission of hara-kiri on the part of Chosiu's emissary (one of his karous or chief councillors), which is customary when a high officer fails in the execution of his mission, and this will be a signal for the commencement of hostilities.

Regarding probabilities, my ideas are as follows :—

Firstly, should the Tycoon by any possibility get the better of Chosiu, he will thence immediately proceed against Satsuma. Secondly, that Satsuma being aware of this probability, and having ulterior political views in end, will not allow the Tycoon to get the better of Chosiu, and with these views in predominance, and a temporary and interested accruing friendship for Chosiu, he will secretly aid and abet him in resisting the Tycoon. His aim no doubt is to draw Aidz, the Mikado's bodyguard, away from the capital, and take possession of the sacred person, from which eminence he will be able to dictate his own terms; and my own opinion is that a success in this object will alter in a very desirable way our position in Japan ; so much or probabilities, based however on good ground. On the other hand, the Tycoon is aware of Satsuma's intention, and rather afraid of catching a Tartar ; but he has put himself between the horns of a serious dilemma, for in the first place he cannot without shame recede from an ultimatum ; and in the second place the sustenance of a defeat would oblige him to abdicate. Report says that he has referred the matter to the arbitration of two of the chief priests at Miako, but there is no proof of this. With regard to other Daimios, I think that most of them will maintain a strict neutrality in the event of a war ; some of them will doubtless take their cue from Satsuma, and some assist the Tycoon. It is evident, however, that troops fighting for the Tycoon will not do so with that energy and desperation which will probably mark the endeavour of a Daimio whose ancestry dates long before that of Tokugowa, and who held his present territory before the accession of Jy'eyas, to hold his own against a Daimio whose assumed power he, in common with others, ignores, and upon whom he looks as a usurper and a pretender.

CHINA.

SHANGHAI.

Dates are up to the 18th July. The P. and O. mail of May 26 arrived out on the 9th July. The private steamer *Dumbarton* arrived on the 5th July with the news of the stoppage of the Agra Bank. This steamer is said to have been despatched from Hong Kong by Messrs. Gibb, Livingston and Co. on account of the Hong Kong and Shanghai Banking Company and others, with a view of covering their claims on the Agra, which they succeeded in doing to the extent of about £100,000 by selling bills to the Agra Bank for which they obtained payment. These Bills when due would be used as a set off to the Agra Bills which they held.

The particulars of the murder of the two French bishops and seven priests in the Korea, have not been received by the present mail.

The 4th of July (says the *Friend of China*) passed off much quieter than we had been led to anticipate. The American frigate *Hartford* fired a salute at noon, and we heard some guns at daybreak ; but there was none of that pop, pop, pop-ing at all hours of the day which, from large craft and small, was wont to strike somewhat disagreeably on the tympanum in former years. The men-of-war of both France and England were profusely decorated with flags, but they did not join in an expenditure of powder; and why the commanders of said vessels did not they best know. For ourselves, we should have been glad to hear the welkin ring again ; not so much for any feeling of regard for the 4th of July in particular, but because the epoch marks the inauguration of days of peace again on the great American continent, and resultant happiness to many millions of the human race. In the evening there was a dinner in the long room over Messrs. H. Fogg and Co.'s auction mart ; and it should have been a good dinner, for we are told that names were down to the extent of tls. 1,500—and this entirely in contributions among American civilians. Mr. Seward, U.S. Consul-General, took, or was to take, the chair, with Admiral Bell on his right ; and, writing in a casual way, a gentleman present says :—"Our dinner went off first-rate. Many, including myself, regretted the absence of members of the press to report the very excellent speeches that were made."

The 10th July was appointed for the first meeting of creditors and choice of creditors' assignees in the estate of Dow and Co. Very few creditors were in attendance owing to their claims not being prepared for submission to the Court. Mr. Cuthbertson, for the Central Bank of Western India, put in a claim for taels 110,507.19, which was admitted. Mr. Macall, for the Chartered Bank of Australia and China, proved for £5,183. Mr. Gray, for Hooper and Co., put in a claim for taels 181.23. It appeared that part of this claim was due by one of the partners previous to the partnership. The Court ordered it to be referred to the creditors' assignees when chosen. No creditors' assignees were chosen .The meeting was therefore adjourned to Friday t July.

In re Samuel Clifton.—This was the day appointed for the admission of proof of debts, and for the assignees to produce a statement of the bankrupt's estate so far as ascertained, for declaring a dividend, and other purposes mentioned in the 174th section of "The Bankruptcy Act, 1861." The bankrupt tendered claims on behalf of Joseph Bruce and Mrs. Brand, for the respective sums of £107 2s. 10d. and £146 15s. 6d., proof of which was adjourned. J. W. Wright, by his attorney, proved for tls. 180. In the statement submitted to the Court by the official assignee, it appeared that the available assets amounted to tls. 9,285.83 ; amount due to creditors who have already proved, tls. 8,735.08 ; contingencies to tls. 1,503.30. There was also one creditor who claimed tls. 6,600 ; but it was not yet decided whether this claim was to be paid in full, or whether the claimant would rank with the other creditors.

MEETING OF COMMERCIAL BANK CREDITORS.

Mr. Myburgh, counsel to the corporation, said Mr. Maclellan, the manager at Shanghai, had called a meeting of the creditors for the purpose of laying before them a statement of the assets and liabilities of the Shanghai branch, and informing them what the directors at home had done since suspension of payment by the corporation, and what it was in contemplation to do in order to wind up the bank's affairs in London and the East. A copy of a letter dated 26th May last, addressed to the chief manager by the bank's solicitors, had been received by the last mail, stating that an extraordinary meeting of shareholders had resolved that the bank should be wound up under the Companies Act of 1862. (He read the letter). The object of a winding up by the Court of Chancery was to stay proceedings of hostile creditors, to procure a quasi judicial realisation of the assets, and to divide the proceeds amongst all the creditors *pari passu*. He believed that two official liquidators would be appointed, one of whom would at once start for the East for the purpose of realising the assets, and protecting the interests of the creditors at large. It must be satisfactory to those present to know that the directors did not anticipate that a call upon the shareholders, who were liable for £25 per share, would be made, but that they would on the contrary receive something substantial out of the assets. The state of the Shanghai branch was most satisfactory. The statement which would be laid before the meeting showed that the assets were far in excess of the liabilities. In fact, the bullion, cash, bills receivable, and bills discounted, not to mention the loans, were alone amply sufficient to cover all local liabilities. On behalf of the corporation he would ask for the forbearance of the creditors. Nothing could be gained by any attempt to recover judgment against the bank, as he would feel it his duty at once to file a petition in the Supreme Court for the winding up of its affairs under the Act of 1862. When once the petition was filed, the Court would, on application, stay all proceedings against the bank. From what he had learnt of the state of the bank's affairs in London and at the different branches, he felt convinced that the official liquidator would, immediately on his arrival, proceed to satisfy the claims of creditors.

Mr. Hayes wished to know whether holders of drafts which had not reached home, were creditors on this branch or on London ; whether those drafts had been included in the liabilities of this branch or not.

Mr. Myburgh replied that only £103,000 of drafts were on their way home, while remittances had been made from hence to the amount of £354,000, which would reach home after the suspension. All the banks and head offices were, he believed able to meet the claims on them.

Mr. Hayes : Would each branch then meet its own liabilities ?

Mr. Johnson remarked that, unless every branch was able to meet its liabilities, it was hardly likely the debts would be

Digitized by Google

paid off at any one place until it had been ascertained how the general assets stood.

Mr. Myburgh inferred from the letter of the solicitor to the bank that the shareholders would not be likely to be called on for any additional payment, and consequently that the assets would suffice to cover all liabilities and enable the official liquidator to pay off the debts of this branch and remit home any surplus. He might inform the shareholders that no payments had been made since the suspension, except in one or two cases, in order to get possession of securities which had been handed in.

Mr. Dixwell supposed that no creditor of any one branch could be paid off until it had been ascertained whether the general assets would suffice to meet the general debts.

Mr. Myburgh having suggested that a chairman should be appointed with a view to the passing of any resolution that might be deemed necessary, Mr. Jackson called on Mr. F. B. Johnson, to take the chair; and the latter having declined, he called on Mr. Dixwell, who also declined, seeing no use in the passing of any resolution.

After a silence of some minutes, no one apparently being inclined to initiate any further proceedings, Mr. Myburgh suggested that unless the gentlemen present wished to pass some resolution there was no occasion for their further attendance; and the meeting broke up accordingly.

HONG KONG.

Dates by this mail are down to the 24th July. The English mail of 11th June arrived out on the 21st July. Our files of papers have unfortunately miscarried, and our correspondent has also missed this mail.

SIAM.

BANGKOK.

The following items we take from the *Bangkok Recorder*. In the issue of the 28th June the Editor calls upon the community to contribute such items of local news as will assist him in the publication of the paper, and in the following issue we see the appeal was responded to—we wish it would succeed in London; we trust however that the *Bangkok Recorder* will not be allowed to drop.

"The King of Siam, on reading from some European paper that the Pope had lately suffered the loss of some precious jewels, in consequence of a thief having got possession of his Holiness' keys, exclaimed, 'What a man! professing to keep the keys of Heaven and cannot even keep his own keys!'

"His Excellency Chow Phya Kalahome, the Prime Minister, left in the *Volant* early on the morning of the 27th June, for a trip to Panatsananikonei the province at the mouth of Banpakong River. He was accompanied by a large part of his family and English secretary. It is understood that his Excellency will visit Anghin before his return with the view to forward the new sanitarium he is erecting there.

"Our readers will be delighted to learn that the sanitarium at Anghin built by his Excellency the Prime Minister is completed and furnished. Intending visitors will have to provide themselves with plates, dishes, knives, forks, and cooking utensils. The house is roomy, cool and pleasantly situated. A more suitable residence and position for invalids could not be found on that coast. In short to be appreciated it only requires a visit."

It gives us pleasure to notice in this issue that the 90th anniversary of American Independence was celebrated by a portion of American residents in this city on Wednesday, the 4th July at the residence of J. M. Hood, Esq., U. S. Consul. As but a quiet and not really a public celebration of the day was contemplated, and as the repast to which the guests were invited was to be only a *tiffin* and not a dinner, the attendance was not as large as it otherwise would have been. Some of our American community had previously arranged to celebrate the day, as we learned by a steamboat excursion to the old city, and some still in other modes according to their more personal and independent pleasure.

STRAITS OF MALACCA.

PENANG.

There has never been such an abundant crop of coffee seen in Penang as the present one. Wherever the plants have been well manured and cared for, the crop is abundant, and could crops like the present be relied upon, coffee might yet form by no means a small part of Penang exports.

A paragraph lately appeared in a Calcutta paper, from which it has been inferred that some serious political difference had arisen between this Government and the Raja of Kedah. This is a mistake. When the disturbances, created by Syed Hussain, and his society in the Muda district of Province Wellesley, came to a height in his bringing some armed followers from Kota to Telo Ayer Tawar and assaulting the Pangulu Besar there Colonel Man called on the Raja to punish his followers and surrender Syed Hussain for trial here. Owing to a misconception of Colonel Man's wishes the Raja did not at first send Syed Hussain to Penang, and some delay took place in replying to Colonel Man's letter. The reply, chiefly owing to the misconception in question, was not considered satisfactory, and the Governor addressed the Government of Siam on the subject, and in the meantime suspended the payment of the Raja's allowance. As soon as the misconception was removed the Raja lost no time in sending Syed Hussain to Penang in custody of his first minister, Wan Ismail. But he had been preceded a day or two by Wan Abdullah, a Commissioner sent by the King of Siam *via* Singapore, with full power to inquire into the proceeding of Syed Hussain. Syed Hussain was taken back to Kedah, where he was tried by the Commissioner, found guilty, and sentenced to be banished to Bangkok, where he now is. The arrears of the Raja's allowance have of course been paid up.

The following is a statement of nutmegs, mace, sugar, arrowroot, tapioca, and rum exported from Penang during the last six months, viz., from 1st January to 30th June, 1866:—

	Pls.	Cat.
Nutmegs	1,488	59
Mace	218	92
Sugar	79,455	73
Arrowroot	1,744	32
Tapioca	5,439	51
Rum	49,076	Gallons.

Another case of piracy has been reported. A cargo boat returning to Bukit Martajam with sundry provisions, &c., was said to have been attacked off Qualla Pry by a number of Chinese and Malays, and it is reported that five persons were killed and four missing.

Tenders are invited for the construction of a new barrack for the marine police, the Sergeant Major's quarters, Expense Magazine, also putting the batteries en barbette on the N. E. and N. W. bastions, Fort Cornwallis.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DENT—On the 24th Aug., at Ribston Hall, Yorkshire, the wife of John Dent Dent, Esq., M.P., of a daughter.

MESURIER—On the 25th Aug., at the Royal Arsenal, Woolwich, the wife of Capt. Cecil, B. Le Mesurier, Royal Artillery, of a son.

PRITCHETT—On the 27th Aug., at Clyde Lodge, Forest-hill, the wife of Francis Pritchett Esq., of a daughter, who survived her birth only a few hours.

RUTTER—On the 25th Aug., at Glebelands, Mitcham, Mrs. J. C. Rutter, of a son.

MARRIAGES.

CHAYTOR—VAN STRAUBENZEE.—On the 25th Aug., at Spennithorne, by the Lord Bishop of Ripon, assisted by the Rev. Albert van Straubenzee, William Chaytor, Esq., eldest son of Sir William Chaytor, Bart., of Clerveaux Castle, county of Durham, to Mary, youngest daughter of Lieut.-Colonel and the Hon. Mrs. Van Straubenzee, of Spennithorne, Yorkshire, and niece of Lord Wrottesley.

HART—BREDON.—On the 22nd Aug., at St. Thomas's Church, Dublin, by the Rev. Augustine Fitzgerald, M.A., incumbent of Portadown, Robert Hart, Esq., Inspector-General of Imperial Maritime Customs, China, eldest son of Henry Hart, Esq., Ravarneth House, county Down, to Hester Jane, eldest daughter of the late Alexander Bredon, M.D., Millicent-terrace, Portadown, county Armagh. No cards.

SMITH—MAB.—On the 5th July, at the U.S. Consulate, Bangkok, Capt. John Smith, a citizen of the United States, to Miss Mab, of Bangkok.

DEATHS.

DOMER—On the 3rd July, at Bangkok, Mr. William Henry Domer, proprietor of the Bangkok Hotel. The deceased was about 28 years of age and a native of Oxford.

KOBKE—On the 27th June, of typhoid fever, the wife of Captain F. I. I. Kobke, aged 27 years. Deceased was a native of Denmark, and had been married only a few months.

LAMONT—On the 25th Aug., at Douglas Hotel, Aberdeen, John Lamont, Esq., late of Hong Kong, China, aged 62.

PICKWOAD—On the 31st Aug., at Southampton, six days after his arrival from China, Edwin Pickwoad, Esq., Proprietor of the North China Herald, of Shanghai.

STERLING—On the 30th Aug., at Lower Brunswick-place, Brighton, Matilda, wife of Paul Ivy Sterling, Esq., late Attorney-General of Hong Kong and Judge of the Supreme Court of Ceylon.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: June 16, Tiptree; July 1, Chaa-sze; 5, James Longton. From Liverpool: 6, Vanda. From Bordeaux: June 21, Inez.

At SHANGHAI.—From London: July 9, Dunkeld; 12, Dartmouth. From Liverpool; 7, Charlgrove; 11, John Paul. From Cardiff: 7, John Bull; 8, Edith Banfield; 12, Pauline; 16, Arabia. From Newcastle; 10, Summer Cloud; 11, Faders Mindes. From Newport: 10, China; 16, Burmah. From Sunderland: 16, Acacia. From Amsterdam: 8, H. M. Elizabeth. From New York: 13, Antelope.

At SINGAPORE.—From London: July 26, St. Andrew's Castle. From Cardiff: 30, Admiral de Winter, Cornelia Hendrika. From Hamburg: 29, Luneberg; 30, Dorothea.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London: July 13, Highflyer; 8, J. R. Worcester, Pak Wan; 16, Cinderella, Coulnakyle (via Hong Kong).

From SINGAPORE.—For London: July 26, Dovercourt; 28, Benvoirlich. For Liverpool: River Eden. (Reported per Telegraph). For London: Bastiaan Pot.

VESSELS PASSED STRAITS OF SUNDA.

City of Quebec, Banian, Beautiful Star, Invincible, Eleanor.

COMMERCIAL POSTSCRIPT.

The new season tea clippers are not yet reported, nor the *Far East* hourly expected.

DEPARTURES.—September 2, from Sunderland for Batavia, General Michiels.

LAID ON.—At London, for Colombo, Akbar; at Liverpool, for Batavia and Sourabaya, Amazon.

SPOKEN.—Couranto (barque), Singapore to Liverpool, Aug. 1, 2 N., 23 W.

CASUALTY.—The Yaratilda, of Workington, Donough, from London to Hong Kong, was abandoned, June 27, in lat. 34 S., lon. 42 E., leaky, with mainhatch stove, loss of boats, &c., and only lower masts standing; crew taken off and landed at Madras by the Berar, Hall.

The Admiralty have invited tenders for the conveyance of a few tons measurement stores, consisting of 5,500 lbs. malt and 700 lbs. hops from the River Thames to Hong Kong; 14 days' notice of shipment will be required.

NEW ROMAN CATHOLIC CONVENTION.

The Hong Kong *Mercury* publishes the following translation of a proclamation which has been extensively posted up in the interior. It relates to a convention recently concluded with the Chinese Government by the French Minister:—

Regulations for the Roman Catholics in China.

1. The great objects of the Romish (Lord of Heaven's) religion are intelligent worship and self culture. It gives its chief attention to fidelity, mercy, and filial piety, makes repentance and reformation the condition of admission and preparation for the great business of life and death its end. They that adopt this religion make it their aim afterwards kindly to harmonise and mutually to agree with other men's feelings and with vulgar customs. Therefore all exhortations to do good and eschew evil for the rectifying of men's hearts, all building of temples for the worship of Buddha and for *sacrificing to spiritual intelligences*, all establishing of hospitals and gratuitous distribution of medicines for the saving of men's lives, are the exercise of their correct principles of active duty. For nothing is included in the obedient service of the Lord of Heaven which is beyond the universal and constant laws of humanity. In short it is evident that this religion attaches the highest importance to orthodoxy, and has no heretical doctrines or practice—no charms, incantations or unlawful practices,—and if there are any who in the name of Romanism practise any unlawful acts, let them be sought out and punished.

2. The propagators of this religion in every place are chosen men of probity and pure morals. No low people may be employed. The local magistrates must therefore treat them as gentlemen and extend their protection to them. If there are any instances of lawless and disorderly conduct, they should be accurately investigated and communicated to the resident bishop of the province, that he may deal with them according to law, and prohibit (the defaulters) from further employment.

3. Every matter of importance connected with this religion ought to be communicated in clear terms through the resident bishop of each province to the general committee (? consistory), and through the committee to the provincial officers, to be examined and disposed of, and the decision thereon should in like manner be published through the general committee, without delay, and in accordance with the treaty.

4. The propagators of this religion, when anything occurs relative to their work, ought, after ascertaining the facts of the case, to apply to the local magistrate to settle it. If any case of difficulty should arise, they may appeal to the Provincial City through the resident bishop, who shall investigate clearly all the circumstances of the appeal, and if there has been any partiality in the administration of justice it shall rest with the bishop to put the case at once into the hands of the committee for investigation and judgment by the civil officers. There must be no departure from established rules and regulations, or it will be found disadvantageous to those concerned.

5. The propagators of this rellgion are not to interfere in the least with any local affairs, public or private, that do not concern their work, and are not to encourage their disciples to make unreasonable demands or trump up stories to the prejudice or inconvenience of the civil authorities. Whenever disciples are found guilty of lawless acts, they are to be immediately expelled and the local magistrates left to deal with them according to law. They who fail to expose known crimes shall bear part of the blame.

Digitized by Google

6. The propagators of this religion shall have their names, numbers, and dates of employment registered for the committee to transmit to the local magistrates, to prevent imposition; and all removals and changes shall be duly notified.

7. A local registration of all the followers of this religion in each place may, on account of frequent changes of residence and moving to and fro, be attended with difficulty, but in any case where the local authorities may have occasion to investigate, they may refer to the provincial committee for all needful information to be obtained from the resident bishop.

8. The propagators of this religion must inquire into the antecedents of all new converts and see that they have been men of good behaviour, neither law-breakers nor rebels, before they admit them. If any are found of suspicious character, or who have been rebels, evil-doers, or runaways, they are to be expelled at once, and no shelter is to be given them.

9. If the followers of this religion, in violation of its rules, make use of their name to cause disturbance or to deceive; or if they borrow the help of the society for self-aggrandisement, when found out or convicted before the local magistrate, they are to be expelled from the society of the well behaved.

10. All complaints of disciples, except such as are connected with the religion, which are to be transmitted through the bishop of the province and the committee, must be presented in the ordinary way to the civil authorities by the complainants themselves. Those who disobey shall be dealt with according to their perversity.

Note.—The above regulations are intended for general use. But in provinces where there are no resident bishops, and where no committee has been established, any important business relative to the religion must be be communicated by the head of religion in each place to the local authorities, and through them again to their superiors for adjudication.

COMMERCIAL SCANDAL MONGERS.

(NORTH CHINA HERALD.)

In times of commercial depression and disaster a wide and favourable field is afforded for the display, or rather indulgence, of the characteristic peculiarities of a certain class of persons met with unfortunately in tolerable abundance in almost every community. These are they who, in ordinary times of prosperity when evil tidings are scarce, would pass with the usual nod of recognition, but who on other occasions seize you by the button-hole, and ask you confidentially, in an ominous whisper with elevated eyebrows, whether you have heard the news—what a loss so-and-so has had—or that such another is spoken of, or indeed any thing or circumstance of an unpleasant or even painful nature concerning anybody except their own particular belongings. They always make these mysterious communications under the vow of secrecy, but as they invariably tell every one they meet the same tale under similar conditions, it is difficult to understand what effect such a course of conduct can have, beyond being calculated to screen the name of the propagator if not the author of the scandal from discovery, and so to circulate the rumour anonymously. If it could be supposed that such confidences were made from charitable or other worthy motives, with a view to excite the sympathies or commiseration of the parties addressed, the indiscretion of the act might be overlooked in the worthiness of the intention, and there might be some excuse for the mischievous babbling. But the complacent, nay, even pleased look, too plainly belies the expressions of regret with which they think it proper to accompany their gossip. These individuals as a class, we would fain believe, do not mean badly. They simply indulge a feeling of morbid gratification in repeating unpleasant or gloomy intelligence, without reflecting on the serious consequences that may result from their indiscretion. A tale oft told gathers force as it goes, and though utterly devoid of foundation, is at least accepted as gospel because "everybody says so." It is even said that a man may repeat an anecdote having no other foundation than his own sparkling imagination, until he begins to believe it himself. There is some truth in this, and the rule applies equally to a story repeated from mouth to mouth. These social "bears," then, merely give way to a weakness of an unamiable and too frequently mischievous kind. The practice of their besetting sin gathers strength from use, and grows upon them so as to obscure their feelings of charity, and even obliterate their sense of justice—even too frequently their sense of truth. The moral effect of this vicious habit on them is only equalled by its injurious influence on others. These persons strange to say, only delight in the unfortunate and the unhappy—they refuse to receive or record pleasant impressions, and love only to dwell on faults and deficiencies. If a man has said something clever or has done anything deserving of praise, they are silent—it affords them no pleasure to be the heralds of happiness or success; but let some unfortunate object of their solicitude say a foolish thing or do an unwise one, then, down they are upon their quarry. This is the favourite food over which they gloat. The natural history of this class of persons is not without interest, and their development seems to follow pretty well-defined laws. They usually begin by practising as harmless gossips; then, from habit aided by proclivity of mind and opportunity, they advance to the grade of scandal-mongers; and when to these conditions we add the peculiar circumstances of times such as we at present experience here, they are to be recognised as croakers. Various combinations, however, of these characteristics are met with in the same individual; in fact, pure specimens of any one of the varieties named are rare, so much does the one form glide insensibly into the other. However mischievous the practice of this habit may be, as well on those who indulge in it, as in the injuries it may inflict on the unfortunate victims selected by these gossips for their inuendoes and remarks, the latter are really not so much to blame as might at first be supposed. Apologies are not wanting on their behalf. The habit depends on the morbid development they have permitted by indulgence of a principle pretty generally implanted in the human breast. Like many other anomalous and undesirable qualities, it may apparently co-exist even with the most laudable mental characteristics. The celebrated George Selwyn, for instance, a gentleman of the utmost refinement and kindliest disposition, took the greatest pleasure in witnessing, and often put himself to great expense and inconvenience to be present at, the execution of criminals in whom he otherwise had no individual interest; and that too when such exhibitions retained many revolting and barbarous features. It is also with reference to a primary form of this strange mental principle that Montaigne delivered his sage and sensentious dogma—that there is a certain sense of gratification in the misfortunes even of our dearest friends. Few will venture to question the truth of this observation, and on the same principle it is perhaps easier to mourn with the unhappy than to enjoy with the fortunate. So much then for croakers. So long as telegrams *via* Kiachta and Galle brings us such doleful tidings, they will have ample provender; but let them take our remarks in good part, and hesitate ere they give thoughtless circulation to idle rumours that may not only give rise unnecessarily to painful feelings, but may even inflict material injuries.

It is one of the peculiarities of scandal that it effects its aim simply by being uttered. Appealing as it does to certain of the baser elements in our nature, reason and the higher faculties do not stay to reduce its utterances by the standards of truth and justice. Scandal, like its younger sister rumour, is many tongued; and though in nature less vital, and in effects less permanent, it seems strangely to spread and propagate through humbler channels with a rapidity denied even to truth itself. Society can guard itself from the thief and the housebreaker, but is almost powerless against the poisonous breath of the liar and scandal monger. Shakespeare well said, "He that robs me of my purse steals trash, but he that robs me of my good name steals that which enricheth not him and leaves me poor indeed." This quotation embodies the whole moral aspect of the vice. There is positively no excuse for the utterer of scandal; he is not driven to it by the dire necessities that so often impel the robber to his crime, but inflicts too frequently the gravest injuries on the innocent and deserving, merely to gratify the inclinations of a sarcastic mind. Perhaps the worst feature of this vice and that which renders endeavours to oppose or overcome its effects so often useless and unavailing, is, that no publication of denial or demonstration of the untruth of its averments, however ample, will ever attain so extensive a circulation as the original rumour; or if it does, will ever entirely remove the impression made on the mind of the recipient by an evil tale. We have been induced to return to this subject in consequence of the number of mischievous reports that are, and have been, so extensively circulated during the last few days within the settlement, regarding the solvency of some of our oldest established and most respectable banks and mercantile firms. Being supposed, in our public capacity, to be *au courant* in everything, we are continually appealed to, sometimes by deeply interested parties, with reference to rumours in circulation, the existence of which we frequently only learn in this way. It is incalculable the amount of mischief that may be brought about by such means, not only on the unfortunate persons more immediately concerned, but by the general disturbance of public confidence it creates, with its natural consequence, paralysis of trade. The most strenuous efforts should be made to arrest the progress of this vicious habit amongst us. We should set our face against it at once; and the most effectual — perhaps the only — means of accomplishing this would be to insist either on obtaining the authority for any statement of a shady nature communicated to us, or to declare the intention of announcing it on the authority of our informant; or failing this, to refuse to listen to any information not given with these conditions. The law of supply and demand will soon exert itself in this way with most beneficial results. Since publishing some observations on this subject we have had copies of a correspondence placed in our hands by a leading firm here, received from the house of Samuel Allsopp and Sons of Burton-on-Trent, which illustrates to the letter how a scandalous rumour can originate on the most unfounded basis, how distorted it becomes by transmission, how widely and rapidly it spreads, and how seriously its mischievous effects may act on the credit and good name of the most solvent and prosperous. The scandalous rumour referred to in connection with this firm was so characteristic of a system prevalent at the time in the city, of circulating unfounded reports affecting the character of large houses, that it was made the subject of detailed comment in *The Times* of the 4th May, 1866. In this correspondence the course and development of the scandalous report from its original can be traced so as to afford an interesting and instructive example of the progress of error. In the first place, inability on the part of Messrs. Allsopp and Sons, while taking measures t oextend their plant, although brewing 15,000 barrels per week, to execute large orders unexpectedly received, was unfavourably interpreted by some uncharitable persons to mean that their financial resources were embarrassed, and rumour took up and spread the report in this form. From correspondent to correspondent it went, growing quickly in size and altering in shape, till a file of colonial papers reached London containing the speech of the Hon. Captain Bagot in the Legislative Assembly of South Australia wherein that gentleman, discussing the shortcomings of the Peninsular and Oriental mail line from Galle to the Australian colonies, states "that the great brewing firm of Allsopp and Sons would have been saved from bankruptcy if the mail had not been delayed!" Here is rumour "of ambitious aim" in an imaginative flight of the highest order; the scandal in its most aggravated and damaging form not only uttered as an accepted fact in a legislative assembly, from the mouth of law-giving wisdom, but one of its remote contingencies urged even as an argument against the character of a large public company totally unconnected with it. This is quite a typical case, and illustrates in every detail the mischievous tendencies of the habit of repeating—perhaps even thoughtlessly—any idle unauthenticated rumour which can possibly reflect on the credit and reputation of those whose names are attached to it. The vice is bad enough when indulged in at the expense of the character or fair fame of private individuals in our own circle, but when it attains or aspires to the dimensions of injuring business credit and spreading actual ruin among its victims, it deserves not merely the general reprobation of all right-minded men, but that society, as a means of protecting one of its weakest points, should visit its calumniators with condign punishment of the severest kind in its power to inflict.

The ship *Akbar* has been engaged for the conveyance to Colombo of the troops mentioned in our issue of the 26th July.

COMMERCIAL AND FINANCIAL INTERESTS OF CEYLON.

Concurrently with the great impulse imparted within the last few years to Ceylon production, the consumption of coffee in Great Britain has been marked by a positive decline. Looking only to this one broad fact, it might appear as though the extension of coffee plantations in Ceylon must come to be checked by that greatest of all impediments, unremunerative prices, with every allowance for more economical processes in culture and preparation, and that inflow of increased capital which we anticipate at no distant date. But we have been careful to point out, and to verify our assertion by incontestable figures, that with an aggregate decrease of consumption, that of Ceylon descriptions were steadily increasing, the decline being on coffee from other quarters. It is evident that increased regard is being paid to quality, and as the higher and middle classes may be assumed all along to have taken their customary supplies, the inference is that the taste for Ceylon plantation and native is spreading downwards; giving assurance that with increased means, resulting from the general increase of wages, and, generally, the improved means of the country, the demand will, on the average of years, keep pace with production. We referred at length in a former article to continental requirements. Were monetary accommodation attainable in Ceylon on more reasonable terms, the margin even of existing profit would admit of being somewhat narrowed, thus materially enlarging the home demand, affecting, as any reduction in price must, the classes to whom we must look for increased demand. The announcement of a further fall in the rate of discount which the present mail will carry out will do much to place Ceylon planters dependent on advances in their former position, and to reassure Colombo merchants. Although the stock of coffee in this country as compared with the corresponding period of last year exhibits a considerable augmentation, the prices realised at sales have been well supported. Holders evidently have in view a good continental demand, the current requirements of Germany especially, both for consumption and export, having been seriously checked by the war. The continental stocks are low, and must be replenished. Deliveries for home use continue large. As regards the improvement of monetary facilities in Ceylon, it is a good and healthy sign that the Bank of Madras, stimulated no doubt by representations from Ceylon itself, should have determined on establishing a branch bank at Colombo. Ceylon interests are nowhere better understood than in India, and the increase of trading transactions between them renders desirable yet more intimate financial connection. It was to have been expected that the late financial crisis would have created a drain on Ceylon specie, and this at its very earliest period. With the seat of commercial credit threatened, the outlying extremities of our financial organisation could not otherwise than suffer. Ceylon has borne well the brunt, and whilst we cannot but regret the individual inconvenience and even positive loss that has been occasioned we are satisfied that Ceylon will rapidly recuperate herself, and this from new sources, as late events have directed more attention than ever to colonial investments, the large profits accruing from which are found not to be necessarily synonymous with high risks. We find the shortening of the usance of Indian bills resolved upon by our Anglo-Indian banks commented on in the Ceylon journals come to hand. All curtailments of this character are necessarily disconcerting at the outset to the mercantile community, even in cases where transactions are carried on in due proportion to the capital invested. An impartial and comprehensive view commends an arrangement which will work favourably in the reduction of currency rates. No trade, probably, is on the whole more legitimate than that carried on by Ceylon, and the adverse comments on a measure really taken in the interests of all parties appear to arise firstly on the assumption that, so far as the measure applies to Ceylon, no allowance will be placed for the distance at which she is placed; and again, that the principle applying to exchange transactions necessarily involves not only the shipment but the realisation of the goods on which the bills are drawn. Instead of unreasonably curtailing credit operations, a shortening of the usance will place credit itself on a more stable basis, and in improving the position of the Anglo-Indian banks,—the great levers of our Eastern trade—will increase their power to extend all requisite facilities to their customers.

EXTENSION OF THE UNION MAIL SERVICE TO CEYLON.—The history of the Union Company has been one of well-considered and stable progress, the service between England and the Cape increasing in efficiency and accommodation, whilst the further extension to Natal and the Mauritius, and now onward to Ceylon, will tend to increase the revenue of the company and to enhance its reputation. The last mail from Ceylon informs us of the arrival of the first steamer on the new section of the above route, having left the Mauritius on the 6th of July, and arrived at Natal on the 16th of the same month. The arrival was marked with the same punctuality as to contract time which has distinguished the passages of the Union Company's steamers. There were nine passengers, and there is every certainty that the number of these, together with the amount of merchandise carried, must rapidly increase. The *Natal*, the steamer in question, brought mails for India and Australia. The importance of this link in oceanic communication as between three of our most flourishing colonies and the Far East and Europe cannot well be overrated. We look to a time when the Union Company will still further extend its organisation over the Eastern seas. The good fortune that has heretofore attended it, both as regards the actual services it has undertaken and the character of commanders and agents in its employ, will, we are assured, not forsake it. The arrival of the *Natal* at Galle has been commented on with marked gratification by merchants in London connected with the Cape, the Mauritius, and Ceylon. The first-named, under the new arrangements made, will be enabled to receive more prompt replies to their advices.

MEETING OF THE BRITISH ASSOCIATION.—In the Geographical Section Mr. F. Wymper read a paper "On the progress of the Russo-American Telegraph Expedition, *via* Behring Straits." He said—This great enterprise is the work of the Western Union Company of America. In order to make it a success a large amount of exploration had been found necessary, and this being almost in new or little known countries would, of course, add considerably to our knowledge of them. The first officials of the company reached San Francisco late in 1864, and some of them at once proceeded to British Columbia to commence the preliminary exploration. The line had previously been carried through Oregon and Washington territory to New Westminster, Fraser River, and the commencement of the new line is at this latter place, which is the embryo capital of British Columbia, and it terminates at the mouth of the Amoor River. The organisation of the first expedition was not completed until the end of July, 1865. Five vessels, including a screw steamer, were employed to take up the exploring parties, and to leave them at their several destinations, with stores for their subsistence, &c.; all returned to San Francisco before the 1st of December. The preparations for 1866 were on a more extended scale. Seven vessels, one of which is a magnificent clipper ship, would be employed in transmitting, principally to the coast of Asia, men, supplies, and telegraph material. More than 300 men would go to Kamschatka and Siberia, whilst the line is already constructed for about 700 miles north of New Westminster. By the end of this year about 1,500 miles of wire would be stretched northwards, and other sections of the line commenced. During the first half of June three vessels left San Francisco. Colonel Bulkeley (an engineer of immense experience, a colonel in the United States regular army in the corps of Engineers, and who was during the late war principally engaged in military telegraphing) was accompanied by Count Ansoff, a Russian commissioner appointed by the Imperial Government to see that every facility was afforded to the expedition. The United States steamer *Saginaw* would convey a part of the expedition, and a Russian man-of-war was ordered to report to Colonel Bulkeley, at Petropauloski, for the same purpose. On the deck of the clipper ship *Nightingale*, the largest vessel of the expedition, two small stern wheel steamers would be carried, which were intended for the navigation of shallow rivers on the coast of Siberia and Russian America. Early this year, in British Columbia, Major Pope explored the country from Lake Tatla to the head waters of Stekin River, and then descended that river to the sea, travelling more than 500 miles in snow shoes and the remainder of the distance (from the head of the navigation) in a boat. He was accompanied by only one white man and two Indians for the greater part of the journey. He described the country north of Tatla Lake as lightly wooded, though there is much prairie, and land which is very unlike the greater part of British Columbia. Every facility had been given to the expedition by both the British and Russian Colonial Governments, and all *materiel* for the company's use was everywhere admitted duty free. A paper written by Mr. W. H. Johnson, and read by General Sir A. S. Waugh, containing the result of explorations from Leh to Khotan in Chinese Tartary. Dr. Thomson expressed his belief that now that both Russia and England touched each others frontiers they would become better friends than ever. On either side of the dividing line of mountains there would be a settled government, and, consequently, no incitement to cross the barrier. Moreover, the hills themselves were of such a character as to render military movements almost hopeless, as must be tolerably apparent from the fact that it took an unarmed messenger 20 days to accomplish a distance of 100 miles. Mr. J. Thomson who, at considerable personal risk, labour, and danger to health, had succeeded in penetrating to the ruined temples of Cambodia, and in bringing back admirable photographs of these ruins, laid before the section some details of his journey. Starting from Bangkok, in Siam, he had succeeded in reaching these edifices, which stood in the midst of a vast plain, surrounded by forest and jungle, the quarries from which it is supposed they were built being at a distance of forty miles. No trace of the people who built them can be discovered, nor can the era to which they belong be ascertained. The present inhabitants of the country have no architectural knowledge, and worship the statues in general, having among them a tradition that the palaces, temples, &c., were erected in one night by a flight of angels from Heaven. There are inscriptions belonging to three different periods on the walls, but only the latest of these can be deciphered, and have no reference whatever to the buildings. Mr. Thompson exhibited specimens of the photographs which he had taken, which are really admirable as works of art, and show incontestably that the designers of the long stone-roofed corridors, noble pillars, bas-reliefs, and exquisitely-finished statues must have reached a very high state of civilisation. A cordial vote of thanks was passed to Mr. Thomson for his interesting communication.

LONDON, WEDNESDAY, SEPT. 5, 1866.

THE FRENCH IN SIAM.

In another column, a correspondent's letter will be found relative to the encroachments of the French in Siam, and the general position of that country. We have already published a statement that demands have been made for a slip of territory sufficient for the purpose of constructing a canal. Now this is certainly one of the most preposterous claims ever advanced by a Power professing amity and friendship. We would fain look on it as a friendly act for the improvement and development of the kingdom, but the circumstances of the case unfortunately establish a different view. All persons acquainted with Siamese affairs will remember the unwarrantable action of the French Consul-General, M. AUBARET, previous to his withdrawal from that post about two years since, and it was fully expected by the Siamese that the French Government would accredit some other functionary; but no, M. AUBARET is again at Bangkok, and unless some urgent remonstrances are addressed by the British Government to the Court of the Tuileries, we shall not be surprised to find that he will follow up his demands by the introduction of the French troops which are located at Saigon—a convenient distance. There is no use disguising the intentions of the French, for it is transparent that they are now inaugurating a scheme for the commercial improvement of their possessions in Cochin China at the expense of Siam. The propositions are so scandalous, however, that even in these days of non-intervention we feel sure that our Government, as also that of the United States, will not quietly stand by and see the spoliation of so good an Asiatic ruler as the King of SIAM, who has on all occasions promoted the interests of British and American commerce. But to take a purely selfish view of the matter, it will not suit our interests nor those of America to allow France to domineer in Siam as she has in Cochin China. The Government and merchants of both England and the United States have a settled stake in Siam which we cannot see coolly wiped out by any Power. England and America have, with the liberal and intelligent assistance of the KING, made Siam what she is. Even the very concession which the French now ask for has already been conceded to a British merchant, and a good deal of money expended in the preliminaries for cutting a canal through the Isthmus of Kraw. It is therefore the commonest justice that we should be supported in our claims. No doubt the possession of Cochin China (like Mexico) has been found a most inconvenient burden to the French Treasury, and M. AUBARET has been found to contain the necessary genius for altering this state of things. We trust however that M. AUBARET will not cause any trouble between the respective Governments, but negotiate fairly for any concession he may require from the Siamese. He knows, or should know, that his Imperial master cannot and will not sanction anything savouring of filibustering. We fear from all accounts that M. AUBARET is a very unfit man in point of temperament to hold the post he has, and the French Foreign Minister could not have been aware of the discourteous, almost bullying manner, in which he discharges his functions towards the Government of Siam. French Consuls and Diplomatists generally understand how to combine the *suaviter in modo* with the *fortiter in re*, and had M. AUBARET been trained to the work in the proper school no doubt he would also. The training of a man of war is certainly not suited to acquire the necessary qualifications. It is to be regretted that the Siamese Government did not lay a distinct complaint against him and protest against his re-appointment. We trust that Mr. KNOX, our Consul at Bangkok, has kept Lord STANLEY well advised as to the proceedings we have called attention to, and that his lordship will give it his usual prompt attention.

THE CHINESE COMMISSION.

PIN-TA-JEN and his attendant mandarins having taken leave of the Western world, and set out on their return to the flowery land, it behoves us to inquire what the total result of their flying visit has been. That in the general sense they can have learned or acquired anything save a misty and confused idea of European wealth and grandeur is simply impossible. Hurried from country to country, or rather from Court to Court, they were bewildered by the scenes which passed rapidly before them, and doubtless failed to derive any information from contrast or comparison. Thus to these representatives of a civilisation now superseded, England, France, and Russia must have conveyed the same impressions; the same courtesy was displayed by the officials of each, the same amount of military strength was exhibited, the wealth of each as typified by the comparative splendour of the three great European capitals might well to a cursory observer appear the same; and thus the only intelligible motive that prompted the formation of the commission was thwarted. And we must again protest against the use of such expressions as "the Chinese Embassy," "the Chinese Ambassadors," and the like. We do not desire to undervalue the feeling that prompted the organisation of the first special commission to foreign countries, but the terms we have cited and others similar that have been used, chiefly by the home papers, have conveyed a radically erroneous impression of the nature and scope of the duties entrusted to PIN and his comrades. The Commissioners have broken the ice and no more. The good old motto, *fiat experimentum in corpose vili*, has been rigorously followed in their case. Were information required as to the personal habits of that amusing brute the King of ABYSSINIA, and the relative strength of the African tribes in his vicinity, the Downing-street authorities would certainly not expend a fully fledged plenipotentiary in the prosecution of their design. The post of danger would be conferred upon some enterprising Foreign-office clerk, good enough for the service upon which he is despatched, but probably the last man that, under any circumstances, would be accredited to Paris and Berlin. So with PIN, he may be, and no doubt is, very useful in his way, but his position in his own country, and therefore his relative position in a European State, may best be judged from the simple fact that his rank or rating is that of chief clerk in one of the Peking Yamuns. It is manifest therefore that much of the ostentatious respect wherewith he was received was out of place, and seemed no less ridiculous to the man himself than to the lookers-on who knew to what an extent he possessed just claims to consideration. In England we contrived to signalise ourselves by according the Commissioner privileges hitherto denied to our Minister at the Court of Peking, but we have too much reason to anticipate that the only result of this step will be a stupid wonder on the part of the native authorities when they hear how accessible are the highest personages in the British realm. Still, the ice has been broken, and now that the manners and customs of the barbarians at home have been examined, there can be little doubt that the Chinese Government will take seriously into consideration the appointment of Ministers at the European capitals. Natives of China have of late years wandered so widely from their fatherland, that questions of civil right as between Chinese and subjects of other Governments may at any moment arise in the colonies. Native merchants and contractors, either directly or through agents, now make purchases in the foreign markets, and thus matters connected with trade are liable to come under consideration. Moreover with representatives at St. James's and the Tuileries, the rights of English and French subjects in China would in all probability be more assured than they are at present, for although not regarded as hostages by the Courts to which they would be sent, it is in this light that such Ministers would be regarded by the Court of Peking. To this then amounts the advantage to be derived from the late commission to foreign countries: the native authorities have thereby been rendered familiar with the idea of representing themselves at the capitals of the West, and the dread which must fall on an uneducated and unpractical Chinese when first he undertakes the dreary voyage over the unknown seas that separate the East from the West has been dissipated. "Pleasant it is," says the sage, "to meet friends

Digitized by Google

who come from distant climes," and this pleasure together with the expectation that the confidence of the Chinese in European faith may be restored and strengthened, form the total upon which we may look as gained by the visit just made by the Commissioners.

Literature.

—o—

International Policy: Essays on the Foreign Relations of England. Vol. I.—London: Chapman and Hall.

(*Continued from our last.*)

We take up the narrative again at the commencement of the "*Arrow*" war—the incidents of which will be fresh in the memory of most of our readers. Canton was taken; the Peiho forts captured; the treaty of Tientsin was signed, and Lord Elgin returned home leaving Mr. Bruce to get it ratified. As might have been expected, as soon as his back was turned the Chinese prevaricated, and hostilities again broke out in which our forces were worsted at Taku. What followed is thus described:—

"In 1860 Lord Elgin was again sent out to China, accompanied by Baron Gros, as the representative of France. In August the Taku forts were captured. In October, in retaliation of a violation of a flag of truce and imprisonment of British subjects by the Tartar General, the Summer Palace of the Emperor, the *chef d'œuvre* of Chinese architecture, was burnt and plundered by the Anglo-French troops; and on the 21st of October the treaty of Tientsin was ratified, with additional pecuniary indemnities."

Here again we find an undue learning towards the side of our opponents. The "violation of a flag of truce" is lightly passed over, as if it were a small matter, and the "imprisonment" only of British subjects alluded to, all mention of the accompanying ill-treatment, torture, and even murder, being withheld. By glozing over these atrocities, the destruction of the Summer Palace is made to appear an act of unjustifiable vandalism, instead of a wholesome and necessary retribution.

The stipulations of the treaty of Tien-tsin are then recapitulated; the "exterritoriality" clause being held up to special condemnation in these peculiarly constructed sentences:—

"If it is (*sic*) ruinous to the self-respect, and therefore to the public order and well-being, of a nation, to have foreign settlements forcibly implanted in its midst, it is even more fatal and pernicious that its own internal legislation, whether criminal or financial, should be at the mercy of a foreign Power. If it is (*sic*) deeply wounding to the self-respect of Spain that we should occupy Gibraltar, how far more humiliating, how incomparably more fatal to its interests, how far more disgraceful to our honour, were we to assume the pretensions of regulating its tariff for the sole benefit of English merchants and English labourers! How small the difference between submitting to the will of a foreign conqueror and submitting to the monstrous claim of exterritoriality, by which a British subject who had robbed or murdered a Spaniard in a Spanish port should assert his right to be tried not by Spanish but by British law, and by a British judge! Yet forcible regulations of commercial tariffs, and forcible assertion of British criminal law in cases of injuries committed by British residents or sailors on Chinese subjects, have been two cardinal principles of our Chinese policy!"

All this indignation is really thrown away. Of course a British subject who murdered a Spaniard in Spanish territory would be tried and punished by Spanish law, and very justly so. But how would the same system work in China? The criminal handed over to the Chinese for punishment would inevitably be tortured to death—perhaps cut up piecemeal—unless able to purchase entire immunity from punishment. British subjects convicted of offences against the natives of China and Japan seldom escape without chastisement, which in many cases is merciless in its severity; witness that of Mr. Moss, for instance, in Japan. Many European criminals have been executed in Hong Kong for acts of piracy and murder of which the Chinese were the victims. There has always been a stronger tendency on the part of our Ministers and Consuls to punish severely the offences of British subjects against natives than to insist upon the due punishment of natives guilty of fraud or outrage on those under their protection. And the much maligned British merchants so unsparingly vilified by this writer have always been most consistent in opposing the slightest leniency towards the "rowdies" who have of late years infested the coast, disgracing their nationality, and imperiling our good understanding with the Chinese. But to allow these scoundrels to be dealt with by the Chinese would defeat the ends of justice altogether; in many cases they would escape scot free by a sacrifice of their ill-gotten gains, while in others they would be cruelly tortured—a fate to which no true Englishman would subject even the vilest criminal. The writer's peculiar views on this subject prepare us in some measure for the nature of the policy he would adopt. This is the scheme proposed as a panacea for all the evils by which our present relations with China are characterised:—

"The first principle, then, of the policy I propose is recurrence to the Nanking treaty of 1842; cession, that is to say, of the additional rights extorted by the iniquitous war of 1857-60; restrictions of our commercial relations to the five ports of Canton, Amoy, Ningpo, Foo-chow, and Shanghai. It might be questionable whether the first of these ports should be retained, unless it is found that the bitter feeling aroused by the wars of 1842 and 1858 has in a great part subsided. In any case, however, the right of demanding passports to travel in the interior should be given up; and those who venture upon inland excursions should be considered to place themselves wholly beyond the pale of British protection. Above all, the settlement of Han-chow, and the whole navigation of the Yang-tze-Kiang, should be abandoned; no clause in our treaties with China having by the confession of almost every one of our political agents produced greater disorder and confusion than this. . . . . Even at the treaty ports, the right of exterritoriality, the right, that is, of trying British offenders against Chinese subjects by British instead of Chinese law, should be abandoned as wholly incompatible with the very foundations on which all international law rests. . . . . The next feature of our policy should be total suppression, so far as depends upon ourselves, of the opium traffic. . . . . The money extorted after the wars of 1842 and 1858 should be repaid. Our Oriental policy is degrading our standard of military morality with fearful rapidity. In the engagement in the Straits of Simonoseki, a few months ago, we demanded money for having abstained from the atrocious outrage of burning down a defenceless unoffending town. It is time that such procedure should be held in its true light, and as the merest buccaneering."

In other words, we should humble ourselves to the very dust; abandon our countrymen in China to the tender mercies of those ruthless savages, the "Mandarins;" pay tribute to the "Brother of the Sun and Moon"—and withdraw entirely from the splendid trade we have created, leaving our share of it to America, France, and the other Treaty Powers. On the whole, we may regard it as a matter of congratulation that the control of our international policy—at all events as regards the Far East—is not in the hands of Mr. J. H. Bridges, the author of this essay.

The sixth essay, that on our policy towards Japan (by Mr. Charles A. Cookson), is written in a different strain. It upholds, to a certain extent, some of the views adopted by Mr. Bridges, but in a much more reasonable way. The tone is more moderate, the language far better chosen, and the vindictive feeling towards the mercantile classes so freely indulged in the previous essay is nowhere apparent. Our notice of the book having already extended to greater length than usual we refrain from making further extracts; and in conclusion recommend the work as one well worthy of perusal, notwithstanding the peculiar principles it inculcates.

THE EMIGRATION COMMISSIONERS' REPORT.

The Twenty-Sixth General Report of the Emigration Commissioners states that in the 51 years that have elapsed since 1814 there have left the United Kingdom 5,901,510 emigrants, of whom 3,597,789, or nearly 61 per cent. have gone to the United States of America, 2,177,850 to British Colonies, and 125,871 to other places. Of the composition of this emigration in the earlier years, the Commissioners do not venture to offer an opinion; but of the 4,827,530 who have left the United Kingdom during the last 25 years they believe that upwards of 60 per cent. were Irish, and that of these the great bulk have gone to the United States. The Irish emigration may be calculated at an average of upwards of 116,000 a year during the whole of that period, which is considerably more than the natural increase of the people could supply. The reduction of the population of Ireland in the last 25 years is thus to a great extent accounted for, irrespective of the mortality in the famine of 1847. The emigration in the year 1865 was 209,801, of whom there were—English, 61,345; Scotch, 12,870; Irish, 100,676; foreigners, 28,619; not distinguished, 6,291. The Irish emigrants therefore formed 47.98 per cent. of the whole emigration, and 55.74 per cent. of the emigrants who went to the United States. There were among the Irish who went to the United States 31,943 single men, being in the proportion of 38.9 to the whole Irish emigration. Of the emigrants of 1865, there went to British North America, 17,211; to the United States, 147,258; to the Australian colonies and New Zealand, 37,283; and to all other places 8,049. In the first three months of the present year, the number of emigrants who left the United Kingdom from ports at which there were emigration officers was 39,672, of whom there went to British North America, 100; to the United States, 32,913; to the Australian Colonies and New Zealand, 6,067; to all other places, 592. This is the largest emigration during the same period of any year since 1854; the increase being principally in the Irish emigration to the United States.

With respect to "Chinese Emigration" the Commissioners report as follows:—

"In our report for the last year we explained the arrangement which had been made by British Guiana and Trinidad for placing on a somewhat more permanent footing the emigration from China to those colonies. It was provided that those colonies should take between them not less than 2,000 emigrants in the year, of whom five-eighths were to be sent to British Guiana, and three-eighths to Trinidad. British Guiana, however, instead of the 1,250 which would have been received under this arrangement, in 1864-65, applied for 1,800, and actually received 1,766, of whom 414 were women. The number sent to Trinidad was 612, of whom 187 were women, and in addition, one ship, carrying 480, of whom fourteen were women, was despatched from Amoy to Honduras. The whole number despatched was therefore 2,858, to whom are to be added fifteen born on the voyage, making a total of 2,873; the number of deaths on the voyage was 115, equal to 4.0 per cent. Considering the length of the voyage and the impossibility of entirely excluding men whose constitutions have been enfeebled by opium eating, the mortality cannot be considered large.

Digitized by Google

"The Chinese who arrived in Trinidad in the season 1864-65 are generally well spoken of by the immigration agent of that colony. He says, that, with few exceptions, they have been "more subordinate" than was expected; that some of the gangs have not only worked well for wages but have surrounded themselves with gardens, and have acquired pigs and poultry; and that the women are nearly all industrious and quiet. There are, however, exceptions, he says, to this description, some of the gangs being idle and unmanageable. The Chinese are more difficult to manage than the Indians, and require temper and discretion on the part of the overseers. They have no respect for courts where corporal punishment is not inflicted, and are much given to petty thefts. The Chinese imported into Cuba are said to be more honest and trustworthy, and the immigration agent is of opinion that a severe discipline, including corporal punishment, would have a good effect on their first arrival. Imprisonment with hard labour they regard without apprehension.

"During the season 1865-66 1,250 Chinese emigrants were ordered for British Guiana, and 750 for Trinidad. We have heard of the despatch from China of two ships for Trinidad, carrying 613 emigrants, and three for British Guiana, carrying 1,278.

"We regret to state that in the *Pride of the Ganges*, one of the ships for British Guiana, a mutiny broke out the day after the vessel sailed. The master and the purser were thrown overboard, and the mutineers compelled the first mate to proceed to Hainan, where all the emigrants left the ship. The ship was afterwards taken to Hong Kong by the mate and has since sailed with another body of emigrants for British Guiana. The alleged cause of the mutiny was the indifferent quality of the rice on board, but the fact that the rice was subsequently sold in the open market at the highest price of the day, seems to disprove the truth of that allegation. The mutineers did no injury to the ship, and took away from it nothing but provisions.

"We have received intelligence of the arrival at their destination of three ships, conveying 1,106 emigrants. The number of deaths on the voyage was 22, being equal to 1·98 per cent. of the numbers embarked.

"An endeavour is about to be made to initiate an emigration from China to British Guiana without Government assistance, which, as it may have important results, and is at all events interesting in its conception, may be noticed here. In the end of 1864 a Chinese Christian, O Tye Kin, who had for twelve years been a revenue surveyor at Singapore, arrived in British Guiana, with the intention of endeavouring to convert his fellow countrymen to Christianity. He succeeded very soon in forming a congregation of about 120 persons, and shortly afterwards he commenced, with the sanction and assistance of the local Government, the formation of a settlement about thirty miles from George Town. This settlement the Governor visited, in company with Admiral Hope, and gave it the name of Hopetown. In December last the Governor reported that the settlement had increased to 170 persons; that they had established a store in George Town for the sale of their produce, and that they expected very shortly to pay off the advance of £600 made to them out of public funds towards the formation of their settlement.

"O Tye Kin had proposed to the Governor to adopt in British Guiana the system followed in Singapore for the introduction of emigrants. He represented that, according to that system the employer is in the habit of paying the expense of the introduction of the emigrant on condition of receiving his services during two years for food and clothing only. He is sanguine that the same system might be brought into operation for the Hopetown settlement, and probably for the general service of the colony, and he has proposed to send two delegates to China to collect emigrants on these conditions. The Government so far adopts the scheme as to propose to advance from public funds the amount necessary to despatch the delegates, who on their part are to undertake on their arrival in China, besides obtaining emigrants for the Hopetown settlement, to assist the emigration agent in procuring emigrants for the planters. Whether the advance is to be repaid by the Hopetown settlement or out of the emigration fund is to depend on the result of the delegates' operations in procuring emigrants for the general service of the colony. That the delegates may be able to effect this is doubtful, but their presence in China can scarcely fail to be beneficial, as affording the ocular proof of the success of Chinese emigrants in the West Indies which the emigration agent in China has continually declared to be indispensable to the continuance of a satisfactory emigration.

"The importance of obtaining Chinese evidence as to the results of the emigration has been urged on the British Embassy by the Prince of Kung, and on Her Majesty's Consul at Canton by the Viceroy of the two Kwangs. The Prince of Kung with this view proposes to despatch a Chinese officer to visit the colonies to which Chinese emigrate, and to report on their condition. The Viceroy suggests that the emigrants themselves should combine to send back some of their number to give the results of their experience. There can be no doubt that the information which would be obtained by either of these courses would be most valuable, as an encouragement to the emigration of a respectable class of labourers, and it might be good policy in the colonies of British Guiana and Trinidad to send back some of the Chinese emigrants for the purpose of making known the advantages held out to labourers in those colonies. At present the Chinese feel a natural distrust of a system the results of which they have no means of ascertaining."

The number of emigrants under indenture in British Guiana on the 1st of January, 1865, was 32,150, among whom there were 5,354 Chinese males and 793 females. To the latter are to be added 1,691 Chinese introduced in the course of the year. During the year ending 30th June, 1865, 5,920 emigrants entered into renewed indentures for five years, and received in bounties 291,800 dollars for so doing. During the same period 1,190 immigrants paid the sum of 18,557 dollars as commutation for further service under indentures, and 360 others gave notice of their intention to commute. The number who re-indentured themselves is evidence of the general contentment of the immigrants with their position as labourers on estates, while the number who paid commutation money shows with what facility the industrious may acquire the means of determining their own condition. A large proportion of those who paid commutation money are said to have been Chinese, whose object in doing so was to obtain the bounty on entering into fresh indentures for five years.

The number of immigrants under indenture in Trinidad on the 1st October, 1865, was 9,879, of whom 380 were Chinese; in addition to whom 5,282 were resident on estates of whom 205 were Chinese. Among the Indians 375 deaths occurred during the year, being equal to a mortality of 2·5 per cent. The arrival of the Chinese was too recent to allow of any fair calculation of the rate of mortality among them. The proportion of Indian females and males resident on estates was rather more than 33 per cent.; the ratio of females to males of all ages was 38·8 per cent. The proportion of Chinese women to men introduced in 1864-65 was 45·61 per cent. During the season 1865-66 the women despatched from China to Trinidad were in the ratio of ·99 per cent. only to the men. The importance of the introduction of women is self-evident.

The Chinese immigration into New South Wales seems to have come to a pause during the 1864, for 84 only arrived during the year, while the number who left was 1,044.

In Victoria an Act was passed in 1865 "to amend the laws affecting the Chinese immigrating into a resident in Victoria." This Act repeals the Chinese Immigration Statute, 1864, and re-enacts it with the following omissions, viz.—(1.) The tax of £10 on the master of the vessel bringing male Chinese into the colony. (2.) The tax of £4 on Chinese entering the colony in any other way than on board a ship. (3.) The limitation in passenger ships of one passenger to every ten tons of the ship's tonnage if any of such passengers were male Chinese.

Labuan receives the following notice:—

"In the appendix to our report for 1864 we printed a copy of the lease then recently granted to the Labuan Coal Company for raising coal in that island. The operations of the company during the two years that have since elapsed were not so successful as might have been hoped, and they applied for some modification in the terms of their lease. Their application has been acceded to and a new lease has been granted to them (and the China Steam Shipping Company, with which they have amalgamated), a copy of which we print in the appendix. The principal alterations are, that instead of paying a royalty on all coal raised, they are in future to pay a rental of £300 a year, and a royalty of 6d. per ton on all coal beyond 12,000 tons sold or disposed of for value before 25th December, 1870, and of 1s. per ton for all beyond 6,000 tons after that date. They are also to be allowed to raise ironstone, fireclay, freestone, and petroleum on payment of certain royalties, and to cut timber for their own use or for any other purpose, on condition that they keep the land from which such timber is cut free of underwood and jungle. And in consideration of their making a railway from their coal pits to the shipping place and introducing settlers, they are to be allowed free grants of land along the course of their railway to the extent of five acres for every labourer introduced, not, however, to exceed 640 acres for each mile of railway."

A table given in the appendix shows that the contract price per adult from Canton to British Guiana is £14, though the *Queen of the East*, being of much larger tonnage than the other vessels, took a cargo of 488 persons at £12 17s. 6d. The *Montrose* got £15 a head from Canton to Trinidad, sailing on the 17th November, 1864; but the *Dudbrooke*, which sailed from Amoy to Trinidad on the 23rd October, 1865, contracted at £13 10s., while the *Red Riding Hood*, which left Amoy six weeks later, obtained £14. The greatest number of deaths during the voyage occurred on board the *Arima*, which left Canton on the 31st March, 1865, and arrived at British Guiana on the 11th of July. The deaths on her were 32, out of a total of 343 passengers. The *Brechin Castle* had only three deaths out of a total of 270 emigrants, who left Canton on the 18th October, 1864, arriving at British Guiana on the 26th January, 1865.

FOREIGN INTERESTS AT SHANGHAI.

(From the Annual Report by Commissioner of Customs.)

BRITISH.—The British easily obtain the larger portion of the goodly sized ingot which yearly passes through the crucible of trade at Shanghai. Their houses are the oldest; the most powerful among them are branches of those colossal establishments founded when China was still enveloped in mystery for Europe, by bold speculators who became merchant princes; they have passed through that happy epoch when the Celestial Empire was a mine of gold; the mine is still rich, but now it only yields brass, and is not so easily worked; their advance is therefore considerable. On the other hand, Great Britain, as regards China, is the only really importing country, for, compared with her, the United States and the Continent show but every insignificant figures; she is, consequently, the only country that has established a substantial system of barter or exchange of produce, which is moreover greatly to her own advantage; for, by her direct imports and by opium we have already seen that she introduces into Shanghai an amount of thirty-six millions of taels, whereas she only takes away twenty-two millions and a half. Furnishing her merchants therefore with goods through which they realise profits, and are without any expense in possession of funds with which to purchase native produce, they (the merchants) have at all times been enabled to land in Europe tea, silk and cotton under more favourable circumstances than others, and thus absorb a greater portion of the business of China, at the same time that London is made the general entrepot for all exports from the "Far East." The numerous British colonies situated in this part of the world also help to extend the circle of their transactions by the products exported from them, which increase their means of exchange. Besides, local trade, or that between port and port, instead of being, as in the case with other nations, a question of chance, is for them the natural corollary of those advantages, which enable them besides to keep up a considerable merchant fleet in these waters, forming indeed one half of the total amount of foreign tonnage. Of eighty-eight houses of business, fifty-eight are British, in which we include seven Parsee houses of good standing; the broking and commission houses, with very few exceptions, and all the banks, except one, are also British. Three docks, one ship-building and two ship-repairing establishments are managed by British subjects and worked with British capital.

AMERICANS.—The Americans at Shanghai are, as is the case everywhere else, in the ascendant as regards shipping; it is impossible to compete with their steamers, except by opposing them by others of the same kind, and built on the same model. On the Yangtze line, seven steamers out of nine are American; the others are distributed on the Ningpo, Hong

Digitized by Google

Kong and Japan routes; almost all are built with engines on the walking beam principal; one of them—the *Suwonada*—bears the palm for the rapidity of her coast voyages; she averages 14 knots. The fleet of merchant sailing vessels of the United States, now that the seas are free, will soon resume its former importance; many American clippers, during the war, flew foreign flags. This year the tonnage of sailing vessels and steamers was the same as in 1864, amounting to one-half that of the English vessels.

GERMANS.—Judging from the return tables of exports and imports, German commerce would appear to be almost null, and would be disposed of by the mention of a few articles of relatively very small value; but the Germans, not finding in their own country sufficient elements of business, go elsewhere to seek them, and thus create a trade for themselves; their houses in Shanghai order out manufactured goods from England, and return Chinese produce; they have also agents and branch houses in Japan, Siam, Singapore, Hong Kong, and other ports in China.

FRENCH.—France, the country of "ideas," imports many into China by means of her missionaries, but she does not care for importing cottons and woollens—leaving to more practical nations a free field for transactions of such a profitable but vulgar nature. The table of imports from foreign countries marks only a series of cyphers to her credit; in exports the items silk and cocoons shows piculs 5,844, and tls. 2,415,198; and although this amount is but trifling, as the total export was 43,000 bales, and as France must have taken more than the half for the consumption of her manufactures, it might still convey to the reader abroad an exaggerated idea of her trade at Shanghai. Of these 5,844 piculs, which may be treated as 7,300 bales, French houses only exported 2,500 bales; the rest having been sent forward by English, Americans, and Germans.

FRENCH AGGRESSION IN SIAM.

(To the Editor of *The London and China Telegraph.*)

SIR,—Being an old resident in Siam I beg to send for your pages a few facts worthy of public notice. I am necessarily obliged to condense them as much as possible, but they will not be the less faithful or deserving of your attention. Aware as I am of the great internal resources of this country, its external or natural advantages must be no less obvious to every one who casts his eye over the map, and knows at the same time the prolific nature of the soil, watered by the "Menam." It is true that the Siamese, either through ignorance or inability have failed to derive the advantages which circumstances the most felicitous have placed within their reach; but this has not been without its benefits to Europeans, as it induces them the more willingly to permit foreign merchants to establish on the best footing a connection for the purposes of trade and traffic. Several British houses are already established here, being branches of some of the most respectable and influential firms in London; but I regret to say that of late years Siam has been gradually succumbing under French aggression.

Napoleon III. may not himself be at the bottom of these shameful encroachments (though small and by degrees), but there is a small party in France whose minds are possessed with the idea of gold *en masse* and who take every opportunity of intimating through such agents as M. Aubaret, the Consul of France, and others, established all over the land, as to what the "lions and eagles" of *la belle* France are capable of doing under such and such an emergency. Thus the noble old ruler of Siam with his able Premier and Government are finding themselves insulted and threatened on the most trifling questions that happen to arise.

The conviction that Siam is gradually but surely losing her independence is gaining ground everywhere, even among the most casual of observers. For some time past rumour has been busy in attributing to Commandant Lagré, of Upper Cambodia, the design of annexing without any pretext whatever two adjoining provinces of Ligor and Baltabong. Since 1862 his Majesty the King of Siam has had the peculiar consolation of finding his revenue minus three important incomes. At this moment M. Aubaret, who has just returned to Bangkok, is using the most violent measures possible (without coming to an open rupture) to secure privileges the most exclusive and monopolies the most unprecedented to France.

It must not however be forgotten how fatal an influence it might have on England's Eastern possessions if the French or any other Power were to obtain the command or right to any of these ports and shut them up against us. The fertility of Bengal, as is already known from experience, is far from being beyond the influence of the seasons; but the luxuriant and almost spontaneous productions of this empire—combined with its being one of the finest of fruit-growing countries in the East—makes it sure of certain resources against the calamities of famine or a failure of the rice crop.

Having had long experience from local knowledge I am anxious that matters of such weighty consequences should not remain unknown concerning a country whose independence and welfare is the subject of the utmost importance to England's Eastern possessions, and to which the eyes of the European world have of late been turnedwith so much interest; and with which—if the present undertaking so auspiciously arranged for a telegraph be successfully carried out—our commercial and political relations are destined soon to be of a much more definite and satisfactory kind.—I am, Sir, yours faithfully, OLD SIAM.

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

Oriental Bank Corporation, Threadneedle-street, C. J. F. Stuart, chief manager.

*** *Companies omitted in the above list will be included if the particulars are forwarded.*

Monetary and Commercial.

Considerable surprise has been expressed in commercial and legal circles at the action taken by some creditors in Hong Kong against the Commercial Bank Corporation, and more especially at the decision of the judge of the Supreme Court in deciding that the creditors were not bound to respect the authority of the Court of Chancery, into whose custody the head office in London had been placed. We think this a most injurious decision, and one that will inflict an injury on the claimants themselves, for in a few days after that decision full powers would arrive from the Court of Chancery in England, and the attempt to obtain an unfair advantage would simply result in the loss of the legal expenses incurred. We think the creditors were also mistaken as to the nature of the assets. We understand that the bank's vaults were nearly clean swept before the stoppage, and that the assets consisted of title deeds, &c.

The following paragraph appeared in *The Times* of the 3rd inst.:—

A telegram from Calcutta has brought information to the Agra and Masterman's Bank that the powers of the appointments under the Court of Chancery have been fully recognised there, and that everything connected with the liquidation is working smoothly. An agent of the liquidators had started for China to prevent, if possible, in the case of this bank a repetition of the injury inflicted on the Commercial Bank by the local courts having refused all protection to it.

And the next day the following letter relating to the Commercial Bank Corporation of India and the East:—

"Sir,—The paragraph in the City article of *The Times* of to-day is calculated to convey an erroneous impression as to the position of the Commercial Bank Corporation of India and the East of China. According to my most recent advices measures had been successfully adopted for protecting the assets of the corporation at its various agencies in China and Japan, and this had been effected long before the decision at Calcutta alluded to.—I am, Sir, your obedient servant,

"W. H. HOLYLAND, Official Liquidator of the Commercial Bank Corporation of India and the East."

Complaints have been made of the non-delivery of telegraphic despatches forwarded by the Kiachta route to Shanghai. The homeward ones take 22 to 30 days, and are sometimes quite unintelligible. The line has also been used by some unscrupulous persons to transmit false news, one telegram having been sent to the effect that the Bank of Hindustan in London had stopped, which must have had a bad effect on that bank at Shanghai.

The *Shan-Tung*, of 311 tons, was sold at Lloyd's by order of the Admiralty for £1,370.

The *Erl King* steamer is loading a general cargo for Shanghai at £6 per ton.

At the annual general meeting of the Hong Kong and China Gas Company the report presented states—

The loss on the revenue account is solely attributable to the unfortunate state of your late manager during the latter part of his residence in the colony as previously communicated, which prevented proper superinten-

Digitized by Google

dence being exercised over the setting of the retorts or the economical manufacture of gas, thereby causing the consumption of coal to be fully twice as much as was necessary. The large stock of 2,000 tons originally laid in was thus quickly consumed, and before fresh supplies could be obtained inferior qualities had to be purchased in Hong Kong at the high prices then ruling. The cost of labour for carbonising the large extra quantity daily consumed, added much to the expenses, which were in other respects on an extravagant scale. When these facts became known to your board, they took prompt measures to effect a thorough change by appointing Mr. Newton, in the place of the late manager, Mr. Autey as sub-manager, and a local committee of three shareholders, with all of whose services they have every reason to be satisfied, and to whom their best thanks are due. Having pointed out the cause of disappointment, your directors turn with pleasure to the encouraging facts that the demand for gas is most satisfactory and continues steadily to increase, and had it not been for the unfortunate circumstances alluded to, a fair amount of profit would have been realised on the working of the first twelve months. By recent advices from the works your directors are glad to report that the new retorts have arrived, and that they would be immediately set by a thoroughly practical man who was sent out to be in readiness to receive them. A good supply of coal at a reasonable price had also arrived, so that little doubt exists that at the present time very satisfactory results are obtained. The consumption of gas in the colony is steadily progressing, the fitters are well employed, and fresh orders coming in. The want of a good market for the residual products is much to be regretted; when better known it is believed they will become more in demand, and so enable your directors, at no distant period, to reduce the price of gas.

These facts having been known to the shareholders and the public some months since there was no discussion on them. It is expected that the directors will now very shortly be in a position to pay a dividend from remittances expected from Hong Kong. It is quite evident from the large amount of receipts for the year, £11,382, that the shareholders will soon enjoy a very handsome dividend.

The Circular of Messrs. Sillar and Co. says :—

GOLD.—The state of the foreign exchanges still causes an influx of gold into the country, and large amounts continue to be sent into the Bank of England; the amount sent in duving the week is £972,000, and, on the other hand, £102,000 has been withdrawn, chiefly for America. The steamer *Tanjore* from the East, due at Southampton on the 9th proximo, brings £133,292.

SILVER has been in rather more request for the Continent, and we raise our quotations for both Bars and Mexican Dollars, viz., 5s. 0¾d. and 4s. 11d. respectively, at which prices those by the *Shannon* were sold. There is no demand whatever for the East; the last steamer for Bombay took no buillion.

EXCHANGE ON INDIA.—The business transacted is still only to a limited extent, and our quotations remain as before. The amount of Council bills to be tendered for on the 5th proximo is 35 lacs.

The amount of bullion by the P. and O. Company's steamer *Pera* from Southampton on the 4th inst. was :—In gold to Madras, £500; in silver to Madras £20; to Hong Kong, £215. Total in gold, £500; in silver, £235.

FREIGHTS AND CHARTERS.

The amount of tonnage loading for the various Eastern ports has somewhat declined, but no alteration has taken place in outward freights. Coal freights from the outports remain about the same. In homeward charters there has been but little doing, we hear of one vessel being placed from Java to Europe at 47s. 6d. per ton. The Akbar has been engaged to convey the troops to Ceylon which has been tendered three times.

Current Rates of Freight for Vessels on the Berth :—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow :—From Wear or Tyne per keel. For Hong Kong: £43. For Singapore: £30. For Shanghai: £50. For Saigon: £50. For Yokohama: £50. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Singapore, £1 6s. For Shanghai: £2 7s. 6d. For Saigon: £2 8s. For Batavia: £1 6s. For the Philippine Islands: £2 2s. 6d. For Manila: £2.

CASUALTIES.

The wreck of the Golconda, from Singapore to London, which went ashore on the Pan Sand near Whitstable July 4, was, on Aug. 25, got in near the cut of Whitstable Harbour, where the cargo still remaining in her may be easily got out, endeavours will, however, be made to place her so that she will be dry at low water.

The second mate of the Agincourt, from Southampton to Hong Kong, which foundered on June 24, reports that when the vessel was abandoned she was on fire.

Accounts from Capetown, dated July 15, state that the Senior, Bakker, from Batavia to Amsterdam, which put into Simon's Bay July 8 leaky, was discharging cargo and that about half of the quantity already discharged was damaged.

The Shun Lee, which cleared from London on Aug. 25, for Hong Kong, put back to Gravesend on the 31st with windlass damaged, she, however, proceeded again on her voyage the following day.

Advices from Rio Janeiro, dated July 11, report H.M.S. Challenger as having landed there the second mate and five men of the Severn, Leyland, from Newport to Shanghai, which vessel foundered June 16 in lat. 37 N., lon. 14 W., the master and rest of the crew were landed at Pernambuco July 12 by the British vessel Arequipa; and later accounts from the same place bearing date Aug. 8, state that the St. Vincent de Paul, Guerin, from Toulon to Saigon, which put into Rio Janeiro July 30 very leaky, would have to discharge half her cargo there.

MISCELLANEOUS.

At SIMON'S BAY.—July 15, St. Jan, Lommerse, from Batavia; Alblasserdam, Hoen, from Padang.

At RIO JANEIRO.—July 30, St. Vincent de Paul (Fr. ship), from Toulon for Cochin China, leaky.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessel tores, &c., when requiring to discharge them.

Amoy, March, 1865.

REVUE ORIENTALE,

Conducted by M. LEON DE ROSNY,

Professor of Japanese in the Imperial School of Living Oriental Languages of Paris.

DEVOTED specially to Ethnography, History, Literature, and Commerce of Asia, Africa, and Oceana.

The last issue (No. 57) contains, amongst other matters,—

THE INEXORABEE COURTESAN, a Hindoo Story translated by M. Garcin de Tussy, Member of the Institute of France.

COMMERCIAL RELATIONS of the EAST and WEST in Ancient Times, by M. A. Castaing.

OCEANIC STUCIES, by G. Delonore.

VOYAGE in the HOLY LAND, by M. F. de Saulcy, of the Institute.

ORIGINAL CORRESPONDENCE.

MISCELLANEOUS NEWS relating to the East.

Agents in London: TRUBNER AND CO.

ENGLISH GARDENS IN THE EAST.

THE Fourth Season has now confirmed the complete success of MR. CHRISTY'S Cases for conveying Fruit Trees, Vines, Plants, Flowering Shrubs, and Seeds, to the East, when shipped in the holds of Steamers like ordinary Case Goods. Mr. John Waterer, junr., the American Nursery, Bagshot, Surrey, or Mr. Christy, 28, Pall Mall, London, are prepared to execute orders for gentlemen in the East, and beg to call attention to the list of prices and conditions. FRUIT TREES, including PEARS, APPLES, PLUMS, CURRANTS, GOOSEBERRIES, PEACHES, NECTARINES, APRICOTS, CHERRIES, and QUINCES, per case, 10 Guineas.

	Guineas.
20 FRUIT TREES, with Ten varieties, per case	14
ROSES of the best kinds ... ... „	15
RHODODENDRONS and AZALIAS, &c.	15
GARDEN SEED (various) ... ... „	5 upwds.

The number depends on the size of the roots; the cases average 30 plants each.

All the above prices include freight, insurance, and all charges to any port where the P. and O. steamers call. The season for shipment commences about September and ends in January. All orders must be accompanied by a remittance or orders for payment. The name of the agent at the port of arrival must be furnished, to prevent delay in forwarding.

DINNEFORD'S FLUID MAGNESIA

THE Medical Profession for Thirty Years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Headache, Heartburn, Gout and Indigestion; and as a mild aperient it is especially adapted for ladies and children. Prepared by

DINNEFORD & CO.,

CHEMISTS, &c.,

172, NEW BOND-STREET, LONDON

And sold throughout the world by all respectable Chemists

CAUTION.—See that "Dinneford & Co." is on each bottle and red label over the cork.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S OINTMENT AND PILLS

counteract most diseases. Causes which determine the health or sickness of large communities should be carefully investigated, and, when possible, they should be removed. Where this is impracticable their baneful effects should be mitigated by such well-known purifiers and healers as Holloway's Pills and Ointment. They prove in the hands of all sufferers the greatest boon when health is the object of search, and when immediate restoration is the only safeguard against continued indisposition. Holloway's remedies will succeed under the most unfavourable circumstances in casting out all impurities, strengthening every weakness, and regulating any disordered function. No medicines can equal them for advancing the public health and protecting delicate persons from unnecessary pain.

HEAL and SON, Bedstead, Bedding, and Bedroom Furniture Manufacturers 196, 197, 198, Tottenham-court-road, London, W.

WALKER'S CRYSTAL CASE WATCHES.

PRIZE MEDAL, 1862.

JOHN WALKER,

CHRONOMETER, WATCH AND CLOCK MAKER

(BY APPOINTMENT), TO THE

English, Indian, Foreign, and Colonial Railways,

68, CORNHILL, AND 230, REGENT STREET, LONDON.

J. W. SOLICITS the attention of Military and Naval Officers and the Public of China to his CRYSTAL CASE WATCHES, as they are especially adapted for foreign use.

The CRYSTAL CASE WATCH is so constructed that it entirely obviates the necessity of a Hunting Case Watch, as it is much stronger and cannot so easily get out of repair. Description Pamphlets with List of Prices on application.

PEACOCK & BUCHAN'S COMPOSITION FOR IRON SHIPS

THIS is now established as the best and cheapest Composition known for keeping the Bottoms of Iron Ships CLEAN and free from Corrosion or GALVANIC ACTION. Apply to the Manufacturers direct, at SOUTHAMPTON, or to their accredited Agents at all the principal sea ports of the world.

From Captain John Ralph Engledue, Managing Director of the Thames Iron Works Ship Building, Engineering, and Dry Dock Company, Orchard-yard, Blackwall:—

"The Thames Iron Works, Ship Building, Engineering, and Dry Dock Company (Limited),
"Orchard-yard, Blackwall, E., September, 26th, 1865.

"Messrs. Peacock and Buchan.

"Gentlemen,—I shall at all times have much pleasure in bearing testimony as to the value and superiority of your Compositions for Ships' bottoms.

"I have used the No. 2 extensively for the last fifteen years, more particularly on the bottoms of the iron ships belonging to the Peninsular and Oriental Steam Navigation Company, and in every instance successfully. It is easily applied, economical, keeps the bottom CLEAN, and also has the property of preserving the iron.

'I visited, in dock, an iron SAILING vessel, called the 'Chile,' a few weeks since, and found her bottom perfectly clean, which had been coated with your Composition for upwards of twelve months, having made a voyage to New Zealand and back, and in salt water the whole time.

'I have also used your No. 1 Composition for the bottoms of wooden ships, coppered, and found it most advantageous, making the copper last double the usual time, and then only taken off to recaulk.

"I have at various times tried preparations of copper on iron ships, and in every case found the iron and rivets damaged.—I am, Gentlemen, yours faithfully,

"(Signed) J. R. ENGLEDUE."

"Egyptian Navigation Company, Azeeziah Mussriah, 61, Mark-lane, 7th July, 1865.

"Messrs. Peacock and Buchan, 39, Upper East Smithfield.

"Dear Sirs,—I have received orders to send to Egypt three tons of your patent Composition for ships' bottoms, same as supplied me in July, 1864. I now wish to know the soonest time you could have this packed and ready for shipment, as there is one of the Company's steamers leaving London about the end of next week. Please reply by return, and state price.—I remain, yours obediently,

(Signed) D. ABDUL HAMID BEY,
"I. FRICKEN."

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York and at 37, Gracechurch-street London.

Office. 12, George-yard, Lombard-street, London, E.C.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

MESSRS. COLLARD & COLLARD

FIND it NECESSARY to CAUTION the Public against the EXTENSIVE FRAUDULENT USE of their NAMES in the COLONIES, and urge on Purchasers the necessity of Examining very Carefully the NAME-BOARD of any INSTRUMENT they may be Buying; but especially they recommend that in all cases Respectable DEALERS or PROFESSORS of MUSIC should be CONSULTED for GUIDANCE.

A Certificate of Authenticity accompanies every Instrument sent abroad by Messrs. COLLARD and COLLARD.

16, GROSVENOR-STREET, and 26, CHEAPSIDE, LONDON.

PRIZE MEDAL,
INTERNATIONAL EXHIBITION, 1862.
AWARDED TO

F. MORDAN,

FOR

IMPROVEMENT IN WRITING MATERIAL

F. MORDAN'S EVERLASTING GOLD PEN is now established in reputation as the most beautiful, useful, and truly economical Pen ever manufactured. Thirty years' experience has only increased the estimation in which it is held, and tested the value of the warranty given with it. F. MORDAN can now proudly point to a sale of upwards of 90,000.

F. MORDAN'S PATENT PNEUMATIC INKSTANDS, the most useful and simple ever offered to the public, perfectly protecting the ink from dust or evaporation.

F. MORDAN'S WRITING, COPYING, BLUE, BLUE BLACK, BLACK, COLOURED, and MARKING INKS, in bottles of new and useful designs, with patent spouts and stoppers. These bottles are rapidly superseding all others, there being no increase of price for these improvements.

F. MORDAN'S PERFUMED MAUVE INK for Ladies' writing.

F. MORDAN'S SCENTED SEALING WAX in fancy colours; also HARD INDIA WAX for warm climates.

F. MORDAN'S LIQUID GLUE, for mending Glass, China, Wood, Metals, &c.

F. MORDAN'S PREPARED LIQUID GUM, for Office use, and general purposes.

Merchants and Shippers can obtain Illustrated Catalogues on application at the Manufactory,

ALBION WORKS, 326, CITY ROAD, LONDON.

---

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,
WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

FURTHER REDUCTION IN PRICE—FIRST QUALITY.

ARNOLD, Commander; loading in the West India Docks. This beautiful vessel has a full poop, with every accommodation for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

COLOMBO LINE of PACKETS.

Will meet with the usual Quick Despatch.

DIRECT for COLOMBO, the favorite clipper ship, FRANCES, A 1 thirteen years, 310 tons register, J. HIGGS, Commander, West India Docks. This splendid vessel is well-known for her very rapid passages; has recently returned from Colombo, making the fastest passage of any ship sailing at the same time, thus offering a first-rate opportunity to shippers.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

A Regular Trader.

Will meet with the usual Quick Despatch.

DIRECT for COLOMBO, the splendid clipper-built ship FRANCES, A 1 thirteen years, 489 tons register, FRANCIS HILL, Commander, lying in the West India Docks. This fine vessel, well known in the Colombo Trade for her quick passages and sound delivery of cargo, is recommended to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will have the usual quick dispatch.

DIRECT for COLOMBO, the splendid high-classed clipper ship GRANVILLE, A 1 15 years, 696 tons register, G. GALLICHAN, Commander; lying in the West India Docks. This very high-classed vessel, well known in the Ceylon trade, is confidently recommended to shippers.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

A REGULAR TRADER.

To follow the "EXCELSIOR," with Quick Despatch.

DIRECT FOR COLOMBO, COCHIN (BEYPORE or CALICUT), CANNANORE and MANGALORE, the beautiful British-built clipper ship, STAR of CEYLON, A 1 ten years, 399 tons register, A. MATTHEW, Commander; lying in the St. Katharine Docks. This fine little ship, well-known in the trade, offers a first-rate opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's Bishopsgate-street, E.C.

The latest telegrams are up to the 24th Aug., from Hong Kong, and from Shanghai to 19th. The present mail has on board 830 bales silk.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per P. and O. steamer Surat, arrived Sept. 13.—From Hong Kong: Mr. H. E. Amoore, Mr. Douglas Lapraik, Captain Hall, Messrs. Pavia, Barba, Carmichael, and Morrison. From Singapore: Mr. and Mrs. Dandignor, Mr. von Plotz.

To Southampton, per steamer Poonah, expected to arrive Sept. 20.—From Hong Kong: Captains Bosustow and van Salphood, Mr. O. S. Baptista, Captain Gibb, Messrs Logan, Scherar, Olive, and J. W. Page, Colonel Macdonald, Mr. Macdonald. From Singapore: Mr. and Mrs. Hankin, Miss Bansch, five children, and ayah, Mrs. Armitage, Mrs. Holmes and child. From Penang: Lieutenant Curtois.

To Gibraltar.—From Hong Kong: Mr. O. Neale.

To Suez, per Nubia.—From Shanghai: Mr. and Mrs. Ganzler. From Galle: Messrs. Harper Creswick, Ragiozzi, and Vine.

PASSENGERS OUTWARD.

Per P. and O. steamer Pera, from Southampton, Sept. 4.—To Hong Kong: Mr. Phillips Mr. H. Beveridge, Mr. G. P. Duncanson, Mr. J. T. Hudson, and Mr. J. W. Hunt, Dr Maxwell, R.N., Assistant-Surgeon McMorris, R.N., Captain Adams and two second-class passengers. To Shanghai: Mr. A. Warwick, Mr. J. Grant. To Ceylon: Mr. P. Moir, Mrs. A. Carey and two children, Mr. and Mrs. Smith, Mr. Dalton, Mr. J. K. Clarke, Mr. and Mrs. Bisset, Captain Creagh, Mr. J. G. Smither, Assistant-Surgeon Ewatt, Mr. J. Clarke, Mr. W. Fyffe and five second-class passengers. To Singapore: Mr. R. J. Sargeant. To Calcutta: Mr. and Mrs. Avdall, Mrs. Spencer and two children, Major G. Sweeney, Mr. and Mrs. Capper, Mr. C. White, Professor Forster Hill, Mr. A. Griffiths, Mr. J. Brander, Mr. Home, Lieutenant Hime, Mr. M. Holland, Miss Warne, Ensign Begbie, Messrs. Cogswell, Cronne, R. Oldham, C. Swaffe, W. Sherman, J. Craig, R. F. Stein, and J. Hannen, Rev. G. Girling, Mrs. W. H. Bradbury, Mr. A. McAlpine, Mr. W. Hardie, Mrs. E. James, Mr. W. C. Midwinter, Mr. R. Beynon, Mrs. Naismith, Mr. Saunders, Lieut. Dorward, Mr. R. Levinge, Mrs. Beale and two children, Captain Boddam and nephew, Mrs. Boddam, Vet. Surg. Walker, Staff Assistant Surgeons Minty and Fishbourne, Messrs. T. Smith and A. Gray, and ten second-class passengers. To Madras: Dr. Montgomery and four second-class passengers.

From Marseilles Sept. 12.—To Hong Kong: Mr. and Mrs. Sinclair, Mr. C. M. Kerr, Mr. W. Holt, Chief Justice and Mrs. Smale, Miss Smale, Mr. Smale, jun., Mr. Schmidt, Mr. McMicken, Mrs. O. Elmenhorst, Mr. T. Achli, and one second-class passenger. To Shanghai: Mrs. Forrest, Mr. and Mrs. Stammann, Messrs. R. Verlinden, A. Thys, J. M. Guisset, G. Meyer, and L. Fransenbach, and one second-class passenger. To Ceylon: Mr. W. Mowatt, Mr. J. R. Bruce. To Calcutta: Mr. and Mrs. F. A. Cohen, Mr. and Mrs. Reinholt, Mr. J. P. Griffith, Mr. Wienholt, Mr. G. Teske, Mr. L. A. Cohen, Colonel Atlay, Mr. R. White, Messrs. J. Jonas, J. H. Clarke, Ross, and J. Frances, Major E. and Mrs. Oakes, Messrs. R. H. Ramsay, Colley, C. Walker, and C. Carne, Major Miller, Mr. Smallwood, Mr. and Mrs. Waite, Mr. and Mrs. Severin, Mr. G. R. Clarke, Mr. E. L. Beake, and one second-class passenger. To Madras: Mr. and Mrs. Nicholas, Capt. Stoddart, and one second-class passenger.

From Gibraltar.—To Hong Kong: H.E. Jn. Maria de Ponte e Horta, Don. J. Z. da Silva Sabo and lady.

Per French steamer Peluse, from Marseilles, Sept. 19.—To Singapore: Mrs. P. W. Auchincloss, Mr. R. M. Hay. To Shanghai: Mr. J. von Gumpach, Mr. and Mrs. Hart, Mr. and Mrs. Campbell, Mr. E. Waller.

Per P. and O. steamer, from Marseilles, Sept. 20.—To Hong Kong (V.B.): Capt and Mrs. Gronewold.

Per P. and O. steamer, from Southampton, Sept. 20.—To Hong Kong: Mr. John Brown, Mr. Griffiths, R.N., Mrs. W. Bell, Staff Surgeon Major Robertson, Staff Assistant Surgeon Mount, Miss Robertson. To Ceylon: Mr. L. Carey, Mr. and Mrs. Strachan and three daughters, Staff Surgeon Skipton.

From Marseilles, Sept. 28.—To Singapore: His Highness the Tumongong of Johore and two friends, Mr. T. Scott. To Hong Kong: Capt. Maxwell.

Per P. and O. steamer, from Southampton, Sept. 27.—For Hong Kong, (V.B.): Mr. Peter Orme, Mrs. Green and two children. To Singapore (V.B.): Mr. T. Steel. To Yokohama (V.B.): Mr. James Bisset. To Penang (V.B.): Mr. W. Mackay.

From Marseilles, Oct. 4.—To Shanghai (via Bombay): Mr. T. A. Cowderoy, Mr. P. A. Gerrard. To Ceylon: Mr. Heycock. To Hong Kong (via Bombay): Mr. L. J. Swire.

Per P. and O steamer, from Southampton, Oct. 4.—To Shanghai: Miss J. T. Blackwell. To Hong Kong: Mr. A. Zinnern, Mr. A. J. Macleod. To Shanghai: Reverend D. Perkis.

From Marseilles, Oct. 12.—To Singapore: Mr. and Mrs. Cumming.

Per P. and O. steamer, from Southampton, Oct. 12.—To Ceylon: Sir John Cheape, Mr. Cheape, Capt. Allfrey, Mr. G. Paterson.

From Marseilles, Oct. 20.—To Singapore: Mr. T. Shelford. To Hong Kong: Mr. G Phillips, Mr. R. C. Antrobus. To Shanghai: Mrs. W. Hart, Miss Norris.

Per P. and O. steamer, from Southampton, Oct. 20.—To Hong Kong: Mr. R. M. Stephenson, Mrs. Carnegie, Miss Kate Smith. To Singapore: Miss Harper. To Ceylon: Mrs. A. Maitland.

From Marseilles, Oct. 28.—To Shanghai: Mr. W. Watson. To Hong Kong: Mr. Robertson, Mr. Lobscheid. To Singapore: Mr. Braddell. To Ceylon: Mr. G. Yule.

Per P. and O. steamer, from Southampton, Oct. 27.—To Ceylon: Mrs. Dixon, Mr. A. T. Anderson.

Per P. and O. steamer, from Southampton, Nov. 4.—To Yokohama: Mr. E. Trotter. To Shanghai: Mrs. Wadman. To Hong Kong: Mr. E. Bigg, Mrs. F. B. Johnson and two children, Mrs. D. O. Clarke and child, Mr. and Mrs. W. T. Richardson. To Ceylon: Mr. Justice Thompson.

From Marseilles, Nov. 12.—To Hong Kong: Mr. P. J. Forbes, Mr. E. Cunningham, Mr. G. Hughes, Mr. D. King, junr. To Shanghai: Colonel Raikes. To Ceylon: Major Skinner.

Per P. and O. steamer from Southampton, Nov. 20.—To Singapore: Mr. Meldrum Miss Jewry.

From Marseilles, Nov. 28.—To Ceylon: Mr. P. W. Braybooke.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates are to the 13th July, or only one day later than per French mail published in our issue of 5th inst. By way of San Francisco and New York, however, we have news to the 16th, stating that the war of the Tycoon against Chosiu had been ended by confiscating one-third of the revenue of the latter, relieving him from power, and transferring his rank to his grandson. The speculations and comments of the local press received by this mail are, therefore, neutralised to a great extent. There appears to be some truth in our correspondent's fears (in our last issue, September 5th), that silk would not be brought into the market as usual, for the present steamer brings only 43 bales Japan silk.

The following items are from the *Japan Times*:—"The crisis in London can hardly be said to have had much practical effect on our export market, from the circumstance of the news reaching us at the dull season of the year, before any new silk had arrived and before the new season's teas had come down in any quantity. Our import market was already so dull and depressed, for reasons lately given very fully, that, though certain forced sales at still lower prices than our last quotations have been made, the only farther disadvantage experienced by merchants interested in European goods has been in making remittances, the Oriental and Mercantile Banks having naturally taken advantage of the situation and lowered the rate for sterling bank paper to a point at which they can get dollars here about 2d. cheaper than by importing them in the

"Our readers will probably remember the name of Kubota Sentaro, lately in command of the Japanese Garrison here. He was, on the occasion of the review and sham fight on March

Digitized by Google

21st, the guest of Colonel Brown, of H.M.'s 20th Regt., and directed the movements of the Japanese troops on that day. He was well known and much liked by many officers of the regiment which has just left us. It is with much regret that we have to tell, as we are sure it is with sorrow that his friends in the 20th at Hong Kong will hear, the sad end to this able and promising officer's career.

"The excitement caused in mercantile circles by the news from home having quickly subsided, commercial men have now been able to give due examination to the new Convention and Tariff. These are found to be highly unsatisfactory. The Chamber of Commerce, after a long and laborious sitting, has passed resolutions strongly condemnatory of the new arrangements and have instructed their corresponding committee to address the Chambers of China, and such in Europe and America as are interested in the Japan trade, with a view, by united action, to obtain from the various Governments represented in the late Conference, a disavowal of their Ministers' proceedings. We thoroughly agree with the Chamber. Sir Harry Parkes, who is known to have taken the leading part in the recent Conferences, has, it must not be forgotten, a great reputation for "energy" to keep up. But on this occasion he seems to have confused the qualities of haste and power. The Japanese plenipotentiaries delighted the foreign Minister, it appears, with their ready acquiescence in almost all the new propositions submitted to them. Doubtless we shall be able to show, while examining the tariff, that every one of the important changes are in favour of the native Government. It will be remarked that we have found it necessary to preface our examination of the Convention by commenting on the cavalier treatment of the mercantile body at the hands of the officials. "T'was ever thus:" from this Settlement's "childhood's hour," when a paternal Government sent an ex-medico from the Spanish Legion, obstinate and self-opinionated,—a Minister,—and a good-tempered, simple heavy dragoon for a Consul, the mercantile community of Yokohama has been most unfairly degraded in the eyes of the Japanese by the treatment it has received from the British officials. We are still willing to believe that in the present instance the discourtesy shown to the Chamber of Commerce was unintentional, but in such case an oversight has the same effect on the native mind as a deliberate slight. Had Sir Harry Parkes treated the merchants with more consideration, he would have saved himself the humiliation of being out-manœuvred by the Japanese, and averted from foreign trade the considerable damage which it has received.

"The system of bonded warehouses has been inaugurated, and is now in operation under the direction of Mr. Benjamin Seare, a gentleman whose name is well known to merchants in China and London as that of a man thoroughly conversant with the system. Complaints are made that the tariff of storage charges is excessive; but this an evil which will cure itself. A revision of the scale is promised on the 1st of September next. One great omission was made in the Convention. Drawbacks on goods now in the place, which overstock our import market, as we recently showed, should have been made a *sine qua non*. There are many merchants who had made up their minds to re-export, could they have got back the duties they had paid, and resistance to their claim was illogical and most unfair. This is one of the chief points where Sir Harry Parkes deserves censure for giving way.

"We need not remark on the fall of the Commercial Bank. We regret to have to announce that the Central Bank of Western India has also closed its doors here. This bank was the first established in Yokohama and, for over two years, had a clear lead among the financial institutions of the place. But with so many and such powerful rivals to contend against it has been unable, during the bad times of 1865-6, to hold its position, and the directors at head-office have probably acted wisely in contracting the field of their operations at the present time. We must not omit to notice the advent of the Hong Kong and Shanghai Bank, a branch of which has just been opened under the able direction of Mr. Robert Brett, a financier very favourably known here, and who has certainly the advantage of a far larger experience of Japanese business than any other banker in the place. Established on what may be called the "mutual benefit" principle, the same as that of the China insurance companies, we can predict with safety a brilliant future for this bank in Yokohama."

NAGASAKI.

Advices from this port are to the 17th July, and announce the arrival of Sir Harry Parkes, who intended a visit with the Admiral to Kagosima (we presume to Satsuma).

The P. and O. steamer *Granada* had been sold for $109,000, and the *Yedo* for about $70,000.

Private advices by telegram mention the sale of the steamer *Eagle*, lately despatched by E. M. de Bussche, Esq., from this, at $180,000, equivalent to about £40,000.

CHINA.

TIENTSIN.

From this port our advices are to the 11th July. The following is from Messrs. Platt and Co.'s Monthly Report:—

Private telegrams dated "London, 10th June," have arrived by the "Kiachta route," but the most recent public ones arrived on the 9th July, ex-French Mail of the 18th May, and bear dates "London, 5th June."

PIECE GOODS.—Our market for piece goods followed those of the south in their depressive movement throughout last month, and although considerable business resulted from the low prices then ruling, it was occasioned solely by the natives seizing the opportunity to lay in stock at the then unexpectedly low rates, and not from an increased and legitimate demand from the interior where the inquiry is by no means buoyant. We fear, therefore, that the rise in price and greater firmness of holders which this market has experienced within the last few days will greatly check operations. Imports for the time of year are excessive, and chiefly on native account, whilst the bulk are being stored for the fall trade.

GREY SHIRTINGS.—Quotations to date are at tls. 2.9 to tls. 3 per piece, but no European sales at these rates have as yet taken place.

RAW COTTON.—Export to 30th June 82,515 piculs. Since then the improvement has been still more marked owing to the imports by the last three steamers being exceedingly small.

The spirited little community of Tientsin, who are celebrated for their laudable efforts to lessen the tedium of a Chinese exile, have lately set on foot a promising little amateur theatre, which was inaugurated on the evening of the 23rd instant by the production of "On the Sly" and "Whitebait at Greenwich." The audience on the occasion was agreeably increased by the timely arrival of Sir Edmund Hornby and the officers of H.B.M.S. *Barrosa*, and a well-filled house, for Tientsin, greeted the amateurs on the rising of the curtain.

The general arrangements of the theatre were complete and well carried out. They reflected great credit on the managing committee. The parts one and all were excellently played, and on the whole the first performance of the *corps dramatique* of Tientsin may be pronounced a great success. There is every reason to hope that, with increased appliances, and with a little further trouble, their future performances will prove the Tientsin stage second to none in China.

SHANGHAI.

The following items are from the *Commercial Record* of the 22nd of July:—

"The news from the interior and from the North with respect to the movements of the Nienfei and the Mahometan rebels is of a somewhat serious character, though unfortunately coming only from native sources it bears the usual vague and unsatisfactory stamp. There is, however, no doubt that the Nienfei are pushing their way in the Kiangsu Province, and we hear upon reliable authority that they are now assembled in

Digitized by Google

considerable numbers about T'ung-tai; to which place they made their way by a circuitous route and forced marches along the sea-board; having evaded Tseng-kwo-fan and his forces around Tsing-kiang-fu. The complete incompetence of the Chinese Government to cope with any disorders which may spring up receives fresh illustration from day to day, and there scarcely appears to be a hope that tranquillity will ever again be restored by them without foreign aid; as even troops disciplined after the foreign mode of drill are useless when brought into the field unless by Europeans.

"Advices have been received from Newchwang to the effect that the trial of eight of the men who recently attacked Mr. Knight was being proceeded with; and that a number of men supposed to be concerned in the affray were being kept prisoners on board the *Wachusetts*. That vessel is to proceed to Taku and Mr. Knight will go in her *en route* for Peking, with a view, we understand, of having the matter laid before the Imperial Government.

"A disturbance of a somewhat serious nature has taken place at Chin Hai in consequence of the fishermen refusing the taxes demanded by a Mandarin sent to collect them. It appears that they seized the man and put him to death, and that in consequence some troops were sent to the spot, and the fishermen, two hundred in number, were forced to give up hostages from each of their boats. One man was decapitated on the spot. The sea wall at Hang-chow has again given way, causing a serious flood and large destruction of life and property. This wall seems to form a constant illustration of that system of neglect which in fast allowing China to fall into decay. Heavy charges are repeatedly made on the Imperial Treasury by the various local mandarins for its repairs; but as they each stay at the place but a short time a mere show of work is made, and by one after another the sea wall is made a subject of charge, but it is left as bad as ever.

"News has been received of the murder of six French missionaries in the Corea. They formed a portion of a party of nine of whom two have remained in the Corea and the third, it is stated, has proceeded to Peking to ask for the assistance of troops.

"A new set of Land Regulations for the French settlement have been published by the French Consul, by whom they were received from the Foreign-office in Paris. This has raised up the old question with respect to the nature of the jurisdiction claimed by the French in their concession, and some dissatisfaction has been felt at the amount of independent authority which is now assumed; especially as at a meeting of Consuls which took place shortly after, the French Consul refused to give his assent to the regulations now in process of formation for the English and American settlements until he had received the consent of the home Government. The Consuls have proposed a scheme for bringing the Municipal Council under judicial authority. It is suggested that that body should be suable before the consul of the nationality to which the plaintiff in any given suit belongs. This plan, though not without faults, is thought likely to prove the best that can be hit upon, considering the difficulties which Shanghai labours under in all matters of this description, and it is thought that with some few modifications it will meet its object.

"The adjourned meeting of the shareholders in the Shanghai Gas Company took place at the office of Messrs. Cowie and Co. agents, on the 16th inst., when the minutes of the previous meeting were read and confirmed; and the joint opinion of Messrs. Lawrance and Myburgh upon the legality of making a further call was read out, namely, that the company not being incorporated by any special Act, nor being under any Act of Parliament, its deed of settlement was of the nature of articles of co-partnership, and that no call could be made after the capital had been paid; and they recommended that the capital, stock, and plant of the company should be mortgaged for the purpose of obtaining the necessary funds. The Chairman laid before the meeting the accounts prepared in accordance with the resolution at the last meeting; and Mr. Hargreaves asked for explanations of several items in them, and complained that the dependencies now laid before the meeting had not been previously given more in detail. A lengthened discussion took place as to the best mode of paying off the loan due to the Mercantile Bank, and it was suggested that debentures bearing interest at 12 per cent. per annum might with advantage be issued. It was agreed that the liabilities of the company, viz., tls. 40,575.50, should be met by a loan voluntarily subscribed among the shareholders, to be secured by the issue of debentures, repayable in five years, and protected by mortgage of the plant, land and building of the company, bearing interest payable yearly at the rate of 12 per cent. per annum. The Chairman stated that there was some probability of being able to obtain the money upon loan from Hong Kong, but that as yet no definite reply had been received from the parties communicated with. The opinion of the shareholders present was taken as to the amounts they would be willing to take up on debenture when tls. 6,100 was readily subscribed for. It was however, decided, that the subscription loan should not be circulated until directors receive replies from persons already in correspondence regarding the loan, and that in the event of it being offered elsewhere, the directors be empowered to accept the same for six months.

"Maclean and West, two British subjects concerned tin the robbery of some bags of dollars from a house-boat in the Soochow Creek, in the course of which a Chinaman was killed, have been tried at the Supreme Courts. The verdict returned was to the effect that the prisoners were guilty of the robbery but that there was not sufficient evidence of the way in which the Chinaman came by his death to convict them of murder. Thompson, a notorious character, who is an American, and, was implicated in the matter, has also stood his trial for murder, but the decision of the Court has not yet been given."

At the final meeting of creditors in the estate of Chan-Lai-Sun and G. W. Johnson, for the purpose of application being made for discharge, Mr. Eames, who appeared on behalf of the estate of the late Bishop Boone, opposed the discharge of Chan-Lai-Lun upon the grounds mentioned at previous meetings; namely, that he was not satisfied as to the nature of a transaction with reference to the lease on building terms of a plot of land to Messrs. Hayes and Nixon; which it appeared had previous to being leased, been mortgaged to Mr. Caldecott Smith. Mr. Lai-Sun stated that he had intimated the circumstance to Messrs. Hayes and Nixon at the time the lease was effected, but this was denied in evidence by both those gentlemen. The plot of land, Mr. Eames contended, ought to come into the estate as an asset; while it had been left out as an inadequate security for the sum of tls. 6,000 though with the houses built upon it, it would be worth far more than that amount. After taking these circumstances into consideration, the Court decided to suspend Lai-Sun's certificate for six months, allowing him, however, to retain for his use a salary of $120 per month which he stated he was drawing from a house in Foochow, for which he was acting. Mr. Johnson's discharge was granted.

Judge Sir Edmund Hornby has returned from Peking, with what results of course we know not.

CHAMBER OF COMMERCE STATEMENT OF STOCKS OF MANUFACTURED GOODS STORED IN FOREIGN OWNED GODOWNS ON 30TH JUNE, 1866.

HONG KONG.

The following items are from the *China Mail*:—

"The termination of an interesting case came before the Court on the 14th, relative to the time of starting the Canton steamers. Mr. Rowett brought an action against the Hong Kong, Canton, and Macao Steamboat Company, on the ground of the *Kinshan* having left Canton before the advertised hour. The learned judge decided that the captain had, by starting at his own time, of which due and

Digitized by Google

reasonable notice was given by the ringing of the ship's hour and warning bells, done what could reasonably be required, giving at the same time permission to appeal.

"Three of the five pirates found 'guilty of piracy with intent to murder' are to be executed to-morrow (Friday) morning at six o'clock, within the precincts of the gaol. Fourteen others have been captured, and several identified, and it is to be hoped that those guilty will share the fate of their companions. The two reprieved were admitted Queen's evidence, and pointed the whereabout of the last batch.

"The Duc d'Alençon has been paying us a visit. On Friday last a review was held of the troops in garrison, at which they acquitted themselves very fairly.

"Much discussion has been taking place relative to the acts of his Excellency the Governor. There seems to have been a sort of misunderstanding between the colonists and the head of the Government. That he is not liked by his immediate subordinates is possible, but that we fancy is the natural effect of a transition from the very easy-going way of doing business which formerly characterised official Hong Kong, to the strict discipline his Excellency is desirous of seeing carried out. It is to be hoped that the colonists will see the wisdom of not expecting too much, and that he on his part will not disdain to conciliate by attention to those trifles which frequently attract a greater share of notice than more important acts.

"The weather here is warm but the health of the colony remains pretty good. The height of the thermometer during the past week has varied between 84 and 90.

"The *Ganges* brought us intelligence of the massacre of two French bishops and seven priests in Corea, a general persecution of the Christians in that out of the way corne of the world having been inaugurated by order of the father of the youthful Prince who, nominally under China, exercises the functions of King. The unfortunate gentlemen were it is stated first cruelly tortured and then then beheaded. One comfort is that the French will probably exact a heavy penalty for this little piece of amusement on the part of the Coreans, though doubtless the *Bright-ish* section of the British community will feel horribly annoyed at the idea of France going to war with a poor unoffending nation because she has an "idea" that her priests should not be massacred. Would that a deputation of peace-mongers would wait on the French Emperor to urge clemency and be served in the way certain ambassadors were of old. For any treatment short of crucifixion Great Britain would surely demand no redress. What however is England going to do? Is France to be permitted to occupy and then annex Corea or are we to have a finger in the pie? If the saying that "one good turn deserves another" has any weight with us we must aid in teaching the top knotted savages that the conquerors of Peking are yet alive and as dangerous as ever—that the foreign Ministers in Peking are not (as they are carefully informed) tribute bearers; and that the torture of a few bishops more or less however unimportant in Corean eyes has a certain amount of importance attached to it in the Councils of the west—no matter what their nationality.

"At the meeting of the creditors of the Commercial Bank Corporation a resolution was proposed by Mr. Granville Sharpe to the effect that an application should be made to the Master of the Rolls for an order permitting the local representative of the the official liquidator to accept and receive proof of debts due by the Hong Kong branch of the bank, instead of creditors being compelled to have proof made in London as now advertised; and for an order for the payment of such proved debts (so far as consistent with the interests of the general creditors and shareholders) here instead of in London. That the attorney of the official liquidators be requested to support this application, and in the event of such application being refused, obtain an extension of the period granted for proof of debts by Hong Kong creditors. This resolution was carried without dissent, but a great many creditors abstained from voting in its favour. This being noticed by Mr. Pollard he requested the Chairman to put the resolution to the meeting a second time. This was refused by that gentleman who stated that he would put any new resolution to the creditors present. Mr. Pollard then stated that he could not ask for the terms stated in the resolution unless it was unanimous, and the meeting separated without apparently any understanding having been come to."

"On the 26th three of the five pirates lately sentenced to death were executed in the Gaol compound. One of them died hard, as the phrase is, the others showing some sense of the fate which had overtaken them.

"The great event of the week, however, so far as active movements are concerned is the destruction of 13 pirates junks in Samoy bay, by H.M. ships *Opossum* and *Osprey*. They seem to have done their duty thoroughly well, and more than that, disinterestly; for a large amount of cargo was burnt in the junks which had it been sold would have realised a very handsome amount of prize money. Sooner than risk this again falling into piratical hands it was destroyed. We are glad to earn that the Commodore has mentioned the officers employed most favourably to the home authorities. The Mandarin who accompanied the party was unfortunately killed through an excess of bravery.

"A court-martial has been dragging its slow length along for some days. The prisoner was Dr. Woodward, of H.M.'s 20th Regiment, and the charges against him apparently amounted to the fact that he had, in the use of his discretion as a medical man, overstepped the boundaries of military etiquette. We have no particular sympathies for or against Dr. Woodward, such matters being to us 'news,' which it is our function to prepare for our readers; but we protest against the want of courtesy shown to the press by the Court, or, more correctly, the President of the Court, who made himself the laughing-stock of military circles by giving *our* reporter a written memo.!"

The following confirms the notice in our last that the bank's vaults had been cleared:—

"The action taken by certain firms against the Commercial Bank being considered as sharp practice, as it was a departure from their word as pledged by their representatives at the late meeting of shareholders, was met by a counter piece of diplomacy, the available assets having been transmitted to Bombay by the last steamer. Under the circumstances it is difficult to blame the manager, for if people would not keep faith with him he was obliged to act as he judged best for the great body of creditors. We do not commend the resolution, but a promise is a promise, and should be acted up to."

Another case of rupture between bank managers is reported. The Hong Kong and Shanghai Banking Company being creditors of the Agra Bank it appears refused to pay out coin for $50,000 of their notes presented by the Agra. The manager of the Hong Kong wished to endorse these notes and return them though a notary and this course was agreed to, but before it was carried out the legal adviser of the Agra, Mr. Barnard, advised that the manager of the Hong Kong, Mr. Kresser, should be summoned for the illegal detention of $50,000 in notes, the property of his client, and asked for restitution of these notes. He proceeded, he said, under section 60 of ordinance, which he read. He also stated that defendant had been guilty of fraud at least, if not larceny, and trusted the case would be summarily dealt with. The presiding magistrate, Mr. White, very properly dismissed the case, and expressed his opinion that the action should never have been brought in this form. The accusation of having done away with $50,000 especially against a respectable gentlemen was rather a serious one. Mr. Barnard had attempted to prove under section 60 that Mr. Kresser had acted in a fraudulent manner. So far from doing so, he thought that gentleman had acted in a very straightforward manner. It was much to be regretted that the summons was ever taken out, as there was no foundation whatsoever for the charge.

The same magistrate has also decided that holders of Agra Bank notes were entitled to judgment. The decision was:—

"In this case the bank is clearly liable to the plaintiff. It is, however, contended that the bank had suspended payment and by so doing had committed an act of bankruptcy, and therefore that the plaintiff must come in with the other creditors of the defendants, and prove his debt in the ordinary way,

"It is, however, by no means clear that under our local law of bankruptcy as regulated by Ordinance No. 5 of 1864, an incorporated company can become bankrupt, and were it perfectly settled that it could, still, I do not see how the manager of a branch bank can by any act of his, render the company, of which he is merely the agent bankrupt.

"Mr. Barnard, on behalf of the defendants, proposed to give in evidence a telegram which Mr. Anderson had received announcing that the head bank in London had suspended payment. That, however, I refused to receive on two grounds; in the first place, because I know of no case in which such evidence has been allowed, and in the second place, the telegram did not purport to come direct from the Agra Bank in London, but from a firm in Galle. However, even if I had admitted it I do not see in what respect my decision would have been different. The fact that the Agra and Masterman's Bank has suspended payment is not likely now to be disputed, and it will of course be soon wound-up, under the provisions of the Companies' Act (25 and 26 Victoria, Cap. 89). It does not, how-

Digitized by Google

ever, necessarily follow that it will be wound up in bankruptcy, and in any case the English Acts do not extend here."

"The law affecting branches here of companies incorporated at home is in a complicated and unsatisfactory state, and demands grave consideration.

"There is one provision especially of the companies' Act which for the security of residents here and in other colonies should be rendered general, and that is section 182, by which banking companies issuing notes in the United Kingdom are subject to unlimited liability in respect of such issue. I think such unlimited liability should extend to every place where notes are issued, and then cases like the present one would not be brought before the Court.

"I give the plaintiff a decree for $130 and costs."

Mr. Barnard, the Attorney for the Agra, applied to appeal.

His Honour granted leave.

The Governor, in laying the estimates for 1867 before the Council, said:—

"I have not even ventured to strike out votes for ornamenting public grounds, planting of trees, and such things as are not merely necessary in the most meagre acceptation of the term, but are symptoms of a refined and civilised tone in the community. I do not believe I should truly interpret your wishes if I were to do so. I have therefore judged it better to meet the crisis by not abandoning any useful work or evident duty, merely because it entails expense. I prefer inserting all that I think consists with our duty, the position of the Colony, and the natural expectations of those whose affairs we administer—and trusting to you to make good the deficiency. I have therefore proposed an expenditure of $970,000, including $165,000 for public works, though I do not believe you will have really a revenue of more than $852,000.

There will thus be a deficit on the year of nearly $120,000, and I apprehend that you will find it expedient to make good that deficiency by increased taxation in some form, and I know of none less objectionable than the Stamp Act, which has proved a source of so much profit to the Singapore Government with so little injury to the community.

THE NEW ORDINANCES.

The New Ordinances were then intrdouced one after the other and read a first time.

They were:—

1st. The Estimate for 1867.
2nd. The Harbours and Coasts Ordinance.
4th. The Registration Ordinance.
5th. The Piracy Court Ordinance.
6th. The Order and Cleanliness Ordinance.
7th. The Vacation of the Supreme Court Ordinance.

With reference to the Ordinance for the establishment of a Special Court for the trial of pirates the acting Chief Justice said that he was strongly of opinion that the Legislative Council had no power to pass such a measure.

When all the Ordinances had been taken as read a first time the Governor said that he thought it would be better not to attempt the discussion of such a mass of legislation without due deliberation on its details. He would therefore adjourn the Council for the present without fixing another day for its next meeting, and he hoped that in the interval which would elapse the members would come freely to him and to the Attorney-General with the view of asking any questions in connection with the proposed Ordinances, or of making any suggestions which might occur to them. The Council then adjourned.

On the Governor's proposals for new taxation the *Overland Trade Report* says:—

"It was understood that there was a considerable deficit in the accounts, and that at the meeting of the Council, which was long expected, the Governor would bring forward some financial measure by means of which the treasury could be recruited. When the time came, he not only brought forward his budget, but a quantity of legislation as well, directed towards the suppression of the various evils which have so long been rampant in Hong Kong. He explained that he had considered it advisable to bring forward all the Bills then laid on the table *en bloc*, because the estimates were to some extent modified by them, and it was better that the members of the Council should have an opportunity of considering the financial proposals and the draft ordinances at the same time. The total estimates for the year amounted to 803,600 dollars. In contemplating the measures necessary for meeting this expenditure the Governor reviewed the accounts for the last six years, showing that in the year 1863 the expenditure for the first time exceeded the revenue. In every year since then there had been a deficit, and the accumulations of the land premiums had now been entirely swept away. The Governor argued, therefore, that inasmuch as the expenditure must be permanently in excess of the revenue, the only way of meeting the present financial difficulty was to raise more money by taxation. The first six months of this year the expenditure will have exceeded the revenue by $75,000, and at the conclusion of the year a deficit of $100,000 may be expected. These calculations, indeed, which are those of the Auditor-general, are more favourable than some that have been prepared by other officers of the Government. Under these circumstances, therefore, and in face of the possible necessity of borrowing money to meet the immediate obligations of the colony, the Governor considered an increase of taxation inevitable, and announced his intention of bringing forward a measure modelled upon the Stamp Act of Singapore. This Bill he will lay before the next meeting of the Legislative Council. In the meantime he laid on the table the series of ordinances above referred to. These were—first, the estimates for 1867, secondly, the harbours and coasts ordinance, which is directed to the removal of one of the grossest anomalies which have been observable hitherto in the administration of this colony. This is the freedom which native craft of all kinds have up to this time enjoyed of coming and going as they pleased in the harbour of Victoria without being subjected to any of the simplest port regulations to which civilised vessels have to conform. The result of this freedom has been that the harbour of Victoria has been one of the securest refuges for pirates which could be found anywhere along this coast. In future, under this ordinance, all junks entering the harbour will have to report themselves at the harbour master's office, state their character, and obtain a proper clearance before they will be allowed to leave. Another of the new Bills is intended to provide a special court, consisting of the chief justice, the admiral of the station, the senior naval officer at Hong Kong, the judge of the summary court, and two unofficial members, for the trial of piracy cases. Another ordinance provides for the registration of all Chinese houses in the colony and all native servants. Another for new police regulations directed to securing greater attention on the part of the Chinese to ordinary sanitary precautions. The ordinances together constitute what has been called a 'social revolution' in Hong Kong, but the revolution has been so much wanted that it is welcomed by all parties; and although, as will be seen by the comments of the local press, the proposal for a stamp act will be highly unpopular, there is a general disposition to acknowledge in the heartiest manner the energy which the Governor has shown in grappling with difficulties which encountered him on assuming the administration of this colony."

PHILIPPINES.

MANILA.

Dates *via* Hong Kong are to the 23rd July. The London mail of 26th May arrived on the 8th July. The following letter gives some interesting items:—

"The only two items worthy of mention are, first, the failure of Government in receiving bids for the loan advertised to take place on the 20th of last month. As I wrote to you in my last, 1½ millions of dollars were required, Government fixing the rate at 96. The amount of coupons were of $1,000 each. The only bids offered were for $3,000 at par, which were accepted, and $25,000 at 90, which were refused. Under the idea that sufficient time was not given to the public to take the loan, another attempt is now being made, by keeping it open for ten days, fixing the rate again at 96. Whether this time the Government will be more successful is greatly doubted, but "*Vamos a ver*," as we say here. The second occurrence is the recal of our present Governor-General, which pleases everybody; for in the short time that the present incumbent has had his post, he has made himself disliked by high and low. The Indians or natives took a dislike to him during the first fourteen days of his stay for not assisting at a fire, a custom which has been so far followed by every Captain-General we have had.

"It is now some months ago that five or six Chinamen, principally the oldest and most influential residents, received a peremptory order to leave the islands by the next steamer, allowing them barely sufficient time to regulate their business. As this was a great prejudice to the foreign mercantile community who had dealings with these Chinamen, the whole body met together, and the different foreign Consuls were requested to lay the matter before the Governor. As we have only two diplomatic Consuls here, those of France and England, and the latter only a Vice, the Governor thought fit to snub them, and went so far as to insult one of the Consuls of another Power, refusing at the same time to grant their request, or even allow the Chinamen time enough to regulate their affairs, saying moreover that the interests of commerce were no concern of his. Of course, as you can well imagine, this affair created quite a sensation here in Manila, and by the following steamer not alone did the reports of the Consuls to their Governments go home but likewise everybody who had friends in Government service at Madrid wrote to them, giving them, of course, different versions. The Governor committed at the time a great blunder by not reporting the matter to the home authorities. In the meanwhile the Chinamen were first allowed a week, then a fortnight, and at last only two of them were ordered to leave, and they returned again in six weeks.

"On the different reports reaching Madrid the affair created quite a sensation. It came before the courts, and the different opposition papers had great articles about it, and the result was that another General was appointed. This would have been all very well had the Government notified the present one here officially of it, but it only sent an order to have a steamer waiting at Singapore by a certain day, and it is supposed that the now General brings the order, relieving the present one himself. The Captain-general is very much disgusted with the affair, and thinks it most dishonouring to evacuate his position in this manner. Our rainy season has fairly set in, and for the last fourteen days we have had a continued spell of wet days."

MALACCA STRAITS.

SINGAPORE.

The *Straits Times* of 6th August has the following summary of news:—

The London mail of the 26th June arrived here by the P.

Digitized by Google

and O. steamer *Northam* on the morning of the 28th July—an exceptionally short transit; by this opportunity we had telegrams from London to the 18th idem, and these have since been extended by way of Calcutta to the 19th idem.

The political concerns of the Settlement have again been brought into prominent notice—affording room for considerable discussion—owing, first, to the appearance of the annual Government Administration Report, and, second, to the receipt here of the parliamentary papers which were laid on the table of the House on the introduction of the Bill for the transference of the control of the Settlement from the India to the Colonial-office. The latter document, which is doubtless in the possession of those at home interested in the welfare of this place, has given general satisfaction here, as the recommendations it contains are as a rule in accordance with the expressed public opinion. The interruption to the passage of the Bill which the change of Ministry has occasioned is to be regretted; but it is hoped that this will not be for long. The Administration Report, the only authentic record we possess of the progress and condition of the Settlement, is the work of the local Government, and has this year been issued somewhat earlier than usual. The picture it presents is in all respects satisfactory; financially it exhibits a *bona fide* surplus of revenue over actual necessary expenditure of some £10,000, and comercially shows a continuance of that steady increase of trade which has marked the Settlement from the first.

The Governor and suite continue at Penang. Sir Benson Maxwell, who this year completed his term of office as Recorder of Penang, has accepted the recordership of Singapore, and was sworn into office on the 28th of July. During his stay of three weeks here he got through the criminal session, and disposed of nearly all the civil business of the Court. He has returned to Penang to open the session there, and only waits the appointment of a judge for that division of the Court to take up his residence here. Sir Benson Maxwell's appointment to the judgeship of Singapore gives general satisfaction, his temporary administratson of its duties since Sir Richard McCausland's departure having produced a favourable impression.

The weather for the last month has been most exceptional, characterised by heavy and continuous rains, indeed, bringing the climate back to something of the kind that must be remembered by residents twenty years ago.

A small steam pleasure yacht named the *Indrabayoo*, built for the Rajah of Laroot, measuring 63 feet in length, 10½ in breadth, and 6 in depth, has been successfully launched from the shipbuilding yard of Mr. G. Lyon, at Tanjong Rhoo.

On the 14th of July the British ship *Grenada*, John Herd, commander, from Singapore to Liverpool, near the Gaspar Island, went on a well-known reef, but got off eighteen hours after, having thrown overboard about one hundred tons divers merchandise. The captain declared that the ship was perfectly tight, and continued his voyage on the 15th. The passengers on board are one English lady, one English and two Dutch captains.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BOURNE—On the 20th June, at Yokohama, the wife of Mr. William Bourne, of a son, prematurely.

DAVIDSON—On the 17th July, at Hong Kong, Mrs. W. M. Davidson, of a daughter.

GYE—On the 20th July, at Shanghai, the wife of James Gye, Esq., of a daughter.

HUGHES—On the 14th July, at Hong Kong, the wife of Emilius Hughes, Deputy-Assistant-Commissary-General, of a son.

MACMILLAN—On the 12th July, at sea, the wife of Captain MacMillan, of the British barque Kalahome, of a son.

WELLS—On the 26th July, at Singapore, the wife of Mr. Graham Wells, of a daughter.

WILLIAMS—On the 3rd August, at New Harbour, Singapore, the wife of Mr. J. Williams, of a daughter.

MARRIAGES.

DE WICHTRACH—YOUNG.—On the 6th Sept., at St. Mary Abbotts, Kensington, by the Rev. W. J. du Boulay, Rowland de Steiger, son of the late Baron Alexander de Steiger de Wichtrach, of Berne, Switzerland, to Catherine Cecilia Christie Young, eldest surviving daughter of W. O. Young, Esq., of 1, Palace Gardens-terrace. No cards.

HOOGLANDT—PISUISSE.—On the 3rd Sept., at Maestricht, Holland, William Hooglandt, Esq., of Singapore, to Marie Louise, eldest daughter of the late Colonel Henry Pisuisse, and granddaughter of the late General Baron Ralph Dundas Tindal.

KNOX—RICE.—On the 23rd Aug., at Loghill Church, county of Limerick, by the Hon. and Rev. Aubrey Spring Rice, Octavius Newry Knox, Esq., third son of the Hon. John and Lady Mabella Knox, to Lucy, fourth daughter of the late Hon. Stephen Edmond Spring Rice, of Mount Trenchard, in the same county.

TRIGGS—KERR.—On the 6th Sept., at St. Barnabas, South Kennington, by the Rev. J. Wallis, M.A., the Rev. G. C. Triggs, curate of Old Stockwell, to Emily Eva, second daughter of the late Crawford Kerr, Esq., of Hong Kong, China, and London.

WOOD—WILL.—On the 4th Sept., at St. Mary's, Stoke Newington, by the Rev. Thomas Jackson, rector, Mr. William Wood, Chartered Bank of India, Australia, and China, to Christina Cook, youngest daughter of Mr. Thomas Will, Bloomfield Villas, Park-road, Stoke Newington, late of Aberdeen. No cards.

DEATHS.

BOWRA—On the 4th Sept., suddenly, at his residence, Durrington Lodge, Surbiton, William Addenbrooke Bowra, late of Hong Kong, China, in his 50th year.

CASWELL—On the 3rd August, at Singapore, Thomas, eldest son of the late James Caswell, Esq., of Sydney, New South Wales.

CLARKE—On the 9th July, at the Murray Barracks, Hong Kong, Ellen Clarke, 20th Regt., aged 18 months.

CARR—On the 11th July, at the British Hotel, Hong Kong, Eliza, wife of Henry John Carr, aged 49 years.

COX—On the 12th July, at the General Hospital, Hong Kong, Charles Cox, Colour Sergeant, 2nd Batt. 20th Regt., aged 37 years.

DAVIDSON—On the 18th July, at Hong Kong, the infant daughter of Mr. and Mrs. W. M. Davidson.

DAVIS—On the 7th Sept., at Hollywood, Gloucestershire, after a long and painful illness, Emily, the affectionate wife of Sir John F. Davis, Bart., K.C.B., late Governor of Hong Kong.

DOCKSON—On the 7th July, at Hong Kong, John Dockson, gunner, R.A., aged 26 years.

DUTTON—On the 16th July, at Canton, Mr. S. Dutton, photographer.

FIELDING—On the 6th July, at Hong Kong, Charlotte Mann Fielding, the beloved wife of Captain James C. Fielding, Ceylon Rifles, and fourth daughter of Gother M. Parsons, Esq., late Ceylon Civil Service.

GARDNER—On the 10th July, at Macao, Johann Eduard Emil, son of William Gardner, Hamburg Tavern, Queen's-road, aged 13 months.

HARVEY—On the 24th Aug., at Bearehill, Brechin, Francis James, third son of John Harvey, Esq., Blackheath-park, aged five years and six months.

LINDSAY—On the 16th July, at the General Hospital, Hong Kong, Patrick Lindsay, private 2nd Batt., 20th Regt., aged 26 years.

REYNVAAN—On the 15th July, at Canton, Appoloneus Johannes Reynvaan, of Spring-gardens, aged 43 years.

STOAKES—On the 11th July, at the Victoria Gaol, Hong Kong, Henry Stoakes.

CHINA AND JAPAN IMPORTS.

HONG KONG.

An active business has been continued throughout the fortnight in cotton manufactures, without, however, any marked improvement in rates, owing to the large stock, and willingness of holders to meet the market. Chinese have been the principal buyers of Grey Shirtings for shipment to the North. Woollens: An active inquiry has sprung up for Long Ells, which have accordingly advanced rapidly in price, particularly scarlet sorts, of which there are very few in stock. Moderate sales have also been made of Spanish Stripes and Lastings. Camlets have not been wanted. Metals have been neglected; no sales of Nail Rod or Bar Iron are reported; Lead remains unchanged. Coals: The market has been flooded by the late large arrivals, amounting to thirty one ships in six weeks, bringing about 30,000 ton of Coals. The only sale reported is a

Digitized by Google

forced one of 3,000 tons at $9 25 to cover freight; holders, however, will not hear of submitting to a decline, and a large quantity has, consequently, been landed and stored. There is at the moment little or no demand, and the few offers that have been made have ranged from $1 to $2 below the nominal quotations.

YOKOHAMA.

Since the date of our last report the mails of the 10th and 17th May have arrived, bringing advices of a financial crisis at home unexampled for severity during the experience of the present generation. The greater part of the news having reached us by telegram, there is reason to fear that the full extent of the mischief is not yet known, and the consequent uncertainty felt as to the position of various banks and commercial firms connected with the East, is productive of much inconvenience. The effect of this state of things upon our import market, added to the depression previously existing from other causes, has been to induce large sales of goods at rapidly decreasing prices, and it was not until the French mail brought advices of a better feeling in the Shanghai market, that some of our importers ceased to force off their stocks at whatever rates could at the moment be obtained. Grey Shirtings had previously been placed as low as $3.45, but the Shanghai quotations showing a considerable margin upon this price have checked further operations, and induced the re-export of some 40,000 pieces which will materially relieve this market. Other goods have participated in the depression, especially Camlets and Taffachelass, of which the supply is now very considerable. We hear of a sale of the former to some extent at a price much below our quotations. Cotton Yarn is somewhat firmer the last few days, owing to the falling off in shipments from home, and the increasing demand for consumption. Of articles in fair inquiry we may mention Turkey Red Cloth, Velvets, Figured Orleans, and Sugar, which are saleable at a slight reduction upon the prices previously current. A small parcel of Lead has been placed at our quotations. Three arrivals have taken place from the United Kingdom during the fortnight. The new tariff came into operation on the 1st inst., and appears to give satisfaction as far as imports are concerned. The bonded warehouses have also been used to a small extent, but it is as yet too soon to give an opinion as to how the system will work.

CHINA AND JAPAN EXPORTS.

YOKOHAMA.—TEAS.—Buyers kept out of the market at the commencement of the fortnight, and forced the native merchants who were in want of funds to realise at a reduction of $2 to 3 per picul. The French Mail news afterwards caused a slight disposition to purchase, and about 3,000 piculs have found buyers. The crop this year is expected to be large, and even in excess of that of last year. Export from January 1, 1866, 3 159.150 lbs.; 1865, 3 233,000 lbs.

SHANGHAI.—Black Teas: Since the departure of last mail there has been a good inquiry for Congous, nearly 30,000 chests having found buyers at irregular prices; we may quote, however, an advance of two taels on previous rates for all good teas. The demand has been chiefly for medium to fine Ningchows (Monings), and common to good Oonams. There have been very few Oopacks settled, holders deciding to ship them rather than accept a loss on Hankow cost. One chop of fine quality has been taken at tls. 43 for Russia. Stocks continue heavy, but teamen remain firm. Settlements have been as follows:—12,800 chests Oonam, at tls. per picul 23½ to 32½ equal to Sterling per lbs. 1 5 to 1 11; 12,100 chests Ningchow at 28½, to 36½ equal to 1.8 to 2.1¼; 2,600 chests Oopack, at 30 to 34, equal to 1. 9¼ to 2. 0; 2,200 chests Hohow and Kaisow kinds, 22 to 31, equal to 1.4 to 1.10, 29,700 chests. Re-shipments, 35,100; stock, 34,000 chests. Total settlements, with re-shipments from the River ports, from 1st June to date, 112,400 chests against 83,500 chests last year. Green Teas: Three chops of Pingsuey have been settled at tls. 35, 37, and 40½ respectively, prices on about a par with the opening rates of last season. Four chops of New Shanghae-packed Fychows have also been taken at tls. 32 to 37½, and two old chops of coarse quality at tls. 20 to 24 per picul. Musters of new Moyunes may be expected in about in about five weeks. Settlements have been as follows:—3,800 half-chests, as above. Re-shipments, 89,000 half-chests. Stock, 6,500 half-chests. Total settlements, with re-shipments from Kiukiang, from 1st June to date, 13,900 half-chests, against 8,800 half-chests last year.

HANKOW.—An active business had been done in Congous during the fortnight, at prices showing no material change on previous quotations. The second crop Oopacks were arriving freely, and being considered superior to the past two seasons' growth in both strength and quality, had attracted attention, some 20 chops finding buyers at from tls. 24 to 27¾ per picul. Settlements for the fortnight were 24,000 chests, at the following prices:—Oonans, common to fine, tls. 18¼ to 28 per picul equal 1 4¾ to 1 18¼ lbs. sterling. Oopacks, fair to fine (first crop), tls. 23½ to 34 per picul equal 1 1¼ to 2 3; Medium (second crop) tls. 24 to 27¾ per picul equal 1 8¾ to 1 11 lbs sterling. Arrivals.—1866, 223,800; Settlements, 203,600; Stock, 20,200 chests. 1865, 1,70,600; Settlements, 145,300: Stock, 25,300 chests.

SILK — SHANGHAI. — Notwithstanding the receipt of advices by telegram, which under ordinary circumstances would have had the immediate effect of lowering prices, the Chinese, being fully impressed with the truth of the reported shortness of the supply of silk this season, will not dispose of their stocks unless tempted by offers which show a profit on former cost, and are nearly equal to the present rates ruling in the country. The result has been that purchases made at the close of the mail show an advance of from tls. 35 to 45 per picul on the former quotations. Tsatlee: Chops No. 1, tls. 560 to 565; chops No. 2, tls. 540 to 545; chops No. 3, tls. 520 to 525; market No. 3, tls. 500 to 510; market No. 4, tls. 480 to 490; market No. 5 and common, tls. 460 to 470 per picul. Taysaams: Chops No. 1, tls. 465 to 485; No. 2, tls. 445 to 450; No. 3, tls. 425 to 430; No. 4, No. 5, and common, tls. 400 to 410 per picul. Yuenfa: No. 1, tls. 475 to 480; No. 2, tls. 460 to 465; No. 3, tls. 440 to 445; No. 4 and common, 400 to 425 per picul.

YOKOHAMA.—The market continues quiet, only a few parcels of mixed new and old silk had been settled; Nos. 1 to 3 Mybash costing about $720 per picul. The present steamer has 100 bales engaged, and is expected to take 740 bales Chinas and Japans. Settlements for the past fortnight 800 bales. Stock, 5,000 bales.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Amsterdam: July 12, Gloria. (Reported per telegram). From Liverpool: Receipe.

At SHANGHAI.—From New York: July 19, Golden State. (Reported per Telegram). From London: Aurora Australis, Polmaise, Wild Deer.

At FOOCHOW.—None.

At HONG KONG and CANTON.—From London: July 15, Gresham. From Liverpool: 22, Adelia Carleton. From Shields: 12, Arracan. From Sunderland: 13, Runnymede. From Cardiff: 14, Pocahontas. From Newport: Congress. From New York: 12, Christopher Hall; 15, Samuel Russell; 17, Supply. (Reported per Telegram). From London: Invincible. From Sunderland: Corrientes.

At MANILA.—From Newcastle: July 10 Westward Ho.

At SINGAPORE.—From Cardiff: August 2, Luctor et Emergo, Yedo. From Newcastle: Fop Smit. From Sunderland: George Shotton. (Reported per Telegram). From Clyde: Lochleven Castle.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London: July 17, Fusiyama. 19, Vigil, 20, Star of China.

From FOOCHOW.—For London: 9, Zingra. 11, Maitland. 18, Devana. For Liverpool: 18, Everest. For America: None.

From HONG KONG and CANTON.—For London: July 17, Victoria.

From MANILA.—For New York: July 10, Sooloo, Sailor Prince. 20, Rangoon. 19, Jane Leech (via Cebu). For Boston: 14, White Swallow.

From SINGAPORE.—For London: July 27, Dovercourt. 31, Benvoirlich.

From PENANG.—For London: July 23, Oribe. Aug. 1, Balaklava, Benvenue.

VESSELS LOADING.

At YOKOHAMA.—For London: Conference.

At HANKOW.—For London: Helen Nicholson.

At SHANGHAI.—For London: Agamemnon (s.s.), Challenger, William Melhuish, Nelly, Illimani, Knight of Snowdon, Antipodes, Sir W. F. Williams, Peterborough, Lansdowne, Coral Nymph, Agamemnon, Blencathra. For Liverpool: Trebolgan. To United States: None.

At FOOCHOW.—For London: Ornate (full), Philomela, Naomi, Dewa Gungadhur, Northfleet.

At HONG KONG.—For London: Melbreck, Valdivia (full), Mary Nicholson, Cedars, Solent.

At MANILA.—For Liverpool: Benjamin Bangs. For Cork: Equinox, Prudhoe. For New York: Lady Blessington, Rattler. For Boston: Franklin.

At SINGAPORE.—For London: St. Andrew's Castle. For Liverpool: Blandina Dudley, Huntley Castle, Edinburgh Castle. For Falmouth: Maria Wilhelmina. For New York: Dunmore (*via* Penang), Jacmel packet.

At PENANG.—For London: Elizabeth.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and Tea, £2 10s. to £3 per ton; very little freight offering.

At HANKOW.—For London: The rate is reduced to £5 per ton.

At SHANGHAI.—To London: Tonnage in abundance, and freights have receded to £3; a better demand exists for coasting purposes.

At FOOCHOW.—To London: £2 to £2. 10s. per ton.

At HONG KONG and CANTON.—For London: The Melbreck has been engaged full at £2 per ton to load at Whampoa, and the Solent is filling up at same rate. The estimated number and tonnage of disengaged vessels in Hong Kong, according to the circular of G. Holmes, is 70, representing 41,205 tons.

At MANILA.—The settlements show a decline on previous rates, the following being the engagements of the fortnight:—The Jane Leech for New York, at £2 5s. for 350 tons Clayed Sugar, and £4 5s. per 20 cwt. or Hemp; the latter being shipped in Cebu. The Lady Blessington for New York, at £3 5s. per 20 cwt. for a full cargo of Hemp; Benjamin Bangs, for Liverpool, at £2 7s. 6d. for Clayed, £2 12s. 6d. Unclayed Sugar, and £3 per cwt. for Hemp; Westward Ho, Melbourne, at £2 per 20 cwt. for Unclayed Sugar.

At SINGAPORE.—To London: Sugar, £2. Measurement, £2 5s. per ton; tonnage plentiful.

At PENANG.—To London: Light cargo, £2 10s.; dead weight, £20s. per ton.

VESSELS PASSED ANJER.

From ENGLAND and CONTINENT to CHINA, &c.—July 11, Silesia, Cardiff to Shanghai; 13, Conrad, Sunderland to Japan; 15, Invincible, London to Hong Kong; Eleanor, London to Japan; 17, Harkaway, Liverpool to Batavia; 19, St. Andrew's Castle, London to Singapore; City of Quebec, London to Shanghai; 20, Albatross, Cardiff to Hong Kong; Minnie, London to Japan; 20, Dorothea, Hamburg to Amsterdam; 21, Esperanza, Cardiff to Shanghai; 21, Banian, London to Hong Kong; 22, Luneberg, Hamburg to Singapore; Maria Elizabeth, Cardiff to Batavia; 23, Cornelia Hendrika, Cardiff to Singapore; Royal Berkshire, Plymouth to Shanghai; Coral Queen, Sunderland to Hong Kong; 18, Aquarius, Glasgow to Batavia; 19, Susanna, Rotterdam to Batavia.

From CHINA, &c., to ENGLAND and CONTINENT.—July 11, Wiona, Singapore to London; Bastian Pot, Singapore to London; Ada, Foochow to London; Grenada, Singapore to Liverpool; 13, Flying Spur, Foochow to London; Oithona, Manila to London; 16, Deerfoot, Macao to London; 16, William Cundall, Manila to Falmouth; 17, Jeanette and Cornelia, Batavia to Scheidam; India, Batavia to Rotterdam; 18, Robert Lowe, Singapore to London; Presto, Batavia to Amsterdam.

From UNITED STATES to CHINA, &c.—July 14, Lota, New York to Shanghai.

TRANSPORT BY WATER ACROSS THE ISTHMUS OF SUEZ.

The Suez Canal Company having avowed its determination to keep the transport of the fresh-water canal in its own hands, has now announced the name of its agents at Marseilles and elsewhere, through whom alone the merchandise of the whole world sent by that route must pass. The company adds its assurance that the route will be open without favour to all the world, and we are therefore at a loss to conceive why it does not adopt the customs of ordinary commerce, and accept merchandise from any one who will forward it; but, perhaps, there is a fear of too great a pressure.

THE arrangements which have been in progress for the resuscitation of the Agra and Masterman's Bank are nearly completed.

WE understand that it is under the consideration of the directors of the Bank of Hindustan to reconstruct the bank, reducing the nominal amount of liability, &c. This course has been urged by shareholders, in the press as well as in private, and no doubt would be beneficial to all concerned.

MR. ROBERT HUNT, the Inspector-General of ustoms, returns to Shanghai by the next mail (French).

The Chartered Mercantile Bank of India, London and China have notified that their business will be carried on at the new banking house, 65, Old Broad-street, E.C., on and after Tuesday, the 18th instant.

In reference to our notice in another column of the steam service from Java to Queensland, we find by the mail in to-day that the Government had accepted the tender of Messrs. Bright Bros. for the steamer *Hero* to run for six months, that is, three voyages. The tenders for the service are reported as—James Coleman, four steamers, at 10s. 6d. per mile; Bright Brothers, steamer *Hero*, for [?] per month; A. S. N. and Netherlands India companies, jointly, £43,000 per annum; Van Delden, on behalf of the Dutch company, £30,000 per annum, for three paddle steamers.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, SEPT. 7.

The question who will be the successor of Mr. Sloet van den Beele, the Governor-General of Java, still occupies our political circles; the more so, since the last Java papers told us that he should wish to return as soon as possible to the mother country. When the fate of the India Budget is known, we, perhaps, shall also know the name of the Governor-General. At this moment nothing can be said thereabout with any authority.

Amongst the Bills laid before the members of Parliament is one regulating the granting of land in India, on the principle of quit-rents. This Bill, however, will not come into discussion in this session, which must end on Saturday, the 15th, because on every third Monday in September the new session must be opened, when the discussions about the Address of reply to the Speech from the throne are followed by those about the budget for the following year. It is, however, probable that the Bill confirming the plan of the Government to end to the company of Exploration of the State Railways a um of two and a half million of guilders will be debated in his session. I need not say that the plan to aid this company, which is involved in financial difficulties, meets with a strong opposition.

The Minister of the War Department had several audiences with his Majesty the King; the *Nieuwsbode* says that this fact relates to the plan of that Minister to increase the credit wanted by that department for the service for next year. Those warlike measures create a disagreeable feeling throughout the country.

The arguments of the last Java papers have produced here a very painful impression, they nearly being uproarious, in consequence of the great disappointment caused by the defeat of the Liberal Cabinet in respect to the Culture Bill. Undoubtedly the discontentedness will increase, when the result, obtained till now by the colonial debate about the East India budget, will be known in Java. During ten years the Liberals are fighting for introducing their principles in the Government of our colonies, but still the Conservatives triumphed over them, and once more they obtained a victory in the last days. The principal point of the East India budget, the to be or not to be of this Cabinet, was resumed in section F. The Second Chamber had to approve of or condemn the measure of the actual minister of the Colonial department, by which the personal services which the natives must render to the heads were maintained, contrary with a resolution of the former minister by which they were abolished. During four days this principle was defended and condemned in the Second Chamber; numerous motions were proposed by the Liberals, and, notwithstanding they were defended energetically, they all were lost. With thirty-five against thirty-two votes the Conservative principle was approved of. Of course this victory was again obtained by the divergence among the Liberal party. It was again Mr. Thorbecke, the former leader of this party, who helped the Conservatives; he and four other Liberals voted against the principal motion, that of Mr. van Heukelom, which proposed that the Second Chamber should condemn the revoking of the resolution by which these personal services were abolished. The Conservatives obtained another triumph, with regard to the consignation system, the Liberals being of opinion that it is just that the products must be sold in Javaand not here, and proposed that the Chamber would declare that this system ought to be avoided as much as possible. Mr. Andreae (a Conservative), however, amended this motion, and added the clause, that this measure could not go so far that our trade, navigation, and treasury should be prejudiced. Of course the Liberals were obliged to vote against this murdered motion of Mr. Blussie. When I now add that the Minister declared again that it was his firm intention to maintain the Governments cultures of coffee and sugar, that the Conservatives protested with the greatest success against the opinion that India ought to be governed in India and not in the Hague, then, indeed, I must acknowledge that the Liberals, within a long period of ten years, did not advance very much, and it cannot excite much surprise that people in India become impatient, and that they fervently wish to have their own government, like our West-Indian possessions have.

The new Japan tariff of import and export duties was published here on the 1st inst. It gives generally much satisfaction, and it is trusted that the trade with Japan will revive by this liberal measure.

P. S.—ROTTERDAM, SEPT. 8.—Mr. Rochussen propo nd ment to decrease the subsidy which was to be granted to the steam line between Java and Australia, from 200,000f. to 100,000f.; this amendment was passed by 49 against 9 votes. The general opinion was that this line would not prove to be so advantageous for Javn that such a high subsidy could be approved. Some members thought it preferable to grant a high subsidy for a steam line between Java and the mother country.

Mr. de Laat de Kanter proposed an amendment to decrease the amount destined to pay the high freight to the Dutch merchantmen for conveying their twin produce from Java to one of the Dutch harbours with, 335,000f., and to charter at the lowest freight possible. This amendment was also approved of. Finally the E.I. Budget was approved of 50 against 5 votes.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, SEPT. 6.

The British Government has forwarded to the Senate of Hamburg, through H.M.'s Consulate in this city, a sextant for presentation to Capt. Ernst Denicke, of the Hamburg barque *Therese*, in acknowledgment of his services in saving the crew and passengers of the British ship *Parsee*, lost in the China Seas, and his humane conduct and kindness to them whilst on board his vessel. In like manner they have sent another sextant to be presented to Capt. Bendix Bendixen, of the Hamburg barque *Amoor*, as a reward for having, at the peril of his own life, succeeded in saving the crew of the British ship *Palmerston* when in a sinking state, also in the China Sea.

The great annual fair at Nijni-Novgorod has commenced, and, notwithstanding the ravages of the cholera—the fear of which has no doubt prevented many, who otherwise regularly attended the fair, from making their appearance there this year—promises good results. Last year the quantity of iron brought for sale was 4,000,000 poods; this year there is less by 600,000 poods, but a good demand has sprung up, and two million poods have been already sold at 2 roubles 75 copeks for sheet iron, and 1 rouble 49 copeks for bars. The sales of tea have also commenced. Formerly this was an event of the greatest importance in the annals of the fair, and no business was done till the tea had arrived and the prices were fixed; but latterly, partly owing to the facility of importing the so-called Canton tea (meaning that shipped round the Cape of Good Hope), and partly to the falling off in the demand for cloth and other manufactures on the part of the merchants of Kiachta, who make their purchases now, to a great extent, in other markets, the tea trade at the fair has lost much of its former *prestige* in regulating the market prices. The first sales of Kiachta tea—to the extent of

Digitized by Google

12,000 chests—were made at 115 to 117 roubles per chest, whilst Canton tea is selling at from 90 cop. to 1 rouble per Russian lb. The middle men or dealers, mostly Muscovites *pur sang*, have not yet begun to make their purchases, and, indeed, a great many of them have not yet arrived. The high prices of tea paid this year are not so much in consequence of short supplies—for the stock is no less than 44,000 chests, of which 9,000 are buds—as owing to the fluctuations in the exchanges, by which the value of the Russian rouble is greatly depreciated in other countries. Canton tea now competes largely with that of Kiachta brought overland through Siberia, and the dearer the former the more advantageous becomes the competition for the latter. This year some descriptions of Canton tea command higher prices than the Kiachta, though in general the quality is not superior. Of the so-called *Kirpitchni* tea only 7,000 chests have been this year brought to the fair, and have not yet found purchasers. It is said that M. Alexandrow, a merchant of Kazan, had made an offer of 65 roubles per chest, which was refused, the holders demanding considerably more. The advantages in favour of the Kiachta traders, consequent in the fall in the exchanges, as compared to the importers of Canton tea, are balanced by the losses the former have to submit to in buying metallic currency at the fair to take home with them. Of sugar 7,000 tons are on sale; the description known as Koenig sells at 9 r. 80 cop. per pood, which is 1 r. 40 cop. more than it fetched last year. Other sorts are selling at 9 r. 35 cop. to 9 r. 40 cop. per pood. In manufactured goods large quantities of cloth have already changed hands, and the prices realised for camel's hair cloth and Sermyaga (coarse woollen cloth used by the peasants) are 15 per cent. cheaper than last year. Manufactured tobacco from Saratov, packed in boxes of 1 pood 10 lb., is in good demand and sells freely at 15 roubles per box for the best quality, 8 r. for the second, and 4½ r. for inferior. Saratov cigars and cigarettes are also in favour, the former selling easily at 15 r. per 1,000, and the latter at 27 r. per box containing 10,000. By the last advices the weather was cold and rainy, and the cholera gaining ground, 96 persons having been attacked with it on the 22nd of August.

COMMERCIAL.

COFFEE.—There is a lively demand for this article, and increased confidence is felt. Sales of the fortnight, 55.000 bags of different descriptions, besides 100.000 lbs. of Porto Rico. No alteration in prices.

SUGAR.—Raw is in slack request, and prices can with difficulty be supported. The dealings in Refined were limited to 20,000 loaves, as there was no more in the market. The demand was chiefly for shipment to the north of Europe.

RICE.—Market firm, with a good business in cleaned grain. There have also been some sales by private contract of rough, among which were 6,000 bags of Bassein per Titania (to a steam mill in this city), 7,850 bags Arracan per Carl and Auguste, and 8,000 bags per Alert from Rangoon.

SPICES.—Several large purchases of Cassia Lignea have been made at rising prices, and nothing is to be had now under 11¼ sch. bco. Ginger commands more attention, and 246 chests of Cochin were easily placed at remunerative rates. Of Cassia flores 50 chests lately to hand, per Uranus, sold readily at 20½ sch. bco. There is an improved demand for Pepper, and 1,000 bags Singapore were taken out of the market at a higher figure.

SPELTER.—A better feeling prevails, and though the sales were not large higher prices were obtained. Among the sales reported were:—

2,000	centners for	September, October at	13 Mks	10	Sch. Bco.
1,500	,,	do. do.	13 ,,	11	,,
2,000	,,	October, November	13 ,,	12	,,
1,000	,,	Special Marks	13 ,,	15	,,

DISCOUNT.—The Money Market continues easy, and discount remains low, say 3½ per cent. Owing to the abundance of money and the prospects of a durable peace all funds and railway shares have risen considerably, though many of them are still below the prices they fetched before the war.

SHIPPING.—ARRIVED.—August 29, Carl and Auguste, from Akyab; do., Alert from Rangoon; Sept. 2, Voladora, from Iloilo; do., Selma, from Maulmain.

SIR WALTER FARQUHAR.—The will of Sir Walter Minto Farquhar, Bart., M.P., formerly of Gloucester-square, but late of Berkeley-street, Berkeley-square, was proved in the London Court on the 14th ult., by the acting executors—namely, Dame Erica Catherine Farquhar, the relict; Sir Walter Rockcliff Farquhar, Bart.; and Martin T. Smith, Esq., of Lombard-street; power being reserved to the testator's son, Sir Eric Robert Townsend Farquhar, Bart. The personalty was sworn under £25,000. The will is dated Feb. 8, 1860, and the testator died June 18, 1866, at the age of fifty-seven. Sir Walter, after making some small pecuniary bequests to his wife and younger children, leaves the silver centrepiece and salvers presented to his late father by the inhabitants of the Mauritius to be held by his wife for her life, and after her Ladyship's decease, bequeaths the same to his eldest son, Sir Eric, and leaves to his relict, Lady Farquhar, all the remainder of the plate, together with the jewels, furniture, and carriages. All the residue of his estate, real and personal, he leaves to his eldest son, Sir Eric, Paid Attache to H.M. Legation at Peking.

DR. HENRY NORTON SHAW, late secretary to the Geographical Society, and member of several other learned bodies, has been appointed Consul at Islay, in Peru.

Naval and Military.

The paddle-wheel steam-frigate *Leopard*, 18, Captain Charles T. Leckie, arrived in Plymouth Sound on the 7th inst.; left Nagasaki March 26, arrived at Shanghai March 29, and left April 3. Her subsequent dates were—Singapore, May 8; Mauritius, June 9; Simon's Bay, July 11; St. Helena, July 29; St. Vincent, Aug. 17; and Madeira, Sept. 1. She brings the crews of the *Rifleman* and *Algerine*, paid off at Hong Kong, thirty-five invalids, two lunatics, and two prisoners.

The Sylvin, which is fitting out as a surveying vessel for China and the Corea, will sail in October most probably.

The Merchantman and Gosforth have been engaged for the conveyance to the Cape of Good Hope of nineteen officers, seven ladies, and 453 men, with about 100 women and children. The Akbar, after discharging her troops at Colombo, will call at the Cape of Good Hope for the purpose of conveying the troops ordered to England.

The Dart, 4, screw despatch gun vessel, commissioned at Portsmouth by Commander Marcus Lowther, is completing her stores and general equipment for service on the West Coast of Africa.

The appointment by the Admiralty of Capt. Astley Cooper Key, C.B., Governor of Royal Naval College, Portsmouth, and commanding the Excellent gunnery establishment, to the new office of "Acting Director-General of Naval Ordnance," fulfils the pledge made on the subject by Sir John Pakington and his colleagues during the recent Admiralty inspection at Portsmouth, and, it may fairly be presumed, is the first step towards the establishment of a permanent Naval Ordnance-office, for the arrangement and supply of the armament of Her Majesty's ships without interference on the part of the authorities of the War Department. To the Navy this is one of the most important appointments.

By the death of General Sir Charles Menzies, K.C.B., K.H., Colonel of the Royal Marine Artillery, Col. John Hawkins Gascoigne, C.B., becomes Major-General, and a general promotion takes place throughout the corps.

Captain Sherard Osborn, R.N., C.B., having resigned the very lucrative appointment which he held in India, is now in England, and is desirous, we understand, of placing his services at the disposal of the Admiralty in a position where they can be made most available for the public interests.

A couple of the old Imperial Chinese guns captured during the late war with that country have been cut in halves in the Royal gun-factories at Woolwich, by the suggestion of Brigadier-General Lefroy, R.A., President of the Ordnance Select Committee, with a view of ascertaining the exact nature of the materials and the method of construction employed. The inspection proves that the same system of manufacture had been adopted in both guns, consisting of a wrought-iron tube, with solid and rounded ends, having a 9-inch smooth bore. The outside of the tubes is rough and excessively uneven, and appears to be specially prepared in that manner for the reception and consolidation of a body or outer casing of brass, with which the tubes are thickly enveloped. Each of the guns appears to have stood some service, and is still in good condition. They are to be deposited in the Rotunda at Woolwich, of which Brigadier-General Lefroy is Curator.

The ship *Akbar* has been engaged for the conveyance to Colombo of the troops mentioned in our issue of the 26th July.

His Royal Highness the Duke of Edinburgh will very shortly commission Her Majesty's ship Galatea at Devonport. The Galatea is a frigate, and mounts 26 guns; she has a nominal horse power of 800, and is 3,227 tons burthen, or about 1,000 tons heavier than Nelson's old flagship and three-decker, the Victory. We believe that the Prince has selected as his commander the late First Lieutenant of Her Majesty's ship Racoon, Commander Hugh Campbell, who was promoted to his present rank on the 18th July last.

THE ROUTE TO THE FAR EAST.

(THE TIMES.)

Captain Tyler's report to the Postmaster-General on the use of an Italian route for the conveyance of the Eastern mails fully confirms the statements of several of our own correspondents on this important subject. By giving the Italian line over Mont Cenis, and throughout the Peninsula from Susa to Brindisi, the preference over the Marseilles route, Captain Tyler assures us there would be a gain in the conveyance of the mails from London to Alexandria of 35½ hours, even in the present state of the carriage road over Mont Cenis; upon the completion of the summit railway now in progress over the same mountain, the gain would next Spring be 36½ hours; and, again, there would be an advantage of 42½ hours when the great tunnel under the mountain is opened, towards the end of 1871. Captain Tyler calculates, besides, that the time will be better kept on the Italian route, both "because land transit may be performed with greater punctuality than sea transit," and also "because the sea passage from Brindisi to Alexandria would be more certain than that from Marseilles to Alexandria, as the worst part of it, across the Gulf of Lyons, would be avoided." The fulfilment of all these anticipations, however, depends on the friendly disposition of the French Government, and on the influence it may exercise on the railway companies of the empire, and especially on the Lyons and Mediterranean lines; for these companies have a vital interest in forwarding all the traffic in the direction of Marseilles, and have hitherto evinced no little jealousy of the Mont Cenis route, even after they gained a certain control over it by the purchase of the Victor Immanuel Railroad across Savoy. Captain Tyler confidently expects the most earnest co-operation of M. Vandal, the Director-General of the French Posts. But it would be vain to expect too heroic a self-denial; the opposition of the great railroads interested in the Marseilles route and of the Messageries Imperiales would not be without weight in the councils of the French Government; and, at all events, nothing is more conducive to the establishment of a good understanding with our neighbours than the means we may possess of making ourselves independent of them. To remove all obstacles towards

Digitized by Google

he furtherance of the traffic by the Mont Cenis Route, we have only to prove that there are other lines which might, in case of need, equally answer our purpose.

Up to the year 1859 Austria was in possession of Lombardy and Venetia, and all the efforts of Italy were directed to a scheme for a railway either across the St. Gothard or the Luckmanier. In 1859 the possession of Milan and Como gave her the choice between either of those two passes and that of the Splugen. Now, the cession of Venetia, if, as it is to be hoped, it be coupled with a good understanding with Austria, adds to the above three a fourth line—that of the Brenner. From Ostend, over any of these four passes, the Overland Mail could, with no great trouble, be conveyed by nearly as short a line as that of Mont Cenis. The project of a railway across the St. Gothard or the Luckmanier has been entertained by the Sardinian or Italian Government for more than twenty years, and their well-meant endeavours have only been baulked by the jealousies of the Swiss Cantons, each of which, Ticino, Uri, and Grisons, consulted their local interests to the detriment of the general welfare. The acquisition of the Splugen, far from mending matters, only gave rise to new dissensions; but the cession of Venetia has taken from the Swiss the monopoly of the Alpine Passes, and if Italy and Austria come to a good understanding for their mutual advantage, not only may the Brenner be passable, either by a summit railway, on Mr. Fell's plan, or by a tunnel, at nearly as early a period as Mont Cenis; but the prospect of success in that quarter will stimulate the zeal of the other lines, and the Alpine chain may ten years hence have nearly as many railway lines as it has now carriage roads.

CHIN-KIANG INSTEAD OF HANKOW.

(To the Editor of the *London and China Telegraph.*)

SIR,—The forcible remarks in your last issue as to the risk to the underwriters of ships loading teas at Hankow, induced me to call attention to the risks of navigation between Woosung and Shanghai, which are patent to anyone having a knowledge of the navigable disabilities of the Woosung river. Would not Chinkiang be a good substitute for either of the above ports whereat to load teas brought down by steamers from Hankow? The rise and fall of water is considerably less, and while at Hankow vessels cannot swing at all, at Chinkiang they do. The river is very much wider than at Shanghai, and capable of affording anchorage for a large fleet; laden ships can get to sea quicker, while inward bound vessels, with a good offing and standing well to the eastward, can lay right up for Silver Island, the only barrier being the Langchau Crossings, but which taken at fair flood offers far less obstacles than the various intricacies of the Woosung river.

Chinkiang, it must be remembered, is nearer to Hankow; it is at the entrance to the Grand Canal, and was formerly a great entrepot of native trade, while geographically it is decidedly preferable to Shanghai as a depot for Hankow, as can be seen by reference to the map.—Yours faithfully,

London, Sept. 8, 1866. ALPHA.

THE CHINA CLIPPER RACE.

We give the following articles to show the general interest taken in this event. There are of course several errors in them which we need not point out to our readers, and which are too numerous to allude to.

(DAILY TELEGRAPH.)

We English are in the habit of thinking that we know something about yachts, and our amateur sailors who face the Channel gales and are dashed by the Channel brine have no more attractive pastime than a competition for the cup when the breeze is stiff and the long rolling swell grows angry and troubled. That all such contests are popular is not surprising. It is easy to appreciate the sport which takes the form of a stern struggle for mastery before the eyes of admiring crowds—whether it is seen in the long swift stride round Tattenham-corner, or the measured pull of Mortlake, with Oxford and Cambridge neck and neck, and citizen steamboats following hard in the rear, or in the beating round the Nab Light with canvas swelling like the outspread plumage of some ocean bird. Every step in the contest, from the careful start to the keen exitement of the close, can be watched. The suspense, though great, is short-lived, and the interest has not time to flag. But a new excitement is now formally brought to our notice. What is to be thought of a race 16,000 miles long, taking more than three months to complete? Cowes to Cherbourg, though not a long run, is generally considered sufficient for our yachtsmen. Quite enough for purposes of pleasure, it is, however, only holiday work at the best. Mightier contests, involving weightier issues, are wanted nowadays. Those who merely play at sailors—our dandies of the billow and breeze—must submit to yield the palm is gallantry, skill, and endurance to the men whose business it is to go down to the sea in ships, whose work is a constant grappling with her frowns or the wooing of her smiles, and to whom the ocean race is only one short episode in a life of battle, hardship, and dangerous vicissitude. The public is now furnished with a specimen of a hard-fought contest, of which the field is not the channel, but the ocean, or rather several oceans; a contest protracted from nearly a hundred dawns to a hundred sunsets, through nights of anxious labour and watch in tropic seas and around stormy capes, becalmed on a waveless surface or tossed and baffled by adverse winds. An ocean race is no child's play—it is a matter of business in which people wholly differing from sporting men are concerned. Careful and provident shipowners—hard-headed Scotch captains—cool, cautious, wakeful merchants, eager for a profitable venture—and Mincing-lane brokers, taking what may be termed a professional interest in the first season's tea, just as brewers do in the earliest hops—are strongly and personally concerned in the competition which was decided on Thursday last. Yet so deep is the national feeling for such trials of skill and speed, so much is a contest of any kind a matter of "sport" with us, that an ocean race is now the Derby of all our seaports; the mercantile marine entering with fierce zest into the rivalry; and betting on the Serica or the Fiery Cross being as familiar as taking odds about Lord Lyon or Savernake.

The annual despatch of the earliest teas from China has always been an interesting event, and a prize has usually been offered to the ship which outstrips all its competitors, and brings its cargo first to market. There is nothing new in the fact of such a race as that decided last week, nor has it been even peculiar to the China trade. The leading cargo of lemons from Messina or of raisins from Malaga was, in its degree, also a subject for competition, and a premium generally rewarded the fortunate skipper who first reached Fresh Wharf. But it is in the special circumstances and details that the struggle between the three clippers has presented so many points of interest. Nine swift ships laden with the first crop, left Foo-chow-Foo on dates varying from the 29th May to the 6th June last; but only four of the nine really competed for the prize—the Fiery Cross, the Ariel, the Taeping, and the Serica. Three sailed on the 30th May. The Fiery Cross started on the 29th; but, though she had a day's clear start of her rivals, she was becalmed in the Atlantic for twenty-four hours, and lost the race. The others, leaving China at the same time, sailed almost neck-and-neck the whole way, and finally arrived in the London docks within two hours of each other! A struggle more closely contested, or more marvellous in some of its aspects, has probably never before been witnessed. The Taeping, which won, arrived off the Lizard at literally the same hour as the Ariel, her nearest rival, and then dashed up Channel, the two ships abreast of each other. During all that Wednesday they gallantly ran side by side, carried on by a strong westerly wind, every stitch of canvas set and the sea sweeping their decks as they careered before the gale. Off Dungeness the following morning the pilots boarded them at the same moment, and at the Downs steam-tugs were in waiting to tow them to the river. It was at this point that the fight was really decided. Both the vessels were taken in tow almost simultaneously, and again they started neck and neck. But the Taeping happened to have a steam-tug of greater power than her neighbour, and to that fortunate accident, rather than her own sailing qualities, she owed her success. She reached Gravesend first, the Ariel at her heels, and the Serica a good third; and she entered the dock at a quarter before ten o'clock on Thursday morning, just half an hour in advance of the Ariel, and an hour and three-quarters before the Serica. The Taeping has thus secured the prize, which is an extra freight of ten shillings a ton on her cargo of tea, equal to about £500; and Captain M'Kinnon has gained what we suppose may be called the blue ribbon of the sea—a distinction which, beyond doubt, he amply deserves.

No sort of comparison can be drawn between such a race and other contests of animate or inanimate things with which we are familiar. Skill, pluck, coolness, dash, are all required in a jockey or a yachtsman, and even endurance enters largely into the list of qualifications. But the courage, "bottom," and dexterity requisite for any of those displays of manly effort have, so far as duration goes, but a limited field for their exercise. It is a spurt—a dash—a violent fit of mental and bodily exertion, and the strain is soon over. In the case of the ocean contest all those characteristics have to be displayed, united to infinite patience and almost sleepless watchfulness. For months the attention must never once relax; day and night the vigilance must be prolonged, and if the captain does not sleep with one eye open, he must at all events have a very efficient pair of deputy eyes in the person of his chief officer. Everything that goes to make a successful yachtsman is required, multiplied a hundred-fold; there must be ceaseless vigilance and skill for months together, with a careful observation of the minutest passing events, and a preparation for every possible future. Not merely an acquaintance with the science of navigation, but that knowledge of homely details which constitute what is called the practical man, is wanted to give any chance of success. The trim of the ship, the condition and arrangement of every sail and spar, a familiar acquaintance with currents, tides, and winds, attention to the health of his crew, are among the conditions essential to success in a man who has to fight so keen a battle as that just closed. No doubt all may be in vain, and the anxious racer may be encountered by some one little obstacle that baffles and upsets his most elaborate calculations. Thus, as we have remarked, one of the ships that left China on the competition, after having the best of it till far on through the Atlantic, was becalmed for twenty-four hours, while her captain had the mortification of seeing his fortunate rival, not many miles off, catch a fresh breeze, and leave him hopelessly behind. "The race is not always to the swift," and when man has done his best the elements may step in to show that his best is of little avail. None the less is the exercise of such qualities to be admired and cultivated. It brings out the best and most valuable points in the character of the British people; while contact with the forces of nature developes in that character qualities which ennoble and elevate, as well as powers which strengthen. We hope, therefore, that the great China race will long continue to be an annual event, affording a stimulus and encouragement to our hardy seamen, providing an additional link of connection between them and the rest of the community, and strengthening the interest which all feel in those who, through storms and calm, under Indian suns and amid Arctic snows, carry the flag and the renown of England over the waste of waters.

(THE TIMES.)

The truly marvellous race between the fleet of China clipper ships from Foo-chow-Foo for the premium offered by the London brokers for the first season's teas, and their almost neck-and-neck struggle during the whole voyage of upwards of 16,000 miles, is an event exciting a vast amount of interest in almost in every maritime port, both at home and abroad. It appears there were nine ships engaged in the contest, and not five as previously reported. They were as follows, together with the times of their respective departures from Foo-chow-Foo:—

Names and Tonnage.	Captains.	Where Built.	Owners.	Date of Sailing.
Ada, 685 tons ...	Innes ...	Aberdeen ...	Wade and Co.... ...	June 6.
Ariel, 853	Keay ...	Greenock ...	Shaw and Lowther ...	May 30.
Black Prince, 750 ...	Inglis ...	Aberdeen ...	Findlay and Co. ...	June 3.
Chinaman, 688 ...	Downie ...	Greenock ...	Park Brothers ..	June 5.
Fiery Cross, 689 ...	Robinson ...	Liverpool ...	J. Campbell	May 29.
Flying Spur, 731 ...	Kyrie ...	Aberdeen ...	Robertson and Co. ...	June 5.
Serica, 708	Innes ...	Greenock ...	Findlay and Co. ...	May 30.
Taeping, 767... ...	M'Kinnon ...	Greenock ...	Roger and Co. ...	May 30.
Tartsing, 815... ...	Nutsheid ...	Glasgow ...	Findlay and Co. ...	May 31.

Digitized by Google

The struggle was between the Fiery Cross, Ariel, Taeping and Serica. The Fiery Cross obtained a start of one day over the others. The Serica, Ariel, and Taeping crossed the bar of Foo-chow Foo in company together, the 30th May. The Taitsing started the following day. There was a fair wind (N.E.) blowing, which the Fiery Cross kept to 19·20 N., when they met with a few hours calm and southerly wind. N.E. wind, fresh, again set in, which carried them to the Pascells reef, on the 3rd of June, though they were not sighted. The Serica, Taeping, and Ariel met with similar weather. The Fiery Cross saw nothing of them until noon of the 7th of June, in lat. 9 37, when she passed a large ship on the opposite tack, believed to have been the Ariel. To the southward of the Pascells they met with strong S.W. winds. As far as we have been enabled to ascertain, the ships passed the lighthouse at Anjer, Straits of Sunda, as follows:—Fiery Cross, at noon on the 18th of June; Ariel, on the morning of the 20th of June; Taeping, on the afternoon of the 20th of June; Serica, at 6 P.M. on the 22nd of June; Taitsing, at 10 P.M. on the 22nd of June; Black Prince, on the 29th of June.

At this time the Fiery Cross was evidently holding the lead, while the Taitsing, which left Foo-chow-Foo on the day after the others, had caught up with the Serica, the Fiery Cross heading both by two days. From Anjer they carried good trade winds to the meridian of Madagascar. The Fiery Cross passed Mauritius on the 30th of June, the Ariel on the 2nd of July.

The Cape of Good Hope was sighted by the Fiery Cross on the 15th of July at 10 P.M.; the Ariel rounded the Cape the next day. Wind, S.E. to E., and N.E. The Serica rounded the Cape on the 22nd.

The Equator was passed—Fiery Cross, 6 P.M. on the 4th of August and Ariel on the 5th.

On the 9th of August, in lat. 12·20 N., the Fiery Cross signalled the Taeping, and continued in company till the 17th, with wind variable and light. In lat. 27·52, long. 36·54 W., a fresh breeze sprang up, and took the Taeping out of sight from the Fiery Cross in four or five hours. The Fiery Cross was becalmed, and was not making one knot per hour for twenty-four hours. This circumstance is alleged to have lost her the race. On the 29th she reached lat. 41·5 N., long. 35·51 W., and at 10 A.M. on the 6th of September she sighted the Isle of Wight, it bearing N.N.W., with a wind W.S.W. blowing hard.

The Ariel and Taeping, which had lost sight of each other for 70 days' found themselves on Wednesday morning, at eight o'clock, off the Lizard running neck and neck up the Channel under every stitch of canvas that could be set, with a strong westerly wind. During the whole day the two ships kept their position, dashing up the Channel side by side in splendid style, sometimes almost on their beam ends, every sea sweeping their decks. On approaching the pilot station off Dungeness next morning they each fired blue lights to signalise their position. At daybreak the pilots boarded them at the same moment, and the race was continued in the same exciting manner till they arrived in the Downs, where they both took steamtugs to tow them to the river. The ships had to shorten sail to enable the tugs coming up and picking up the hawsers to take them in tow. This was about 8 o'clock A.M., the tugs starting almost simultaneously, and both ships still neck and neck. The Taeping, however, was fortunate enough to have a superiority in the power of steamtugs, and reached Gravesend some time before the Ariel. The Serica followed closely upon them. She passed Deal at noon, and got into the river with the same tide which carried the Taeping and Ariel up the river to the docks, when the result of this extraordinary race was declared to be as follows:—

Taeping, docked in London Docks, 9·45 P.M.	1
Ariel, docked in East India Dock, 10·15 P.M.	2
Serica, docked in West India Docks, 11·30 P.M.	3

The Taeping, therefore, was the winner of the premium, about £500 the bills of lading of each ship setting forth that 10s. per ton extra was to be paid if first sailing vessel in dock with new teas from Foo-chow-Foo. The Fiery Cross arrived in the Downs on the 7th, and was compelled to bring up to an anchor on account of a heavy gale blowing, when she remained some time. She, however, managed to get into the London Dock by 8 o'clock on Saturday morning, some 28 hours after the Taeping. The fifth ship, Taitsing, arrived in the river yesterday forenoon.

During the past few days the excitement occasioned by the probability of the arrival of the first ship in this great annual ocean race from China was unprecedented. The friends of each vessel have been supporting their favourite by betting considerable sums. During no previous year has so much interest been centred in the result of this race, and from the fact of so many Clyde-built ships being engaged in the competition Scotchmen generally have largely partaken in the speculation which has existed at almost every maritime part both in Britain and China. It will be remembered that last year the ships Fiery Cross and Serica left Foo-chow-Foo for London on the 28th of May, both having been towed to sea by the same tug, and that both vessels arrived off the Isle of Wight simultaneously on the 10th of September after a passage of 106 days. By a stroke of good fortune, however, the tug sent out by the owners of the Fiery Cross sighted her, took her in tow, and arrived in London one tide before her rival, the Serica, the latter having failed to sight the tug on the look-out for her.

Singular to observe, the Taeping, Ariel, and Serica were all built by Messrs. Steele and Co., of Greenock. The Taeping and Ariel were constructed on the composite principle of wood and iron. The Serica is iron built.

The cargoes of the ships were—Taeping, 1,108,709lb. of tea; Ariel, 1 230,900lb.; the Serica, 954,236lb.; Fiery Cross, 854,236lb.; and the Taitsing, 1,093,130lb.

The time occupied on the voyage by the three ships has been ninety-nine days, being seven days shorter than the time occupied by the Fiery Cross and Serica last year.

The Ariel, which was a new ship, was the first favourite among the shippers in China.

(STANDARD.)

We are now in possession of some further particulars relating to the late extraordinary ocean race. According to these the "entry," instead of being confined to the five ships spoken of in our article of Monday, included also four others—viz., the Ada, belonging to Messrs. Wade and Co.; the Black Prince, belonging to Messrs. Findlay and Co.; the Chinaman, to Messrs. Park Brothers; and the Flying Spur, to Messrs. Robertson and Co. Messrs. Findlay had, therefore, no less than three ships engaged in the contest, Messrs. Shaw and Lowther having two—the Ariel and Fiery Cross—and the other four belonging to four different owners. Practically the race was confined to the five vessels originally mentioned—the Chinaman, Ada, Black Prince, and Flying Spur having left Foo-chow-Foo five, six, three, and five days respectively after the last of this "first flight," which all started on three consecutive days, the three winning ships sailing on one day and almost at the same hour. It should be borne in mind that this is not a time race, no allowance whatever being made for difference of start. Its object, indeed, is not to test the relative speed of the vessels—though, so far as the captains and owners are concerned, this is, of course, one great point at issue—but simply to ensure the earliest possible delivery of the new season's tea; and thus the prize is awarded, not to that vessel which makes the quickest run, but to that which at whatever time she sailed, first passes through the gates of the East India Docks. Of course, from a sporting point of view, this condition must be taken into consideration, and in estimating the performance of the various ships it must be borne in mind that the ship which gains this prize has not necessarily made the shortest passage. The Ada, for instance, might have beaten the Fiery Cross by more than seven days, and would yet have lost the prize. In the present instance the vessels are placed in the order of their speed, so that this allowance does not come into question; but it might possibly be of importance.

So far as expectation was concerned the race this year was supposed to lie between three ships, among which the eventual winner was not included. Last year it had been a neck and neck affair between the Fiery Cross and the Serica, the former winning by the good fortune—or perhaps we ought to say good management—which enabled her, on arriving in the Channel, to pick up her steam tug some hours before her competitor. It was therefore fairly to be supposed that both these vessels would show well to the front on the present occasion, and the Fiery Cross having got away with a lead of some twenty-four hours, had perhaps slightly the advantage over her rival. The claims of both vessels, however, to public favour were overshadowed by these of the Ariel, a new and larger vessel, belonging to the same owners as the Fiery Cross, and built by them for the special purpose of outsailing her. This she in effect did, the Fiery Cross, though making a splendid passage of a hundred and one days—just five per cent. quicker than her winning voyage of last year—did not even succeed in getting "a place." In her turn, however, the Ariel was beaten by the Taeping, though whether outsailed or not does not appear to be quite so certain. So far as we have as yet been able to ascertain, the Ariel, which left port in company with the Taeping, and entered the East India Docks twenty-six minutes after her—therefore losing not only the £500 prize, but a sum at least equally heavy in bets—was at all events, to some extent, the victim of circumstances. Accounts differ, and until we have an opportunity of actually comparing the five logs it will be impossible to decide with certainty. According to one well-informed authority, however, the Ariel, which had already, in passing Anjer, gained a few hours upon her competitors, was, at a latter period of the race, several days in advance; when, in crossing the line, she fell in with a calm which lasted long enough to place her competitors once more on equal terms. Again she got ahead, and again the unpropitious fates threw obstacles in her way until, off Scilly, she once more encountered her ultimately successful rival. Up Channel was, of course, a race of the most exciting description, the one idea of both captains being to "carry on till all is blue, and what she can't carry she must drag." The wind was fresh, and every opportunity offered for showing what these splendid vessels could do when fairly put to it; and we can well imagine that neither word nor canvas was spared in the exciting race. Even in this last spurt the Ariel claims to have drawn ahead of her competitor, arriving off Dungeness some hours before her. But again untoward fate intervened. Not a pilot was to be found, and she was kept rolling and tumbling about in the short seas with her maintopsail to the mast, till again the Taeping ranged alongside, and neck and neck they once more started up the river. And here the Ariel had for the last time resumed her place in the van, when the very moon took up her parable against her and held her back on the very threshold of victory. Arrived at the dock gates two hours before her pertinacious opponent she found that time and tide, proverbially indisposed to wait for any one, were yet bent on making her wait for them. It would be two hours before there was water enough for her to enter, and for two hours she lay, an anxious Peri at the muddy gates of the Isle of Dogs Paradise, till Father Thames should give permission for her to enter. But before the two hours were out the lighter-built and less heavily-ladened Taeping was alongside. Fourteen feet of water would serve her turn, while her bulkier rival required four feet more, and while the Ariel still lay at the very foot, as it were, of the winning-post, the other slipped in and carried off the prize.

Such, so far as we have just been able to learn it, is the story of the great fifteen thousand mile race of 1866, kept up, neck and neck, for ninety-nine days, and won at last, through momentary lack of a few inches of water, by twenty-six minutes and something like a hundred and fifty yards. It is, as we have said, possible that in some respects the account here given may be modified by subsequent comparison of the various logs; and we hope that such comparison will be speedily and carefully made, not merely for the gratification of a very pardonable curiosity as to the real facts of this extraordinary feat, but as being likely to throw light upon various interesting and important points of navigation. So far, however, as the general outline is concerned, our information is probably very nearly complete, and certainly no nautical novel by Captain Marryat or Fenimore Cooper, or any other of the wonder-purveyors of our earlier days, ever ventured on a more exciting or sensational incident. We may add, in conclusion, that the tea brought home by the five leading vessels was as nearly as possible five and a quarter millions of pounds; the largest cargo, 1,230,900 lb., being carried by the Ariel, and the smallest, 854,236 lb., by the Fiery Cross, the difference between the cargoes of the Ariel and Taeping being no less than 122,191 lb. This difference cost the Ariel the race; but, on the other hand, the larger amount of freight will no doubt more than make good the loss.

—o—

THE HYDRA-HEADED REBELLION AGAIN.

WARS and rumours of wars again disturb the tranquillity which seemed for a time to have settled upon the Chinese Empire. Hardly had the devastating hand of Taiping misrule been stayed, before in the North, North-West and West armed bodies of insurgents sprang into existence clamouring for separate political rights or immunity from Mandarin oppression. In truth the indiscriminate levy of local taxation at the will and pleasure of the provincial authorities would appear to lie at the root of all disturbances in China. The people are naturally industrious and contented, but the fire of resentment and cupidity is speedily kindled whenever and wheresoever a demagogue can be found to excite popular feeling and raise a watchword of defiance against the prevailing misrule. The Nienfei were, however, worn out rather than subdued, and the Mahometans having in a measure obtained what they desired, subsided into at least temporary loyalty. Then for a brief space the Empire remained at peace, undisturbed by internal commotions, and on terms of reciprocal friendship with foreign Powers. Writers in the public press in China had gone so far as to prophesy that a new era was about to dawn, and that with the present leaders of State policy the future of China was assured. But to accept this view we should have had to ignore the important lessons taught us by history—lessons written legibly upon the ruined monuments of antiquity, and upon the mutilated remains of the once noble literature of the Chinese Empire.

At no period whereof we possess authentic records was China free from internal convulsions, due doubtless, at least in part, to the effect of excessive localisation in spite of the influence of a central government based upon principles theoretically excellent. At the present day when all the institutions of the country are tottering; when the Crown itself is in jeopardy and may at any moment become the property of a talented adventurer, the state of things is much worse. It is not too much to say that from the highest official to the lowest, in every department of the State, in every relation of life, corruption reigns supreme. We are not therefore surprised to learn that even in the neighbourhood of the treaty ports of Shanghai and Chinkiang the standard of rebellion has been raised, and thousands of villages smarting under the sense of wrong, and anxious for a change of some sort, have enrolled themselves amongst the insurgents. Again at Ningpo a decisive protest has been entered against the war-tax on opium, and another against certain illegal imposts upon the fisheries. That these did not result in a popular demonstration, the murder of the Chief Magistrate for instance, was due to the promptitude wherewith the authorities fell into the views of the people, and conceded the privileges which they had no right to withhold. A few months before similar circumstances in a remote part of China had led through a similar train of consequences to the temporary overthrow of the local government. Here then was a warning, unheeded, however, as such warnings generally are. It was perhaps fortunate that the position at once assumed by the aggrieved parties at Ningpo was so determined that the officials had no choice but to submit. Otherwise, in defiance of Major-General COOKE'S battalion, the opportunity for an organised resistance would not have been suffered to pass unheeded, and foreign interests at the port would have materially suffered. Luckily for the European merchants the battle-field selected by the insurgents who have appeared in the vicinity of Shanghai is not within the producing districts, and we are therefore able to look on the possible contingencies from a perfectly disinterested point of view. Judging by previous cases we may assume that a large body of Imperial troops having been transported at an enormous expense to the scene of operations, an understanding will be arrived at by the officers in command of the respective armies, and a due amount of treasure having been frittered away and diverted into the ever-gaping official pouch, the necessary concessions will be made, and the successful warrior who has conducted the "campaign" on the Imperial side will be decorated with a *shuang yen ling tai* or invested with the *huang ma-kua*. Meanwhile woes unnumbered will have fallen on the honest trader, the industrious agriculturist, and in fact upon all not directly connected with one party or the other.

It is then fair to ask what object have the people in joining in these and similar movements. The unthinking will immediately answer—"plunder." It is perfectly true that amongst the adherents of every great cause there are found some animated by selfish and other unworthy motives, but we are not therefrom justified in judging of the entire protesting mass by the opinions or actions of certain of its component individuals. Beneath the constitutional apathy of a Chinaman there lies a sense of civil rights, based in part upon the natural sense of equality implanted in every breast, and partly also upon that patriarchal principle which might at first appear to militate against the existence of any such feeling. Hence each one asks with the sage, "If an officer cannot control himself "how can he control others?" and replies, also in the words of the Analists, "the rulers have been in fault, and the people "have in consequence become contentious." Blind obedience to superior power does not lie within the creed of Chinese political morality, and this because the patriarchal relation implies the existence of reciprocal duties. We conclude, therefore, that when oppression is carried beyond a certain point, when the rights of the subject are completely swamped by the privileges of the ruler, the Chinese are inspired to fight for a principle, and that to this are to be attributed the large numbers that flock from far and near to join the insurgent colours wherever they may be displayed. But for the active co-operation of the English and French the Taiping rebellion would never have been completely crushed out, and, in a more limited sense, but for the same co-operation the Nienfei might have re-enacted in the North the horrors which had changed the South into a howling wilderness. Discipline, however, did its work, and the trained soldiers of the Taku and Tientsin camps found the task of routing ill-fed and ill-armed rebels a tolerably easy one. But it may soon happen that European Powers will no longer consider it advantageous to prop the trembling edifice of the Chinese State, and then must come ruin—dissolution—partition. We anticipate such an event with mingled feelings. Sooner or later it must arrive; but against the death agonies of an expiring Empire which has weathered the storms of nigh fifty centuries, we must place the anticipations of a new life springing into being—of untold wealth poured into the lap of the West as the result of the development of the East.

FROM JAVA TO QUEENSLAND.

IN our Rotterdam correspondent's letter it will be seen that the Government have introduced a vote of 200,000 guilders, which was reduced on a proposed amendment to 100,000, towards a steam company to run a line of steamers from Batavia to Queensland *via* Torres Straits. This vote has been taken in anticipation of the contracts for the line being entered into shortly by the Queensland Government, who have invited tenders for its performance once a month both ways. The Queensland Government, in order to test the feasibility as well as the difficulties of the direct northern steam route through Torres Straits to Europe for mails and passengers, chartered the steamer *Souchays* to perform six double voyages in the year between Batavia and Brisbane, commencing at the beginning of the present year, and up to the latest intelligence this service has been regularly done without any casualty or hindrance of importance. The sum paid for this service was reported at Batavia to be as high as £40,000; but this large sum can hardly be correct. From the *Souchays* being an iron-bottomed vessel and fouling rapidly, and a large coal consumer, she is slow, and can take but little freight; and few passengers have of course as yet taken this route to Europe. The principal part of the voyage along the coast of Australia northwards from Brisbane is made by the "inner passage," that is, inside the great range of coral reefs, in smooth water, and with perfect safety.

THE JAPAN CONVENTION AND TARIFF.

OUR diplomatic failures in the East have been numberless. Concessions gained by what we usually term "fair means"—that is by peaceable persuasion—have always turned out worthless, and treaties wrung from reluctant despots at the sword's point have invariably been so systematically evaded as to become in a very short space of time little better than waste paper. It is greatly to be feared that in China this will always be the case; inherent bigotry and prejudice are difficult enough to overcome under any circumstances, but when these obstructive forces are strengthened—as in the case of the Chinese—by an utter blindness to their own interests, they become absolutely invincible. The extent to which this blindness is persisted in by the Chinese is most extraordinary; no better exemplification of it can be quoted than the fact that while receiving a splendid revenue from foreign trade, collected without either trouble or risk through the Customs, they have even been plotting to destroy that trade, or failing its destruction to cripple and maim it by every imaginable species of petty extortion and restriction. In Japan it must be admitted that our path has hitherto been by no means free from similar difficulties. The system of exclusion and isolation was there carried to even a greater extent than in China, and so discouragingly did the first efforts of diplomatists result that there were not wanting people who predicted that the newly inaugurated era of a foreign intercourse would shortly come to a sudden and violent termination. But by degrees—and not by slow degrees either, if we take into consideration the proverbial sluggishness of the Oriental mind—these difficulties have gradually melted away, until the newly-signed Convention threw down the last barriers that separated the people of Japan—an enterprising and intelligent people they are too—from their fellow-citizens of the world. "The Government "of Japan," says one of the opening clauses of this Convention, "is desirous of affording a fresh proof of its wish to promote "trade and to cement the friendly relations which exist between "their country and foreign nations." As a matter of course, all treaties commence with some such magniloquent phrases, but it is pleasant to be able to think that in the present instance these are not mere empty words. We have good reason to know that a very large and influential class among the Japanese really are desirous to promote and develop a friendly intercourse with us. With regard to the Government, be their motives what they may—and there is no reason to doubt that self-interest is one of the strongest—the ready way in which so many and such important concessions have been granted, without the necessity of any pressure beyond that of friendly argument and persuasion, is a sure sign that their sentiments have undergone a very great change, and one which must have a beneficial effect on our future relations with them. Experience has taught them the advantages to be derived from intercourse with the representatives of Western commerce and civilisation; and they freely admit the advantages and their desire to profit by them. In China, on the other hand, all our efforts to enter into closer communion with the people meet with an obstinate resistance. This is the position behind which we find them firmly entrenched—"We don't want you here, "but you have got a footing, and we can't expel you. We "must therefore make the best terms we can with you, and "look on your presence as an evil to be endured, because it is incurable." It seems to us that the whole secret of this difference between the two nations may be summed up in these few words: the one is open to conviction, and the other is not.

By this time all the articles of the Convention should be in full operation, with the exception of the sixth, that which stipulates for an amendment of the currency laws at present in operation, and this will not come into force until the 1st of January, 1868. It is to be regretted that the arrangements necessary to such a change cannot be completed at an earlier date, for it is in all respects a most desirable one. The establishment of an English mint in Hong Kong was the only possible remedy for the multitudinous inconveniences arising from a mixed dollar currency in a country having no silver or gold coinage of its own; but there is no reason for making our commerce in Japan dependent upon that establishment. Japan does possess a coinage of its own, and a very convenient one; the supply of it has hitherto been far from adequate to the requirements of a rapidly increasing trade, but with such improved means and appliances as may readily be obtained from Europe it can soon be made perfectly efficient, and so render unnecessary the importation of any foreign circulating medium. From Nagasaki we already hear that nearly all transactions are carried on in bous, and that dollars are rapidly coming to be looked on as "curious." Of the other eleven articles of the Convention the most difficult to get into satisfactory working order will be the fourth, which stipulates for the establishment of bonded warehouses. It is extremely probable that the building at first provided by the Government will not be such as to rank as first-class risks for fire insurances; and misunderstandings may arise regarding the rates of storage to be charged. These however are but minor troubles and will no doubt soon disappear. The tariff being based on an approximate duty of five per cent. is, it need hardly be said, an equitable one; and the Convention as a whole must tend greatly to the advancement of both native and foreign interests.

THE JAPANESE CURRENCY.

ON several occasions, in dealing with the subject of Japanese currency, we have referred to the reports of the late Mr. James Arbuthnot on the subject. Had those reports, ranging in date from December, 1862, to December, 1863, been issued, even with ordinary promptitude, they might have proved of essential service in leading to an expression of mercantile opinion on one of the most important subjects of discussion between the Japanese and foreign Governments. We should not have failed to analyse them with that care due to the high reputation of Mr. Arbuthnot, and so far, we conceive, have done some service to the interests involved in the settlement of the question. But the news of the completed convention with Japan arrives simultaneously with the publication; and, although we are far from saying that the subject-matter of these reports was not taken into consideration by the Home Government, and allowed to shape the instructions sent out to the English Minister and Plenipotentiary, we cannot but feel that the benefits of the information it conveys have been, to a great extent, neutralised from the absence of that previous publicity which, in the case of public documents, so far from being an act supplementary to the proper exercise of the functions of the several departments of Government, has always been regarded, and properly so, as a means to an end in enabling Ministers of the Crown to form a proper judgment and act in more complete to public interests than would otherwise be possible.

THE FRENCH IN SIAM.

Since the publication of our issue of the 5th instant we have seen the following notice in *Galignani*, from which it will be seen that we have by no means over-estimated the acts and intentions of the French. The writer of the article is however in error in stating that the concession had been refused to the English merchants, and the statement that the French propositions had been received with marked favour, "inasmuch as the reasons which caused just "apprehensions in the mind of the King in the case of Eng-"land are not applicable to France, who does not aim at "any territorial conquests in those regions," is simply rodomontade:—

Advices from Bangkok give news of that capital down to July 14. The question of piercing the Isthmus of Kraw, which separates the Gulf of Bengal from that of Siam, had again come under consideration. A concession for that object had formerly been applied for by an English company, but had been declined by the Court of Bangkok in consequence of some representations addressed to the King of Siam by the Bishop of Mallos, then residing in Paris, to the effect that it would be dangerous for the preservation of the whole Siamese territory to separate the northern from the southern portion; and the more so that this latter part, very remote from the capital by reason of the difficulty of communications, lay immediately under the hand of England, who already possessed important establishments in the Malay Straits. A French company has now submitted a new project to his Majesty, and been received with marked favour, inasmuch as the reasons which caused just apprehensions in the mind of the King in the case of England are not applicable to France, who does not aim at any territorial conquests in those regions. English agents, however, are still making efforts to obtain from the King the concessions originally applied for by their fellow-countrymen. In the north of Siam difficulties have arisen on the subject of a vast territory bearing the name of Tchieng-mai forming an independent kingdom, but still recognising to a certain extent a Siamese protectorate. The Burman Government having raised pretensions to suzerainty over that territory, a diplomatic correspondence has taken place, and the belief was that the result would be favourable to Siam. Lastly, the early return to Bangkok was announced of M. Aubaret, the French Consul, said to be the bearer of an autograph letter from the Emperor Napoleon to the King, and also the arrival of a mission charged to obtain an assurance that the scientific expedition which was to leave Saigon to reach China by the river Me-Kong would be received with kindness in all the parts of the kingdom it would have to traverse.

The Consul for Siam writes to *The Times* as follows:—

"Sir,—An extract from *Galignani's Messenger*, in to-day's impression of *The Times*, professes to give information from Siam. It is wholly un-

Digitized by Google

worthy of credit; it is carefully concocted for a particular purpose, and calculated to mislead those not acquainted with the country and Government, which are essentially British in interest and feeling.—I am, Sir, yours obediently, "D. K. MASON, Consul for Siam.

"September 6, 1866."

THE P. AND O. COMPANY'S FLEET.

We have to note the following movements in this service:—Our readers will be glad to learn that the *Nemesis*, which made such a protracted passage from Galle to Aden in June, is to come home for a general overhaul and repair. The *Candia* was appointed to leave Calcutta with the first mails in Sept. The *Malacca*, screw, sailed on the 25th August, for Bombay and China, followed by the *Sunda*. These vessels are fitted specially for the China service, with accommodation on deck for passengers, and large space for cargo. They are about 1,600 tons and 300-horse power, and on the trial steamed over 11 knots fully laden. The new steamer, *Surat*, will be despatched for the Calcutta station early in October, under command of Captain Dundas. She is now on a trip to Alexandria, under command of Captain Jamieson. The *Ellora*, on the Australian station, will be relieved by the *Geelong* or *Emeu*. The *Nyanza* is in dock under repair. No more vessels building at present, and the increase of the Bombay and Suez line is still doubtful.

THE NETHERLANDS INDIA STEAM COMPANY.

WE are glad to find by our last advices from Singapore and Java that the lines of this company (the concession for which, our readers will remember, was in the first place granted to Mr. H. Oliver Robinson) are now in perfect working order. The operations are of more importance than generally believed, and show such an amount of foresight and enterprise on the part of the Dutch Government that we think English people will be disposed to say that the Dutch are not quite so slow as some people compute them. We very much doubt if we can show such a distinct case of Government expenditure for the benefit of any of our colonies. The measure was most complete, and we believe that the Dutch Government, as well as the merchants, already reap large advantages from the regular communication maintained between their possessions. The head-quarters of the Netherlands India Steam Company are at Batavia, and their operations are performed by Ten efficient steam vessels—which we have noticed from time to time as they were despatched—which are all specially adapted for the service, being designed and constructed for the navigation of shallow, tranquil seas and a warm climate, where coal is costly, and *iron-bottomed* vessels foul with extraordinary rapidity. The principal features of these steamers are their light draught of water, small consumption of fuel, coppered bottoms, and special ventilating arrangements.

The lines of the company are thus divided:—

Two voyages monthly, between Batavia and Singapore, calling at Muntok and Riouw, carrying the European mails.
Four ditto between Batavia and Sourabaya, calling at Samarang.
One ditto between Sourabaya and the Moluccas, Celebes, and Timor.
One ditto between Batavia and ports on the West Coast of Borneo.
Two ditto between Batavia and ports on the West Coast of Sumatra.
One ditto between Sourabaya and ports on the South Coast of Borneo.

For this service the Company receive from the Dutch Government a subsidy per mile run, which amounts to about £30,000 per annum, and the exclusive transport of all Government troops, stores, and civil servants at liberal rates. All public cargo and passengers are of course to their benefit in addition. The construction and despatch of the steam vessels, and the inauguration of the lines have been effected by Mr. Robinson, and we know of no company which has been so quietly and so successfully put in motion, and it reflects the highest credit on those concerned. The only point now is to find it a financial success for the shareholders, and so far there is every reason to believe that it will be so.

THE RANGOON AND SINGAPORE TELEGRAPH.

The last advices from Singapore state that the scheme for connecting the Rangoon lines with Penang, Singapore, Siam, Java, and Australia was still in progress. Application had been made to the respective Governments through whose territories the lines would have to pass, and on the receipt of this, further steps would be taken in the matter. Of course the first section which would have attention would be the one from Rangoon, to Penang and Singapore; no doubt the sanction of the Government of India has been obtained for this and we may expect to see matters put in train shortly for its accomplishment. Our readers may remember that it was at one time decided on by Government to lay a submarine between these places, and the cable was actually made and afterwards used in the Malta and Alexandria line. The enterprise, if undertaken by a company, should certainly be supported in some shape by Government, as its importance as a stepping stone to China cannot be overrated.

Since writing the above we have seen the following in *The Times'* correspondent's letter from Melbourne:—

The attention of the Victorian Government has again been called this month to the very important subject of telegraphic communication with India and Europe. Mr. Alexander Fraser, accredited to these colonies by the Netherlands India Steam Navigation Company, has submitted to the chief secretary plans and estimates of cost which, if founded on accurate data, will secure us the proposed good, and at a very large profit to all who may be financially connected with the enterprise. The company request our co-operation in a plan which shall connect South Australia with Adam Bay, through Victoria, New South Wales, and Queensland, via Cape York and Burketown. A submarine cable would be laid from Adam Bay to the Island of Timor, and another similar cable from Timor to the northern coast of Java, and so thence to Singapore, from Singapore to Malacca, thence to Moulmein, and from Moulmein, by way of Calcutta, to Europe. The details of cost, at per mile over this whole route, have been submitted by Mr. Fraser, bringing the gross amount (including a liberal allowance for extra charges) to £289,750. Mr. Fraser believes that if the colonies embraced in the plan will vote a reasonably moderate subsidy *pro rata*—on the principle long since applied to their postal system—the Anglo-Australian and China Telegraph Company might be willing to execute the whole work under guarantees to be agreed on, or in conjunction with any company which may be formed in the colonies. The subject is certainly acquiring additional importance with each successive year. I believe that both Great Britain and the Australian colonies are merely commencing to open up what must hereafter be a vast and constantly-growing trade with the excessively populous, rich, and fertile islands of the Indian Archipelago. The rapidly-increasing settlement of Queensland and Northern Australia has already made Sydney a sort of metropolis in relation to these newer communities; and the man who remembers merely the Sydney of fifteen years ago would be now surprised, were he to revisit that city, at the noble fleet of steamers and other craft regularly employed in running backwards and forwards between Port Jackson and Brisbane and Rockhampton. Again, these northern towns—the latter mere bush some half-dozen years back—are pushing their trading enterprise through Torres Straits in among the numerous islands of that region, which is every day becoming better known to, and more intimately connected with, us. The electric telegraph would be more efficacious than fleets and armies in teaching these tropical millions the solid benefits of an enlightened commerce with other nations."

THE CHINA STEAMSHIP AND LABUAN COAL COMPANY.

OUR correspondents at Singapore and Manila advise us that the steamer *Japan* has now been put on the line, in addition to the *Mona*, and that they were both doing well, and giving great satisfaction to the respective communities, inasmuch as this chain of communication is by far more direct than *via* Hong Kong. We are glad to find that the negotiations of the company ended so favourably as to procure from the Spanish Government certain concessions of duties on imports The company's vessels run in connection with the mails of the Messageries Imperiales, while the Spanish steamers still run between Manila and Hong Kong, in connection with the P. and O. Co.'s service, by which our post-office forwards all correspondence if addressed simply "Manila."

The China Steam Company also propose to continue alternate voyages to Amoy, and also to keep up a regular communication with Sarawak by the *Teenchang* and *Labuan* steamers. A time-table of the sailings of the company's steamers has been published, arranged by the company's marine superintendent, Mr. Pitman, showing the dates of arrival and departure at the various ports of Singapore, Manila, Amoy, Sarawak, and Labuan. The trade with Labuan since the steamers had called regularly had much increased, as it was found to be a common *entrepot* for a large part of Borneo. The steamer *Eagle* had called and coaled 320 tons. The price of coal at the island was raised to $8, but contracts had been made at $7¼ to $7½ H.M.S. *Salamis* had also called *en route* to China.

Mr. Sinclair, the company's manager and superintendent at Labuan, had arrived out, and the clearing for the intended railway from the coal mines to the harbour was being actively proceeded with, and Mr. Morel, C.E., to whom the directors have entrusted the construction of the line, has left by the Overland mail for Labuan, to superintend its construction. The rolling stock will shortly be shipped from this country, and Mr. Morel expects to have the line in working order before this time next year. There are several bands of bituminous shale in connection with the seams of coal at present working, which will produce large quantities of oil, and the distillation of coal oil will prove highly profitable to the company in a short time.

Digitized by Google

Mr. Sinclair, writing from Labuan, reports:—

"I have made a careful examination of the petroleum springs. They are situated about two and a half miles S.W. from our present coal jetty, and about half a mile from the sea on the west side of the island. I enclose you a tracing from a section showing the position of the oil springs and the coal seams near them, also the borehole which is now in progress. Where the oil springs is marked, on tracing there are several small feeders of water issuing from the sandstone, all having petroleum with them. I commenced a boring at the base of the hill, a short distance from the springs, and on piercing through a bed of fire clay gas came off strongly; afterwards at a depth of nineteen feet a feeder of water and oil came off, accompanied with gas. The boring is now down twenty-one feet; there is still a small quantity of oil coming off, and a good deal of gas.

"If a trade for Labuan timber in China can be established, at the prices mentioned to me, there can be no doubt that its export will be very profitable to this company. At present the best way for exporting timber is in logs or balks, squared in the jungle by the Malays. These logs we can get delivered, at either Port Victoria or here, by contract, the contractor having the use of our buffaloes to haul the timber from the jungle to the beach.

"I learn that Messrs. Gibb, Livingstone, and Co. have chartered a ship of about 600 tons, to come here for coals and timber. This ship is now due, but as the monsoon is against her coming here, she may be longer than the usual time. I expect to send about 100 tons of timber by her. I think this may be a lucrative branch of the business of the company.

"I am much more sanguine of increasing the quantity of coal in a short time than I was when I left you in London.

THE CHINA CLIPPER RACE.

Once more this exciting and most interesting event is accomplished. Last year it will be remembered that the *Fiery Cross* and *Serica* both left Foochow on the 24th of May and arrived off the Isle of Wight on Sept. 10 in 109 days. The *Fiery* by obtaining a tug got first into dock and claimed the prize. This year the *Fiery* got away on the 29th May, the *Ariel* 30th, *Taiping* 30th, *Serica* 30th, and the *Taitsing* on the 31st. They passed Anjer in the following order:—*Fiery*, 18th; *Ariel* and *Taeping*, 20th; *Serica* and *Taitsing*, 22nd. On the 6th Sept. the *Ariel* and *Taeping* were reported off Deal at 8 A.M., with a strong breeze, going faster than a tug could tow them. When the wind headed them off they took steam up the river. At 1 P.M. the *Serica* was reported as in the Downs, and the same night they all docked, the *Taeping* in the London Docks at 9.50 the *Ariel* in the East India at 10.15, and the *Serica* at 11.30 in, the West India. The *Taeping* consequently gains the prize of 10s. per ton extra by twenty-five minutes!! We presume this also decides the bets. This in a passage of some 15,000 miles is almost incredible; that the ships must be very evenly balanced in sailing powers and have equally good *whips* seems evident. It is much to be regretted that the efforts made by shippers in China, and the subsequent toil of the captains, have not been rewarded by a better result than a loss of some £20,000 to £25,000 on each cargo. When will our merchants in China learn how to buy at rates which will reasonably leave a profit? Why toil in a country with the thermometer at 90 for the benefit of the Chinese?

The next day, the 7th, the *Fiery* was announced off Ramsgate and on the morning of the 8th she also docked. The passages stand thus:—*Ariel*, *Taeping*, and *Serica*, 99 days, *Fiery*, 102 into dock. Some dispute arose as to the proper claimant to the extra 10s. per ton, on the ground that the *Ariel* had to wait for water before she could get into dock, but the docks are the final test, inasmuch as a vessel is of no use without being in a position to discharge her cargo. On the 10th the *Taitsing*, Capt. Nutsford, which left Foochow on the 31st May—a day after the others—arrived at Gravesend and docked in the West India Docks at 1.30 P.M., being 103 days.

The *Ariel*, *Taeping*, and *Serica* were all built by Steele and Co., Greenock, who are now building another for Messrs. Shaw, Lowther, and Maxton. The *Fiery*, as our readers well know, is a Liverpool built ship, owned by Messrs. Campbell; the *Serica* and *Taitsing* are owned by Messrs. Findlay; the *Taeping* by Mr. Rodger, of Glasgow; and the *Ariel* by Messrs. Shaw, Lowther, and Maxton.

The reports of the vessels are as follows, except the *Taeping*, which has not been sent in for publication:—

"ARIEL," CAPT. KEAY.—Crossed the bar of the Min about noon of 30th May, closely followed by *Taeping* and *Serica*, all in company the next day. *Taeping* continued close astern and on the quarter till 2nd June, when we shaped course to go west of the Paracels, the *Taeping* continuing down the sea to eastward; on the 10th June met again on opposite tacks N.E. of the Natunas, *Ariel* about two miles to windward; continued working southward three days in company, during the 13th (which was squally), parted near the coast of Borneo. Passed Anjer 7 A.M. of 20th June; meridian of Mauritius 2nd July; Cape of Good Hope 16th; the Equator 5th Aug.; had very light N.E. trades, calms, and baffling N. and N.E. winds from 27 N. to 40 N., 38 deg. W., thence to 20 W. 47 N., unsteady, moderate and light, often running from N.E. to S.E. Abreast of St. Agnes light at 3 A.M. 5th Sept.; 5.30 A.M. *Taeping* again in sight about five miles to S.S.W. On the 6th 5.30 A.M. pilot came on board off Dungeness, *Taeping* about one mile astern. Arrived at the East India Docks about 9 P.M., but had to wait for water before we could enter.

"SERICA," CAPT. INNES.—May 30th, crossed the bar of the Min, in company with the Ariel and Taeping. Had light northerly winds to the south of the Paracels, from thence strong S.W. winds. Passed Anjer 6 P.M. on the 22nd. Carried good trades to the Meridian of Madagascar. Rounded the Cape; had light S.E. trades. Crossed the line on the 6th Aug., 68 days out. Had westerly winds to the Cape de Verd Islands (75 days), from thence a strong N.E. trade to 27 N. on the 18th. Had calm and light airs to the Western Islands (Aug. 30th); from thence home, strong westerly winds.

"FIERY CROSS," CAPT. ROBINSON.—May 29 left Foo-chow-Foo; towed out, and took fine wind to 19 20 N. Had a few hours' calm and southerly winds; then took N.E. wind again, fresh, to the Paracels. June 3—Southerly winds. 7th, noon, lat. 9 37, saw a large ship on opposite tack; supposed to be the Ariel. 20th—Off Anjer Lighthouse. Passed Mauritius in lat. 22 41 S., long. 58 W., July 15, 6 P.M. Sighted Cape of Good Hope light. 20th—Lat. 15, 14 S., long.—W. Aug. 4, 6 P.M.—Crossed the Equator. 7th—Fell in with the Taeping. 17th—Lat. 27 53 N., long.—; ship going not more than one knot per hour for 24 hours; parted company with Taeping.

"TAITSING," CAPT. NUTSFORD.—Sailed from Foo-chow-Foo May 31, rounded the Cape of Good Hope July 25, crossed the Line Aug. 12, and arrived off Portland Sept. 9.

The ships which next cleared from Foochow, and may now be looked for, are the *Ziba* (for Liverpool) June 2, *Black Prince* 3rd, *Flying Spur* 5th, *Chinaman* 5th, *Ada* 6th, *Falcon* 7th, *Belle of Southesk*, 9th, *Yang tze* 10th. From Hankow the first ships with the new season's Monings are the *Eliza Shaw* and *Min*, which left Hankow on the 7th and 9th June. The first ship which cleared—the *Guinevere*—having been lost in the Yang-tze.

The Singapore Gas Company have contracted for the laying down of mains in Fort Canning, Singapore, for the use of the troops there, also for mains along the roads leading to the private residences of merchants, &c. The increase of consumption in the town has been considerable.

THE OVERLAND ROUTE.

(To the Editor of *The Times*.)

SIR,—We shall feel obliged by your insertion, in the columns of *The Times*, of the following account of the treatment the passengers by the mails of the 20th and 28th ult., from Southampton and Marseilles, experienced at the hands of the Egyptian Transit and Peninsular and Oriental Companies on the road from Alexandria to Suez.

It may be premised that the passengers by both boats were in quarantine, owing to some cases of cholera at the ports they started from.

At about six o'clock in the evening of the 3rd inst. we were put on board a lighter and discharged at the Alexandria Railway station. The accommodation professing to be suitable provided for us first-class passengers was something between beast trucks and fourth-class carriages. On remonstrating, we were assured by Mr. Betts that we should be provided with everything we might want in the shape of food and drink, to be handed in through the windows at the stations where our train was to stop. At the first station we were unable to obtain even water. Subsequently, to avoid our importunity, the train was brought up a mile or so short of the stations, nor were we informed how long any stoppage might last, and so could not venture any distance from our cages. At about seven o'clock the following morning we arrived perfectly exhausted at Suez, where the whole flock of us, herded together during the journey across the desert for some 14 hours, without any necessary conveniences, were immediately huddled on board a lighter exposed to a tropical sun without a pretence of an awning, and after 45 minutes' tow scrambled up the sides of the steamer *Bengal*.—We are, Sir, your obedient servants,

EGERTON MILMAN, Major-General.

Peninsular and Oriental ship *Bengal*, Aden, Aug. 10.

THE P. AND O. COMPANY'S REPLY.

(To the Editor of *The Times*.)

SIR,—The attention of the directors has been drawn to the letter which appears in *The Times*, signed by a number of passengers on board the company's steamship *Bengal*, complaining of the treatment they had experienced at the hands of the Egyptian Transit and the Peninsular and Oriental Companies.

In reply I am instructed to state that the name of the Peninsular and Oriental Company cannot be fairly associated with this complaint. From the time of leaving the side of the company's steamers at Alexandria to the time of reaching the side of the *Bengal* at Suez the passengers were entirely in the hands of the Transit Administration, and the agents of the

Digitized by Google

Peninsular and Oriental Company, owing to the existing quarantine, were unable even to approach them, and without power to render them assistance of any kind.

In justice to the Transit Administration and to Mr. Betts, its superintendent, it ought, however, to be stated that the imposition of quarantine on all ships arriving from English and French ports has placed the authorities in a position of great difficulty. Either the passengers had to be detained in quarantine at Alexandria (a measure which would have resulted in the entire stoppage of the overland route in consequence of the frequency of the arrivals and the want of lazaretto accommodation) or to be forwarded through Egypt in quarantine.

The latter course, as the least of two evils, has been adopted, but the ordinary appliances for the conveyance of the passengers from ship to ship are no longer available. The use of the harbour steamers, of the ordinary railway carriages, and of the stations is strictly prohibited, and hence the inconvenience experienced by the subscribers of the letter.

The directors have spared no efforts, through their agents, to mitigate the discomforts arising from this state of things, and they are able to report that since the date of the letter now under notice the arrangements for the "transit in quarantine" have been much improved.—I am, Sir, your obedient servant, C. W. HOWELL, Secretary.

Peninsular and Oriental Steam Navigation Company,
122, Leadenhall-street, London, E.C., Sept. 11.

CAPTAIN NOLLOTH.—The *Army and Navy Gazette* says:—We published last week the address of a body of English merchants in China to Captain Nolloth, Royal Navy, on his leaving for England, and that officer's reply. Captain Nolloth has, we are glad to find, arrived in this country in better health than was expected by his friends. Captain Nolloth had the satisfaction of organising a dockyard at Hong Kong, and after having brought it into excellent working condition on the simple pay of a captain, he has been subjected to the mortification of handing it over to his successor, who has been nominated as a commodore of the second class, and who will only have to carry out the plans already in operation. A residence of nearly five years in a climate which has an exceedingly bad reputation, and a zealous discharge of important duties, should have some weight with a Board of Admiralty that aims at being strictly impartial, in the event of Captain Nolloth being desirous of seeking for further employment.

Monetary and Commercial.

The Mexican dollars brought by the St. Nazaire packet, *La France*, have been sold at 59¼d. per ounce, showing an advance of ⅛d. The silver market is firm, in consequence of a demand for Germany, whither the above will be forwarded after being refined.

The Fine Silver brought by the *Atrato* from the West Indies has been sold at 60⅛d. per oz. standard, a rise of ⅛d. per oz. upon our last quotations. Refinable bars have been disposed of at 61⅛d. per oz. standard, being also ⅛d. per oz. higher. £7,600 has been shipped per *Oneida* to the Brazils. There is a total absence of demand for the East.

In consequence of the calls on the shares of the P. and O. Co., owing to the high rate of discount having prevented the directors renewing loans on debentures on moderate terms, the new shares have declined from £16 prem. to £10. There is also an impression outside that the palmy days of the P. and O. Co. are over. The competition on the French and Italian lines, the Bombay line, the Panama and San Francisco line to China, to open in January, the new Panama route to Australia, and the proposed route by Java to Queensland, are looked on as dangerous to dividends.

In reference to the operations effected by some influential creditors of the Agra Bank (who had prior news of the failure) in selling bills to the Shanghai manager, and procuring payment for the same, we understand that these bills were returned by last mail by the official liquidator of the Agra, and we believe that one of the firms engaged in the matter withdraws entirely from the position assumed.

On the 7th inst. the following was in *The Times*:—

It is understood that the Agra and Masterman's Bank have received favourable accounts from the Hong Kong branch. It appears that, provided no unlooked-for obstacles are interposed, the manager feels confident he can close all the accounts without a single bad debt, and probably without the loss of a single dollar. The liquidation of the Shanghai branch is likewise expected to be satisfactorily carried through. Thus far all the circumstances connected with this undertaking, upon which the fortunes of hundreds of families more or less depended, tend to support the impression that its stoppage and its fearful consequent sacrifices, direct and indirect, might, with the exercise of a very moderate amount of firmness and courage on the part of the financial community have been averted. At the same time it will be well to remember that the ruin was solely due to the machinations of the class of speculators with whom and their operations the Stock Exchange Committee consider it would not be expedient to interfere.

The *Economist* has the following:—"The French Government has received information that French cloth is selling well in China, and that at Kiu Kiang and Hankow in particular, a considerable quantity has just been sold. French exporters are recommended to make the article as suitable as possible to the taste of the Chinese. !

The following reports of meetings, &c., have been issued:—

At the meeting of the London and Glasgow Engineering and Iron Shipbuilding Company (Limited) the report, which was adopted, stated that in January last all branches of the company's business were in full operation, and that the directors, looking at the work performed, considered the position of the undertaking such as to warrant them in recommending the payment of an interim dividend for the half-year at the rate of 6 per cent. per annum. It was anticipated that a larger amount would be available for division at the end of the financial year, on the 30th of June last, but a combination of exceptional circumstances, including the strike in the ship-building trade on the Clyde (now at an end), and the monetary crisis, has prevented the realisation of this anticipation. Although the accounts do not permit the declaration of a further dividend this year, £1,000 has been written off the preliminary expenses, and £344 is left to be carried forward, after allowing for the distribution already made. The directors were recommended to reduce the nominal amount of the shares from £50, with £20 paid, to £10, with a proportionate amount paid.

At the meeting of the Tahiti Cotton and Coffee Plantation Company (Limited) the report was adopted. It stated that, after writing off all preliminary and office expenses, a profit is netted of nearly 10 per cent. on the capital paid up, derived from the produce of an eighth of the land now bearing. There is every reason to anticipate that the expectation of the shipment of cotton to the value of upwards of £100,000 this year will be fully realised. Should the balance of shares still to be issued be taken up, the profit made would be made available for dividend, instead of being applied, as in the present instance, to defray the expenditure required to raise future crops.

The ordinary half-yearly meeting of the Hunasgeria Coffee Company (Limited) was held on the 29th August. The directors have placed the accounts before the shareholders up to the 31st of March for Ceylon, and relatively to England up to June 30th. Owing to the suspension of Messrs. Hallett and Co., the company's bankers, the directors are unable to declare any dividend beyond that paid for the half-year ending Dec. 6, 1865. The yield of the estate has been 10,000 cwt., which is now on its way to England. After some discussion the resolution for the adoption of the report was carried unanimously, and the meeting separated.

The report of the directors of the English and American Bank (Limited), presented at the first ordinary general meeting, announced a dividend on the deposit of £5 per share, at the rate of 2s. 6d. per share, free of income-tax. This will absorb £3,809 9s., leaving £2,032 17s. 1d. to be carried forward to the new profit and loss account.

The Board of Trade Returns for the month and seven months ended July 31st still manifest a comparatively favourable appearance. The total declared value of exports for the month of the present year was £14,957,834, against £14,113,410 in 1865, and £14,394,364 in 1864; which shows an increase of £844,424 over the former period, and of £563,470 over the latter. For the seven months of the present year the total was £107,815,664; in 1865 it was £88,242,048, and in 1864 £92,441,950; which is an increase of £19,573,616 over 1865, and of £15,373,714 over 1864. The Enumerated Imports show a still greater increase, the value for the month of June being £23,243,701 in the present year, against £15,407,688 in 1865, and £21,498,185 in 1864. The value for the six months of the present year is £115,273,358, against £75,340,872 in 1865, and £98,610,176 in 1864, being an increase of £39,932,486 over 1865, and of £16,563,182 over 1864. The trade with the ports and countries in the Far East contributes the figures following to the returns before us:—

EXPORTS TO CHINA AND HONG KONG.

	Quantity for the Month ended 31st July. 1864.	1865.	1866.
Cotton yarn	322,610	3,840	388,080 lbs.
Cotton manufactures	5,192,717	12,910,816	16,191,591 yds.
Worsted stuffs	1,371,718	1,767,961	1,373,773 „
Woollen & Worsted cloths.	214,455	221,105	139,922 „
Lead	566	107	102 ton
	Quantity for the Seven Months ended 31st July.		
Cotton yarn	1,271,582	872,702	2,912,506 lbs.
Cotton manufactures	42,084,813	68,354,658	101,973,487 yds.
Worsted stuffs	7,834,588	10,008,406	12,276,389 „
Woollen and worsted cloths	1,052,217	1,015,499	1,097,659 „
Lead	4,253	1,037	4,185 tons
	Value for the Seven Months ended 31st July.		
Cotton yarn	£153,266	£82,925	£285,187
Cotton manufactures	1,172,415	1,516,497	2,534,318
Worsted stuffs	513,791	758,534	823,338
Woollen and worsted cloths	175,084	172,670	187,456
Lead	93,962	22,647	92,010

The Cotton Manufactures forwarded to other ports and countries in the Far East during the month of July, and their value during the seven months of the respective years, are represented by the figures following:—

	Quantity for the Month ended 31st July. 1864.	1865.	1866.
Ceylon	957,232	391,165	3,821,786 yds.
Singapore	940,280	1,736,058	5,920,344 „
Java	1,078,144	2,191,206	3,027,990 „
Philippine Islands	80,922	2,694,983	58,720 „
	Value for the Seven Months ended 31st July.		
Ceylon	£268,937	£151,057	£342,940
Singapore	505,971	595,216	736,373
Java	418,898	394,569	739,639
Philippine Islands	334,646	436,237	314,747

Digitized by Google

Of Cotton Yarn the quantity exported to Singapore during last July was 252,550 lbs.; and during the seven months 811,920 lbs., against 933,390 lbs. in 1865, and 581,308 lbs. in 1864. To Ceylon 148,000 lbs. were exported in July, and 492,978 lbs. in the seven months of 1866, against 116,392 lbs. in 1865, and 126,100 in 1864. With, as follows, the

	Value for the Seven Months ended 31st July.		
	1864.	1865.	1866.
Ceylon	£20,200	£9,818	£57,451
Singapore	70,133	86,867	81,664

IMPORTS.

For the first time in the present year China appears in the list as forwarding us a small parcel of Raw Cotton. The returns present the following figures in relation to a material so important to our manufacturing interests:—

From	Quantity for the Month ended 31st July. 1864.	1865.	1866.
Egypt	88,609	134,448	70,729 cwts.
British India	281,224	275,454	509,942 „
China	71,959	46,043	13,496 „
Total from all parts	577,656	585,209	1,075,244 „
	Quantity for the Seven Months ended 31st July.		
Egypt	796,853	904,319	690,267 „
British India	1,889,997	1,411,296	2,888,141 „
China	483,328	256,928	13,496 „
Total from all parts	4,124,624	3,694,062	7,932,986 „
	Value for the Six Months ended 30th June.		
Egypt	£8,952,379	£6,193,841	£5,466,635
British India	15,023,536	5,880,043	11,737,547
China	3,570,152	957,866	—
Total from all parts	37,858,292	20,478,572	47,348,759

Of Unrefined Sugar the quantity imported from Java and the Philippine Islands during the month of July last was 3,828 cwt. of the 2nd quality, 859 cwt. of the 3rd quality, and 69,376 cwt. of the 4th quality. The quantity and value of this import from Java and the Philippine Islands has been as follows during the years named:—

	Quantity for the Seven Months ended 31st July. 1864.	1865.	1866.
Of all qualities	95,526	453,525	263,169 cwts.
	Value for the Six Months ended 30th June.		
Of all qualities	£105,735	£415,318	£164,122

Of Hemp from the Philippine Islands the import during the month of July was 985 cwt., and the quantity and value for the seven months and the six months is represented by the figures following:—

	1864.	1865.	1866.
Quantity to 31st July (cwts.)	98,076	145,562	28,312
Value to 30th June	£130,783	£149,177	£59,517

Of Coffee we received from Ceylon in the month of July 6,049,254 lbs., the general return for the three years being as follows:—

	1864.	1865.	1866.
Quantity to 31st July (lbs.)	36,972,517	38,259,126	37,637,536
Value to 30th June	£1,081,163	£1,023,562	£1,003,138

The quantities of the articles named remaining in the Bonded Warehouses of the United Kingdom on the 31st July were as follows:—

	1864.	1865.	1866.
Coffee (lbs.)	24,918,340	26,499,736	34,078,900
Unrefined Sugar (cwts.)	2,865,072	3,470,886	3,865,849
Tea (lbs.)	100,466,432	101,092,945	97,720,786

The present Returns give us the Declared Value of the Exports of British and Irish Produce and Manufactures for the half-year ended the 30th June; and also the Computed Real Value of the Merchandise Imported during the same period. The figures relating to ports and countries in the Far East present the following results:—

To	Exports during the Half-year ended 30th June. 1864.	1865.	1866.
Egypt	£3,031,297	£2,782,160	£3,864,470
China (exclusive of H. Kong)	1,435,531	1,718,225	2,630,041
Hong Kong	873,027	791,932	1,391,916
Ceylon	444,320	291,367	491,176
Singa. and Eastern Straits	783,891	853,943	944,437
Netherlands India (Java, &c.)	518,747	455,190	825,490

MANCHESTER MARKETS.

Grey Shirtings 7lb. 11s. to 11s. 6d., 8¼lbs. 13s. to 14s. 3d.; Cotton Yarn, 16s.-24s., 1s. 6d.; Maddapollams, 5s.; Long Cloths, 12s. 9d.; T-Cloths, 8s. 3d.; White Spot Shirtings, 14s. 6d.; White Brocade do., 14s. 6d.; White Damasks, 26s. 6d. nominal.

In shipping yarns the market is still very quiet, though there is some disposition for business at lower prices than spinners are willing to accept. Some few orders have been given out during the week of fair extent, relieving spinners to a moderate extent of stock. This branch of the market closes quiet. In home trade yarns there has been rather more inquiry, and a few offers for quantity of about ¼d. per lb. decline on Tuesday's rates. There has been no great deal done, but still there are evidences of a disposition to operate. In cloth we have had a very flat market. But few offers can be obtained, and those only at a considerable reduction on seller's quotations. Although these offers do not tend to much business, they have been in some instances accepted. Prices for most kinds of Indian goods are quoted decidedly weaker. There is no new feature in the market, and there seems to be little or nothing to account for this depression, except it be discouraging telegrams from India. A telegram from Calcutta, Sept. 4, quotes Manchester goods exceedingly low, and we have similar advices from Bombay. The anticipation of still lower rates of discount is supposed to have some influence adverse to business, but no doubt the great hindrance is the absence of any temptation. Money is now cheap enough to offer no obstacle if prices were lower, or if there was confidence in their maintenance.

ARTICLES OF IMPORT.

TEA.—Prices have receded for nearly all descriptions. The effect of the further reduction in the value of money to five per cent. has been more than neutralised by the accounts of the excessive export from China and the increased anxiety shown both by importers and the trade to quit stocks of old Teas before the new season's arrival. The last public sales comprised 47,736 packages, of which 40,773 packages were printed without reserve, and these have passed slowly at lower prices for nearly all descriptions. The new season's Teas, per Erl King, have proved very difficult of sale, especially the Congous, which are only taken in small parcels, even at a decline of about 1d. to 2d. per lb. on the opening prices; whilst several parcels Pak Ling Teas, (arrived Overland,) have been sold without reserve, at public auction, at from 2s. 1d. to 2s. 4d. per lb. The *Taeping*, *Ariel*, *Serica*, *Fiery Cross*, and *Taitsing* have arrived in dock, and the samples of them are in the market, but there seems but little disposition to operate, even at 1s. 10d. to 2s. 3d. The dealers seem determined not to be "bitten" as they were last year. Broken-leaf and dusty kinds of Congou, also siftings, have sold a shade lower, the leafy kinds have been firmly maintained. Fair to good common have sold about ½d. to ¾d. per lb. lower, as also fair flavory kinds. Medium Kaisows have sold at full prices, but fine to finest, both old and new season, have been heavy of sale at lower prices. Common to fair black-leaf kinds have sold at about ½d. per lb. decline, also the medium qualities. Good to fine Monings and Wopaks have sold, at public auction, at about the previous reduction in price. New-make Canton kinds, of fair quality, have sold about 1d. per lb. lower, and those "Overland" at about 2d. per lb. lower for good to fine. Amoy kinds show no alteration. Common to fair Oolongs remain as before. A few fine, ex "Erl, King," have found buyers at former prices. Souchongs show no alteration. Flowery Pekoes remain almost in a nominal state, even at the very low prices ruling. Scented Teas show no material alteration common to fair qualities selling steadily. In Uncoloured Japans there has been no change to report. In Green Teas there has been a fair business doing. The demand both from the trade and exporters remaining good, prices have been firmly supported, the chief demand being for the finer qualities of Moyune Tea. Hysons have been rather more inquired for at the low prices current. In Canton Teas there is no change. The stock in the United Kingdom on the 31st August was estimated at 79,500,000 lbs., against 84,000,000 lbs. last year. The quantity afloat at 34,804,735 lbs., against 25,500,000 lbs.

SILK.—Speculation in silk has continued, and No. 3 Tsatlees have been run up to 32s. 6d.; Maibash (Japan), 36s. There is too much reason to fear that these prices, being for the moment purely speculative, will lead to an inflation of prices in China, which on arrival will leave a loss. The latest telegrams from Shanghai, 19th August, quote No. 3 Tsatlees at 580 taels, which, at exchange 6s. 2d., is equal to 32s. Now at this rate it is pretty certain that manufacturers will curtail their purchases to very small

Digitized by Google

limits; in fact, the deliveries already prove this. The bales by the last and present mail cost only about 25s. to 26s., and of course leave a handsome profit. The quantity on board the mail just arrived is about 830 bales, and the following one brings about 2,660 bales. The total quantity for the season is estimated at 25,000 to 30,000 from Shanghai, 7,000 Canton, and 10,000 Japan, say 50,000 bales, although this is a very moderate supply, being some 12,000 bales short of the last year's export, still at the present rate of delivery it is quite as much as the market will absorb. The deliveries from the 1st to the 14th inst China 1,463 bales, Japan 280. Piece Goods:—A small assortment of Pongee Handkerchiefs at the Sales on 5th inst. were the only China Piece Goods. Some of these were nice useful goods, and buyers readily took them at high rates for the best lots; inferior Handkerchiefs were less noticed, and 247 pieces were bought in; the sold quantity was 1,049 demi-pieces, at the following rates:—

Plain White...	7¾ to 8 yds. × 28/29 in.	11¾ to 13 oz.	21s to 28s 6d.
	6½ „ 7 „	„ 24/25 „ 6 oz.	9s 10d.
Figured White	7¾ „ 8 „	„ 28/29 „ 9½ to 13 oz.	20s 4d to 26s.
	8 „ „	„ 28/29 „ 6½ oz.	11s 10d.
Figd. Crimson	7¼ „ 7½ „	„ 26/27 „ 6¾ to 7¼ oz.	12s to 13 0¾d.

Pongee Silks, Black Silk Handkerchiefs, none.—Damasks, 13 pieces, but not sufficient for a quotation, good Damasks are worth 105s. to 110s.—Of Crape Shawls, 564 plain white, from 6½ to 13¼ oz., were offered, but all bought in, the limits being rather above the ideas of the trade.

According to a circular of Messrs. Arles, Dufour and Co., of Lyons, the silk market during the past month has been in a satisfactory state, a fresh advance having been obtained, which may be estimated from 3 to 5 per cent. on European, and from 8 to 12 per cent. on Asiatic silk. The latter sorts have thus returned to, and in some instances even exceeded, the highest rates current in January last, while European still remain about 5 per cent. below. This movement is ascribed to an exceptional scarcity of silk at a moment when generally the most important arrivals are taking place, both from the silk-growing quarters of Europe and from China. Manufacturers are obliged to purchase for their daily wants, being without stock; but they act reluctantly, as they are unable thus far to obtain anything like paying rates for their goods, which remain in slack demand in all quarters.

COTTON.—There has been great dulness throughout the past week. During the week 700 bales Tinnivelly sold at 9d. to 10d. for fair to good fair, and 10¼d. for good to fine. Quotations at Liverpool—Middling Orleans 13½d., and fair Dhollerah at 9d. per lb. The sales at Liverpool this week have reached 49,570 bales, of which the trade have taken 34,090 bales, and speculators and exporters 15,410 bales. Telegraphic advices from New York to Sept. 3 quote middling uplands 33 cents.

SUGAR.—Increased heaviness has been observable in the market during the present week, and business has continued of light amount at prices tending in favour of the buyer. The supply of colonial descriptions by auction has been of trifling extent, viz—695 bags low, to good brown, Mauritius, chiefly bought in at 28s. 6d. to 29s.; and 796 bags, Natal, went off as follows:—common to fine brown 26s. to 30s. 6d., low to good middling yellow, 31s. to 33s. No sales of Penang or Manila.

COFFEE.—The colonial market at the opening had a somewhat quieter appearance, but has since assumed greater steadiness, and most of the parcels in auction went off at full rates; common sorts sold at a slight reduction. Of Plantation Ceylon, 140 casks and 40 bags sold at 78s. 6d. to 83s., and of Native Ceylon 2,900 bags were nearly all disposed of at prices; for good ordinary 64s. 6d. to 66s., and for fine 70s. to 70s. 6d. 448 bags Manila Coffee have been withdrawn. The stock of Coffee in the United Kingdom on the 1st inst. was 17,800 tons.

RICE.—Full prices continue to rule. A cargo of 1,300 tons Rangoon sold for the Continent at 10s. 9d., showing an advance of 6d. per cwt.

PEPPER.—Demand very slack, 1,502 bags Black Singapore at public sale met few bids, and only 260 bags of extra good quality brought 3½d. to 3⅝d., remainder going at 3⅜d. to 3½d., 2,538 bags Penang and Batavia were nearly all bought in at 3¼d. to 3⅜d. By private contract about 800 bags Eastern have been sold, Singapore at 3⅜d. to 3½d., and Penang 3¼d. to 3⅜d. In white there is nothing to report.

SAGO.—In auction 1,476 boxes found buyers at steady prices; small fair pearl 17s. 6d. to 18s. large grain 17s. 6d.

TERRA JAPONICA.—2,800 bags Cutch Pegue sold at 30s. to 31s. for good quality but slightly out of condition.

HEMP (MANILA.).—Scarce; prices high and trade limited. 1,600 bales at auction, which sold at £46 10s. to £48 10s. per ton.

HORNS.—Buffalo: 31 tons Madras, 21 tons Calcutta, and 1¼ tons Siam sold at 47s. to 49s. per cwt. for 3 to 3½ lbs. average, and 24s. to 40s. for 1½ to 2 lbs. average. Deer: Firm; 16 tons Madras, 4 tons Calcutta, and 1½ tons Ceylon sold at 49s. 6d. to 64s. per cwt. for 1¾ to 1¼ lbs average, and 41s. 6d. to 44s. for 2½ to 2½ lbs. average.

CARDAMOMS.—Very quiet; 27 cases Malabar at aucton all retired.

CAMPHOR.—Steady, but quiet. Business limited at £6 10s. per cwt. Japan, and £6 2s. 6d. China, landing weights.

DRUGS.—Cubebs: Very flat; 52 bags at auction retired. Dragon's Blood: Of 24 cases at auction one-fourth sold at £3 15s. to £6 5s. per cwt. for low to middling lump. Rhubarb: Demand improving and prices are realised not previously obtainable. Of 106 chests at auction three-fourths sold at 9s. per lb. good flat; 3s. to 6s. ordinary; and 1s. 10s. to 2s. 5d. low and inferior.

SPICES.—Cloves: 102 bales Zanzibar in auction were withdrawn. Nutmegs: 27 cases in public sale were disposed of at a decline of 1d. to 2d. per lb.

CINNAMON.—Quiet; 41 bales Ceylon offered were only partly taken.

COCOA-NUT OIL.—Improving; 47 casks Cochin and 841 casks Sydney at auction.

OILS.—Anniseed: Has further improved in value; prices 9s. 1½d. per lb. on the spot and 9s. 3d. for arrival. Cinnamon: Quiet, one case at auction retired. Citronelle: Of 43 cases at auction, half sold at 3½d. per oz. Lemon Grass: Abundant, 4 cases at auction sold at 1s. to 1s 2d. per oz.

JAPAN WAX.—Good quality scarce; 225 boxes ordinary at auction retired.

INDIA RUBBER.—Business unimportant, owing to absence of supply; 62 bags Assam at auction retired.

GUMS.—Benjamin: Flat, and 45 cases Sumatra all retired. Damar: Quiet, and 50 cases at auction retired. Gamboge: Still continues scarce, and 1 case at auction sold at £22 10s. per cwt.

GUTTA PERCHA.—Continues very dull; of 93 baskets at auction a few only sold at 5d. per lb. for ordinary reboiled.

TIN.—Prices declining: Closing terms £83 per ton for Banca, and for Straits £81 per ton.

MISCELLANEOUS.—Blacklead: At auction, out of 310 barrels a few only sold at 12s. 6d. to 14s. 3d. per cwt. for fair lump, and 9s. to 9s. 3d. for dust. Ebony Wood: Steady, and of 46 tons Ceylon at auction one-third sold at £7 to £12 5s. per ton. Galls: For Turkey prices higher, China rather lower, and Japan steady but in more adequate supply. Of 200 cases China half were sold at 63s. to 64s.; of 944 cases Japan half sold at same price. Musk: Prices firm and desirable qualities in good demand; 92 caddies Tonquin sold at 33s. 6d. to 34s. per oz. for fine picked, and 24s. 6d. to 25s. for middling. Rattans: Flat; 12,696 bundles Penang all retired. Soy: Cheaper, and at auction out of 46 casks recently arrived a few sold for 3s. to 3s. 1d. per gallon. Tortoiseshell: Auctions have comprised one case ordinary Penang, sold at 10s., and two cases Singapore retired. Vermilion: Cheaper, and of 28 boxes at auction a few sold at 3s. 6d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars £6 5s. to £6 10s.; nail rod, £8 10s. to £8 15s.; hoops, £9 10s. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 5s. to £6 10s.

STEEL.—Swedish keg, £15 15s.

COPPER.—Sheet and Sheathing, £94 to £96 per ton; yellow metal, 7¼d. per lb.

TIN.—£88 for block; £89 for common bars. Tin plates, best charcoal, I.C., 32s. to 33s.

LEAD, &c.—English pig, W. B., £22 15s.; shot, patent, £23 10s. to £24; sheet, £21 10s.; spelter, £20 5s. to £20 10s.; zinc, English sheet, £27; quicksilver, £7.

The following is from the Circular of Messrs. French and Smith:—At length we can report a decided improvement in the tone of this market, owing to the reductions of Bank rate to 8 per cent. on the 16th ult., to 7 per cent. on the 23rd, and to 6 per cent. on the 30th ult., and the prospect that now we may expect a very easy money market for a long time to come. Iron: Has not participated in the improved rates generally obtained in other metals. Copper: The improvement in this metal has been very decided. A large business has been done for consumption and shipment, and also a large quantity has been brought for investment. On the 27th ult. the English smelters declared an advance of £5 per ton, and late on the 3rd inst. a further advance of £3 per ton was declared. At these rates the market is very firm, especially for unmanufactured copper. Yellow Metal: Was advanced on the 27th ult. ¼d. per lb. Tin: Has largely benefited by the cheap rate of money. English: On the 29th ult. the smelters advanced their prices 3s. per cwt.; but as they were previously accepting orders at 5s. or 6s. below their list rates, the real advance was fully 9s. per cwt. In Foreign there have been many transactions, and we quote to-day 84s. 6d. to 84s. for Straits, and 85s. for Banca. Tin Plates: Are in good demand and prices advancing, and the manufacturers are well supplied with orders. The shipments last month were 150,000 boxes, against 95,000 boxes in August, 1865. Lead: There have been some good orders for shipment, without, however, much alteration in price; but the market is very firm. Spelter: Has recovered in price from £19, the lowest price reached during the month, to £20 10s., the present quotation. The stock on the 1st inst. was 6,628 tons, against 7,389 tons on 1st September, 1865. Quicksilver: Remains unchanged.

EXPORT OF BULLION TO CHINA &c.

FREIGHTS AND CHARTERS.

In outward berth freights from London we have no improvement to report, but rates remain firm at existing quotations. Coal freights from the out ports also continue steady at previous rates.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £43. For Singapore: £32. For Shanghai: £50. For Saigon: £50. For Yokohama: £51. For Galle: £30. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2 2s. For Singapore, £1 9s. For Shanghai: £2 10s. For Saigon: £2 8s. For Batavia: £1 6s. For Manila: £1 15s. For Galle £1 5s.

The Admiralty have ordered the Canadian to be surveyed for the conveyance of the following Government stores from the River Thames to Hong Kong, viz., 40 tons naval masts and spars, 112 tons, heavy, and 98 tons, light, Naval stores, also 31 tons cordage, 4 tons sails, 10 tons bricks, 52 tons coke, and 3 tons anchors. And the Spirit of the Deep for the conveyance to Singapore of a naval sounding engine, about 3 tons, a chart house in cases measuring 13 tons, about 1 ton weight boat's davits, and a naval whale boat and gear.

CASUALTIES.

The Maria Catharina (Dutch barque), Westewink, from Newcastle to Batavia, with coals, struck upon the Goodwin Sands, and sprung a leak, and was obliged to put in at Nieuwe Diep, 4th Sept., where she will have to discharge.

The Geo. Douthwaite, Davie, from Shields to Ceylon, with coals, anchored off Yarmouth, 12th September, leaking a little, having been on the shipwash, but required no assistance.

The John Bamfield, Bastian, from London to Colombo, arrived at Scilly, 10th September, with sail split.

The Fortuna, Loftus, from Singapore, which arrived at Liverpool 14th September, had experienced much bad weather from the Mauritius to the Cape of Good Hope, with a severe gale from W. to W.N.W. from the 8th to the 22nd June, during which her deckhouse was gutted and cabins filled, &c. From the Western Isles also she had very rough weather, starting cutwater, losing quarter boat, &c.

MISCELLANEOUS.

At ST. HELENA.—Previous to July 28, Granville, from Canton, for Havana; Wild Flower, from Ceylon; July 23, Cataluna (s.), Valleo, from Macao, and left 26 for Havana; 24, Rifle, Elliot, from Zebu, and sailed 25 for Queenstown; 25, Ida, Tatlock, from Ceylon, and sailed for London; George Green, Spencer, from Batavia; 26, Fortuna, Loftus, from Singapore and Algoa Bay, and sailed 27 for Liverpool; 30, Gaulois, Lavignac, from Canton, and sailed Aug. 2 for Havana; Lorelie, Ingerman, from Zebu, and sailed Aug. 1 for Falmouth; Ava, Young, from Ceylon, and sailed Aug. 1 for London; Pieter Adolf, Jaski, from Singapore, and sailed Aug. 1 for London; Roman (s.), Dixon, from Southampton, and left Aug. 1 for Cape of Good Hope and Galle; Oscar, Larsen, from Java, put in with rudder damaged; 31, Moneka, Morgan, from Singapore, and sailed Aug. 2 for London; Neptune's Bride, Lowther, from Ceylon, and sailed Aug. 2 for London; Charlotte of Derby, Langmaid, from Batavia, and sailed Aug. 3 for Rotterdam; Aug. 1, Robert Dickson, Nielson, from Samarang; Vertrouwen, Dekker, from Batavia, and sailed 2 for Amsterdam; Wilhelm Daniel, Zeylstra, from Batavia, and sailed for Amsterdam; Jupiter, Kieviek, from Batavia, and sailed 3 for Amsterdam. July 28, Antares, Olivand, from Singapore, and sailed 30 for Belle Isle; Congo, Dinse, from Manila, and sailed 29 for Queenstown; Aldebaran, Meyboom, from Batavia, and sailed 30 for Amsterdam; Argonaut, Dreyer, from Tjilatjap, and sailed Aug. 1, for Amsterdam; Magallanes, Certens, from Manila, and sailed 30 for Santander; 29, Java Packet, Hellingman, from Batavia, and sailed 30 for Amsterdam; Franz and Elise, Huofeld, from Java, and sailed 30 for Amsterdam; Strathmore, Burke, from Singapore, and sailed Aug. 1 for London; Meg Merrilies, London, from Ceylon, and sailed 2 for New York; 30, Vanguard, Scott, from Shanghai, and sailed 1 for London.

AT CALLAO.—July 29, Uncowah, Ardano, from Macao.

COOLIE SHIPS FROM CHINA AT ST. HELENA.—The following vessels with Chinese coolies have arrived during the first week in July:—The French barque Denis, with 320 on board; no deaths reported. The Portuguese ship Donna Maria Pia, with 338; 13 deaths. The French ship Carmeline, with 588; 12 deaths. The Italian ship Luisa Canevaro, with 671; 20 deaths. All from Macao for Havana. And the English arque Pride of the Ganges, from Whampoa for Demerara, with 331; 2 beaths; making a total of 2,255 coolies and 47 deaths. These vessels put into this port for water and provisions, which they obtained and sailed again.

THE ACHILLES FOR CHINA.—This vessel (which has arrived at Liverpool) is the property of Mr. Alfred Holt, and was built and engined on the Clyde. She is 1,550 tons register, and is intended to form one of the line of steamers trading between this port and the Mauritius, China, &c., which has been established by the above gentleman. The Achilles was taken into the Sandon Dock, where the work of fitting her out will be completed. Captain Russell, who is to have command of her, brought her round from Greenock. The trial trip of the Achilles took place on the Clyde, and was in every respect a success. When she stopped to put about she was going eleven knots per hour.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Amoy, March, 1865.

THE CHINESE COMMERCIAL GUIDE.

"CHINA MAIL" OFFICE.

No. 2 WYNDHAM-STREET (back of the Club):—

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.

(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents.
ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents. and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.

(The Morning of the Mail's despatch.)

PRICE.—To Subscribers to the Weekly issue, 8 dols to Non-subscribers, 12 dols. Single copies, 50 cents.

ADVERTISING.—The same as in the Weekly. All "Notices of Firms" appearing in the Weekly will be inserted in the *Overland*, and charged for, unless otherwise ordered.

A. SHORTREDE & CO.

Hong Kong, May 17, 1866.

HOLLOWAY'S PILLS.—Prostration of Strength.—When the system is weak and the nerves unstrung disease is certain to present itself unless some purifying and strengthening means be resorted to to avert the threatening mischief. In such cases no treatment can equal the treatment by these excellent Pills; no other plan can be pursued so well devised for ejecting all impurities from the blood without straining or weakening the constitution. Holloway's Pills so fortify the stomach and regulate the liver they raise the capability of digestion, and thus create new power. This is the reason why Holloway's Pills have gained their present popularity, and why they have been handed throughout the globe as a fresh source of life and strength.

RADLEY'S HOTEL,
SOUTHAMPTON,

IMMEDIATELY OPPOSITE THE RAILWAY TERMINUS AND DOCKS

THIS FIRST-CLASS HOTEL, so well-known to most Travellers from the East and West Indies, China, the United States, Brazils, &c., is admirably situated for their convenience, Mr. RADLEY having, by careful organisation, made those arrangements that have tended so much to establish its reputation.

Mr. R. employs no touters or paid agents, but his Porters are always in attendance to meet passengers on arrival, with carriages, &c., as usual. Rooms may be engaged by letter from Malta.

WALKER'S CRYSTAL CASE WATCHES.
PRIZE MEDAL, 1862.

JOHN WALKER,
CHRONOMETER, WATCH AND CLOCK MAKER
(BY APPOINTMENT), TO THE
English, Indian, Foreign, and Colonial Railways,
68, CORNHILL, AND 230, REGENT STREET, LONDON.

J. W. SOLICITS the attention of Military and Naval Officers and the Public of China to his CRYSTAL CASE WATCHES, as they are especially adapted for foreign use.

The CRYSTAL CASE WATCH is so constructed that it entirely obviates the necessity of a Hunting Case Watch, as it is much stronger and cannot so easily get out of repair. Description Pamphlets with List of Prices on application.

MESSRS. COLLARD & COLLARD

FIND it NECESSARY to CAUTION the Public against the EXTENSIVE FRAUDULENT USE of their NAMES in the COLONIES, and urge on Purchasers the necessity of Examining very Carefully the NAME-BOARD of any INSTRUMENT they may be Buying; but especially they recommend that in all cases Respectable DEALERS or PROFESSORS of MUSIC should be CONSULTED for GUIDANCE.

A Certificate of Authenticity accompanies every Instrument sent abroad by Messrs. COLLARD and COLLARD.

16, GROSVENOR-STREET, and 26, CHEAPSIDE, LONDON.

PRIZE MEDAL,
INTERNATIONAL EXHIBITION, 1862.
AWARDED TO
F. MORDAN,
FOR
IMPROVEMENT IN WRITING MATERIAL

F. MORDAN'S EVERLASTING GOLD PEN is now established in reputation as the most beautiful, useful, and truly economical Pen ever manufactured. Thirty years' experience has only increased the estimation in which it is held, and tested the value of the warranty given with it. F. MORDAN can now proudly point to a sale of upwards of 90,000.

F. MORDAN'S PATENT PNEUMATIC INKSTANDS, the most useful and simple ever offered to the public, perfectly protecting the ink from dust or evaporation.

F. MORDAN'S WRITING, COPYING, BLUE, BLUE BLACK, BLACK, COLOURED, and MARKING INKS, in bottles of new and useful designs, with patent spouts and stoppers. These bottles are rapidly superseding all others, there being no increase of price for these improvements.

F. MORDAN'S PERFUMED MAUVE INK for Ladies' writing.
F. MORDAN'S SCENTED SEALING WAX in fancy colours; also HARD INDIA WAX for warm climates.
F. MORDAN'S LIQUID GLUE, for mending Glass, China, Wood, Metals, &c.
F. MORDAN'S PREPARED LIQUID GUM, for Office use, and general purposes.

PEACOCK & BUCHAN'S COMPOSITION FOR IRON SHIPS.

THIS is now established as the best and cheapest Composition known for keeping the Bottoms of Iron Ships CLEAN and free from Corrosion or GALVANIC ACTION. Apply to the Manufacturers direct, at SOUTHAMPTON, or to their accredited Agents at all the principal sea ports of the world.

From Captain John Ralph Engledue, Managing Director of the Thames Iron Works Ship Building, Engineering, and Dry Dock Company, Orchard-yard, Blackwall:—

"The Thames Iron Works, Ship Building, Engineering, and Dry Dock Company (Limited),
"Orchard-yard, Blackwall, E., September, 26th, 1865.

"Messrs. Peacock and Buchan.

"Gentlemen,—I shall at all times have much pleasure in bearing testimony as to the value and superiority of your Compositions for Ships' bottoms.

"I have used the No. 2 extensively for the last fifteen years, more particularly on the bottoms of the iron ships belonging to the Peninsular and Oriental Steam Navigation Company, and in every instance successfully. It is easily applied, economical, keeps the bottom CLEAN, and also has the property of preserving the iron.

"I visited, in dock, an iron SAILING vessel, called the 'Chile,' a few weeks since, and found her bottom perfectly clean, which had been coated with your Composition for upwards of twelve months, having made a voyage to New Zealand and back, and in salt water the whole time.

"I have also used your No. 1 Composition for the bottoms of wooden ships, coppered, and found it most advantageous, making the copper last double the usual time, and then only taken off to recaulk.

"I have at various times tried preparations of copper on iron ships, and in every case found the iron and rivets damaged.—I am, Gentlemen, yours faithfully,

"(Signed) J. R. ENGLEDUE."

"Egyptian Navigation Company, Azeeziah Mussriah, 61, Mark-lane, 7th July, 1865.

"Messrs. Peacock and Buchan, 39, Upper East Smithfield.

"Dear Sirs,—I have received orders to send to Egypt three tons of your patent Composition for ships' bottoms, same as supplied me in July, 1864. I now wish to know the soonest time you could have this packed and ready for shipment, as there is one of the Company's steamers leaving London about the end of next week. Please reply by return, and state price,—I remain, yours obediently,

(Signed) D. ABDUL HAMID BEY,
"I. FRICKEN."

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,
METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York and at 37, Gracechurch-street London.

IMPORTANT

TO PERSONS RESIDING IN HOT CLIMATES.

ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES.

It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corode or get out of order, and can be worked (with or without Ice) by the most ignorant servant. The Freezing Salts employed are indigenous to most hot climates, easily and cheaply obtained. A *bona fide* Receipt for preparing them given with each Machine. It is not too much to say that the "Piston" Freezing Machine is rapidly becoming indispensable to all European residents in India and China.

PRICES:—For 1 Bottle, 1 Block of Ice, 1 Dessert Ice... ... ... £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice, 4 Dessert Ices 11 5 0

If without fittings (merely as Wine Coolers.)

For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0

When Dessert Ices are never required, these Wines Coolers can be fitted with BLOCK ICE MOULD at 30s. for each Mould so fitted.

HARMONIUMS.

W. E. EVANS,

THE ORIGINAL INVENTOR AND MANUFACTURER OF HARMONIUMS IN ENGLAND,

Prize Medal 1862.

RESPECTFULLY draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, in selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every Instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned, SPECIALLY PREPARED FOR INDIA, are recommended:—

No. 1.—With One Stop, in Oak or Mahogany... ... ... 11 Guineas.
(Tinned Packing-case, and delivery at any home port, 35s. extra).

No. 3.—With four Stops, in Oak or Mahogany ... ... 21 Guineas.
(Tinned Packing-case, and delivery at any home port, 40s. extra).

No. 5A.—With Twelve Stops, in Oak or Mahogany ... ... 29 Guineas.
Tinned Packing-case, and delivered at any home port, 42s. extra).

No. 6A.—With Fifteen Stops, in Oak or Mahogany ... ... 43 Guineas.
(Tinned Packing-case, and delivery at any home port, 45s. extra).

No. 9.—With Nineteen Stops, and Two Rows of Keys, in Oak or Mahogany... ... ... 80 Guineas.
(Tinned Packing-case, and delivery at any home port, 63s. extra).

THE "EVANS" IMPROVED HARMONIUMS

Are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private houses whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. EVANS' improvements, without any MECHANICAL appliances.

Fully detailed Price List, with Testimonials from the most eminent Musicians, &c., may be obtained of the Sole Manufacturer and Patentee,

W. E. EVANS, 2B, MARKET-PLACE, GREAT PORTLAND-STREET, LONDON, W.

Mr. Evans is in no way connected with any other House in London.

Per P. and O. steamer, from Southampton, Nov. 4.—To Yokohama: Mr. E. Trotter. To Shanghai: Mrs. Wadman. To Hong Kong: Mr. E. Bigg, Mrs. F. B. Johnson and two children, Mr. and Mrs. W. T. Richardson. To Ceylon: Mr. Justice Thompson.

From Marseilles, Nov. 12.—To Hong Kong: Mr. P. J. Forbes, Mr. E. Cunningham Mr. G. Hughes, Mr. D. King, junr. To Shanghai: Colonel Raikes.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates from this port reach to the 28th July. The English mail of the 26th May was received on the 14th July, being six days before its due date, and only forty-nine days from London.

In our last issue we recorded intelligence, received by way of San Francisco and New York, to the effect that the dispute between the Tycoon and Chosiu had been settled by certain concessions on the part of the latter. This was shortly afterwards contradicted by a telegram received on the 24th inst., bringing news from Shanghai down to the 22nd ult., and announcing the outbreak of actual hostilities between the Tycoon and the Daimio, and this is probably correct. The local papers received by the present mail give some rather conflicting accounts of the state of affairs. The *Japan Times* says :—

"We have to record no material change in the aspect of political affairs. We have certain information overland from Kioto, from which it will be remarked that Chosiu still shows a bold front, and has not the least intention of yielding to the demands of the Shogoon. This is confirmed by information from another source which, though coming from Yedo, does not labour under the disadvantage of being official, and may be relied on as proving the truth of our intelligence from the seat of war. Both concur in stating that the Yedo chief is again 'on the point' of proceeding to attempt the fulfilment of his boast of June, 1865, when his long array of troops left Yedo for a short and pleasant couple of months' excursion at Chosiu's expense. Truly, the position of the Shogoon is not very dignified—urged to fight by the Mikado's party and others whose object is to weaken his power and whose wish is to see him beaten—almost compelled to attempt the attack by the necessity to which he has been reduced by the collective injustice of the Western Powers, and the individual rapacity of some, impoverished by being compelled to pay on the one hand for crimes which he did not commit and on the other for docks, steamers, machinery and 'instructors' which he has not received—and yet restrained by a very wholesome fear of his declared adversary Chosiu and of Satsuma his more than suspected foe. No wonder that the Shogoon should be now, as is well known to those best acquainted with Japanese politics, the worst enemy the foreigner has in this country. The position of the Shogoon and his Government is not improved by the increasing dissatisfaction of the Yedo populace: we have heard of riots there and considerable damage has been done to the houses and property of dealers in articles of food. The local authorities seem either powerless to repress these disturbances or afraid to excite the rioters to more violent measures, for to attempt was made on the occa-

Digitized by Google

sion of the most serious uprising when a mob of some hundreds assembled, to quell the disorder. This was made subject of remark to us by an intelligent Japanese acquaintance, who takes a far-sighted view of affairs. 'See,' said he, 'how weak this Government is. The police can seize and brutally ill-treat a single thief or a small party of some other Daimio's retainers on the Tokaido, but they make no attempt to restrain a mob of four or five hundred coolies from destroying the property of innocent traders.' When an Eastern Government's own servant speaks of it thus, it augurs ill for its stability. The Yedo officials continue, by way of allaying the excitement, to publish repeated notifications to the common people that the war with Chosiu has been stopped by his unconditional surrender, and that rice will, in consequence, be soon abundant and cheap. As we intimated last mail, these documents are about as truthful as one of Napoleon's *Moniteurs* or a Russian bulletin during the Crimean War."

The following is a literal translation of the letter from the seat of war, above referred to Kishiu, who commands in chief, is a relative of the Shogoon, being one of three families called Gosanke, from one of which the Shogoon is necessarily selected under the present *regime*; Matsudaira is one of the Gorogio.

KIOTO, 8th July, 1866.

"The punishment of that thief Chosiu for his repeated acts of rebellion has at last been decreed. The Prince of Kishiu, as Commander-in-Chief, has already started, and Matsudaira Hoki no Kami as his lieutenant, sails this morning. Kiogoku Shiuzen no Sho has been appointed Inspector-General of the Shikoku contingent, and will start to-morrow. The 5th of next month (July 16th) is appointed for the commencement of hostilities by the united contingents of the *fudais* (small Daimios dependent on the Shogoon).

"Chosiu is determined to fight to the last, but I don't think him likely to have the best of it. However, he has brought it on himself. As the war progresses I'll let you have more news."

Greatly confirming the above is the communication from Yedo, which we quote below. This is not a literal translation, but a precis of information received from an authentic source:—

"That Chosiu agreed, or rather pretended to agree, to a settlement is almost certainly true, but that he ultimately played false again is palpable to everyone here (in Yedo).

"Kioto is now guarded by 'Stotesbashi (the ambitious prime minister of the Shogoon, and of the Gosanke family of Mito). So strong is the feeling against the Yedo army there that even the merchants of Osaka are anxious to witness its return to the north.

"The Shogoon has called upon Echizen (formerly So-sai-sho—a high office in the Mikado's court) for advice and assistance, and also upon his relative Kishiu, (a Daimio of 550,000 kokus), to strike Chosiu and his adherents (the whole of the Kiushiu Princes combined).

"The Shogoon remains at Osaka fearful of heading the army himself.

"It is generally thought and freely spoken that if the Shogoon sends Stotsbashi to the front, his rule is near its end. Stotsbashi (*lit.* 'one bridge') will give the disaffected a chance to 'pass over' in safety and have himself proclaimed Shogoon."

The chief item of local intelligence was the compulsory sale, by order of H.B.M. Consul, of the British schooner *Norfolk*. The vessel had lain a long while in the port, and was heavily in debt. On proceedings being taken in the Consular Court by the creditors, the Consul ordered the vessel to be sold by public auction. She was accordingly offered by Messrs. Hansard and Black, and knocked down to the highest bidders—Messrs. Kemptner and Co.—for 3,000 dollars. The master of the vessel protested against the legality of the public sale, and himself effected a private one for 17,000 dollars, to another purchaser. The first sale was then repudiated by the Consul, on the ground that intimidation "was used by a Mr. Crutchley," which caused intending purchasers to withhold their biddings. The case, therefore, will probably furnish occupation for gentlemen of the long robe, and appears to be a very pretty quarrel as it stands.

The rice riots reported last mail appear (says the *Japan Herald*) to have ceased. They broke out on the evening of the 10th July, when a number of shopkeepers, coolies, and even priests went in parties of forty or fifty from various temples where they had assembled to Sinagawa, and having raised a total number of five hundred or six hundred, commenced an attack on the rice, sugar, and saki shops and even some tea-houses and money-changers' shops, breaking and removing the shutters, and in some instances wasting the contents of the godowns. The riot was continued on the following evening, and broke out in various parts of the city. At Kanasuyi, Honshiba, Hamats'cho, Asak'sa and other places leading out of the Tokaido at different points, great damage was done; but it is remarkable that no robberies took place, only the fronts of the houses battered in, and the shopkeepers punished by such means for charging extortionate prices. The houses attacked seem to have been marked, for all were not visited, and very few of the poorer. The rioters did not allow any idle spectators, for they immediately knocked down or drove away any who appeared in such a character. They also compelled all the storekeepers whose houses were not attacked to keep them shut closely and remain inside of them. Some of the richer of the storekeepers purchased immunity by presents of rice, &c., but the purpose of the rioters seemed to be rather punishment than plunder. There are about 300 of them in custody. The price of rice having fallen in Yedo two boos a picul, this was attributed to the measures of the rioters; but the Gorogio thought proper to explain that such was not the case, but the natural consequence of the unlocking of stores, rendered no further necessary by the cessation of hostile fears, and by the payment of a large quantity by Chosiu to the Tycoon. We hear that a considerable quantity has arrived in Yedo from Sendai. During the disturbances the Government increased the guards at the legations; and when Mr. Eusden had occasion to go into the city, he was accompanied by a guard of twenty yaconins, instead of five, the ordinary number.

Regarding commercial affairs, the *Herald* says:—"In Japan we have had our local difficulty, in the cheapness of the ichibous, and they are now at a price such as few would have calculated on their reaching, as they are actually worth just their intrinsic value in silver—making no allowance for coinage. When the Japanese get their mint in operation, which it is expected they will do by the 1st of January, 1868; simultaneously with the opening of Hiogo, the fixed rate will be 311 ichibous per $100 with a small per centage for coinage—so now it is actually cheaper than it will be then: The gradual fall in the price has been one of the principal causes of the great slackness in trade. Japanese merchants having to buy dollars at such a ruinous price to pay for imports, have bought as sparingly as possible, and even in some instances failed to fulfil contracts entered into with them for forward delivery. *En passant*, we may remark that mint coming out to the Japanese was not purchased in France but in Prussia, the commissioners sent by the Tycoon's Government considering that thetGerman machinery was the best adapted for the Yedo requirements of any that were offered to them. While imports have been so heavily affected by the state of the money market exports have been hardly less so, and although the price of silk is much lower than it was, the exchange makes the price of it actually better for the Japanese merchants than when it was at its highest, whilst the advices from home of the fall in price renders its purchase everyway unfavourable to the foreign merchant. The season of 1866-67 therefore commences about as unsatisfactorily as it is possible to conceive, and we can only hope, as well as we may, that things have seen their worst."

Messrs. Findlay, Richardson and Co., of Glasgow and Manila, advertise having a branch of their firm at Yokohama, under the management of Mr. R. V. Grahame.

Messrs. Glover and Co., of Japan, advertise that after the 31st July the business of their firm at Yokohama, will be carried on at the premises of Messrs. R. Lindau and Co., and from that date Mr. Rudolph Lindau will sign their firm per procuration.

NAGASAKI.

The P. and O. Company we understand will provide another steamer, to supply the place of the *Granada*, lately sold here Nagasaki, to run between this port and Shanghai.

Sir Harry Parkes returned with Admiral King from Kagosima to this port on the 1st August. He and the Admiral were, we learn, extremely well received by Satsuma, who made them several handsome presents. Sir Harry intends to proceed next to Simonoseki where he will be met by the Admiral with the fleet. The French Minister had also arrived at Nagasaki in the *Laplace*.

Nagasaki residents complain greatly of a recent blunder by the Post-office at Shanghai, in sending the Nagasaki mails by the *Argus* to Kagosima instead of direct to Nagasaki by the *Cadiz* or *Aviso*, which were leaving at the same time. Admiral King kindly returned them to Nagasaki by the *Salamis*, otherwise they would have had to go on to Yokohama, and struggle back as best they could to their proper destination.

CHINA.

HANKOW.

The water is still rising in Hankow, and is reported to be doing serious injury. A large foreign hong has given way, and a whole square fallen down, killing some thirty Chinese in its descent. This was caused, we hear, by the water sapping the foundation. We are informed that there is not at present a dry place in the settlement, excepting a small patch of ground at the back of Messrs. Russell and Co.'s hong.

A fire broke out in Hankow on the night of the 31st July in the foreign Settlement, and destroyed between forty and fifty Chinese buildings. It was extinguished in about two hours.

Digitized by Google

SHANGHAI.

The P. and O. mail of 10th June arrived on the 25th July, and the French mail of 17th on the 4th August. The dates are now down to the morning of the 6th. The following items are from the *North China Herald* :—We have received, from the Inspectorate of Customs, returns of trade at the several treaty ports during the three months ended 30th June last. It has of course not been considered necessary to specify every item with the minute accuracy which characterises the yearly reports. The principal articles of import and export only are classified. A prominent feature in the return is the great increase in the import of grey shirtings to Shanghai, over the same period during the previous year—493,959, against 171,792. At Hankow, an active trade is reported, though at reduced rates ; the Foochow return shows, also, a considerable increase, though the trade at this port is said to be so entirely in the hands of Chinese that is difficult to ascertain whether the amount of business done corresponds with the quantity of goods imported.

The receipts for messages *via* Kiachta amount to tls 2,481 during the four months it has been working, the accounts showing a rapid increase in the number of messages transmitted. The subscribers, with singular liberality, have handed it over to Mr. Grant, the manager, on the simple understanding that he will repay the tls. 6,000 expended on initiating the scheme, in yearly instalments of tls. 2,000.

Siberia appears to be gradually attracting more attention as a means of communication with Europe. A passenger caravan is announced to set out from Tientsin on the 10th August, if a party can be collected. Public announcement of the project has been too long delayed to enable any one from Shanghai to join it this year. But there can be no doubt that, in future seasons, many persons intending to return to Europe will be glad to exchange the heat of the Red Sea for the cool breezes of Mongolia, if they can avoid the troublesome arrangements incidental to a solitary journey.

The men concerned in the robbery of sycee from Messrs. Waller and Company's silk boat have all escaped punishment ; the two Englishmen and the Austrian by breaking prison, and the American in consequence of a slight technical omission in the conduct of his trial. The assessors, however, dissent from the judgment of the Consul-General in the latter case, so it must be referred to Peking for confirmation.

Sir Edmund Hornby's recent visit to Peking has resulted in the publication by H.B.M.'s Minister of three additional regulations affecting legal procedure in China, which will, we think, commend themselves as useful and necessary. According to Mr. Wade, they relate to the registration of mortgages, the registration of bills of sale, and the registration of companies. Mortgages and bills of sale must be registered at the Consulate of the district in which the property is situated within fourteen days of the execution of the deed ; and with respect to suing co-partners it will in future be sufficient in the indictment to specify one of the names in lieu of all as heretofore. The utility of the first two regulations is obvious, and the third though more novel is no less important. Hitherto it has been obligatory in China, as in England, to insert in every plaint the names of all the partners in any firm which it may be intended to sue, and, we believe, to serve a notice on every individual member, whether resident in Hankow, Foochow, or Canton. The inconvenience, obviously, was very great and apparently unnecessary. Sir Rutherford Alcock has now removed it, of course at the instigation of the Chief Judge, by ruling that, in future :—

"Every such co-partnership and the several members thereof, or the persons or person having carried or carrying on business under the style of any such co-partnership, may be sued in any action at law in the name or names of any one or more of the members of such co-partnership, on behalf of all the members comprising the same."

In brief, whereas it was formerly necessary to insert the name of every individual member of a firm in the plaint, it is now only necessary to insert the name of one, specifying that he is sued as a representative of the firm.

A meeting of the Shanghai Rowing Club took place on the 27th July, when it was decided that the committee be authorised to proceed with the erection of the new boat-house on the site proposed by them, partly on Yu-Chong's grounds, accepting the condition made by Yu-Chong that the house be removable on his giving six months' notice. It appeared that the sum of tls. 1,600 or 1,700 had been already collected, while the total amount required for the erection of a new boat-house was about tls. 2,000

The Shanghai Volunteers held their annual meeting on the 23rd July, when Sir E. Hornby, commandant, took the chair. The business transacted was not of very much importance, the chief matter consisting in the passing of a resolution whereby volunteers will be allowed to compete for prizes at the meetings with any rifle of Government make. The Rangers' Corps also held their usual annual meeting on the 25th July, when the accounts were passed and other routine business transacted.

The committee appointed in May last to take some steps with respect to the investment of the recreation fund have applied to the Shanghai Club to whom the money had been lent on interest by the trustee, for repayment of tls. 10,000 which it had been resolved to apply for at the previous meeting of the recreation fund shareholders. The Shanghai Club have however returned an answer to the effect that the utmost they can repay is the interest and that it is useless to apply to them for the capital.

A measure which was suggested by Mr. Seward United States Consul-General for suing the Municipal Council, having for its basis the plan of making that body amenable to the Consulate of the plaintiff in any given case, has been opposed by the council with the exception of Mr. A. A. Hayes. The members who do not approve of the measure have addressed a letter to Mr. Seward recording their dissent ; and suggesting that a joint court should be formed to consist of the senior Consul at Shanghai together with three other consular assessors.

A meeting of the shareholders in the Shanghai General Hospital took place on the 3rd August at the Ewo Hong ; Mr. Keswick taking the chair. The accounts and report were laid before the meeting, and after some discussion they were passed. It appears that there has been a large amount lost to the proprietory in consequence of a number of the persons who sent patients to the hospital and guaranteed their expenses, failing to pay the accounts. On the whole, however, the state of affairs was satisfactory ; the institution being free from debt, and there being a balance in hand. Mr. J. Barnard was appointed secretary, with a salary of tls. 1,000 per annum.

The recently established volunteer fire-brigades, got up chiefly by the American inhabitants of Shanghai, have had several trials of their engines. At the last one, where the endeavour was to test the working power of the engines, the hose was found perfectly rotten. This, however, can be replaced, and the brigade will then be in a position to afford useful service in the event of a fire breaking out ; and they will supply a want long felt in the settlement.

We have heard of four sudden deaths in the settlement and one or two narrow escapes from cholera. Messrs. Siemssen and Co.'s silk inspector ate heartily at dinner and was a corpse before midnight. A constable at the gaol died as suddenly. A painter in the employ of Mr. Sewell was playing the break of No. 1 fire engine, over heated himself, went home, and was dead in half an hour. The other death was on board ship, the wife of the master of the *William Melhuish*, who was recently confined on board the *Agamemnon*, and was too weak for the great heats of the past few days.

The ship *Star of China* had a narrow escape on her outward voyage, having grounded a short distance from Woosung while in tow of the *Titan*. The tide setting in shortly afterwards, however, she fortunately got off and proceeded to sea.

The conduct of the managers of the Comptoir d'Escompte and Central Bank of India has been very strongly criticised in reference to their proceedings in the estate of Messrs. Dow and Co. It appears that after having agreed on the desirability of winding up the estate under inspection at a general meeting of creditors, they subsequently, without consulting the other creditors, placed the estate in bankruptcy. In our issue of the 5th inst. we noticed that a meeting would be held on the 20th July, for proof of debts and choice of creditors' assignees. Mr. Hargreaves submitted a claim for taels 632.51 for balance of an account. A question was raised as to the liability of the estate for this claim, it being alleged that this claim was contracted by the old firm of Dow and Co., and not by the firm now bankrupt. The claim was ordered to be referred to the creditors' assignees. Mr. E. Whittal, as attorney for Messrs. Scott, Bell and Co., tendered a claim for £33,609, to which the same objection was raised. Mr. Myburgh, on behalf of the whole body of creditors, objected to the admission of this claim as the debit balance was due by the old firm. The books of the bankrupts represent Messrs. Scott, Bell and Co. as debtors to the estate. After some discussion the claim was ultimately rejected. The Comptoir d'Escompte put in a claim for taels 76,817.33, which sum represented twelve bills of exchange, amounting altogether

Digitized by Google

to £22,501 1s. 1d., at 5s. 10d. exchange, that being the rate on the day of adjudication. Proof was admitted. The official assignee intimated his objection to the rate of exchange and gave notice of his intention to move the assignees to appeal. The manager of the *North China Herald* put in a claim for 32 taels, which was admitted. The meeting was then adjourned until the 27th inst., when the assignees will be chosen.

In our last issue we announced that news had been received of the murder of six French missionaries in the Corea. We now supplement the following particulars:—

"On the 7th July a Corean junk, with the French tricolor at one of its mast-heads, was observed entering the harbour of Chefoo. It brought the Rev. Abbe Ridel, Catholic missionary, and eleven Corean Christians, who have fled from that country on account of the persecution now raging there by order of the father of the King against the Christian Churches. Mr. Ridel reports that in the month of February last the King received intelligence that the Russians had crossed his frontier, and that they were holding intercourse with his subjects. At the same time the Corean embassy in China informed their sovereign that the Chinese had murdered two Catholic missionaries, and that it would be well to imitate this example. Upon this a general order was issued to apprehend all the Catholic missionaries (there being no other missionaries) and to exterminate the Christians. Two French bishops and seven priests were arrested, and after having been cruelly tortured were beheaded. As a special favour, a request by some of the missionaries to be executed on Good Friday was acceded to. Only three Catholic priests remained, and they managed to hide themselves in the mountains. They determined that one of their number should endeavour to reach the coast, and come to this port for the purpose of asking the protection of the French Government for those who remained. Mr. Ridel was selected by his confreres for the task, and it was only in obedience to the united judgment of his brother priests that he parted from them, and came on his present errand. He describes the devastation committed on the Christian Church of the Corea as appalling. One town, nearly all Christians, were ordered to renounce the faith. Many were martyred; others fled, and the greatest consternation prevails. The Pagan population are averse to the persecution, but they are too weak to resist. There were at the beginning of this year about fifty thousand Catholic Christians in the kingdom of Corea. The two priests who survive, if they can escape the researches of the King's soldiers, will try to keep alive the faith until fresh missionaries arrive; but they have lost everything. The library which existed in the capital city, containing many Corean books, and especially two dictionaries of the Corean language, compiled by the French missionaries with the labour of twenty-five years' continual application, together with the printing establishment and material for publishing books in the Corean language, have all been destroyed. The loss to the science of languages incurred by the destruction of the above named dictionaries is, it is feared, irreparable. All the sacred vessels for celebrating the holy sacrifice of the mass have been destroyed by the King's orders, and the Christian church in the Corea is threatened with destruction. At the time Mr. Ridel left the persecution had momentarily ceased, as the King found that it interfered with the harvest of the crops; but orders have been given to resume the work of extirpating the Christians in the approaching autumn."

A later account just received will be from our correspondent under Hong Kong.

HONG KONG.

The French mail of 17th June arrived on the 30th July, and the P. and O. mail of 26th on the 3rd August. The dates are now down to the 12th.

In the way of Hong Kong local news we have had various small excitements. Seven pirates were executed in two batches, and seemed fully conscious of the disagreeable fate which had overtaken them. Wong Qui Fook, the murderer of Mrs. Meyers and her child, underwent the penalty of his atrocious crime, protesting with his latest breath that he was only the accessory, and that a friend had actually done the deed.

The new band-stand has been inaugurated. The colonists mustered fairly but few ladies made their appearance. Are the gardens becoming "vulgar?" or how is it that so many failed to grace the assemblage at which, by the way, his Excellency the Governor was present. A parade was held in order to read to the troops the proceedings and sentence of a court-martial recently held on Dr. Woodward of H. M. 02th Regiment.

The most important mercantile matter now under discussion is the question relating to brokers. Some say, what are brokers? Others want to know if there are Chinese brokers. Some want to impose a registration ordinance on the class which shall include only Europeans and Indians, whilst others again (chiefly the brokers themselves) cry out loudly against the injustice of allowing Chinese to act as such without obliging them to be registered also. On the whole, the community may be generally said to be divided into four classes; 1, brokers, 2, the brokers' friends, 3, the brokers enemies, and 4, those who don't care a button for the brokers (having nothing to do with them).

An interesting case has been occupying public attention during the last two or three days, viz., that of Anderson *versus* Shaw and another. Mr. Anderson has sought to recover $5,000 damages for an assault stated to have been committed upon him during the excitement which followed the stoppage of the Agra Bank, and of which full particulars based on statements given by some interested on either side have already appeared. The case was concluded and a verdict for ten dollars was given for the plaintiff, each party paying their own costs.

The trial of Pedro Lourciro at Macao has at last been decided. Although we believe nothing has appeared in print, still it has been known for the past year that Pedro was charged by his late employers, Messrs. Dent and Co., of Shanghai, with defalcations and mutilation of the books of the firm. We have no particulars of the trial, but the result is that he has been sentenced to imprisonment in Macao for six months, and transportation to a Portuguese penal settlement in Africa for fifteen years. The Junta by whom he was tried consisted of the Governor, the Procurador, the Judge, the Commandant and Vice-President and two members of the Senate. The Attorney-General of Macao, who prosecuted, did not consider there was sufficient evidence to prove an abuse of confidence and falsification of the books; the Judge was of the same opinion, but all the other members of the Junta were unanimous. He can of course appeal against the decision to the Home Government at Lisbon. We think that Messrs. Dent and Co. deserve the thanks of the whole foreign community in China for adopting the course they did. The delinquencies of clerks in China have often been condoned by the principals, and hence a lax state of morality highly injurious to individuals as well as the commercial relations of China generally.

It is rumoured that the Governor intends procuring from the West Indies a number of blacks to act as policemen.

The *Government Gazette* contains the formal announcement that the Hon. Julian Pauncefote has been confirmed in the appointment of Attorney-General.

An official notification, dated July 14th, has been issued by the Superintendent of Customs at Canton, and published by D. B. Robertson, Esq., the Consul, which prohibits for the future any vessels from coming up the river to Canton, with the exception of steamers. All sailing vessels are to anchor at Whampoa.

(FROM OUR OWN CORRESPONDENT.)

HONG KONG, AUG. 10, 1866.

The intelligence from Corea which the last mail carried to Europe will doubtless have created some sensation even among the stirring events which were in progress nearer home. The French Government will not, probably, have been altogether unprepared for some such intelligence, as I hear that nearly a year ago appeals for active protection against an apprehended persecution were despatched to Paris by the missionaries living in that jealous country. The French Minister at Peking is reported as having made a representation on the subject of the late massacre to Prince Kung, who disclaimed all control over the actions of the Corean Court, and requested the French Government to act without reference to China in the affair. As the disturbances at Saigon have required the presence there of the French Admiral, whose magnificent flagship lately passed through these waters on her way thither, the probability is that nothing will be undertaken against Corea until next summer, as the severity of the climate in winter and the danger of navigating the Gulf at that season almost preclude the possibility of operations with the cold weather so close at hand. At the same time it is much to be wished that some demonstration could be made while the memory of the atrocities to be chastised is still fresh. It is also greatly to be hoped that Her Majesty's Government will take part in whatever operations are decided upon, with the double view of chastising the Corean persecutors and of opening the country to European exploration and trade. It is

Digitized by Google

anticipated that by the opening of a port in Corea a profitable extension might be secured for the import of woollens, the supply of which, to some considerable extent, is now derived from the Russian markets.

On the coast of China opposite the Corea there have also been disturbances, but of an insignificant character, and directed against some Protestant missionaries. Several families of American missionaries have resided for some years past at Tang-chow-foo, and reports have repeatedly been current of dissatisfaction among the inhabitants owing to sundry speculations in land, which appear to be the reproach of the missionary class all over the world, from China to New Zealand. However this may be, the populace lately vented their spleen by defacing the tombstones erected in the missionary cemetery, whereupon the United States gunboat, the *Wachusetts*, was ordered to the spot with a promptness in calling in the military arm which, had it been an act of British diplomacy, would have evoked shrieks of horror from the Yankee-worshipping peace-party in England. The gallant commander of the *Wachusetts* was not, however, able to obtain much satisfaction, as the authorities of the city retired to a safe distance inland, politely requesting him by letter to communicate with their superior, the Taotai at the treaty port of Chefoo, forty miles distant. On visiting this functionary, it is reported, the gallant naval commander could get nothing from the courteous but astute Chinaman beyond an exhibition of his proficiency in the English alphabet. Captain Townsend tried remonstrance; the Taotai pointed triumphantly to the letters U.S. on his buttons; Captain Townsend threatened; the Taotai murmured "A. B. C." At length, by mutual consent, the grievances of the missionaries were referred for settlement to the U.S. Minister at Peking.

In this colony the extirpation of piracy is being proceeded with bravely, thanks to Sir R. MacDonnell's vigorous "stirring up" of his subordinates. Seven of the pirates of the British barque *Cæsar* were executed three days ago, and the head man has been seized and fully identified. An instance of the miserable procedure till lately in vogue is palpable in the fact that this fellow has twice before been arraigned for acts of piracy, and has twice escaped through legal quibbles.

The new ordinances for the better government of the colony will, it is believed, be very shortly brought into operation, but some doubt is expressed as to their satisfactory working, owing to the absence of an official staff capable of dealing with the Chinese population. Two young men who came out some years ago as students of Chinese are filling official posts in the colony; but with their exception, there is not a soul connected with the Government who can speak the language.

Gloomy forebodings are expressed about the Mint. In a late address to the Legislative Council the Governor appeared to hint at a probable abandonment of the concern as a wasteful scheme; and the dollars, which are produced in driblets, are both shamefully executed and very hesitatingly accepted by the public. At Canton I hear they are not taken save at a discount of two per cent.

We have been expecting a typhoon for some days, and its advent would be hailed with delight as a relief from the excruciating heat which has prevailed now for upwards of a week.

The range of the thermometer has been from 87 degrees at night to 94 degrees during the day, with a dry scorching westerly wind.

PHILIPPINES.

MANILA.

A correspondent's letter from Manila announces the arrival there of General Sanz, who is to act as Captain-General until an officer of sufficient rank can be found at Madrid who is willing to accept the office permanently. General Lara, the former Captain-General, has been recalled, and left for Spain on the 15th July. It appears that he had made himself extremely obnoxious in many ways, and now that he has left there are people who openly accuse him of accepting bribes. The Home Government, acting in their usual peculiar and irascible manner, sent the substitute with the order of recall without the slightest previous notice being given.

We announce with much regret the death, on the 7th July, of William Halkett Webb, Esq., H.B.M.'s Acting Consul. He had been connected with the Manila Consulate since 1848. His funeral, which took place on the 8th, was attended by almost every foreign resident. Mr. Michell, of the firm of Messrs. Phillips, Moore, and Co., is at present Acting Consul, and from his knowledge of the language and long residence we are sure that British interests are well placed in his hands. Our Government, indeed, could not do better than confer on him the post of Vice-Consul, should he be willing to accept it. The salary being only £300 per annum, no one could accept the office unless in connection with some other occupation. In previous issues we have noticed the appointment of Mr. Rainals as Consul, but it appears that there is some hesitation now in despatching him, in consequence of his ignorance of the Spanish language. We cannot understand how the powers at the Foreign-office could have ever thought of sending out a gentleman [so completely unfitted, and we] trust Lord Stanley will not commit such a mistake. Most assuredly would Mr. Rainals be a round peg in a square hole. We can safely assure his lordship that until he can find a competent person Mr. Michell will give him satisfaction.

COCHIN CHINA.

SAIGON.

A correspondent from this place writes:—We reached Saigon at 6 o'clock in the morning (the distance from the Cape to the town being somewhat over 60 miles), and the first object which met our view on coming on deck was the magnificent new floating dock erected by Messrs. Randolph, Elder and Co., Glasgow, under the immediate superintendence of D. J. Dunlop, Esq., for the French Government. This undertaking, now almost completed, is said to be a decided success. The new town is exceedingly well laid out, and the streets and roads in the suburbs are equal, if not superior, to those of Singapore. As yet there are few buildings of any note. The foreign community consists almost entirely of French, with the exception of a few Germans and two or three English.

The natives, or Annamites, as they are termed, are barely up to the mark of other Eastern natives. Their ideas of cleanliness would scarcely meet the requirements of a board of sanitary commissioners; although surrounded by rivers, creeks, and canals, they ignore bathing, which they say causes sickness.

The rebel Annamites continue to give the French outposts a deal of trouble. About a fortnight ago the rebels, to the number of some 5,000, got within five miles of the town, and the Governor deemed it necessary to issue a proclamation calling upon the residents to arm themselves, and to put their houses in as good a state of defence as possible. The rebels have, however, been driven back, and the outposts strengthened. The French have lost a colonel, captain, and lieutenant. The interpreters have been in the habit of supplying to the rebels all information regarding the movements of the French troops. Two days ago a Mandarin of high rank from Hue, the capital, and several others were arrested for having been found in communication with the rebels. Without doubt these gentry will meet with their deserts, and in a short time we expect to see the insurrection entirely suppressed. A consignment of gunpowder and muskets from Singapore was seized by the authorities about a week ago, and confiscated, the goods not having been reported to the Guardship. It is almost certain that a fine will also be inflicted.

STRAITS OF MALACCA.

SINGAPORE.

The P. and O. mail of 10th July arrived out on the 11th August, and the French mail of 17th on the 18th August. Dates are now down to the 21st.

The *Straits Times* has the following on the Transfer question, &c.:—"It has afforded much satisfaction to the public here to find that the Bill for the transfer of the settlement inaugurated by the old Ministry has been taken up by the new, and that it has been read a second time without debate of any kind. It is now, of course, beyond all doubt that this measure which has been consistently striven for for the last six years is about to be accomplished, and there only remains the question of when the old regime is to make room for the new. The Indian official year terminates on the 30th April each year, to which dates the public accounts are made up; but as these must for the future follow the plan of the Colonial-office, it will probably be judged inexpedient to begin the new system with a broken year. We must therefore look to the 1st of January as the date upon which the Indian Government will go out and the Colonial come in, but whether the 1st of January 1867 or the 1st January 1868, has yet to be decided. There is good reason to hope, however, that the earlier date will be that fixed upon. The accounts of the settlement, like its interests,

Digitized by Google

are in reality distinct enough from those of India, and with a little trouble can be made to appear so. On the other hand, there are no longer any open questions, such as the Suitors' Fund, or the fortifications, to cause delay; with a little hard work, therefore, upon details, the new system could be very well introduced with the beginning of next year.

"Commercially, matters have shown some approach to improvement during the fortnight, and a greater feeling of confidence seems to prevail in the Bazaar. Three of the banks here have signified their intention to shorten the usance on bills on London from 6 months to 4 months' sight. A very strong feeling against this step prevails upon the part of the produce exporters, who are chiefly affected by it. It certainly appears that, as a rule, drafts at the shorter sight will mature considerably before the arrival of the produce against which they are drawn; and the result must be very much to confine business, or to place the consignees at home under the necessity of negotiating with the holder of their acceptances.

"The Governor and suite continue at Penang. The appointment of Mr. Hackett, Recorder for Penang, received by last mail, is a matter for congratulation here, as on his arrival Sir Benson Maxwell will be at liberty to come down and assume finally the duties of the Recordership of Singapore.

"A marked improvement in the general aspect of the town is gradually and surely being brought about by the erection of handsome buildings along the newly-made streets, and the lately reclaimed shore frontage; and if the reclamation works along Teluk Ayer, lately projected, are carried out, it will be difficult, except at a few stand-points, to recognise in the Singapore of 1867-68 that of five years ago. The weather has continued excessive wet, not a day occurring in which heavy rain has not fallen—a state of things quite out of order at this time of the year.

"We are very glad to notice that the waterworks are being carried on with vigour, and in a very short time we shall be able to announce the fact of their being completed."

The Dutch steamer *Ambon*, lately sold to an Arab merchant of this place, has now been placed, we understand, under British colours, and called the *Seewoon*. She will leave shortly for Siam.

PENANG.

The London mail of 10th July arrived on the 9th August. Dates are now down to the 23rd August.

On the 13th the anniversary of the foundation of this settlement proved an exception to the usual run of public holidays here, inasmuch as it happened on a day and at a time when no steamers were expected, and therefore all and sundry kept the day in thorough relaxation from business. Picnics and excursions were the order of the day, and all enjoyed themselves to their utmost bent. The weather was luckily fine, and in fact all nature combined to give the weary Penangite a holiday in the highest sense of the term.

The steamer *Agamemnon* has arrived from Shanghai, Hong Kong, and Singapore, and sailed for London and Liverpool Aug. 21, and by telegram we hear that she called at Mauritius, and left on the 7th Sept. She has on board about 2,500 tons of cargo from Shanghai and Hong Kong principally tea. She also brings about 34 passengers from China and Singapore.

The following shipping casualties are announced:—The British ship *Persian Empire*, washed out her saltpetre and was compelled to put in here for dead weight. The British ship *Monteagle*, 928 tons register, from Akyab bound to Liverpool with rice, over three months out, put in here for supplies, &c., on the 15th August, having lost a quantity of her sails and gear from stress of weather. The Russian ship *Amphion*, 551 tons, bound from Maulmain to Europe with timber, nearly four months out, arrived here on the 19th having met with the same misfortune. The *Sleipner* is reloading her cargo for Copenhagen. The *Edith* is to undergo repairs. Her cargo is still in store.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

AITKEN—On the 18th August, at Penang, Mrs. D. Aitken, of a daughter.
ESSEX—On the 12th Sept., at Shalford in Surrey, the wife of E. C. Essex, of a daughter.
PADDAY—On the 26th Sept., at 65 Princes-square, Bayswater, the wife of Reginald Padday, Esq., of a daughter.
PEREIRA—On the 26th Sept., at Wolesley Hall, Stafford, the Hon. Mrs. Edward Pereira, of a son.
SMALE—On the 26th Sept., at 19, Great Marlborough-street, W., the wife of Mr. John Smale, of a son.
TORRANCE—On the 29th July, at Batavia, the wife of Robert B. Torrance, Esq., of a son.
VIZARD—On the 11th August, at Penang, the wife of Major J. W. Vizard, prematurely of a daughter, stillborn.

MARRIAGES.

FILDES—MACKIE.—On the 20th Sept., at Auchencairn House, by the Rev. Mr. Cowan, Thomas, eldest son of John Fildes, Esq., M.P., of Manchester, to Jessie Macblane, second daughter of Ivie Mackie, Esq., J.P., of Auchencairn, N.B., and Plymouth-grove, Manchester. No cards.
GILLSON—MACNAB.—On the 18th Sept., at St. Silas' English Episcopal Chapel, Glasgow, by the Rev. E. Gillson, M.A., Mount Sorrel, Leicestershire, assisted by the Rev. S. Gillson, Worthing, Sussex, William Moore Gillson, Esq., Commander in the P. and O. Steam Navigation Company, to Jessie Campbell, daughter of Allan Macnab, Esq., Glasgow. No cards.
JOHNSTON—FARQUHAR.—On the 20th Sept., at Muiresk, by the Rev. John Cruickshank, M.A., Alexander Rose Johnston, Esq., of Amoy, China, to Pauline Annette Malin, only daughter of Alexander Farquhar, Esq., Muiresk House, Aberdeenshire. (No cards sent).
JOHNSON—REYNELL.—On the 27th July, at Trinity Church, Shanghai, by the Rev. C. H. Butcher, M.A., assisted by the Rev. M. MacClatchie, M.A., Alexander John Johnson, to Ellen Caroline, third daughter of Capt. Reynell, West Croydon, Surrey. No cards.
MILNE—FERRIS.—On the 15th August, at the Presbyterian Church, Singapore, by the Rev. W. Jeffreys, Mr. T. Milne, shipwright, Sandy Point, to Miss E. C. Ferris, youngest daughter of Mr. John Ferris, Belfast, Ireland.

DEATHS.

BAUMGARTEN—On the 13th August, at Cambo-house, River Valley-road, Singapore, Lucy Edmond, the wife of Alexander Baumgarten, Esq.
DALTON—On the 6th June, in his 39th year, Mr. Henry Dalton, son of Thomas Dalton, Esq., Holly Grove, Hollingworth, washed overboard from the steamer Yarra on the passage from Sydney to New Zealand.
GANT—On the 29th July, at the Government Civil Hospital, Hong Kong, William Gant, storeman, late of Military Store Department, aged 31 years.
HOWELL—On the 23rd July, at 2, Yuen-ming-Yuen-buildings, Shanghai, of sunstroke Cyril James Howell, aged 22.
JARVIE—At Shanghai, in Aug., Robert Jarvie, Esq. (received by telegram via Kiachta).
LEWIS—On the 6th August, at Sourabaya, suddenly, Captain E. Lewis, of the Netherlands India Steam Navigation Company's steamer Koningin der Nederlands.
MARSDEN—On the 10th July, on board the P. and O. steamship Ottawa, on his passage home from China, Charles Marsden, second son of George Marsden, Esq., of Sidmouth, deeply regretted.
PREISWERK—On the 1st August, at Shanghai, Mr. Wilhelm Preiswerk, of Basel, Switzerland.
RICHARDSON—On the 27th July, at Shanghai, Henry Richardson, aged 30 years.
ROWE—On the 11th August, at Singapore, Capt. Wm. Rowe, of the B.I.S.N. Company's steamer Calcutta.
SMITH—On the 11th August, on board the P. and O. steamer Behar, a few hours after leaving Penang, George Smith, Esq., manager of the Commercial Bank Corporation of India and the East, Singapore.
VINEY—On the 3rd August, at the Stag Hotel, Hong Kong, Joseph Viney, late proprietor, aged 30 years.
WEBB—On the 7th July, at Manila, William Halkett Webb, Esq., Acting British Consul.
WILLOUGHBY—On the 15th Sept., at his residence, Fulmer-grove, Bucks, Sir John Pollard Willoughby, Bart., of Baldon House, Oxfordshire.
WALKINSHAW—On the 3rd August, at Shanghai, of heat apoplexy, J. R. Walkinshaw aged 26 years.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight.	4s. 5¼d.	4s. 6¼d. to 4s. 7d.
At Shanghai (per Tael.)	6 ditto	6s. 1d. to 1¼d.	6s. 2d. to 6s. 3d.
At Canton, At Hong Kong, At Macao	6 ditto	4s. 4d.	4s. 4¼d.
At Singapore	ditto	4s. 5⅛d.	4s. 6d. to 4s. 6¼d.
At Manila	ditto	4s. 0d.	4s. 1d.

At Shanghai, bills on India, Rs. 297 per 1,000 taels. At Hong Kong, Rs. 218 per $100. Bar silver at Shanghai, tls. 111·2; at Hong Kong, 11 per cent. prem. Mexican dollars at Shanghai, tls. 72·8 per 100; and exchange on Hong Kong, 27 discount. Hong Kong and Shanghai Bank shares, 2 per cent. dis.; Gas Company, 10 per cent. prem.; Hong Kong and Whampoa Dock, 30 per cent. prem.; Steam Shares, 5 per cent. discount; Union Dock Company, 10 per cent. dis.

The latest telegrams quote Exchange at Shanghai 6s. 1d. and Hong Kong 4s. 5d.

The following is from Messrs. Sharp and Co.'s bullion circular:—

GOLD.—The arrivals have amounted to $510,000 value, and the exports to $470,000, including the shipments per Benares, on the 29th ult., and excluding those to leave to-morrow. Gold has not been in much demand here, a considerable portion of the above amounts representing shipments in transit from Shanghai.

SILVER.—The market has been almost bare of bar silver and sycee during the fortnight. The imports are $160,000, and the exports $150,000. The Hong Kong dollars are inquired for at a small premium.

DOLLAR CURRENCY.—Mexicans continue to arrive in large quantity from Shanghai, and are as quickly sent away to be made into rupees. The totals inwards and outwards are $1,480,000 and $1,420,000 respectively. The Hong Kong Mint has struck off a few specimens of a new half dollar; in design precisely similar to the dollars already issued.

DISCOUNT AND MORTGAGES.—Money continues dear, 10 per cent. being paid on good securities for short periods, and 12 per cent. on first class mortgages.

EXCHANGE.—The rupee business has again been very limited, the remittances being for the most part made up of coin and bullion. The few stirling bills have been eagerly bought up upon the falling market, which is down 3 per cent.

SHARES.—A variety of causes have combined to check transactions during the fortnight, amongst these may be named the anticipation of important news by the incoming mail respecting the steamboat companies, and also the meetings which has been called for the ensuing week of proprietors in the Hong Kong Bank and Dock Companies.

COMMERCIAL REPORT.

CHINA AND JAPAN EXPORTS.

TEA.—Continued activity is noticeable at the various ports, though prices have been somewhat reduced from the first exorbitant rates. This inevitable reduction in the market discontents the teamen, who endeavour to resist it, and they give way reluctantly. From and through Shanghai the export to this date for England has exceeded the corresponding export for last year by more than eight million pounds, although it is true a falling off of between two and three million pounds is noticeable in the exports to

Digitized by Google

America. Both at Hankow and Foochow a large business in Congous is reported for the past fortnight.

CANTON.—The principal feature to notice in the market during the fortnight is the commencement of settlements of Country Congous, five chops have been taken at from 30 to 34 taels, and various bids are reported as being offered for several other chops. The teamen express themselves somewhat disappointed at the rates settlements have opened at, and affirm them to be fully 4 taels under Hankow prices. The present stock consists of 19 chops or 12,829 chests.

FOOCHOW.—Large quantities of second crop Congous have continued to arrive at this market, but in the interior picking is over, and no great addition to the stocks can now be expected. During the early part of the fortnight there have been considerable shipments for Australia. The character of the market is firm, and fair medium kinds have risen slightly. A few chops of Souchong have been settled at rates which, although high, are below the extravagant demands lately made by the teamen. Native holders of Oolongs are firm, but transactions on a large scale are shortly expected. Scented Teas are rather depressed as compared with previous advices. The sales and prices for the fortnight have been about as follows:—26,351 chests Congou at tls. 8 to 12 for Dust and Broken Leaf, 13 to 17 for Ordinary Common, 18 to 20 for Good Common, 21 to 28 for Light Flavoury, 28 to 31 for Good Flavoury to medium Kysow kinds. 1,155 chests Souchong at tls. 25 to 36½. 238 chests medium Flowery Pekoe at tls. 24 to 37½, and 10,627 boxes of Scented Teas at tls. 9½ to 26 for Dusty and Common to Medium, and 30 to 34 for fine to finest.

SHANGHAI.—Black Teas: Owing to the large quantity of Teas already sent forward, the market has been quieter, and prices show a decline of one tael on previous quotations which, with a fall in exchange and freights, lay down purchases at very moderate rates. Most of the first crop have now been shipped, and there are very few chops of really good second crop on offer. Supplies continue to come in rapidly, but holders are firm, and no further reduction is anticipated.

HANKOW.—A large business had again been done in Congous at an advance of one tael on common and about two taels per picul on medium kinds. The settlements chiefly consisted of second crop Teas of the latter quality. Supplies continued to arrive freely, and the present scale of prices will no doubt cause some competition in the Tea districts for third crop leaf, and induces growers to hurry forward all their stocks. The Helen Nicholson was nearly full at £5, and the Elizabeth Nicholson has also gone up to load Teas for London. Settlements for the fortnight were 26,900 chests at the following prices:—Oonams, common to medium, tls. 18¼ to 25 per picul; Oopacks, fair to medium (second crop), tls. 21¾ to 26½.

YOKOHAMA.—There has been a large amount of business transacted in the Tea market, the purchases for the most part were made during the early part, since when although foreigners are holding off, the Teamen seem rather inclined to wait further advices before parting with their produce at lower rates. The stock although not excessive gives a fair selection of qualities suitable for export, but the prices compared with London and New York rates, offer no inducement to make ventures with a reasonable chance of profit. Settlements amount to about 4,500 piculs—all for America. Prices have ruled rather unevenly and show an advance of $2 to 3 per picul in somes cases. Quotations and stocks are as under. New Tea: Medium $28 to 30 per 1,100 piculs; Good Medium to Fine, $31 to 35 per 1,100 piculs.

RAW SILK—CANTON.—There has been nothing done in silk for Europe since last report, as holders became daily more firm in their demands, and the native consumers are using a much larger quantity than usual, so that it is hardly expected that prices will give way to any great extent. The fourth crop is reported to have fallen short of the original estimate. The only settlements reported are 30 piculs Kwokong at $480 to 500 for India and 200 boxes rereeled Cumchuck at $580 for America.

CHINA AND JAPAN IMPORTS.

HONG KONG.—During the past fortnight there has been a considerable improvement in the market, and all manufactured imports have been in general demand. In Grey Shirtings a large amount of business has been done, and during the fortnight from 60,000 to 70,000 pieces have been placed. Cotton Yarn is in great demand at an advance in price of $5 to $10 per bale. The stock of T-Cloths is small, but there is a fair inquiry. The least demand for piece goods has been for Grey Drills. Dyed and Fancy Cottons have met with ready sale. A good assortment of S S Camlets have realised $21 per piece. The metal market is altogether dull, and no sales are reported.

SHANGHAI.—The deliveries during the month of July have been on a large scale, and 350,000 pieces of Grey Shirtings were cleared for local consumption and outports. There has lately been a fair demand at full prices, but constant arrivals from Hong Kong and Japan prevent an advance. Of White Shirtings: from 10,000 to 12,000 pieces have sold at previous rates; sale of English Drills: 5,500 pieces; Chintz: Good patterns wanted, sales 7,500 pieces; Camlets: Market firm, 700 pieces sold; Velvets and Velveteens: Stock small, prices firm, sales, 1,200 pieces Velvet and 2,160 Velveteen. There has been no inquiry in the Metal market, except for Hoop Iron, and sales of any other description of Metal have been very difficult to effect.

YOKOHAMA.—The news received by the mail of 26th May and by telegram up to 13th June, caused holders of cotton goods to ask higher prices. Small sales of Grey Shirtings are reported at $3.85 on the spot and $4 to arrive. Native dealers have been unable to buy freely, in consequence of native coin continuing too low in value; 1,500 pieces have consequently been re-exported to China. Cotton Yarn is in fair demand at former prices.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London, July 20, Lorton; from Liverpool, 24, Recife; from Cardiff, 20, John Norman.

At SHANGHAI.—from London, July 25, Aurora Australis; August 2, Wild Deer; from Newcastle, 1, Clara Buhenza; from Downs, July 22, Polmaise; from Cardiff, August 3, Red Deer; from New York, 31, Wild Gazelle. (Reported by Telegram): from London, Royal Berkshire.

At HONG KONG and CANTON.—From London, July 29, Invincible; from Sunderland, 29, Beautiful Star; from Hamburg, 29, Costa Rica.

At MANILA.—None.

At SINGAPORE.—From Liverpool, Aug. 14, Eastfield; from Shields, 10, M. Louisa Antoinette; from Cardiff, 10, Laura and Adele; 11, Passaroeang; 13, Japana; 14, Maria Adriana; 15, S. K. der Nederlanden; 16, Tollens; 17, Joachim; from Newcastle, 13, Pieter Jacoba; 14, Neptunas; from Sunderland, 15, Twee Gezusters; from Greenock, 14, L. Castle; from Antwerp, 12, Cette; from Bordeaux, 13, Panama.

At PENANG.—From London, July 6, Frederica.

At BATAVIA.—From London, Peter Rohland; from Glasgow, Aquarius; from Liverpool, Harkaway, Ribbleton.

DEPARTURES.

From SHANGHAI.—For London, July 23, Peterborough; 25, Coral Nymph; 27, Blencathra; Aug. 4, Nelly.

From FOOCHOW.—For London, Ornate, Philomela, Dewa Gungadhur.

From HONG KONG and CANTON.—For London, Aug. 7, Island Queen.

From MANILA.—For Cork, July 23, Equinox; for Boston, 25, Franklin.

From SINGAPORE.—For London, August 18, Agamemnon (str., via Penang); for Liverpool, 12, Edinburgh Castle; for Falmouth, 11, Maria Wilhemine; for New York, 8, Dunmore.

From PENANG.—For London, August 21, Agamemnon.

From MANILA.—For New York, July 30, Rattler.

VESSELS LOADING.

At YOKOHAMA.—For London, Conference; for New York, Banda, Eliza Hands.

At HANKOW.—For London, Helen Nicholson.

At SHANGHAI.—For London, Challenger, William Melhuish, Knight of Snowdon, Sir W. F. Williams, Agamemnon, Dartmouth, Janet Mitchell, Ann Adamson, Langdowne, Maggie Leslie. Marquis of Argyle, Westminster, Camilla, John Paul; for Liverpool, Trebolgan, John Bull; for New York, Tycoon.

At FOOCHOW.—For London, Marion (full), Naomi, Scawfell, Ellen Rodger Northfleet.

At HONG KONG and CANTON.—For London, Mary Nicholson, Cedras, Solent, Kelso.

At MANILA.—For London, Passing Cloud; for Liverpool, Benjamin Bangs, Stirling; for Cork, Prudhoe; for New York, Lady Blessington.

At PENANG.—For London, Persian Empire, Elizabeth, Victor; for Liverpool, Monteagle.

At BATAVIA.—For Rotterdam, Ymuiden, Noach, Drie Gezustus, Hendrika, van Artevelde; for Amsterdam, Dagmar; for Holland, Ramsey, Ferdinand and Louis; for France, Confiance; for New York, Rangoon; for Boston, Rainbow, Ocean Rover.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT, to CHINA, &c.—July 26, Ariosto, Newport to Hong Kong; 29, Allendale, Sunderland to Japan; Lion, Cardiff to Hong Kong; 30, Dr. Peterman, Cardiff to Hong; Aug. 3, Queen of England, Liverpool to Shanghai; Juanpore, London to Shanghai; 5, Portland, London to Hong Kong; Corea, London to Japan; 7, Johanna Maria, Marseilles to Japan; Onrust, Newport to Hong Kong; 8, Sooloo, Sunderland to Shanghai.

From UNITED STATES to CHINA, &c.—July 30, American, New York to Shanghai; 5, Panther, New York to Kong Kong; 7, T. W. Sears, New York to Amoor River.

From CHINA &c., to ENGLAND and CONTINENT.—July 30, Sovereign of India, Foochow to London; Aug. 8, Ironside, Manila to London; 9 Alma, Canton to London.

From CHINA, &c., to UNITED STATES.—July 30, N.B. Palmer, Hong Kong, to New York; Aug. 8, Leopoldine, Manila to Boston.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Sept. 25, at Liverpool from Foo-chow-Foo, Ziba; 5, at Havana from Canton, Granville; 7, at Havana, from Macao, Cataluna; 26, at Falmouth from Akyab, St. Paul; at Liverpool from Rangoon, Eurynome; 25, at Brouwershaven from Rangoon, Freeland; 26, at Queenstown from Akyab, Excellent; off Queenstown from Rangoon, Royal Alice.

DEPARTURES.—Sept. 18, from Amsterdam for Batavia, Henriette: 23, from off Dover for Padang, Aletta Augusta; 19, from Shields for Galle, Old England; from Liverpool for Singapore, Indiaman; 23, from Newport for Galle, Claire; 27, from London for Colombo, Frances; from Rotterdam for Batavia, Minister v. Thorbecke; 24, from Newport for Shanghai, Seaview; 26, from Swansea for Hong Kong, Fort Regent; from Rotterdam for Batavia, Bilderdyk; 27, from Liverpool for Batavia, Helene Henriette: 28, from London for Shields and Galle, Bahia.

SPOKEN.—Wedlagstone (barq.), Colombo to London, July 27; Peter Adolph (Dutch ship), Java to London, August 12, 2 N., 22 W.; Cleveland (ship), Shields to Hong Kong, August 18, 13 N., 24 W.; Kent, New York to Hong Kong, July 23, 26 S., 29 W.; Otto, Batavia to Rotterdam, July 29, 33 S., 15 E.; Batavia, Newcastle to Batavia, August 9, 13 N., 26 W.; County of Renfrew (ship), Sourabaya to Rotterdam, July 22, 35 S., 24 E.; Krimper aan der Tek (Dutch), Rotterdam to Hong Kong, June 6, 15 N., 26 W.; Hendeina (? Hendrina), Shields to Batavia.

LAID ON.—At London: For Hong Kong and Canton, Belted Will. At Liverpool: For Shanghai, Anna Dorothea. At Glasgow: For Samarang and Scurabaya, Corsoek.

MISCELLANEOUS.—At Simon's Bay: July 25, Schelde Hoffman, sailed for Singapore.

August 16, at Callao from Macao, the Camilo Cavour.

Messrs. J. and A. B. Freeland, shipping agents for the Crown Agents for the colonies, have invited tenders for the conveyance of two locomotive engines and tenders and one small locomotive engine and tender from London to Colombo.

LONDON, SATURDAY, SEPT. 29, 1866.

THE COOLIE EMIGRATION CONVENTION.

THE Convention signed at Peking on the 6th March, embodying the rules and regulations under which the coolie traffic may be carried on in British and French vessels, does not seem likely to be viewed with unmixed satisfaction by anybody except the keepers of baracoons—"Emigration Agencies" they are euphoniously termed in the Convention—and the native crimps employed by them; unless we except the coolies themselves, whose condition would certainly be improved by the new regulations, were they effectually carried out. The terms of the Convention have been sharply criticised by the local press on account of their palpable inconsistency, and justly so. The acknowledged evils of the traffic being known to arise chiefly from its being in the hands of unscrupulous speculators, who employ yet more unscrupulous tools in the shape of native crimps or kidnappers, to bring the human grist to their mill, it is certainly strange that the very document which is devised as a remedy for these evils should commence by giving increased facilities for their continuance; facilities promptly availed of by the French, under whose colours a thriving trade in flesh and blood have been going on ever since. What is the nature of this human commodity obtained by fraud, held by violence and transported with all the horrors of the African slave trade in its worst days? The recipients of it in the West Indies do not seem to value it very highly after all. The *Guiana Times*, writing on the subject of Chinese immigration, says:—"There can be no doubt that a large proportion of the Chinese "immigrants have fallen into the vices of opium smoking and "gambling. As many as 7,000 out of 10,000 in the colony are "devoted to the first-named vice, and 2,000 to gambling. Hence "only 10 per cent. of the number are really sober and industrious "people." If this statement be correct, the 10,000 Chinese imported into Guiana cannot be considered either a profitable or a welcome addition to the population of that colony. And if the Chinese coolie proved so undesirable an acquisition when imported under the old system, how will it be with the newly imposed restrictions and responsibilities? The Jamaica *Standard*, in reviewing the Convention, says:—"It behoves Jamaica to study well the "questions thus raised. We want immigrants, but we cannot, with "any benefit to ourselves, pay too much for them, any more "than a man who wants money can expect to make it profita- "ble by borrowing it at cent. per cent. Some timely represen- "tations from the planters of this country, who may be best "able to deal with the question, ought to be submitted to "Governor GRANT, with a view of furnishing him with a reliable "data whereon to base any consultation he may have with Her "MAJESTY'S Ministers in reference to immigration from China "to this island." After this, we are not surprised to hear that the Coolie Immigration Committee of Jamaica have determined to receive no coolies from China at all, if the new regulations are rigidly adhered to, although they are still willing to take some 2,000 annually should certain of them be relaxed. In fact, the new order of things seems to work badly at both ends; in China it rather encourages the barracoon and crimp system than otherwise, and in the West Indies discourages the continuance of immigration by the severity of the terms imposed.

THE HONG KONG BANKING COMPANY *VERSUS* THE AGRA AND MASTERMAN'S BANK.

OUR readers will remember that the Hong Kong and Shanghai Banking Company sold the manager of the Agra at Shanghai bills on the London and County Bank for £25,000 at six months' sight, and obtained payment for the same, knowing at the time that the Agra had stopped in London, which the Shanghai manager it appears did not know at the time he bought the bills, as the steamer which conveyed the news from Hong Kong to Shanghai, the—*Dumbarton*—was kept at a distance until the transaction was completed. Now, this may be considered "a smart operation," but we think not a correct or justifiable one. It cannot be supported on mercantile usages or principles, and this was the view taken by one of the parties to the transaction, who withdrew from the position, and accepted the bills drawn on them unconditionally, thus saving themselves from litigation and annoyance, which would ultimately be found to have been wasted. We consider that this adjustment was by far the best course, for it will be seen by the report of the case below that the Court of Chancery has decided that the amount of the bills in question (£25,000) should be lodged in the Bank of England out of a dividend of £33,000 which was payable by the Agra Bank to the Hong Kong and Shanghai Banking Company's agent here. They will therefore lose in the meantime the interest on this sum and the legal expenses. After all, the point aimed at—viz., to have this £25,000 placed as a set-off against their claims on the Agra—falls to the ground if the Agra pays 20s. in the pound, which there is reason to believe. It is, however, to be observed that the London manager of the Hong Kong and Shanghai Bank, Mr. Vacher, had no power to authorise the drawees, the London and County Bank, to accept the bills, or he may have been induced to do so and thus ended the matter in the same way as the other case. No doubt the head office in Hong Kong will instruct the London and County Bank to accept these bills which are drawn at six months' sight, and thus obtain the transfer of the £25,000 from the Bank of England to their own coffers. Houses in China will learn by this that these "smart operations" will not succeed when they have to come to London for completion. The following is the report of the case:—

The summons came on before Mr. Peake, the chief clerk attached to the court of Vice-Chancellor Stuart. Mr. Peachey, solicitor (Oliverson, Peachey, and Co.), appeared for the manager of the Hong Kong and Shanghai Bank; and Mr. Upton (Upton, Johnson, and Upton) for Mr. Cannan, the official liquidator of the Agra and Masterman's Bank.

Mr. Upton opened the proceedings by saying that on a previous occasion the chief clerk had desired to know the exact constitution of the Agra Bank, and whether it had power to deal with matters at home as well as abroad. He could inform him that it was established by charter, and that its head-office was in London, and its branches in Hong Kong and other places, while the order for winding up extended as well to the branches as to the establishment here. By the authority of the Court the official liquidator had sent out a gentleman with ample powers to deal with the company's interests. Mr. Peachy observed that five actions in reference to this matter had been brought in Shanghai, and the Judge there refused to stay any one of them, notwithstanding that the bank in London had suspended payment. The chief clerk was unable to see how the case of supposed fraud, alluded to on the last occasion, could be made out, the Agra Bank having purchased the bills in the ordinary way. What the Hong Kong Company might know of any difficulties of the Agra in London had nothing to do with the question. His idea was that the liquidator was not justified in appropriating the dividend towards paying the bills; but he would be justified in withholding the payment of the dividend on the £133,000 until the question was properly set at rest. After a great deal of discussion, regarding the disposal of the money, the chief clerk said that the order he would make would be that the dividend, £33,000, less £25,000, should be paid to the Hong Kong and Shanghai Bank, and the remaining £25,000 should be carried to a suspense account, to be opened at the Bank of England until the matter should be settled.

THE course proposed by Sir Richard MacDonnell in levying a stamp tax in order to cover the deficiency in the revenue for 1867 caused by the outlay for the Mint, is generally approved by persons interested in Hong Kong. It is felt that it would be highly impolitic to place any further taxes on house or landed property. Above all, preserve the port free.

NEW YORK advices mention that the *Colorado* steamer will open the line on 1st January, from San Francisco to China, to be followed by the *Montanra* and *Rising Star*, now on the way from New York to San Francisco. Our American friends at San Francisco, with their usual energy, have announced a paper to be published in English and Chinese, in connection with this line of steamers. They have coolly appropriated the title of two English papers already in existence, the *China Mail* and *Flying Dragon*.

Digitized by Google

ACCORDING to the *Gironde*, of Bordeaux, the formation of a French company for cutting through the Isthmus of Kraw, in order to open a rapid communication between the Gulf of Bengal and the Gulf of Siam and the Chinese Seas, is spoken of. [This subject was fully noticed in our issue of the 15th.]

No steps have as yet been taken by Government in reference to the Postal Committee's Report, nor do we expect that the recommendations therein contained will be attempted until the turn of the year. When the alterations are definitively settled tenders will be invited.

THE announcement which appears in a contemporary that the nomination of a gentleman for the Bishopric of Victoria had been agreed on is premature. The appointment will, however, be shortly announced. Efforts will again be made to procure a chaplain for Manila.

MR. RODGER, of Glasgow, the owner of the *Taeping*, has, we are informed, presented her commander with the munificent gift of £500, to mark his appreciation of his skill and perseverance.

HIS HIGHNESS THE TUMONGONG OF JOHORE, who proceeds by this mail, has been nominated by Her Majesty to be a Knight Commander of the Star of India.

Naval and Military.

On board the twin-screw ship Far East, Henry Jones commander, which arrived at Cork on the 23rd from Hong Kong, Mauritius, and the Cape, with the right wing of the 67th Regiment, were Colonel J. W. Thomas, C.B., in command, 323 men, 23 women, and 18 children and the following officers:—Colonel J. W. Thomas, C.B.; Brevet-Major R. H. Wood, wife, and four children; Brevet-Major E. H. Lennon, V.C., wife, and one child; Acting Paymaster Brevet-Major W. F. Stehelin, wife, and two children; Quartermaster E. Pierson, wife, and two children; Surgeon J. Lamprey, Lieutenant and Adjutant A. J. Poole, Capt. E. B. Knowles, Lieutenants R. E. E. Jarvis, L. N. Mosse, and W. D. Lloyd; Ensigns E. D. Thompson, J. E. Blundell, G. W. B. Anderson, C. F. Underwood, D. M. Potter, and F. F. E. Knox. The only casualties have been the death of one man of the Royal Engineers, of consumption, between China and Mauritius, and one of the 67th, from the Cape. Two births occurred on board. The 11th landed in good health at Algoa Bay. The Far East was chartered at Hong Kong in April last to convey the right wing of the 11th Regiment to Algoa Bay, but was detained at Hong Kong waiting the arrival of 12 men of the Royal Engineers from Japan until the 3rd of June, when she left for the Mauritius and Algoa Bay, touching at Anger on the 15th, and arriving at the Mauritius on the 1st of July, leaving again on the 7th, and reaching Algoa Bay on the 15th, where she was detained till the 26th, waiting for the 67th Regiment, which were under canvas at Grahamstown. She called at Simon's Bay for stores and coals, at St. Helena for water, and St. Vincent for coals, having been under steam from the Cape, meeting with north-west and west winds in the region of the south-east trades till past St. Helena. Since leaving St. Vincent north-east winds had been encountered. These, with fine weather, prolonged the passage, which was tedious from the Cape. The vessel's bottom had become very foul from lying at anchor so long in Hong Kong and Algoa Bay.

The following passengers and troops arrived, per Whiteadder from Hong Kong, at Queenstown on the 24th inst.:—Colonel Chermside, R.A.; Major Jebb, Captain Stevens, Captain Jones, Ensign Sayers, Ensign Spence, Assist.-Surg. Campbell, 67th Regt.; Staff Assist.-Surgeon Clapp, Lieutenant Meredith, 2nd Batt., 11th Regt.; Mr. Ward, late 99th Regt.; Mr. Stevens, Mrs. Chermside, Miss Chermside, Master Chermside, Mrs. Stevens, Miss Stevens, Miss E. Stevens, Master Stevens; 228 men, 14 women, and 16 children, 67th Regt.; 8 men, 2nd Batt., 11th Regt.; 2 men, 1 woman, and 5 children, 2nd Batt., 20th Regt.; 2 men, 1 woman, and 5 children, 99th Regt.; 1 man, 5th Dragoon Guards; 4 men and 1 woman, Royal Artillery; 3 men, Royal Engineers; 1 man and 1 woman, Commissariat Staff Corps. Total, 249 men, 18 women, and 26 children.

The Admiralty have invited tenders for the conveyance of the following troops, the Government supplying provisions, &c., viz.:—From Queenstown to Hong Kong, 33 officers, 3 ladies, and 4 children, 7 staff-sergeants, 4 wives and 6 children, 599 men, 69 women and 45 children. From Hong Kong to Cape of Good Hope (about half, *i.e.* Headquarters to be landed at Natal, the remainder at East London), 32 officers, 5 ladie and 4 children, 8 staff-sergeants, 3 wives, 736 men, 54 women and 69 children. From Portsmouth to Hong Kong or Japan (Yokohama), 1 officer, 1 staff-sergeant and wife, 98 men, 9 women and 16 children. A separate vessel preferred for the detachment intended for Japan, also for the conveyance of 8 naval masts from Deptford to Hong Kong. The Himalaya (not steamer) and May Shepherd have been ordered to be surveyed for the above troops.

The screw two-decker line-of-battle ship Rodney, 78, 2,770 tons 500-horse power (nominal), in dock at Sheerness, has a large number of shipwrights and other workmen employed on her in effecting the various alterations and making the necessary repairs to adapt her for a flagship for service in China. From the extensive nature of the repairs ordered to be carried out, she will be in the shipwrights' hands for some considerable time to come.

The 2nd battalion 20th Regiment now at Hong Kong, will probably leave that station for the Cape early next year, and be quartered partly at Natal and partly at East London (Cape).

The Swallow, steam sloop, nine guns, 486 tons, 60-horse power, Master Commander E. Wilds, arrived at Sheerness and was taken into the large basin of the dockyard, where she was inspected by Captain D. M. L. Mackenzie, Captain of the Formidable, flagship of Vice-Admiral Sir Baldwin W. Walker, K.C.B., Commander-in-Chief at the Nore, previously to being dismantled and paid out of commission. During the last four years the Swallow has been engaged on a surveying expedition to the China station. She left England in April, 1862, and arrived at Hong Kong in September of the same year. In June and July, 1863, she was surveying the Korea. Its length is about 300 miles and 200 in breadth. The men there asked our sailors if our Queen had finished destroying the Chinese at Nankin by fire and lightning. In April, 1864, she was surveying the Yangtze River, and afterwards visited successively the Amherst Rocks, Gutzhoff, Shawishan, and the Saddles, and at the close of the year was at Amoy. She remained employed on surveying service until the close of 1865, when she was ordered home. The vessel left Hong Kong for England on the 10th of March, 1866, surveyed the Scarborough reef from the 13th to the 18th of March, and called at Manila, Singapore, and Batavia. In the Java sea two important dangers were discovered and their positions determined — viz., the Sharpshooter's Rock, at the entrance to Gaspar Straits, and a ledge with 23ft. in it, called the Swallow Rock. She passed Anger on the 10th of May, and had a tolerably fine passage until off Point Hood, on the African coast, where for seven days a severe gale was experienced, amounting sometimes to the force of a hurricane. Considering that three vessels, one twice as large, and another three times as large as the Swallow, foundered near her, those on board had cause to congratulate themselves on escaping without damage. They were, besides, enabled to save the lives of some of the passengers of one of the foundered ships, the Stalwart. The Swallow left Simon's Bay on the 22nd of July, called at St. Helena August 3rd, and arrived at Portland on the 12th of September. Several harbours have been surveyed, and about 3,000 miles of coast line; besides which the ship has sounded the whole of the China and Yellow Seas. The health of the officers has been very good, but on account of the bad accommodation the seamen have suffered considerably. Nearly every seaman who left England in the ship has been invalided home before she left China, but only four deaths occurred.

The Imperial Russian screw corvette Griden, 14 guns (unarmoured), Capt. S. Kenarzewski, anchored at Spithead on the 24th from Cronstadt, *en route* for the Pacific and the Amoor river, and exchanged the usual honorary salutes with the flagship of the Port Admiral and the saluting battery of the garrison. Mr. G. Baker, the Russian Vice-Consul at Portsmouth, paid an official visit to the ship on her arrival, and on leaving was saluted from the Griden's battery with seven guns. Capt. Kenarzewski afterwards landed at Portsmouth, and, accompanied by the Vice-Consul, called officially upon Lieut.-General Sir George Buller, K.C.B., Vice-Admiral Sir Thomas S. Pasley, K.C.B., and Rear-Admiral Superintendent G. G. Wellesley, the Military and Naval Commanders-in-Chief at Portsmouth. The Griden will discharge her powder and shell into ordnance lighters at Spithead, and afterwards steam into Portsmouth harbour to remedy a few defects prior to resuming her voyage to the Pacific.

We have to record the death of Captain Alexander Mitchell, of the 31st Regiment at the Curragh. Captain Mitchell entered the service in December, 1851, served in the Crimea from May, 1855, and was present at the attacks on the Redan on June 18 and September 8; he was also with the 31st in the campaign of 1860 in China, and was wounded in subsequent operations against the Taepings. Although the vacant company would not be filled up under ordinary circumstances, the 31st being a reducible regiment, it is probable that the long service (fourteen years) of the senior subaltern, Lieutenant Waldron, will be considered by the authorities a sufficient justification for departing from the strict rule.

OUR CONSULS IN CHINA.—The correspondent of the *Daily News*, writing from Shanghai, says:—"The consuls, acting on official traditions, pursue a policy of deference to the mandarins, yielding to them and allowing them to violate the treaties, until the acts of the Chinese authorities become so intolerable that a collision is inevitable, and then the consuls turn round and become the patriotic defenders of their country's rights. If they have any specific duties to perform in China at all, surely the very first is to see that the treaties are upheld and respected, It might be naturally imagined that by this time the consular services would be sufficiently acquainted with the ideas and habits of the mandarins; but although they have had continually presented to them the most indubitable proofs of the falsehood, dishonesty, and insincerity of Chinese officials, they do not seem to see any reason for treating them differently from what they would do those of any European Power. Experience does not teach them wisdom, but they evidently discover in the most crafty double dealing and immoral government in the world, the innocence of the dove. If a consul has to protest to the mandarins against acts clearly in violation of the treaties, it is no use sending formal notes and allowing time to be wasted in long correspondence; what is wanted is to send an ultimatum, and to insist upon it by force if necessary. But both the foreign and the Chinese excellencies prefer the polite and diplomatic method, and have the most profound faith in the civilising and outwitting power of compliment."

THE "SATURDAY REVIEW" AND ITS "IDIOTS."—In a notice of the Tea clipper race which we extract from the usually clever *Saturday Review*, it will be seen that the writer draws a most gloomy picture of the captains, owners, and crews, whom he is pleased to term "idiots." It is quite evident that the writer is himself an "idiot" on nautical matters, or he would not have made the comparison between this race and the loss of the *London*. The article appears to be penned out of pure spite, because the staff of the *Saturday* are supremely ignorant about matters nautical, and cannot enjoy the race. We need say nothing of the taste which designates owners and captains as "choice idiots." At least they might have been called idiots, and not "choice idiots":—"A melancholy piece of facetiousness has lately been invented in the institution of what is called an ocean race of the clipper tea ships from China to the Thames. The course is only 16,000 miles; the competitors some nine ships manned and owned by a choice collection of idiots, who stake hundreds of lives and hundreds

Digitized by Google

of thousands of pounds of property for the blue ribbon of the sea—a £500 prize for landing the first few chests of new tea. We are told to be in ecstacies at this happy combination of nautical pluck and skill, in which the two leading ships raced neck and neck, or we suppose bowsprit and bowsprit, all the way, and did the distance up the Thames within six hours of each other. Of course it is a happy thought, and quite a novelty in the undeveloped art of getting up shipwrecks. No doubt it will fire the emulation of railway companies, and a pleasant rivalry will be established between land and sea in the number of victims. What is odd is the inconsistency of leading-article writers. When the *London* was lost, all sorts of jeremiads were written on the folly of encountering the Bay of Biscay with too much sail; but when, for ninety-nine days, nine crews carry on a press of canvass, often on their beam ends, and with the sea constantly sweeping their decks, the captains disregarding every danger of wind and current, and boldly reckless of all but speed, they are saluted with universal plaudits and the frenzied exultation of the *Daily Telegraph*. We would only hint that if the *Taeping* and *Ariel* 'happen to be lost,' possibly the underwriters may have something to say about 'the great ship race from China.'"

OUR IRON-CLAD FLEET.—Captain Sherard Osborne has addressed a letter to *The Times* on the subject of wooden *versus* iron ships. It has been asserted that it would be quite as well to return to the old fashioned wooden vessels now that Captain Palliser's newly-invented projectile will penetrate the sides even of an iron-clad. Captain Osborne ridicules this notion, and points out that although an iron-clad is penetrable, she is only so at 500 yards range, while a wooden ship may be sunk at a distance of two miles. He concludes as follows:—"To you, Sir, who have so consistently urged on a reluctant and reactionary department the construction of an iron-clad fleet, which, indifferent as it now is, is still the only safeguard of our country and guarantee for our remaining a first-class Power, I would say do not hesitate, do not relax your efforts, and, above all, do not give the *fogeydom* of our service, or those who make their profit by ministering to its weaknesses, the satisfaction of pointing to *The Times* as disposed to hark back into the dear old ruts in which I trust lie for ever long-backed wooden frigates and painted Jezebels of hundred-gun three-deckers.

CHINESE IMMIGRATION.—By the West India mail just arrived we find the following in reference to this subject, which we have noticed in another column:—"The Demerara Court of Policy had a sitting on the 24th of August, when the Government Secretary read the following extract from a despatch received from the Secretary of State, in reference to the Chinese Convention:—'With regard to Mr. Murdoch's remark, that the recent convention with China, if ratified, will probably put an end to Chinese emigration, I may state that neither the French nor English Government is likely to ratify the convention without modifications.'"

THE ANNAMITES IN PARIS.—The fourteen young Annamites, who had arrived in France to be educated at the expense of their own country, which allows 800f. a year for each pupil, had been placed in the college of the Marists, at La Seyne, but have just been sent away from that establishment, which does not undertake the primary education of children. They are now lodged provisionally in the barracks of the ships' crews at Toulon, till a school can be found willing to take charge of them.

THE MURDER OF MISSIONARIES IN THE COREA.—(From the Paris *Patrie*).—Rear-Admiral Roze, commanding the French naval division in the China and Japan seas, proceeded on board the steam-frigate *Guerriere* to the coast of Corea to demand satisfaction for the execution of the Catholic missionaries whose death has been mentioned. The First Minister of the King of Corea replied that it was the father of that sovereign, exercising the functions of regent during the minority of his son, who ordered the missionaries to be put to death; but as France took an interest in them and the other Christians such acts should not be repeated.

CHINESE IN THE SOUTHERN STATES.—A letter from New York says:—"A Chinaman, named Ah-Yuk, and well known to the people of California, left San Francisco for New York on the 19th August. Ah-Yuk's mission to the East is to prepare for the introduction of coolie-labour on the plantations of the South. Ah-Yuk offers to furnish planters with hands at sums much lower than those demanded by the freedmen. One thing is certain—the Asiatics are more industrious than the full-blooded African negroes. The introduction of coolie labour will only complicate the problems that now puzzle our people. What will we do with the negro when we have given his work to the more profitable Chinaman? and what will we do with the Asiatic when we get him? Shall we make him a citizen, or shall we make him a slave. The coolie question is destined to become a very important one, and that at no distant day. For we can prevent emigration from China no more consistently or justly than we can prevent emigration from Great Britain or Germany. And let the Asiatics once discover their profit in labour in the Southern States and swarms will hasten to these shores.

GUIDE TO CHINA AND JAPAN.—We are glad to observe that Messrs. Trubner and Co., of Paternoster-row, will shortly publish a work bearing the following title: *China and Japan; a Complete Guide to the Treaty Ports, and Vade Mecum for Travellers and Residents*, by W. F. Mayers, Esq., and N. B. Dennys, Esq., of H.M.'s Consular Service, and Lieut. Charles King, Royal Marine Artillery. We trust that for the future travellers will cease to be sufferers from the not always amusing blunders of *Bradshaw's Overland Guide*.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, SEPT. 24.

The stormy weather that prevailed during the night of the 16th prevented my second letter reaching you in time for insertion; your readers would else have been informed by the last mail of the important fact that the First Chamber of the States General had approved of the first chapter of the East India budget (expenditure in Holland, f.35,729,785.99½) by 27 against 1, and the second chapter (expenditure in India, f.87,271,490.65) by 26 against 2. As to the discussions, I need not add any particulars to those I mentioned in my last letter, notwithstanding the Minister of the Colonial Department made a very long and able speech, in which he answered the great number of questions proposed by the members. All his promises, all his binding declarations, remain but idle words, for he is now unable to fulfil them. To everyone's great astonishment an extra number of the *Staats Courant* informed us last Sunday—the day after which the budget passed and the session for 1865-6 was closed—that Mr. Myer had resigned, and that Mr. Trakranen had been appointed Minister of the Colonial Department. Of course everyone expected that after this Mr. Myer would be named Governor-General of the East Indies. And so it was. A few days ago this very important appointment was made known by the official paper. It is impossible to repeat the words in which this appointment is disapproved of by the press. Anger, mingled with contempt, disgust and abhorrence, prevails in consequence of the miserable conduct of this Conservative Minister, who only showed himself liberal to make himself master of this lucrative dignity that will make him within five years a rich man. Had Mr. Myer deserved it by his political career of course everyone would have applauded this nomination, but the contrary is the case. The *Dagblad*, the ultra-Conservative journal, feels itself obliged to disapprove of it. A much stronger feeling of abhorrence will be created in India when this news is known. In the papers received by the last mail, in which he is spoken of as the proposed Governor-General, his name was accompanied by such adjectives that I hesitate to report them to you; they however prove that he is the most unpopular man who ever could be appointed for this dignity. Had he shown himself a straightforward Conservative, and had he gone as such to the East, perhaps the Liberals would have been disappointed, but would never have manifested dislike or disapprobation.

Under these circumstances the new Parliamentary session was opened on the 17th. I need scarcely say that the Royal speech from the throne was more colourless than ever, and I think it of no use to reproduce it in full. The most important clause was that in which the late war was spoken of. "Despite the war," his Majesty said, "which has been carried on, the Netherlands have uninterruptedly enjoyed the blessings of peace, and our foreign relations have continued most satisfactory. However gladdening this fact may be, it must not be forgotten that the nation will find, after God, its firmest support in itself. I, therefore, have seen with pleasure, as a proof of the national spirit, the organisation of the corps of volunteers. His Majesty further announced that the financial condition of the country was satisfactory. Not one word, however, was said about the question of Limburg, and this caused so much surprise that, when the address in answer to the Royal speech came under discussion in the First Chamber, Mr. Boreel questioned the Minister of Foreign Affairs upon this matter. Mr. van Zuylen, however, declared that there was no question that Limburg should make part of the North German League; but he could not furnish any further particulars because the negotiations were not yet finished. As to the question of Luxemburg the Minister declared that the Government had nothing to do with it. Another member, Mr. Cremers, inquired about the change of Colonial Ministers, and asked what was the *raison d'etre* of Mr. Trakranen. Mr. van Zuylen, who seems now to be the *Premier*, answered instead of Mr. Trakranen, and said that this new minister would give effect to the programme of Mr. Myer, and that he would fulfil all the promises of the latter. With this answer the First Chamber was satisfied.

The Emperor of Russia conferred the knighthood of the Order of St. Stanislaus on Mr. Lion, the editor of the *Dagblad*. This journalist was presented with this cross, while he offered to his Majesty the Emperor a French translation of the account of the funeral solemnities at the burial of the body of the Queen-mother, published in his paper.

The population of the Netherlands amounted on the 1st of January to 3,491,796 persons.

H.M.'s war-steamers *Willem* and *Java* will proceed on the 1st of October to their destination; they are bound for Batavia.

COMMERCIAL.

COFFEE.—Since our last report the market has not altered. There is much demand for those parcels which were paid in the last auction at low prices, but nothing is offered. The private transactions include: 1,345 b. Java good ord., ex A. R. Falck, 924 b. Bali; and 2780 b. Macassar at 36½. The market closes firm.

SUGAR.—(Raw). On the 21st 35,888 kranj. Java were offered at public sale, by the Dutch Trading Company, and an advance of f.1 to

Digitized by Google

f. 2½ was willingly paid upon the July prices, now that the beetroot-crop has proved to be a failure. The value now is f.32½ for No. 11; f.33½ for No. 12; f.35 for No. 14; f.37 for No. 16; f.39 for No. 18; and f.40 for No. 20. The auction was very animated, and the whole quantity was sold. Since the auction, however, no sales have taken place. Refined is very firm, but no sales are reported. The stock in bond of Raw Sugar amounted on the 15th to 47,306,811 k., against 55,666,222 k. on that date last year.

RICE is in lively demand, in consequence of the continuance of wet weather, and the certitude that the potato crop will fail. 10,700 b. Necransie were sold floating per Stad Middelburg at f.7⅜, and 6,900 b. Bassein ex British Banner at f.7¼.

SPICES dull at last auction prices.

TOBACCO (Java leaves).—Since the last important auctions, at which 17,000 b. were sold, nothing of importance has been transacted.

JAVA INDIGO.—The market is inactive, the trade being occupied inspecting the parcels to be offered in the forthcoming sale. Prices are, however, very firm.

JAPAN SILK.—The 397 b. raw silk offered by the Trading Company were sold at the following prices:—

179	bales	Maibash (Dyepots, Flotillons)	f.41	to	f.46¾
34	„	Sinshiu (do. do.)	43¼	„	47½
110	„	Oshue (re-reeled, redévidée)	34½	„	41¼
42	„	Koshue (Selé)	34¾	„	40
27	„	Sodai (Bricks)	36	„	37½
5	„	Mashtah (Slips)	34	„	34½

There was a good demand, and the article closed rather firm. In this auction an advance of 10 per cent. was paid upon the London price.

BANCA TIN.—Limited transactions; 200 slabs were sold at 47f., 1,000 slabs at 46¾f., and 600 slabs at 46½f. to 46f. The market closes dull.

HIDES.—The private transactions include the following parcels:—211 p. Sourabaya Reindeer, ex Lichtstraal; 2,500 p. do., ex Elisabeth; 741 p. do., ex A. R. Falck; 1,136 p. do., ex Ida Maria.

COCOANUT-OIL.—In good demand, and 38f. willingly paid.

DRUGS.—Camphor firm, and in much demand. Cassia Vera is paid with 32c. Gum Damar: Nominal, 33c. Gum Elasticum: With want of stock. Japan Wax: Some parcels may be had at 35f.

RATTANS.—More attention is paid to this article. 650 bundles were sold ex Tweelingen.

HEMP (MANILA).—96f. without stock.

MONEY.—The Bank rate of discount is still unaltered. The funds are in general very flat. Dutch Two-and-a-half per Cents., 55½. Three per Cents., 66. Four per Cents 87.

EXCHANGE ON LONDON.—3 mo., f.11.65. 2 mo., f.11.68½. Short, f.11.78½. Paris: 3 mo., f.46.30. 2 mo. f.46.42½. Short, f.46.75.

SHIPPING.—ARRIVALS.—September 17, at Texel, from Tjilatjap, Argonaut; September 19, from Macassor, Hendrika; September 20, from Batavia, Java Packet; September 22, from Padang, Alblasserdam.

DEPARTURES.—September 23, from Brouwershaven for Batavia, Min. Fransen van de Putte; for Samarang Albrecht Beyling.

PASSENGERS INWARD.

From Java, per Hendrika: Mrs. G. G. Lubbers, Mr. M. Steenmeyer; per Java Packet; Messrs Bockstal, G. Broers, Groenewald, de Bruin, Messrs Freyes and family, Goding and family, Messrs. Apon, L. Ryncken; per Eva Johanna: Messrs. Kerkhoven and family, W. van Grelen, Wethmar and family, de Lang, Aalstius den Appel and family, van Gerth and family, Hennige and family, Sorillon and family, Jonker and family, van Frist and van Beusekom, Miss de Bordes, Oosteweghel, Wethmar, van den Berg; per Alblasserdam: Messrs. Henner and family, de Jaeger.

Monetary and Commercial.

It will be seen in our report on tea that dealers still hold back, and that new season's continue to be put forward in public sales, which is quite unprecedented so early in the season. Invoices of parcels on board the lately arrived clippers have been offered at 20 per cent. discount. Indeed, the losses may be assumed at 6d. per lb. on the average, and this, too, on at least 50 million pounds of the present season, for we doubt if even at that stage of the export the prices given were much less than at the opening, and we see little or no chance of improvement in our market. We trust, however, that the remaining portion of the season's supply—computed at 125 millions—will be purchased at much lower rates, and leave a profit to cover the losses on the first 50 millions, which at 6d. gives the large sum of £1,250,000. The advices sent from this of the prospects for the season pointed out the large quantity of last season tea still held, upon which the buyers had lost heavily, and that suffering from such losses they would be very cautious in buying the new season's at much over 2s., yet in face of this they cost 2s. 6d. to 3s. laid down.

The success which has attended the laying of the Atlantic cable has given an impetus to other sub-marine projects, and it is expected that the company formed for laying down communication with India by the Red Sea, noticed in a late number will soon be placed before the public for subscription. The proposed line from Falmouth to Gibraltar, thence on to Malta, forms part of this scheme also, present means of communication with Malta not being at all satisfactory. Our friends at Singapore will also see an encouragement to proceed with their scheme for connecting the India lines with Singapore, Java, China, and Australia.

The affairs of Overend, Gurney and Co. are in a deplorable state, and unless some arrangement be made between the creditors and shareholders to stay litigation the result will be very disastrous for all concerned.

The biddings for £300,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta £273,000, and to Bombay £12,000. The *minimum* price was fixed at 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay; tenders at 1s. 10¾d. on Calcutta and Madras and at 1s. 11d. on Bombay will receive in full. These terms show a demand for fair remittance.

A general meeting of the Oriental Bank Corporation is convened for the 18th October, when an interim dividend for the half-year ended the 30th June is to be declared. A meeting of the Chartered Bank of India, Australia and China will also be called on the 17th to declare an interim dividend.

The *Friend of India* reports that much indignation has been expressed in Calcutta and Bombay at the letter from the London manager of the Agra and Masterman's Bank, throwing the blame of the stoppage on the Calcutta and Bombay branches. The Calcutta branch, according to the *Friend*, closed with ten lacs of cash, besides other assets, and the Bombay branch was so carefully conducted that it was more free from advances to speculators than any other in that city.

The advices from Bombay announce the suspension of Premchund Roychund, a very large operator in produce. It is understood that his engagements will be enormous, and that he has been the holder of a considerable quantity of cotton. He had been a director of the Bank of Bombay, and the India and China Banks here have fallen since the news arrived from sales by frightened holders.

The report of the Mauritius Land Credit and Agency Company, to be presented on the 28th instant, recommends a dividend of 2s. per share, making, with the interim dividend in February last, 10 per cent. for the year. The sum of £1,000 is to be written off preliminary expenses, and £101 will remain to be carried forward. The mortgage investments of the company during the year show an increase of only £20,481, "the state of the money market not having permitted the company to borrow to any extent with a view to re-invest in Mauritius."

The mail delivered on the 15th and 22nd inst. brought about £1,000,000 in gold from Australia and silver from India. The next mail, expected on 28th inst. and 4th prox., will bring about £285,000 in silver from Calcutta.

Part of the silver alluded to above has been sold for the Continent at 60⅞d.

The American mail steamer from San Francisco for Panama of 10th September carried 1,500 packages Japan tea for New York.

The amount of bullion by the P. and O. Company's steamer *Delta*, from Southampton on the 20th inst. was:—In gold to Madras, £863; in silver to Shanghai, £8,219.

ARTICLES OF IMPORT.

TEA.—Our market still continues in a very quiet state, although, owing to the arrivals of new tea, and the large quantity offered for public sale without reserve, the aggregate of sales has been larger than for some time past. Prices have, however, again given way for many kinds, and there is at present no symptoms of any general revival of demand. The samples of the new teas have been freely offered, but met with but little demand from the trade, partly owing to the general dulness, and partly to the unsatisfactory quality of the bulk compared to last season's teas, of which many parcels are still offering. Prices have ranged chiefly from 1s. 7d. to 2s. 2d., per lb., with a few parcels from 2s. 3d. to 2s. 6d. per lb.; about 7,500 packages having been realised at public sale without reserve. The sales noticed in our last have passed off with fair spirit at about previous market value for nearly all kinds, the only decline being 1d. to 1½d. per lb. in new-make Congous, of which a large portion was printed. The new season's teas sold at prices fully equal to those obtainable by private contract. The Black Prince has arrived from Foochow in 109 days. Broken-leaf and dusty kinds of Congou, as also siftings, show no alteration. Fair to good common and fair flavory kinds remain as before. Medium Kaisow kinds, of old season, show no material change. Fair to good, of new import, have sold from 1s. 7d. to 1s. 11d., and fine from 2s. to 2s. 6d. per lb. Common to fair black-leaf Congous have sold from 10½d. to 1s. 1d. per lb.; good qualities show no alteration. In fine a few have changed hands at previous prices in the absence of new arrivals. New-make Canton kinds have sold at a decline of 1d. to 1½d. per lb. In Amoy kinds there is no change to report. Common to fair Oolongs remain as before, some parcels of new season have sold from 2s. to 2s. 4d. per lb. A few fine Souchongs have sold at full prices. Flowery Pekoes show no improvement. In Scented Teas, common to fair Capers and Orange Pekoes have realised former prices. In Foochow, of new import, sales have been made to a fair extent at a decline on previous prices, per Erl King. In uncoloured Japans there are no transactions to notice. In Green Teas there is a scarcity, and holders are very firm, refusing late prices current. The samples ex Vanguard have been placed in the market, and sales made at advanced prices for all kinds. Hysons have somewhat improved in value. Canton Gun powders more inquired for at former prices. The circular of Sillar and Bateman says:—"Large public sales were brought to a conclusion yesterday. 52,958 packages were advertised to be sold without reserve, but on the morning of the sale it was announced that upwards of 6,000 packages would be withdrawn by order of the importers. This proceeding has caused considerable discussion among the trade. It is much to be regretted that cause should be given for any unpleasant feeling to arise between dealers and importers, and it is a question whether the merchant has the right to advertise Teas to be sold without reserve and afterwards to withdraw them. The official return shows the quantity of Tea, duty paid, in London up to the 31st August to have been 43,551,816 lbs., the quantity exported 18,214,569 lbs., and sent coastwise 22,224,977 lbs., making the total delivered 83,991,362 lbs., or upwards of two million pounds heavier han estimated by the brokers. The Dryden and Chanticleer are anxiously looked for as green teas are very scarce." With regard to the quality of the new season's Teas, the Circular of Messrs. Steains says:—"The quality, as a whole, is far inferior to last season being almost entirely of the thin-burnt flavour, devoid of real aroma, giving evidence of immature growth, hurried preparation, and of being rather freely mixed with winter leaves. This is just what we anticipated as a consequence of the folly displayed last season, when these hungry burnt sorts were eagerly bou ght at 2s. to 2s. 4d., quality being almost entirely disregarded. We are, however, glad to find that this season purchases are being made with a due regard to quality and real value, and which must result in solid advantages to those who vend direct to the consumers."

SILK.—Buyers now seem staggered at the high prices, and have shown an indisposition to operate, though any material concession on the part of importers cannot be expected in the face of an undoubtedly short export both from China and Japan. The deliveries, though showing some improvement on those we have lately been accustomed to, are still on a small scale, and we are very much wanting the quantity by the next P. and O. mail and French mail. Deliveries from 1st to 24th inclusive: China, 2,049 bales; Japan, 384 bales.

COTTON.—The demand has much increased, and prices are higher with a prospect of further rise. Sales at Liverpool on the 26th and 27th reached 50,000 bales, including 23,000 speculation and export. Prices for China, 9¾d., Madras, 9½d. to 10d., American, 11d. to 18d.

SUGAR.—The abatement of activity in the market has become more decided, and transactions have been with difficulty effected at previous rates. Of 4,526 bags Mauritius at auction the bulk was yellow grainy, which sold at 34s. to 37s. for low middling, and superior 40s. 6d. to 41s. A few lots soft good and fine brown realised 28s. to 29s. By private contract 2,000 bags grainy sold at 36s. and 700 bags brown at 26s. to 28s. Of Manila, 3,000 bags Clayed sold at 28s. by private contract.

COFFEE.—Steady demand for colonial descriptions; prices somewhat lower. Of Ceylon, 1,150 casks and 871 barrels and bags Plantation at public sale were mostly disposed of at a reduction of 6d. to 1s. per cwt. Prices, fine ordinary to low middling, 77s. to 80s. 6d.; middling to good middling, 81s. 6d. to 85s. For Native the prices remain the same as at last report, and sales of 1,500 bags are reported. Manila still remains unquoted.

RICE.—The demand still continues good, but owing to the light supply and extreme firmness of holders, transactions have not been on a very extensive scale. The prices on the spot are—for good Rangoon 11s. 6d., Bassein 10s. 6d., and good white Bengal 16s. Afloat—two cargoes Rangoon, 3,170 tons, for London, 11s. 3d. At auction—552 bags damaged Rangoon sold at 10s. to 11s.

PEPPER.—A flat tone prevails in the market. Of Black Singapore 3,369 bags were offered at auction, of which fully three-fourths were withdrawn, the remainder selling at 3⅞d. to 3¼d. per lb. Privately about 1,000 bags have sold; Singapore at 3⅞d., Penang at 3½d., and good Cochin at 3⅞d. White very flat, and no auctions; 100 bags Singapore sold privately for cash at 6¼d. per lb. On the 26th, Black Singapore: 5,700 bags, sea-damaged, were sold with all faults; first quality, at 3¼d. to 3⅜d.; second, 3⅛d. to 3¼d. About 2,700 bags sound sold as follows:—Malabar, 4⅛d. to 4⅝d. Penang, 3⅜d. Of White Singapore: 20 bags sold at 6d., and White Penang was quoted at 6⅝d.

SAGO.—Market steady, and prices about 6d. per cwt. in advance of our last report. Of 1,527 boxes at auction a few only were sold at 17s. 6d. to 18s. per cwt. for fair small.

TERRA JAPONICA.—Cutch Pegue is in excellent demand; 4,643 bags were offered at auction of which four-fifths sold at 27s. 6d. to 32s. 9d. Of 839 bales Gambier one-third were sold at 23s. 6d.; also 3,121 packages sea damaged sold with all faults at 16s. 9d. to 21s. 6d.

HEMP (MANILA).—Still continues scarce, and prices somewhat higher. Good roping has realised £49 10s. per ton, and inferior £45.

HORNS.—Scarcely anything doing; arrivals expected; prices: Buffalo 26s. to 53s., Buffalo tips 28s. to 37s., Deer 40s. to 65s.

CARDAMOMS.—Improved since last report; 36 cases Malabar nearly all sold at 3s. 9d. to 5s. 4d. per lb. for ordinary dark to fair. Alleppy and Madras all retired.

CAMPHOR.—Market very quiet, and trade limited both in China and Japan descriptions. Prices: £6 10s. per cwt. Japan, and China £6 2s. 6d.

DRUGS.—Cubebs: Quiet, and slight improvement over last report; about 130 bags sold by auction at 80s. per cwt. for good. Dragons' Blood: Scarce, and market firm; sale reported of a single case in reeds at £15 per cwt. Rhubarb: Has sold very irregularly; about 50 cases sold at 2s. 10d. to 6s. 11d. per lb. for ordinary to good flat and round, 8d. to 1s. 6d. for very low and inferior.

SPICES.—Cloves: Market flat; in public sale good Penang realised 1s. 1d. to 1s. 2d., and 4 cases Ceylon sold at 10¼d.; no sales of Zanzibar. Cinnamon: 213 bales Ceylon were disposed of, first quality at 1s. 9d. to 2s. 8d., second, 1s. 8d. to 2s. 5d., third, 1s. 3d. to 2s. 1d. Nutmegs: Market quiet, and of 96 cases Penang, and 19 cases Dutch, about one-third sold at 4s. 1d. per lb. for very good bold, and 1s. 7d. to 2s. 3d. for fine small to good medium. Mace: 11 cases Penang and 20 cases Batavia sold by auction at 1s. 6d. to 3s. per lb. for inferior red to fair palish.

COCOA-NUT OIL.—Market continues firm, and for Cochin there is an advance in price; 229 Cochin and 128 casks Ceylon at auction.

OILS.—Anniseed: Prices lower; about 23 cases sold at auction at 9s. to 9s. 1d. per lb.; business done privately at same quotations. Cinnamon: One case sold at 3s. 2d. per oz. for good. Citronelle: about 12 cases at auction sold for 3½d. per oz. Lemon Grass: Nothing doing whatever.

JAPAN WAX.—Good quality scarce and much wanted. Of 754 boxes, saucers mixed with water, three-fourths sold at 45s. to 64s. 6d. per cwt.

INDIA RUBBER.—No supply, but arrivals expected.

GUTTA PERCHA.—Very flat; about 10 tons sold at auction at 4¼d. to 5d. per lb. ordinary reboiled.

GUMS.—Benjamin: Of 62 cases Sumatra at auction one-fourth sold at £12 10s. to £13 per cwt. for good seconds. Gamboge: Scarce, and no business doing. Damar: Dearer; 48 cases at auction retired, but subsequently sold at 63s. per cwt. for good.

TIN.—Market rather lower with moderate business doing. Prices:—Straits, £80 to £81 per ton; Banca, £81 to £82 10s., for cash.

MISCELLANEOUS.—Blacklead: Prices a trifle higher since last report; 667 barrels have mostly sold at 14s. 6d. to 15s. 6d. per cwt. good lump, and 8s. to 10s. 6d. dust. Ebony Wood: No business; arrivals expected. Galls: In China and Japan fair business has been done at 65s. for both kinds, being an advance of 1s. on last report. Musk: Of 51 caddies Tonquin at auction, nearly two-thirds sold at 20s. 6d. to 25s. 6d. per oz. for ordinary to middling; of three tins Grain, one sold at 47s. 6d. for good. Rattans: Nothing doing. Soy: Steady; of 50 casks at auction a few sold at 3s. per gallon. Tortoiseshell: No business of any importance. Vermilion: Nothing doing. Mother-o'-Pearl: Very scarce, and no business reported in either Singapore or Manila.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars £6 5s. to £6 10s.; nail rod, £8 10s. to £8 15s.; hoops, £9 10s. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 5s. to £6 10s.

STEEL.—Swedish keg, £15 15s.

COPPER.—Sheet and Sheathing, £91 to £93 per ton; yellow metal, 7½d. per lb.

TIN.—£88 for block; £89 for common bars. Tin plates, best charcoal, I.C., 33s. to 34s.

LEAD, &c.—English pig, W.B., £22 15s.; shot, patent, £23 10s. to £24; sheet, £21 10s.; spelter, £20 5s. to £20 10s.; zinc, English sheet, £27; quicksilver, £7.

The following is from the Circular of Messrs. French and Smith:—A moderate business only has been transacted since our last report. Iron: Is steady, and looks firmer. Copper: For unmanufactured there is demand at a shade over official quotations. Manufactured is freely selling at smelters' prices. Tin: English is quiet, Foreign Tin being much cheaper. Several thousand slabs of Banca have changed hands at £82 10s. in London, Dutch sale prompt Nov. 28. Fine Straits has realised £81. The Dutch autumnal sale of Banca is to take place on the 28th inst. at Amsterdam. Lead: Quiet, but firm. Spelter: without change.

ENGLISH GARDENS IN THE EAST.

THE Fourth Season has now confirmed the complete success of MR. CHRISTY'S Cases for conveying Fruit Trees, Vines, Plants, Flowering Shrubs, and Seeds, to the East, when shipped in the holds of Steamers like ordinary Case Goods. Mr. John Waterer, junr., the American Nursery, Bagshot, Surrey, or Mr. Christy, 28, Pall Mall, London, are prepared to execute orders for gentlemen in the East, and beg to call attention to the list of prices and conditions. FRUIT TREES, including PEARS, APPLES, PLUMS, CURRANTS, GOOSEBERRIES, PEACHES, NECTARINES, APRICOTS, CHERRIES, and QUINCES, per case, 10 Guineas.

	Guineas.
30 FRUIT TREES, with Ten varieties, per case	14
ROSES of the best kinds	15
RHODODENDRONS and AZALIAS, &c.	15
GARDEN SEED (various)	5 upwds.

The number depends on the size of the roots; the cases average 30 plants each.

All the above prices include freight, insurance, and all charges to any port where the P. and O. steamers call. The season for shipment commences about September and ends in January. All orders must be accompanied by a remittance or orders for payment. The name of the agent at the port of arrival must be furnished, to prevent delay in forwarding.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Amoy, March, 1865.

TO IMPORTERS.

The undersigned beg to remind Importers of Wearing Apparel, and Boots and Shoes, of the many advantages which their long experience as Manufacturers and Shippers, their vast resources, and their intimate knowledge of the requirements of Foreign and Colonial Markets enable them to offer.

ASSORTED SAMPLE CASES FORWARDED ON RECEIPT OF REMITTANCE OR ORDER ON LONDON AGENT.

"CHINA MAIL" OFFICE.

No. 2 WYNDHAM-STREET (back of the Club):—

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—3 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.
(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents.

ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents. and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.
(The Morning of the Mail's despatch.)

PRICE.—To Subscribers to the Weekly issue, 8 dols. to Non-subscribers, 12 dols. Single copies, 50 cents.

ADVERTISING.—The same as in the Weekly. All "Notices of Firms" appearing in the Weekly will be inserted in the *Overland*, and charged for, unless otherwise ordered.

A. SHORTREDE & CO.

Hong Kong, May 17, 1866.

HOLLOWAY'S OINTMENT AND PILLS.—READY TO HAND.—Every good and generous person feels a natural sympathy in the presence of suffering, but how much more grateful would that compassion be if it could supply the means of relief. Professor Holloway offers to every one the never-failing power of thus rendering the most essential service to afflicted humanity. His noble remedies reach the seat of every malady, whether it be on the surface or hidden in the darker recesses of the interior of the system, and thus extirpate it, if that be possible. Plainly printed instructions for the guidance of invalids envelop every package of these restoratives, the reputation of which is not only European, but extends throughout the globe.

IMPORTANT ANNOUNCEMENT.

JOSEPH GILLOTT,

Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street New York; and 37, Gracechurch-street, London.

Orders and remittances should be addressed to the MANAGER.

Office. 12, George-yard, Lombard-street, London E.C.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words "DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's.

To sail punctually on the 5th October.

FOR SHANGHAI, the well-known clipper FIERY CROSS, A 1 thirteen years, 689 tons register, RICHARD ROBINSON, Commander; lying in the West India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Regular Line of Packet Ship.

To sail punctually on the 5th October.

FOR HONG KONG and WHAMPOA, the celebrated clipper ship ARIEL, A1 fourteen years, 853 tons register, JOHN KEAY, Commander; lying in the East India Docks. This beautiful ship has just completed her first voyage, with the new teas, in ninety-nine days into dock.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Regular Line of Packet Ship.

To sail punctually on the 25th October.

FOR HONG KONG and WHAMPOA, the well-known clipper BELTED WILL, A 1 fourteen years, 812 tons register, A. LOCKE, Commander; lying in the London Dock. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

FOR COLOMBO, CEYLON, Direct, to follow the "Avon," and will have quick despatch, the well-known clipper ship THAMES, A 1 thirteen years, 444 tons register, O. J. H. ARNOLD, Commander; loading in the West India Docks. This beautiful vessel has a full poop, with every accommodation for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

FOR COLOMBO, CEYLON, Direct, will have immediate despatch, having the whole of her dead weight, and only room for light measurement goods, the clipper ship PALESTINE, A A1, 608 tons register, T. Park, Commander; loading in the West India Docks. This splendid vessel has a full poop, with magnificent accommodations for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

COLOMBO DIRECT (warranted first ship), the FRANCES, A 1 13 years, F. HILL, Commander; now rapidly loading in the West India Docks, and will be found the best opportunity for shippers of fine goods.

Apply to JOHN C. CAMPBELL, 22, or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street.

Will meet with Quick Despatch.

DIRECT for BOMBAY, the fine fast-sailing ship JOHN BRIGHT, A 1 twelve years, 541 tons register, N. T. MARQUAND, Commander, loading in the London Docks. (Owned by Messrs. Marquand and Co., Guernsey.) This splendid ship has a large portion of her cargo engaged, and offers a first-rate opportunity to shippers.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

From Marseilles, Nov. 28.—To Ceylon: Mr. P. W. Braybrooke, Mr. W. H. De Saram.

Summary of News from the Far East.

JAPAN.

From this quarter we still receive conflicting accounts regarding the progress of the civil war. Advices from Yokohama state that in three engagements out of four the Tycoon's troops had been victorious, while Nagasaki accounts affirm that all four battles had been gained by Choshiu's forces. The latest telegraphic news which comes from Shanghai under date Sept. 5th, confirms the defeat of the Tycoon in at least one case. The same telegram also announces that a treaty of commerce and navigation between Italy and Japan was signed at Yedo on the 25th Aug. It will come into operation on Jan. 1, 1867.

YOKOHAMA.

Our latest advices from this port are to the 13th August. The English mail of the 16th June, conveying also telegraphic news to the 27th of that month, was received on the 8th August. The following summary of news is from the *Japan Herald*:—

"The news from Osaka is more stirring than for some time past. War has commenced between the Tycoon and Choshiu. Up to Saturday, the 4th August, intelligence had reached Yokohama from Osaka, to the effect that in three engagements the troops of the Tycoon had prevailed against those of Choshiu. The scene of action was Oshimagoori, in the province of Soowo, one of the two provinces composing the estate of Mori. The troops engaged on the side of the Tycoon were 5,000 or 6,000 men, under command of Matsdaira Okino-kami, and some infantry and artillery (about 1,200) drilled in the European style. Oshimagoori is near the sea—so much so, that it is declared that the *Fusiyama* took part in the combats with good effect. In the last battle the Daimios Sakakibara and Tachibono commenced the attack. The Matchi Oshimagoori was taken and after the triple success the Tycoon's troops marched as far as Iwakonie. Mori and his son Nagato were in the castle of Yamagotchi, a very strong place fortified after latest European strategic rules. Ogasawara Ikino Kami was at Kokoora waiting for steamers to convey him and his force to the seat of war. It appears that Simonoseki was occupied by the Tycoon's troops without opposition before war began. The Tycoon is at Osaka with about half of his troops. His little squadron is at Simonoseki and Oshimagoori.

The opinion of high Japanese officers seems to be that the war will be short. They say they are fighting Ronins, and that Mori is overruled by them and is not hostile to the Government. We entertain serious doubts on this score and await results with much interest."

Later advices confirm the foregoing and add—"The Tycoon's troops occupy Oosima, and Choshiu's forces had made an attack on the ports on the other side of the Straits. They were, however, repulsed, but not before they had destroyed several towns. In these operations Choshiu lost two ships." On the other hand the latest item of intelligence from Osaka is less favourable to the Tycoon's cause, being as follows: "A body of the Tycoon's forces under Sakakibara and Ikanomono Kamihas been attacked and defeated by Choshiu's troops at Toshaigowa, near Oshimagoori. Details are not given."

In consequence of the constant firing across the Straits, and the blockade of Simonoseki by the Tycoon, the Gorogio has requested the foreign Ministers to proclaim the closing of the inland sea until the war is over and the blockade raised. This,

Digitized by Google

so far as British ships are concerned, Her Majesty's Minister has power to do, according to the terms of the order in Council. But what answer he and his colleagues will give has yet to be decided. On being pressed to say what was intended by the interdiction of European vessels through the Straits of Simonoseki for awhile, the Gorogio has replied that they are not very particular as to the mere passage through, provided they do not anchor; but they cannot be answerable if they are hit by shot from either side.

The Tokaido has been crowded during the week with coolies taking munitions to Osaka. From the constant drain of population from Yedo towards the seat of war—some to join the army, some to see the fighting, and others on speculation to see if anything can be gained, the Tycoon's capital looks every day more and more deserted.

Kubota Sentaro, the Colonel (not General, as we have been in the habit of calling him) lately commanding the troops at Kanagawa, is in Yedo in good health. The troops he commanded were raised from the peasantry after the manner of Europeans, as a trial, and were not of the ordinary class of Samourai. The trial was only a partial success, one half did extremely well, and have gone to Osaka to join the Tycoon's force there; the other half nothing could be made of, and they were sent to their homes. Kubota Sentaro could not go to Osaka with the portion that was sent thither, as it would have been lowering him after being in command of upwards of 1,000 men to give him command of only half of the number. He was appointed to the charge of all munitions of war in Yedo, and his services acknowledged by an advance of two steps in promotion.

The Italian frigate *Magenta* is again at Yedo. The plenipotentiary of Italy has commenced the conferences for the treaty between his country and Japan. He is temporarily lodged at Dai Tchoodje, the temple once occupied by the British Legation.

The Daimio Midzoo Idzoumi no Kami, who lately resigned his seat in the Gorogio, is confined as a prisoner in his own house. The exact reason is unknown. That given, however, by public report, and most generally believed, is, that orders having come from Osaka for an additional tax to be laid on Yedo, Midzoo Idzoumi no Kami opposed its levy, saying that the city had contributed already so largely that the greatest distress prevailed; and that, to prove the correctness of his opinion, he incited the leaders of the rice-rioters to make the *emeute* recorded in our last issue.

Among the visitors to Yokohama were H.E. the Governor of Macao and the Duc d'Alencon. The hospitality of the British Legation was offered to the latter on his arrival, but he preferred to remain for the present at the Commercial Hotel. He is accompanied by his secretary, Baron Bache. It is his intention to make one or two excursions in the neighbourhood of Yokohama, after which he will pay a visit to Yedo, where the building of the British Legation will be placed at his disposal.

Major General Guy, commanding H.B.M.'s troops in China and Japan, was expected to arrive very shortly.

With regard to the visit of the British Minister to Kagosima, the *Herald* says:—"The visit of Sir Harry Parkes to Kagosima has not the political significance that some attach to it. He is quite justified in accepting the invitation of the Prince of Satsuma, and, as British Minister, has perfect right to go to Kagosima or any other port or place in Japan where it would be against law for those unconnected with the legations to show themselves. But he is not the man even to entertain the question of diplomatic relations between his Government and Satsuma or a confederacy of Daimios. He would be acting treacherously if he even listened to proposals that had for their end the upsetting of the Tycoon's throne and Government, or the setting aside of treaties already made. He may be impulsive, as some have recently proclaimed him. His first impulse, if such proposals were whispered to him, would be to embark forthwith, and leave the territory of one who could have so unworthy an opinion of him as to suppose him capable of lending his ear to them."

An amusing incident has happened at the celebrated sulphur baths of Atami, a watering place situated at the foot of Fusiyama, which is thus narrated in the *Japan Times*:—

"Our readers are aware that M. Leon Roches, the French Minister, has lately been at the baths of Atami, whither he has resorted to try the effect of the sulphur spring there on a chronic rheumatism to which he is a martyr. This spring is well known to, and much admired by, the Japanese in this neighbourhood, and its virtues are undeniable. The hot well, for which the place is famous, is about a quarter of a mile from the beach, and resembles, when quiescent, a mere hole or cavity among some rocks. Every four hours, as regular as a clock, takes place an eruption of the sulphur well beneath. A few puffs of steam are first seen ejected from the hole—which increases in rapidity and volume until the water leaps out. The action lasts ten minutes, during which the water increases in heat and intensity of flow, until the temperature rises to such a pitch that nothing comes from the hole but a prodigious jet of steam, which, with a great roar, dashes against the large stone spoken of above, and finally rises in a magnificent pillar two or three hundred feet into the air, which gradually dissolves as the action of the spring weakens, and the flow of steam diminishes and finally ceases altogether. The strong impregnation of sulphur is perfectly distinct to the smell and taste of any one standing in the enclosure during the eruption. The precious water flows away into a tank, built behind the large upright stone, and is thence conducted by the usual bamboo tubes into the various bathing houses in the village below.

It appears that the French Minister had taken up his quarters among the hills, a mile or two from Atami, and was in the habit of having the water brought to him from the spring day by day. The village Yakonins of course soon thought they saw a fine opportunity for a 'squeeze;' so, as soon as M. Roches had fairly established his *ménage*, proposed to him the modest sum of 30 boos per diem as compensation for the labour of bringing him his diurnal baths. This was of course resisted. His Excellency, knowing very well the price of coolie hire, said that he did not mind three boos a day, which was about twice the proper tariff, but thirty boos he would not pay. The officials—applying the great economic law of demand and supply in a novel way, viz., holding the 'supply' thinking that they could 'demand' what they chose—persisted. Then the Minister threatened to write to their superiors in Yedo, and bring them to condign punishment, but still they would not give in. Thus stood matters when the *Magenta* passing rather close saw the French flag flying and dropped anchor in the bay. This was a pleasant distraction for an invalid Minister, and M. Roches invited the officers up to his house. Next morning, on his returning their visit on board the corvette, the usual salute was fired. Fired with most unexpected effect—dire was the consternation in Atami—all thought a bombardment had commenced, and that the place was given up to destruction—for squeezing a Minister! 'The fisher left his skiff to rock' wherever it happened to be at the moment, the cabinet maker dropped his tool, and the Yakonins the *abacus* on which they were calculating their ill-gotten gains. All the able-bodied men in Atami fled up into the hills, the women, children, and household goods were rapidly thrust into hiding places of safety, and none but bedridden cripples were left in Atami, when the Minister returned to tiffin. In due course the Yakonins presented themselves, it is said, in sackcloth and ashes, pleading hard for their lives, offering exchange for building villa residences, buying horses, &c., &c., at five boos for the dollar and daily hundreds of gallons of highly sulphuretted water considerably below cost price. A convention and tariff were, after due deliberation, arranged, the people were persuaded with great difficulty to return to their homes, which they found much to their astonishment in *statu quo*, and in about six-and-thirty hours tranquillity was restored. And so the bombardment of Atami has become an historical fact."

NAGASAKI.

Dates from this port are to the 12th August.

Choshiu's troops are said to have beaten the Tycoon's forces in three engagements, and each time to have made captures of guns. A further report had just reached Nagasaki to the effect that a fourth battle had been fought, with great slaughter on both sides, in which the Tycoon's troops were signally defeated with great loss of officers, men, and guns. The last report, however, though generally believed, wants confirmation.

Sir Harry Parkes and M. Roches, the French Minister, had visited Simonoseki and had interviews with Choshiu. With regard to Sir Harry Parkes' visit to Kagosima, his Excellency had caused the Gorogio to be informed that the visit was strictly of a private character, having nothing whatever to do with politics. Sir Harry Parkes received the invitation for himself and as many of the officers who accompanied him as could avail themselves of it, to enjoy a few days' shooting, and most naturally was most happy to accept it. Mr. Glover, of Nagasaki, was also on a visit to Kagosima.

Digitized by Google

The steamer *Eagle* had been sold by Walsh and Co. to the Tycoon for $180,000 or $185,000, and the *Mercury* has been sold by Glover and Co. for $30,000. The export of rice had been prohibited, but prices were still very high. Trade had been very dull, recently, in consequence of the high rate of exchange—305 ichibous per $100. Great complaint had been made that officials should alone have the privilege of drawing ichibous at the rate of 300 to the $100; but now that the current rate of exchange had passed even this limit, there were few merchants who were not anxious for its reduction to the normal limit of 240 or 250.

The following statement of export of Tea is from the Circular of Messrs. Alt and Co.:—

Export of tea from all Japan from 1st June, 1866, to 31st July:—

From Nagasaki to United Kingdom ...	none	
„ „ to United States ...	421,885 lbs.	421,885 lbs.

CHINA.

SHANGHAI.

The mail of June 26 arrived out on 8th August, and the dates of this mail are down to the 17th August. In reference to the murder of the Catholic priests in Corea, the following appears in the *North China Daily News*:—

The American schooner *General Sherman* is believed to have left Chefoo for Corea, though she cleared nominally for Passiet. She is heavily armed, and carries a large crew; Mr. Thomas, the author of several articles which have appeared lately in the *London and China Express* regarding the Corea, accompanied her. The French missionary who brought intelligence of the late massacre of his companions intends shortly to visit Shanghai.

It is believed that some twenty or thirty lives were lost on board the *Williamette*, through her collision with the *Plymouth Rock* near Kiukeang. She had 900 soldiers on board returning from the recent disturbance in the salt districts; a number of these were asleep on the paddle-box, which was completely cut away by the collision, and were of course thrown overboard and drowned. The *Williamette*, which was at anchor at the time, is so seriously damaged that it seems doubtful whether it will be possible to repair her.

It is with much regret that we have to announce the death of Captain Townsend of the *U.S.S. Wachusetts*, which resulted from sunstroke at Chinkiang. Mr. Kelly, the mate of the same vessel, died from a similar cause. We also hear that two men on board the *Algerine* were struck down.

The Fete Napoleon was celebrated by a *Te Deum* at the parochial church on the French concession; the ceremony being very imposingly conducted, and being attended by a large number of the officials, both Naval and Civil, of various nationalities.

The *Glengyle* brings intelligence that the river has at length ceased rising at Hankow, though there is not yet any apparent decrease. She left on the 12th, and there had been no rise for two days previously. It had risen on the 10th Aug. to four feet on the Bund.

Messrs. Latimer, Little, and Co.'s Kiukiang property was sold by Messrs. Cowie and Co. for tls. 15,700.

We understand that the various Consuls in Shanghai are about to make a formal protest to the Ministers at Peking with respect to the new Municipal Regulations for the French Concession.

If any proof of the extreme heat of the sun were required, beyond personal experience, it would be afforded by the fact that six of the Chinamen employed in building the Masonic-hall were struck down by the sun in eon day, at their work. The next day, we learn, eight deaths occurred among sailors, who habitually come on shore with only a straw hat or some still less adequate covering for the head.

We regret to learn that the *Foh-ke-lin* has brought back the bodies of the captain and mate of the *Bridgetown*, both of whom died of sunstroke on their way down the river.

The recaptured convicts, West and Maclean, were sent down to Hong Kong per steamer *Cadiz*, a consular constable accompanying them as far as the Saddles, from whence he returned in the pilot boat. It is to be hoped that the P. and O. officers will keep them safe at Hong Kong until they are delivered over to the custody of the proper authorities.

A flock of Tientsin sheep, belonging to J. Markham, Esq., grazing on the old racecourse, were at 6 A.M. quite well and lively, at 10 A.M. a messenger reported that the sheep were apparently sick, and at quarter-past eleven it was found that the whole, 32 in number, were dead. As there is great suspicion of poison having been administered to them, one or two of the carcases are being analysed. Another flock, grazing in the same neighbourhood, is still in good health. It is reported that the Russians intend shortly to annex the southern half of the island of Saghalien, in which they have already several settlements.

Messrs. Hall and Holtz have undertaken the agency of Grant's Courier Service *via* Kiachta, and have issued the following notice of charges:—For twenty words, 15 taels; thirty, 20 taels; forty 25 taels; fifty, 30 taels; and for every ten words extra, 5 tls. Special couriers will be despatched from Tientsin and Kiachta at any moment for 150 taels. An allowance of 5 per cent. will be made on regular weekly messages.

It is announced from Chinkeang that Mr. Harvey, the Consul, had suddenly left the place, *en route* to Hong.

AMOY.

Native reports say that Ting-jih-cheng will shortly return to his post at Yangchow, having accomplished the object of his mission to Changchow.

A gentleman recently from Tokao, on the west coast of Formosa, reports on the whole very satisfactorily regarding the commercial prospects of that port, which is situated about 28 miles south of Taiwan, the capital of the island. There are about a dozen of Europeans, exclusive of the missionaries resident there. The harbour is large and spacious, but not of sufficient depth of water to allow of vessels drawing over twelve feet to enter. The climate is delicious; during the south-west monsoon a refreshing breeze prevails, and the north-east winds do not affect Takao, inasmuch as it is protected by high hills on that quarter. For the last few months trade in imports had not been in a very flourishing condition; as for exports, sugar had been shipped off in large quantities by Chinese, especially during the first part of the season, commencing in January; of rice only small parcels were exported in Chinese junks, owing to a prohibition on the part of the Tautai at Taiwan to permit grain to quit the country. With respect to this prohibition, which is against treaty stipulations, a kind of protest has been despatched to Peking. The document is signed by all the Consuls of Amoy, and more will be heard on this subject before long. Camphor continues a monopoly of contractors with the mandarins of Tamsui. The Island of Formosa is remarkably fertile, and for purposes of colonisation our informant praises it very highly.

HONG KONG.

The *Feiseen* has gained a salvage of $4,000 for the aid rendered to the *Hong Kong* at the time of her being run ashore by mutinous coolies embarked at Macao. The judge of the Vice-Admiralty Court ruled that the latter was not derelict at the time of her salvage, and considerable disappointment will doubtless be felt by those belonging to the *Feiseen* at the verdict.

The reported amalgamation of the steamboat companies, or rather the sale of the vessels owned by Messrs. Russell and Co., to the limited company, is likely to be satisfactory to everyone who wishes well to the rival firms whose names represent the conflicting interests.

The following on the Coolie trade is from the *Evening Mail*:—

"We have been permitted to make the following extract from a letter received last mail by a gentleman in Hong Kong, from the captain of a ship bound to Havana with coolies. The letter is dated 'June 28, off Scilly Point,', the writer being on his voyage to England, after delivering the coolies.

Digitized by Google

"Soon after leaving Anjer, a plot was set on foot amongst our cargo of coolies to treat us as some other poor creatures have been served. This was during some hot calm weather, when they had nothing else to think of but making mischief. Our old Chinese steward was the one to give us the first information. A strict look out was kept that night, and our pistols prepared. Next morning two corporals (*i.e.*, police among the coolies, of which we had very good and zealous ones), sought out and tied by their tails all the suspected coolies, and after breakfast we had a regular court of inquiry when the whole plot was revealed by them accusing one another. It was, for one of their number to jump overboard, and while some of the crew were endeavouring to rescue him and the others about their work, to rush in a body aft, murder us all, and get possession of a fabulous amount of dollars which they imagined we had on board, and take the ship to China. They had appointed their captain, chief mate, &c., who of course were the ringleaders in their pretty scheme. However, the end of it was, when all had been examined, that a dozen of them got each a dozen lashes, and another twelve two dozen. How they did yell out! Some of them wanted their heads cut off in preference. The two ringleaders were kept in irons for some days, and I am happy to say that was the end of it. There never was the least trouble afterwards; they were as orderly as possible. They all got quite fat, respectable, and cleanly-looking before reaching Havana, and we lost only two after leaving Anjer. With respect to the company to whom we were consigned, I can only say that their arrangements are most liberal and their transactions truly honourable. A complete register of the Chinamen is strictly kept in their own office, containing the date of engagement (on leaving Macao harbour), the date of each transfer, to what district each coolie is taken, the name of planter who hires him, the coolie's vocation, &c. If the coolie, during his term of service, has good ground for complaint of ill-treatment, he can change to another estate. They are clothed, lodged, fed, and medically treated, all gratis; and though their pay ($4 per month) is small for Cuba, still they have opportunities of making outside pidgin; so that those who keep clear of the gambling dens and are industrious frequently make plenty of money. Many are settled down in the island. A great many whose time of service has expired are working at high rates of wages on their own account. About sixty left in the *Emma Matilda* on their return to China, paying $102 each for their passage—you may be sure carrying a few dollars with them also. The *Josephita y Almira* was expected to leave in about a month after us direct for Hong Kong, and would probably take three hundred more Chinese back at the same rates. No doubt there are dark scenes in the system at Macao, but that is confined to the Chinese (native broker) collectors, and does not attach to the company or their agents, and in that respect the British emigration (*free*, forsooth) is exactly on the same footing. Mr. S—— has no more idea than the man in the moon where or how his Chinese brokers get the coolies. The coolie in Demerara has a shorter term of service. A great advantage granted; but I much doubt if he is better off in other respects. Certainly he has a much worse climate to work in. One thing I am convinced of is that the emigration to Havana is just as free as to Demerara, and is a great boon to the class of men (animals you may term them, so long as they remain in China) from which the emigrants are taken. They have not a ghost of a chance to better themselves in their own country."

From another part of the same letter we take the following, relating to the *Josephita y Almira*, with coolies to Havana:—

"They had a great deal of trouble. They had three mutinies amongst their coolies before reaching Anjer, and had to put into Batavia. Their crew were nearly as bad as the coolies. Through the dilatoriness or misbehaviour of the crew, the ship got on shore in Gaspar Strait. They would not obey Captain Lee's orders. Two days after this the coolies made an attempt on the ship. It appears that a great number of them rushed aft, armed with belaying pins, knives, pots, or anything they could lay their hands on. One wretch actually got into Mrs. Lee's cabin and was making up to her, when she seized a sword and stood on her defence; at the same moment the steward came in and felled the Chinaman to the ground. Then a fight occurred on deck, but the crew obtained the mastery, and a large number of coolies were put in irons, and some were brought into Havana still in chains."

On the meeting of the Legislative Council, the *Evening Mail* says:—

His Excellency opened the meeting by remarking that he thought it best that the Council should at once come to a decision upon the question of revenue, and determine whether they would increase the revenue, or cut down the expenditure. That he thought it would be best to pass the Stamp Act through its second reading, so that it could be published in full for the information and opinion of the public.

Mr. Whittall opposed the second reading of the ordinance. He thought it could not be said that the colony was under taxed, when so small a portion of it paid £200,000 per annum. That the colony owed much of its success to its freedom from taxation, and the new taxes would create distrust in the minds of the Chinese. He thought there was no immediate necessity for an increase of the revenue. and he proposed to defer the passing of the Stamp Act for twelve months. To meet the deficiency in the revenue, he would advise that the new road be given up, and that they should not accept the gunboat as offered by the Home Government; these two items would give $49,000, leaving a surplus of $17,000. He hoped that an increase of the revenue might be looked for, and that public money would not be squandered as it has been in building works so badly that they had to be rebuilt yearly. That there were several lots of land that might be sold at Battery Point which would realise $60,000, and that by 1867 the Mint will have proved a success and pay for itself, or a failure and be abandoned. He then proposed to postpone the Stamp Act for twelve months, and suggested that a police tax could be raised to meet the expenses of the Pok-foo-lum waterworks. His Excellency expressed his dissent from Mr. Whittall's opinion, and Mr. Dent and Mr. Rennie both offered remarks on the subject, the former in support of, and the latter in opposition to Mr. Whittall's proposition. The motion for a second reading of the Act was carried by four to three.

The *Daily Press* says:—The Stamp Act was read a second time in the Legislative Council, in the face of the united opposition of all the non-official members. One after the other, in vigorous and argumentative speeches Mr. Whittall, Mr. Dent, and Mr. Gibb said that they protested against the measure; they affirmed on their experience of the trade of this place that it was calculated to have a most disastrous effect on commerce; they stated as a fact that the Chinese trading classes were already alarmed by the ordinances that had been passed, and they gave it as their opinion, based on the knowledge of the Chinese character, which in the course of business they must have acquired, that the introduction of the Stamp Act would heighten that alarm to a dangerous extent. In spite of all this, in spite of the fact that the matter under discussion was a piece of commercial legislation and that the three commercial men on the council were earnestly opposed to it, the Governor carried it over their heads by the votes of the official brigade. The whole responsibility of passing this measure rests on the Governor, because the votes of the official members count for nothing in the public estimation. We all know that they cannot vote otherwise. We all know that with strong convictions against any measure before them they yet must vote with the Governor, under pain of dismissal, according to the principle laid down in Mr. Cardwell's despatch. It is the Governor who says the Stamp Act shall be, against the voices of Mr. Whittall and Mr. Dent. Mr. Gibb says, "This measure is disastrous; we as commercial men know it to be disastrous, and protest against it." That he accepts such a responsibility is amazing.

H.M.S. *Osprey*, which left Hong Kong on the 2nd August, returned into harbour on the 13th. She only succeeded in finding two piratical junks, which she made out on the 8th, and proceeded to overhaul them; finding escape impossible they ran on to shore near Hang-go-tsin in Hainan. The crews deserted the junks and escaped inland. On the *Osprey* getting within range she fired a few shot and shell at the junks, and then sent her boats to burn them. which was accordingly done, though in effecting it one man was seriously burnt by the explosion; he, however, has since been doing well. She afterwards proceeded to Sama Bay, where the piratical fleet was lately destroyed. A white button mandarin, with a party of soldiers, had arrived there since the pirates were destroyed. Some of the soldiers had been ill-treating the villagers in the vicinity, who had given information which led to the discovery of the pilongs. One soldier was found plundering a house by a party of blue-jackets who were getting wood off to the ship, and by them subjected to a summary punishment,

Digitized by Google

known on board ships as a "cobbing," an operation in which a rope's end plays a conspicuous part in the hands of a good performer.

According to the following account it would appear that Hong Kong coolies can compare with any smart Yankee:—Last night, when the bag of an eminent firm was handed into the post-office window for receipt of the mail letters, some scoundrel in waiting stepped forward when the hong name was called, and received the bag, leaving the proper coolie to return without it. This morning several of the letters were picked up by Europeans, who found them floating in the water near the Mint, and were fortunately restored to their lawful owners Another firm in the habit of receiving a large number of letters has not received any by this mail, and it is supposed that a similar trick has been played them. It is to be hoped that our energetic Postmaster-General will be able to devise some means of putting a stop to such an infamous proceeding.

The following discussion on the Hong Kong Bank took place at the meeting of the Council on the 14th August. The members present being:—His Excellency the Governor, the Hon. the Acting Chief Justice, the Hon. the Attorney-General, the Hon. the Acting Colonial Secretary, the Hon. Colonial Treasurer, the Hon. Mr. Whittall, the Hon. Mr. Dent, the Hon. Mr. Gibb. Before the second reading of the Ordinance respecting the incorporation of the Hong Kong and Shanghai Bank Corporation, his Excellency remarked that since the last meeting he had given this ordinance his attention, and that there was no provision for the winding up of the bank. That in view of recent closing of banks, and the consequent want of confidence in bank-notes, it would be well to adopt some means to satisfy the public of their security. He would propose that the liability of shareholders should be unlimited in reference to bank-notes payable on demand. After conversing with the chairman and directors of the corporation, he thought this better than giving the notes a first lien on the bank property, which was the plan he had first proposed.

Mr. Dent remarked that the provision was not in the charter of any other bank. He did not oppose the clause, but merely pointed it out.

His Excellency said that it might become necessary to extend the provision to the other banks as well, and he thought the Hong Kong and Shanghai Bank would be a gainer by it, as it would have the greater confidence of the public. The Bill was read a second time, and the Council went into committee on it.

At the half-yearly meeting of the Hong Kong and Shanghai Bank, John Dent, Esq., in the chair, the report and balance sheet were duly adopted. A full report will appear in our next issue.

The following extracts from the Colonial Estimates for 1867 show the proposed works and repairs and the estimated expense attendant on their being carried out:—

WORKS AND BUILDINGS.

New Gaol, Stone Cutter's Island	$2,000.00
Suggested Reservoir at Pokefulum to impound 100,000,000 gallons water; cost, say $100,000 to be expended in 1867	50,000.00
Improvements, Ventilation to Victoria Gaol ...	2,000.00
Extension of Sanitarium at Kowloon ...	11,000.00
Reclaiming Ground at Bowrington	10,000-00
Repairs to Buildings	7,000.00
Maintenance of Public Gardens, Fountains and Improvements to same	5,000.00
Maintenance of Water Works	2,000.00
Planting Trees	1,000.00
Proposed Breastwork or Fortification at Mint	1,600.00
Total...	$91,600.00

ROADS, STREETS, AND BRIDGES.

Paving Streets and Improvements to same in Taipinshan	$25,000.00
Carriage Road from Upper Albert Road to Gap above Race Course	23,000.00
Widening and improving Quarry Bay Road ...	2.500.00
Correcting Levels and repairing Robinson Road ...	3,000.00
Roads in Kowloon	4,000.00
Repairs to Roads out of Victoria	3,000.00
Do. to streets in Victoria	1,000.00
Do. to drains in Victoria	3,000.00
Do. to surface drains is Victoria	500.00
Repairs of bridges	1,010.00
Praya Walls in Victoria	2,000.00
New Surface drains in Victoria	2,000.00
Miscellaneous Services	1,500.00
Roads and Streets contingencies	2,000.00
Total ...	$73,500,00

Return of the average amount of notes in circulation at the Bank of the Oriental Bank Corporation.

Notes issued	$329,600
Specie in reserve	150,000

Chartered Mercantile Bank of India, London, and China.

Notes in circulation	$335,441
Specie in reserve	200,000

Chartered Bank of India, Australia and China.

Average notes in circulation	$33,800
Specie in reserve	33,800

Hong Kong and Shanghai Banking Company.

Notes issued	$607,050
Specie in reserve	460,000

The new half-dollars have been issued from the Mint.

PHILIPPINES.

MANILA.

Dates from this port per China Steamship Company's line *via* Singapore reach us to the 20th August. The mail of July 10 had not arrived out; the last one being of June 26, received on the 12th of August.

In reference to the remarks made in our last issue on the subject of the Manila Consulate, it has been suggested that our comments are calculated to convey an impression, that Mr. Rainals is incompetent for the post. Our intention was simply to express an opinion on the incompetence of Mr. Rainals or any other gentleman not acquainted with the Spanish language. Our information with regard to Mr. Rainals' general qualifications as a Consul—in which post he has served for some eight years—is quite unexceptionable.

SIAM.

BANGKOK.

We take the following from the *Bangkok Recorder*:—

"We are informed that an audience was given by his Majesty the King to Monsieur Aubaret on July 6th, for the reception from the Consul's hand of the autograph letter of Napoleon III., Emperor of the French, as also the sword sent by the Emperor as a present to his Majesty. What was done with the dagger from the Prince Imperial to Prince Somdetch Chow Fa Chulalongkorn we have not been informed, but suppose it was then duly presented to his Royal Highness.

"A matter of importance in its bearing upon the future of the kingdom has transpired this week at the Royal Palace. The young Prince Chow Fa, heir-apparent to the throne, has really entered for a time the holy orders of the priesthood, without which, in the estimation of his Royal father, he would not have been fully prepared to occupy the throne of Siam. Wednesday and Thursday were devoted to these ceremonies."

The following is in reference to the proposed telegraph from Rangoon to Singapore:—

"It is hoped that those who have this telegraph project in hand will not fail to remember the handsome offer made by the merchants of Maulmain. They promise and engage to pay all working expenses of the line for a stipulated time. Amherst lies almost in a direct course on the route to Bangkok. The Government have declined the construction of this line, because, as it is said, they have other and more important points to connect. They cannot lay down telegraphs everywhere at once, and the director-general has no personal knowledge of the province and, as a consequence, no interest in its commercial or political welfare. Twice has this authority vetoed the application laid before him, on this very subject of putting up a telegraph wire between the town of Maulmain and the port of Amherst, a distance only of twenty-five miles. No reasonable doubt can be entertained that if Bangkok can be connected, and there is no reason why it should not, with the proposed telegrams to the Straits, two important objects will have been achieved. One is, that much of the distance will have been gained towards Saigon and China; the other is, the line will pay better dividends to its shareholders."

STRAITS OF MALACCA.

SINGAPORE.

From this port we have dates to the 1st Sept., but no news of importance either political or commercial. The English mail of 26th July arrived on the 27th August, conveying also telegraphic news from London to the 5th August.

The steamer *Arabia* having on board the Rajah of Kedah, arrived from Calcutta on the 25th inst. H.I.M.'s steamer *Lorne*, Captain Juin, from Suez arrived on the 27th, having on board 944 French troops *en route* for Saigon.

Digitized by Google

The arrangements for conveying gas into Fort Canning were completed by the Singapore Gas Company, and the Fort was lighted up for the first time on the 1st of September. The introduction of gas into the settlement is highly appreciated by residents of all classes.

The steamer *Pluto* was on the way from Penang to Malacca and Singapore, conveying Sir Peter Maxwell, the Recorder of Singapore.

The papers are filled with an unusually large number of cases of robbery and other offences by Chinese.

The steamer *Ajax* noticed in the shipping intelligence in our last issue as having arrived from "Penang" on the 12th July, should have been "Liverpool for Penang," &c. We now hear of her arrival at Singapore on the 29th August, being sixty days from Liverpool.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

Coghill—On the 14th Aug., at Shanghai, the wife of J. G. Sinclair Coghill, M.D., of a daughter.

Douglas—On the 16th August, at the Victoria Gaol, Hong Kong, the wife of F. Douglas, superintendent of the gaol, of a daughter.

Keasberry—On the 20th Aug., at Singapore, Mrs. Keasberry of a son.

Robinson—On the 27th Aug., at Singapore, the wife of Philip Robinson, Esq., of a son.

Walsh—On the 2nd July, at Yingtsze, Newchwang, the wife of Mr. M. A. Walsh, pilot, of a daughter.

DEATHS.

Andrews.—At the General Hospital, Shanghai, on the 5th August, James Andrews, of —— Tientsin, aged 28, a native of Ayrshire, Scotland.

Duncan—On the 15th Aug., at Shanghai, on board the *William Melhuish*, the last survivor of the twin children of Captain and deceased Mrs. Duncan.

Green.—At Shanghai, on the 4th August, Annie Maria Wilson Green, second daughter of the late Rev. J. Fish, of Chester, England, and wife of John Wilson Green, of the Imperial Customs Shanghai.

Fabris—On the 10th August, at Shanghai, Florence Joy, youngest daughter of E. A. Fabris, aged 5 months.

Kelly—On the 13th August, at Chinkiang, Thomas Kelly, mate of the U.S. steamer Wachusett.

Lessler—On the 10th July, at Bangkok, very suddenly, Max Elliot, only son of Paul Lessler, Esq., Prussian Consul, aged 8 months.

Lyon—On the 12th August, at Hong Kong, Dr. H. Lyon, eldest son of L. J. Lyon surgeon-dentist, after a few days' illness.

Macpherson—On the 3rd Oct., at Bath, Christina, the beloved wife of Colonel Ronald Macpherson, Resident Councillor, Singapore, and elder daughter of the late Matthew Townsend Bethune, Esq., M.D., of Inverness.

Middleton—At Sarawak, Mr. J. Middleton, for thirty years a follower of Sir James Brooke.

Oppert—At Shanghai, suddenly, of heat apoplexy, Hermann Oppert, native of Hamburg, aged 32 years.

Pray.—At Pagoda Anchorage, Foochow, on the 10th July, Mr. Charles Edward Pray, of U.S.A., aged 52 years, formerly of Shanghai.

Sirr—On the 8th July, at the residence of her sister, Bangkok, of dropsy, Phoebe Sirr, widow of Richard Sirr, youngest son of the Rev. Joseph D'Arcy Sirr, of Winchester, England, aged 32 years.

Soloman—On board the P. and O. str. *Orissa*, between Hong Kong and Singapore, Gregory Soloman, late master of the barque *Julian Edward*.

Thomson—At Singapore, on the 29th Aug., H. D. Thomson, Esq., Surveyor to Lloyds.

Townsend—On the 12th August, at Chinkiang, Commander Robert Townsend, of the U.S. steamer Wachusett, aged 42 years.

Wignall.—On the night of the 6th August, Horatio William, aged 9 months, the infant son of J. H. Wignall, Esq., of Shanghai.

EXCHANGES ON LONDON.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

VESSELS EXPECTED.

From Yokohama.—Thomas Dryden.

From Nagasaki.—Queen of Avon, Chanticleer (put into Pernambuco for repairs).

From Hankow.—Eliza Shaw, Min, Hoang Ho, Gossamer, Sir Lancelot, Napoleon III., Highflyer, Fire Queen.

From Shanghai.—Ethiopian, City of Aberdeen, Burdwan, J. R. Worcester, Pakwan, Coulnakyle, Cinderella, Fusiyama, Vigil, Star of China, Peterborough, Coral Nymph, Blencathra, Nelly, Illimani, Lansdowne William Melhuish, Charlgrove, Agamemnon.

From Foochow.—Belle of Southesk, Yangtsze, Tamana, Feronia, Laurel, Leunox Castle, Sovereign of India, Amber Witch, Zingra, Maitland, Devana, Everest, Ornate, Philomela, Dewa Gungadhur.

From Canton.—Deerfoot, John Milton, Alma, Island Queen Taymouth Castle, Victoria, Cedars.

Digitized by Google

SHIPPING INTELLIGENCE.

ARRIVALS.

At Shanghai.—From London, Aug. 15, City of Quebec; from Shields, 13, Caducius; 14, Mirella; from New York, 14, Lota.

At Hong Kong and Canton.—From London, Aug. 20, Portland, 14, Banian; from Southampton, 17, Hotspur; from Sunderland, 23, Drydens; 14, John Frazer, Cora Linn; from Newport, 16, Ariosto; 13, War Sprite; from Cardiff, 12, Albatross; 13, Glenlee, Amazone; from Shields (*via* Algoa Bay), 14, Herald; from Hamburg, 14, Louisa.

At Manila.—From Liverpool, Aug. 11, Espana; from Cadiz, 12, Cilminar.

At Singapore.—From Liverpool, Aug. 23, White Squall, 25, Sirius. From Cardiff, 16, Tollens; 17, Joachim; 21, Walcheren; 29, Matador. From Falmouth, 19, H. E. Susanna; 21, Hollandia. From Sunderland, 19, Norkham. From Newport, 20, Cornelia Mathilda. From Swansea, 23, Martin.

DEPARTURES.

From Shanghai.—For London, Aug. 8, Illimani; 9, Lansdowne; 16, Wm. Melhuish, Charlgrove.

From Hong Kong and Canton.—For London, Cedars; for New York, Aug. 21, Challenger.

From Manila.—For London, August 14, Passing Cloud.

From Singapore.—For London, Aug. 23, Ganansque. For Liverpool, 11, Benjamin Bangs. For Cork, 13, Prudhoe. For New York, Lady Blessington.

FREIGHTS AND CHARTERS.

Yokohama.—To London: Cotton and Tea, £2. 10s. to £3; Silk, £4 to £4. 10s.

Nagasaki.—To London: £3. 10s. to £4. To New York: £4 to £4. 10s.

Hankow.—To London: The Helen Nicholson is loading at £5 per ton.

Shanghai.—To London: 30s. to 40s. per ton (reported by telegram of 5th Sept.).

Foochow.—To London: £2. 10s. per ton.

Hong Kong and Canton.—30s. 40s. per ton (reported per telegram of 12th Sept.).

Manila.—The vessels fixed during the fortnight are the Passing Cloud, for London, at £2. 12s. 6d., for unclayed sugar, and £3. 5s. for hemp; and the Sterling, for Liverpool, at £2. 7s. 6d. for clayed sugar, and £3 per ton for hemp. There has been some inquiry for vessels to load at Bangkok for China, but only a few have been taken off for that voyage, at 42½ to 45 cents per picul to Hong Kong, with the usual additional rates for the Northern clauses.

Singapore.—Homeward rates are weaker, and the vessels now on the berth are loading at £1 per ton for tin, £2 for other dead weight, and £2 5s. for light cargo. The only additions to the berth are the Lockleven Castle for Liverpool, and the Indemnity for London.

Penang.—For London: The British barques Elizabeth, 504 tons, and Victor, 370 tons, are on the berth—the former at £2 15s. and £1, for light freight and tin respectively, the latter at £2 10s. for light freight, and £1 to £1 15s. for dead weight Both have the greater portions of their cargoes engaged.

Batavia.—Freights continue firm, all vessels which have arrived seeking have found employment, and others could be placed at remunerative rates.

COMMERCIAL POSTSCRIPT.

The India and China Bank shares have not been affected by the stoppage of the Asiatic. Oriental is quoted 46 to 48, Chartered Mercantile 36 to 38, Chartered of India 17¼ to 18½, Hindustan 1 to 2, London Joint-Stock 42 to 44.

Arrivals not included in the Tables.—Oct. 3, at Plymouth, from Batavia, Charlotte of Derby; 1, off Plymouth, from Penang Moorhill; Sept. 20, at New York, from Batavia, George Green, from Manila, Hadapah, from Shanghai, Finzel; Oct. 4, off Falmouth, from Bassein, Cambrian; at Deal, from Colombo, Blanch; at Scilly, from Akyab, Ranavola; 5, at Queenstown, from Rangoon, Schiller; 4, at London, from Foo-chow-Foo, Ada.

Departures.—Sept. 28, from Liverpool for Colombo, Empress; Oct. 5, from London for Nagasaki and Yokohama, Chrysolite.

Laid On.—At London, for Colombo and Cocanada, Brockham; for Shanghai, Falcon, Whiteadder, Chinaman.

Spoken.—Elisabeth (Dutch barque), Rotterdam to Batavia, August 25, 9 S., 35 W.; Neptune's Bride, Colombo to London, September 22, 43 N., 27 W.; Aboyne, Ceylon to London, September 21, 41 N., 30 W.; an English barque, Shanghai to New York, August 22, 11 N., 38 W.

The Ceylon papers state that almost as soon as the Atlantic cable was laid a captain of a ship who arrived at Point de Galle telegraphed to his owners at New York. He telegraphed to the agents in London, and they telegraphed to America, but the answer was sent direct from New York to Galle. The distance which the telegram and the reply travelled was 29,000 miles, and the cost was £50.

THE JAPANESE MARRIAGE CEREMONY.

The lower orders of the Japanese employ some married couple to make matches for their sons, and these agents are called nakodo, or go-betweens. Betrothal sometimes takes place in the infancy or childhood of parties, but is very often deferred till they are old enough to wish to have some voice in the matter themselves, which, however, is denied them if they have parents living. When, by reason of the death of his parents, a young man is left free to manage the matter in his own behalf, he chooses a pair of go-betweens from among his friends (or acquaintance, and through them makes inquiries for a suitable help-mate, and when they report the discovery of one, he sends them to solicit her hand of her parents. If the proposal suits her parents, the bargain is made, and by their connivance a meeting is arranged to take place between the young people at some tea house, unless they already know each other by sight, where the betrothed can only cast sly glances at each other, but are permitted to hold no conversation, as that in the present stage of affairs would be a breach of Japanese etiquette.

In arranging matters for the wedding, fixing the day for it, &c., other go-betweens are employed, whose office expires only when the two are made one. First, the young bridegroom sends the go-betweens with the presents to the parents of the bride elect. These may consist of a variety of things, varying according to the taste or ability of the bridegroom or his parents, provided only that certain things are included in the number; as, for instance, some edible seaweed, and noshi, or strips of dried and powdered awabi. The preparation of the latter is made chiefly in the department of Iser. If noshi cannot be obtained a kind of dried fish will answer the purpose. But whether the presents be few or many, the bridegroom must send a written list of the articles along with them, for which a specified form is furnished in the Japanese works on the subject.

These presents being received, and the wedding day being fixed between the bride's parents and the go-betweens, nothing remains to be done but to await the appointed time. Meanwhile the bride and her family are occupied in preparing the numerous presents to be made by them to the parents and relatives of the bridegroom on the night of the wedding.

In the evening of the day set for the nuptial ceremony, the bride, dressed throughout in white (the colour of mourning in Japan), is escorted in the kango or norimon by her parents and invited relatives to the house of the bridegroom.

Between the bride and bridegroom is placed a tray bearing three lacquered cups, one upon another, the smallest at the top. The two butterflies pour a little sake from both their flasks into the uppermost cup, while the bridegroom holds it to be filled, grasping it with both hands. He then sips the wine three times, in a very slow formal manner, and passes the cup to the bride, who takes it in her hands and takes three similar sips under cover of her veil, when she hands the cup to the female butterfly who sets it aside. The second cup and the third are filled and emptied in like manner, so that each party drinks nine times. Hence this ceremony is called san-san-kudo, and forms the most important part of the nuptial rites, for it makes the parties husband and wife. While this drinking is going on, one or two male singers are seated behind the screen in the same room, chanting songs of congratulation to the happy pair. They are now married, and the bride and groom proceed to another room, where they pay their respects to her parents, by drinking sake together; nominally, but not really going through the san-san-kudo again. After that they are conducted to another room, where the bride removes her veil, and exchanges her white dress for one of bright and gay colours; and the groom puts on the ka-mi-shimi, or Japanese full dress, distinguished by the wing-like shoulder pieces, and full trousers; and then again they drink to each other three times three cups, in mutual congratulation at the happy change that has come over them, as indicated by their change of dress. This being done, there follows a feast to all in the house, who assemble in one room, and regale themselves with the fare set before them; and having kept up the festivities till about the dawn of day, the wedding party breaks up. Three days after the bride usually pays a visit to her own parents, when another entertainment is made, to which the relatives of the family are invited.

Henceforth the married woman is regarded as having been absorbed, as it were, into the family of her husband, and to have sundered her relationship to her father's house. Her duty to her father-in-law and mother-in-law supersedes all the obligations of filial piety.

The common people in their matrimonial rites endeavour to ape as far as possible their superiors, the daimios and other great people of the land.

ITALIAN MISSION TO CHINA AND JAPAN.

It will be remembered that some months ago the Italian Government sent out the *Magenta* on a mission to Japan and the Chinese seas. The *Gazette de Turin* has just published extracts from a letter written home by the chief of the expedition, Professor Filippi, and bearing date Singapore, May 16, 1866. Professor Filippi says that he is well content with the materials which he is accumulating in his portfolio, that he has made many drawings, and hopes to be able to publish a magnificent volume. He says that the expedition had scarcely left the sea; it left Montevideo on the 2nd of February, avoiding the Cape, and directed its course towards the south between latitude 42 degrees and 44 degrees, but that they were met there by cold, fog, heavy seas, wind, and tempests. They saw few creatures, not one whale, but clouds of procellaria and albatrosses, which, however, disappeared when they reached 32 degrees north latitude. The expedition took eighty-six days to run from Montevideo to Batavia, with the excitement upon one occasion of fire on board, but which, thanks to the energy and coolness of the captain and his officers, was subdued in twenty minutes. Professor Filippi and his companions were enchanted with Batavia, where they staid eight days. The Governor-General received them magnificently and lodged them like princes at Burten, where they saw the most marvellous collection of tropical plants in the world, as well as some very interesting animals. They hoped to have met there the two eminent naturalists, Bernstein and Magulne, but found that both had died in the preceding year. They took nine days to cross from Batavia to Singapore, in consequence of a succession of dead calms, but found the Archipelago splendid. The arrival of the *Magenta* at Yokohama has been announced by us. The expedition was to start at the end of May for Saigon and Yokohama, just touching at Shanghai; the only long halt they intend to make is in Japan. One of the young men of science with Professor Filippi is the son of Count Arese.

The objects of the mission were announced to be military, scientific and diplomatic, especially in Japan, but the selection of a scientific man for the chief of the expedition would seem to show that the scientific object formed the principal element. Beyond this it is more than probable that the supply of silk will occupy considerable attention, the malady amongst the silkworms in Italy having committed ravages almost, if not quite, equal to those which have placed the French silk growers in such a terrible position. Whatever may be the commercial or diplomatic fruits of the exhibition, there is little doubt that professor Filippi and his friends will cull some useful and interesting matter respecting the natural history of Japan and other parts of the Far East.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good fait .

A Register is kept of the addresses of all persons connected with the Far East and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in China, Japan, Singapore, *and other parts of the* Far East, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the Far East.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, SATURDAY, OCT. 6, 1866.

COMPLICATIONS IN THE COREA.

We have frequently taken occasion to point out the desirableness of establishing both political and commercial relations with the inhabitants of that important though jealously guarded peninsula known as the Corea, and to express satisfaction at the belief that our views on the subject were shared in by the Government. Events have recently occurred there of such a nature as to warn us that any further delay in so doing will be attended with danger both to our own particular prestige in the Far East and to the general interests of Christianity and civilisation also. At the very time when our last article on the subject was penned a murderous persecution of both foreign and native Christians was being vigorously carried on. It is the old story over again. The French missionaries—than whom no more zealous and successful propagandists ever existed—gained a footing among the primitive inhabitants, precarious at first, but of later years more apparently secure; for the natives were not unfavourable to the Romish doctrine, and we are told that the number of converts to it exceeded 50,000. But the growing magnitude of the new sect at last roused the alarm, and doubtless the jealousy of the dominant class; and a savage and relentless persecution was commenced by the arrest, torture, and the subsequent execution of the principal French clergy, and a general massacre of the native Christians.

There is little room for doubt as to the course that will be adopted by the Imperial Government to obtain redress for this outrage. Any immediate operations will doubtless be impracticable, the presence of the French Admiral with the greater part of his fleet being just now required at Saigon. But during next summer full retribution will doubtless be exacted. A powerful French force will rudely break into the long-cherished seclusion of the Coreans; a heavy indemnity will be required; the establishment of diplomatic relations and full religious toleration will be enforced; other missionaries will arrive to take the place of those so inhumanly martyred, and consuls will be stationed to watch over their safety. Now, if this has to be done in the interests of the Romish Church, why should not the same occasion be made to serve the cause of Protestantism? And if, as a consequence of the impending operations, the Corea is to become a secure field for missionary labours, what should prevent its becoming both a safe and a profitable one for commercial enterprise also? By making common cause with our neighbours now, we have an opportunity of attaining both these ends; together with the satisfaction of aiding, in yet one more instance, to break through the barriers of exclusiveness by which a large portion of the human race are prevented from mingling with their fellow-citizens of the world. We know that Sir Rutherford Alcock has had full instructions for some time to take advantage of any opportunity of negotiating with the Coreans, and we trust to hear of his having, in conjunction with the French Minister, procured a peaceful opening for a treaty.

THE SAN FRANCISCO, JAPAN AND CHINA LINE.

The long-talked of line of steam communication between New York and China, *via* Panama and San Francisco, is at last to become an accomplished fact. When San Francisco was settled into one of the United States it was believed that our monopoly of American correspondence to China would soon cease. Ever since 1850 has the question been agitated, but various influences at Washington have succeeded in preventing a subsidy being granted to this line. It is the greatest anomaly on record that our American cousins should have talked so long over a thing so practical and useful; no scheme could be more legitimate, it was palpable, and yet there has been sixteen years' talk over it. It may be that we Britishers have had a share in that talk, and done all we could to prevent what was so injurious to our own supremacy as the ocean carriers of the world from being carried into effect; however, talking is now over, and action is the order of the day. We announced in our last issue that the line would be opened by the despatch of the Pacific Mail Company's steamer *Colorado* on the 1st January next. This vessel will be followed by other steamers of about 4,000 tons, built specially for the service, with large accommodation for European and Chinese passengers. The question as to calling at the Sandwich Islands *en route* has been finally decided against it. It has also been decided that the terminus in China should be at Hong Kong, with a smaller steamer running between Yokohama, Nagasaki, and Shanghai, to connect it with the main line. At present the service is to be only a monthly one, but as the connecting links with Panama and New York are three times a month, and between Panama and Southampton twice a month, we believe the company will soon find sufficient inducement to make the China line twice a month. For the monthly service we understand the Government subsidy is $500,000 per annum. The Company's steamers leave New York on the 1st, 11th, and 21st, but the one to correspond with the departure from San Francisco for China will be that of the 11th, and the route will stand thus:—

From New York on the 11th, arriving at Aspinwall on the morning of the 19th, and in the evening at Panama, say ..	9 days
From Panama to San Francisco, arriving on the 1st to 2nd ...	12 „
From San Francisco to Yokohama, arriving on the 18th or 19th	17 „
Stop at Yokohama	1 „
From Yokohama to Hong Kong, arriving about the 25th ...	6 „
Total	45

The present route from New York to Hong Kong *via* Liverpool and the Red Sea occupies 54 to 57 days. The journey from England by this route will be as follows:—

Leaving Southampton by the Royal Mail (West India) on the 17th of the month, arriving at Aspinwall on the 8th, and across to Panama, leaving that port on the 9th	22 days
From Panama to San Francisco, arriving about the 21st ...	12 „
Stop at San Francisco	9 „
From San Francisco to Yokohama, arriving on 18th or 19th ...	17 „
Total	60 „

From Yokohama to Shanghai or Hong Kong this passage is four and six days respectively. The time will of course be greatly shortened when the Pacific Railway shall have been completed, so as to form a direct line between New York and San Francisco. This route will be *via* Philadelphia, Pennsylvania, and Cincinnati, Ohio, onward to the capital of Indiana, thence across Illinois and Missouri to Omacha, in Nebraska, from which point sixty miles have been constructed, running westward into the wilderness. Traversing Kansas in a north-westerly direction by the old traders' route to Santa Fe, and a considerable distance of Indian territory, it enters Arkansas, from which the way lies across Utah, touching upon the famous salt lakes. Running south of Colorado, the line stretches across the northern part of Arisona, striking the Red River at Fort Moyaire, from which it makes its way across Nevada to San Francisco. The section of railway from San Francisco to the city of Nevada is already built, and, as with the other completed portion of the line, has been made available for transit. The Union Pacific Railroad will be completed, according to contract, in about eight years from the present time. Its length, as nearly as can be calculated, will be 2,592 miles; and it is estimated that the ordinary time for accomplishing the through distance will be four, days for express and five for ordinary trains. The gradients are for the most part eminently favourable. The difficulties, however, of constructing a road through a wilderness are necessarily very great, arising from the transport of materials and the provision of engineering facilities. So far great energy has been displayed, and the undertaking is in able and efficient hands.

Although the route *via* Panama, as it at present exists, effects no saving of time for passengers to England, it will make a material diffeernce in the conveyance of telegraphic news, San Fran-

Digitized by Google

cisco being in telegraphic communication with New York, and New York by the Atlantic cable with London. We have only to allow the sea passage of seventeen days from Yokohama to San Francisco, or twenty-one days from Shanghai, while our service by Galle occupies twenty-seven from Yokohama and twenty-three from Shanghai, allowing that the lines to India are in good working order, which unfortunately is the exception, and consequently the time of transit is indefinite. At all events there will then be two distinct channels for the conveyance of telegrams between America and China, with the certainty of a third at no very distant date, since the Russo-American telegraph will be completed in about two years.

The question of relative cost of conveying passengers and cargo we are not able to discuss at present, not having yet received the company's tariff; and as regards the accommodation for passengers and the exact measure of comfort they may expect to enjoy we are of course not in a position to speak. As soon however as the line is open we purpose taking steps to furnish a special report on it, as although it will not at present bear comparison in point of time with our own mail route, we are quite sure that as a change of route it will be availed of to a great extent, even by residents in China and Japan, who have no business with San Francisco; and we need not tell our readers that a considerable business is conducted between Hong Kong and San Francisco.

The following comments on the new line are from the *New York Shipping List*:—

"We understand that the Pacific Mail Steamship Company, to whom Government awarded the contract for carrying the mails between San Francisco and Hong Kong *via* Kanagawa, have lately added to their line the fine new steamship *Rising Star*, and that they have on the stocks, in this City, two more steamers of greater tonnage than any vessels belonging to the company. The first steamer (the *Colorado*) will be despatched from San Francisco in January next, and be followed by the *Montana*, now on the way from this port to California. The establishment of this line, in connection with the British line recently established between New Zealand and Panama, it is expected will create a new era in the commerce of the Pacific. The Australasian trade will be controlled by the British line, but as an offset to this, we shall have the vastly greater and richer traffic of China and Japan. The inhabitants of the colonies, including Australia, are few in number compared with those who will be brought into direct commercial intercourse with us by means of our steamship line across that ocean. Many of the most valuable commodities which the world affords are produced by the people who dwell upon the borders of the China sea. The silk, tea, and cotton which seek a market from that densely populated region make it certain that this country will come into possession of a great trade from beyond the Pacific, as soon as the mail steamship line commences its work. Steam to China will cause our country to realise more forcibly than ever the necessity of a Pacific railroad. That the construction of this great thoroughfare will be hastened by the increase of trade which will be offered by means of a steamship line from the Pacific coast to China, at once appears evident. Not only is the commerce between China and Japan and our Pacific possessions expected to be greatly enlarged, but a large passenger traffic is confidently looked for. A few years ago China furnished no passengers. Now large numbers travel to and fro by sail, and it is estimated that at least 5,000 Chinese will travel each way by the steamers. Restrictions upon travel have already been removed by the Japanese authorities, and the time may not be far distant when that curious and inquisitive people, availing themselves of their newly-granted privileges, will travel extensively, and their patronage in this way may become of great importance to California."

CHINESE EDUCATION IN ENGLAND.

Sir John Davis, whose name is familiar to all who have studied the history of foreign relations with China during the past forty years, has, in his recently published volume of *Miscellanies*, traced the rise and progress of Chinese literature in England. We fear that he has somewhat overrated the advance made by Orientalists in this most important branch of study, and we therefore desire to draw attention to the advantage that might accrue from the encouragement of sound Chinese scholarship. At the present moment the language and literature of one-third of the human race possess an expositor in but one university, and that a university of comparatively recent creation. Professor Summers has undertaken an important office, which, however, holds out but few pecuniary attractions, and he has devoted himself with much energy to the task of familiarising Oriental scholars with the language of China. But he labours under many disadvantages, and it is not fair to the vast literature over which, metaphorically speaking, he in England holds watch and ward, to leave him as the solitary guardian of Chinese knowledge. The learned Corporations of Oxford, Cambridge, and Dublin have but a faint idea of what they are slighting when they consider the language and literature of China beneath their attention. The moral philosophers, poets, and philologists of the Celestial Empire are far above mediocrity, and can without arrogance claim niches beside those allotted to the worthies of ancient Greece and Rome. But even on the supposition that the entire range of Chinese literature contained nothing likely to enlighten searchers after truth in this enlightened age, it is yet a duty to acquaint ourselves with the processes of thought which obtained in China during remote ages, and to trace from them the sequence of theories upon which the fabric of government has been built. The political and social constitution of the Chinese people has ever been a puzzle, but it has so long continued a puzzle simply because no encouragement has been offered to those competent to attempt the solution. We are not about to discuss the relative merits of Chinese and (for example) Sanscrit literature. We may, however, assert without fear of contradiction that the one is intrinsically as valuable in every respect as the other, while, moreover, the progress of events seems to indicate that at no distant date political events may give to Chinese the only importance it now lacks. As we have said, Professor Summers has hitherto done his duty nobly, but there should be in England more than one priest of the Chinese mysteries. So much for the general question on purely literary grounds. But there are likewise practical considerations to which much weight is to be attached. Foreign interests in China are rapidly growing in importance, and that they may be developed with the greatest possible fairness both to Europeans and natives a large class of properly qualified interpreters is absolutely necessary. At the present moment not only are natives the sole mediums of communication in all mercantile matters, but many consulates are altogether dependent on Chinese linguists. We speak advisedly when we say that not one in ten of these men is to be implicitly trusted. It is true that European public servants in China are miserably paid, but the Customs offer a field to young men of education and ability which the present Inspector-General is rapidly extending, and rendering more and more attractive. Merchants are unceasingly raising energetic protest against the duplicity of their "compradores" in whose hands they find themselves all but powerless, but no steps are taken to remove the incubus and remodel the existing state of things. Yet a little encouragement offered by the universities and by the mercantile community in China would rapidly call into being a body of Chinese students whose talents and energies would be invaluable acquisitions alike to the literary and mercantile world. Missionary societies would also soon discover how vastly advantageous to the interests of Christianity would be some means of testing the capacity of candidates of labour in the Far East. Young and earnest men are often misled by enthusiasm and discover only when too late that they are incompetent to discharge the duties they have undertaken. It has been repeatedly proved that members of the Consular services and missionaries are occasionally unable to surmount the initiatory difficulties of the language, and this inability is in the one case a certain bar to promotion, in the other a source of pecuniary loss, and, still worse, a scandal to the missionary cause. The Queen's service has, as Sir John Davis justly asserts, given rise to many able sinologues, but the official cares of such men as Parkes, Wade, Hart, and Medhurst, and the less important but equally absorbing interpretorial duties of Alabaster, Brown, Mayers, and others, effectually preclude the possibility of their doing much, if indeed anything, for the spread of knowledge with regard to the Chinese language. Mr. Wade has already contributed a certain quota, but it is vain to expect assistance from any one whose attention is absorbed by the routine of daily official work. Amongst the missionaries at present labouring in China we are indebted to Dr. Legge and Mr. Edkins alone for any valuable light on the subject to which all are supposed to direct their attention, and the names of these gentlemen will ever be connected with the history of Chinese philology. It will therefore be seen how little can be done until some encouragement is held out, and our design now is to suggest the adoption of a plan whereby the needed impetus may be given to the study of Chinese. Such a plan, in order to be successful, should be elaborated in China. Were an exhibition even of comparatively small value offered for competition in London University, or in any other institution where the study of Chinese is promoted, the result could not but be beneficial. The conditions as to the time of study necessary before candidates could become eligible, and the standard of proficiency to be adopted, might be decided by the patrons in China; while, on the other hand, it would be easy to find men now resident in England fully competent to direct Chinese studies and examine candidates. We throw this out merely as a suggestion, but we are moved to do so by the well-known

Digitized by Google

munificence of the merchants in China, and more especially by the recollection of the generosity displayed by Mr. Joseph Jardine, at whose expense (in great measure) the edition of the classics by Dr. Legge was published.

LI HUNG-CHANG.

The Times' Shanghai correspondent has lately thrown into a tangible form the desultory rumours regarding Li Futai's designs on the Imperial throne which for some years have been bandied from mouth to mouth in China. We are not disposed to undervalue the importance of observations made upon the spot or to speak slightingly of circumstances which though undetailed may form an accumulative mass of evidence in favour of the opinions advanced in *The Times*. Separated by a prodigious interval from the theatre of events, and dependent for information upon the ever varying reports that find their way with more or less of authority into the Anglo-Chinese papers and into the letters of our correspondents, we are compelled to fall back on the *ex post facto* argument, and confine ourselves to proving that under the most favourable circumstances such and such events *did not* take place, and that therefore the probability is that these events *will not* take place. The means of communication between the open ports and the interior are so scanty and uncertain that an undue amount of reliance is in general placed upon native statements. The accounts brought by traders from the remote districts of Yunan and Kansu, no matter how vague, are at once accepted for want of better, and few venture to suggest that the existence of interested motives in the creation and propagation of these travellers' tales. Upon such sources and upon the *Peking Gazette* foreigners are obliged to depend for all they know about the interior of China, and it is needless to do more than to assert that the facts derived from travelling traders and the published memorials of the officials are alike unworthy of trust and confidence. But such as they are they command attention and respect, and must continue to do so until some more reliable means of communication with the interior be devised. Even information regarding events occurring at Nanking is all but inaccessible at Shanghai, and by the time it has reached foreigners it has passed through perhaps a hundred mouths, to each of which it is indebted for some fresh colouring or some more material alteration. It is upon evidence thus modified that all speculations regarding the progress of prospective events must rest. The actual condition of affairs at Nanking, which is now the seat of Li's Government, may be ascertained by foreign eye-witnesses, and may be detailed with tolerable accuracy, but the motives that have suggested the warlike preparations that create so much suspicion are matters of mere hearsay, and may or may not be justly ascribed to the Governor-General. There appears to be no doubt that Nanking has of late been very strongly fortified, and that the armament collected within its walls was sufficient to render it impregnable to all attacks from a purely native enemy. Whether there is any reason to suppose that the southern capital has thus been rendered more formidable to a foreign foe is a matter of opinion; suffice it to say that the officers in command of British gunboats on the Yangtsze confidently assert that Nanking could as easily be taken in 1866 as was Chinkiang in 1842. It is also undeniable that the entire province of Kiangsu is in a state of warlike preparation; that large arsenals have been established in various places, and that garrisons are maintained at all the most important strategic points. Lastly, it seems clear that the desolation induced by the long continued existence of the Taiping rebellion in Kiangsu and Anhwei has rendered unnecessary any attempt to render these latter provinces more inaccessible than they are at present. So far the Vice-Royalty entrusted to the hands of Li Hung-Chang appears to be, as it really is, maintained on a war footing. But we do not therefore rashly assume the existence of any *arrière pensée* in Li Hung-Chang's breast; we are satisfied for the present to believe that in adopting the measures he has adopted the safety of his provinces is his only care. We are not sure that the ever-recurring Nienfei alarms are so insignificant as they are occasionally represented to be. On the contrary, when we acknowledge how little we really know regarding the extent and importance of these movements, we are disposed rather to accept the Governor-General's estimate than to pin our faith to the semi-ludicrous pictures drawn for our behoof by newspaper correspondents at the ports. It must be remembered that such as the Imperial troops are such also are the insurgents under whatever banner they may assemble. The raw material is the same, the influences exerted upon both sides are identical, and with sufficient money at command no rebel army need be without foreign officers, foreign guns, foreign small arms, and foreign powder. That it should be so is matter for sincere regret in view of our treaties with the Imperial Government, and of the constant misunderstandings to which such *quasi* foreign opposition gives rise. But that it actually is so the history of the Taiping rebellion sufficiently proves. There can be no doubt that any rebellious movement which has for its end a political object, will tend towards the province of Kiangsu. We have seen that it was so in the case of the Taipings, and we may fairly assume that the possession of the ancient capital of the Empire would appear to any rebel chief the most desirable object to attain. Moreover, Kiangsu represents the mercantile wealth of China, and within its boundaries if anywhere an understanding with foreigners must be arrived at. Apart therefore from all personal considerations in the case of Li Hung-Chang, we can well imagine the Central Government itself directing special attention to the capabilities of Kiangsu and the adjacent provinces.

We should also recollect that Li Hung-Chang is not the head of a party; he is not even a popular man. In Tseng Kuo-fan he lives and moves and has his being. To him he owes his first introduction to public life, and all his subsequent honours and distinctions have been conferred through Tseng Kuo-fan's influence exerted directly or indirectly. At least until the death of his chief he is powerless to act independently of him. But Tseng Kuo-fan has so little to gain and so much to risk by joining any rebellious or revolutionary scheme that he may fairly be said to be above suspicion. The same in a modified sense is true of Li Hung-Chang, although it is of course difficult to form a conclusion as to the ultimate desings of an ambitious man still in the prime of life. But, as we have said, Li is not a popular man either with natives or with foreigners. From the former his success has in part estranged him, and his excessive nepotism has alienated the affections of all the provincial officials but those who belong to his own family or province. The latter trait in his character has called forth several memorials to the throne, to at least one of which he has been directed to draw up a formal answer. To describe his conduct towards foreigners as insolent and overbearing in the extreme is to give but a faint picture of the position wherein he stands with regard to the European and American Consular representatives. From them he has no sympathy to expect, no assistance to anticipate. His removal or degradation would be grateful to the personal feelings even of those who believe that for the purely internal administration of his government he is the right man in the right place. Out of countless instances that we might enumerate we assign but three:—the murder of Burgevine, for which no satisfaction has been offered to the American Government; the difficulties thrown in the way of free-trade with the interior in the matter of steamboats on the inner waters, and notably in the case of British subjects, by the uncondoned outrages upon Messrs. Jardine, Matheson, and Co.'s property; and the refusal to restore to the French Jesuit fathers the land formerly occupied by their mission at Nanking. These are mere isolated examples which will recall many others to the minds of those who have followed the course of events in China during the past few years. But besides all this, we would lay especial stress on the fact that when the ball was at his foot, when opportunities were not wanting, when the Imperial Government was apparently at the last gasp, Li Hung-Chang remained faithful, and obstinately refused to coalesce with any of the great parties by whom the State was then torn. Two years ago he had but to say a word, and a southern empire would have risen upon the ashes of the Taiping misrule; and we must underrate not only his talents but his natural feelings if we assume that the temptation did not suggest itself to him. Well informed upon every shade of European opinion with regard to the advisability of interference in the internal affairs of China, and conscious of the vast inducements he had it in his power to hold out, he might well doubt whether England, France and Russia would offer any material opposition to his designs. But notwithstanding this his aim seemed to be to strengthen the Empire by extending to the provinces and to the north the advantages he had by his individual energy and enterprise gained from foreign assistance. Not only were the Imperial armies in Hunan, Hupeh, and Fukien recruited from his disciplined forces, and the Imperial arsenals in those provinces supplied by him with foreign arms and with shot and shell manufactured in his own workshops, but the Peking Government was urged to send down Tarter officers and workmen to

Digitized by Google

learn the wondrous secrets of gun-making and projectile manufacture brought to light by Macartney and others in the Soochow and Shanghai foundries. These facts speak for themselves. We do not desire to act, self-appointed, as advocates for Li Hung-Chang; indeed we would recommend the European representatives in China to take careful note of his proceedings; but with such evidence as we possess at present we must decline to join in the anticipations of evil to which *The Times'* correspondent appears to have committed himself.

PROFITS OF COFFEE CULTIVATION IN CEYLON.

There are few of the leading problems of political economy on which colonial experience is not calculated to throw light, worked out, as they are, under new conditions, and free from artificial restrictions. That industry must always be arrested at that point where the expenses of production can no longer be replaced with reasonable profit, is one of the soundest maxims of industrial science, and there are those in Ceylon who would appear to be in a constant state of apprehension that this will be the fate of her chief staple. The short-sightedness which measures the future by the present has always been the fruitful source of error. In the last thirty years of coffee cultivation in Ceylon, how frequent and, we may add, how varied have been the forms of vicissitude which the planting interest has encountered! If the question of remunerative returns is that which is now being most actively discussed, the means also have become more apparent by which, in face of increased production and somewhat lowered rates, satisfactory returns may be secured. We do not, however, include within these means a proposition that has found expression, that merchants dealing in Ceylon coffee should lower their commissions and charges for interest. If we mistake not, the competition between the Colombo merchants themselves has been somewhat too keen, even for their own interests. Mercantile capital, too, is entitled to an indemnity equal to that capital employed in other branches of industry. These commissions are wrongly regarded as so much subtraction from the wealth of a country. Nothing so stimulates its productive powers as the exchanges effected. It is, nevertheless, to the interest of all parties that transactions should be carried on with the least expense possible, but not so as to retard the investment of capital. It is in economic management, in more careful and skilful culture, and in the superior preparation of the berry that Ceylon planters must look for the margin of assured profit. Many of the difficulties pleaded as attending the profitable cultivation of coffee are rather referable to the embarrassed financial condition of the complaining planters from the outset, than increasing production and competition. Where profits already go to get bills discounted, it must be an exceptionally good fortune that will hereafter provide a handsome surplus. The profitable cultivation of coffee in Ceylon demands, besides sufficient means, greater skill than ever, a requirement tending to discourage disqualified individuals from entering on the enterprise. The growth of other articles for which soil and climate give Ceylon special advantages—such especially as increase the cultivable area, occupying land not suited for coffee—would render estates more remunerative. A system of rotation of crops has yet to be introduced. When Northern Australia is threatening a close competition with Ceylon coffee, Batavian houses having established themselves in Queensland for its cultivation, it is time that the economic conditions to which we have referred were more fully studied, and more united action taken among planters to secure them. Such a conviction evidently exists at Ceylon itself, and a more perfected organisation of the planting interest is the result. Various incidental influences, wanting in earlier times, now aid the development of coffee production in Ceylon, among which we may note the increase of foreign trade, the improved demand for Plantation in England and in the Continental markets, and the prospect of long-continued ease in the money market—a state of things not likely to be again affected by the same concurrence of causes which led to the late disastrous crisis. That crisis has served to render evident the generally healthy character of the trading relations of Ceylon not only with this but other countries; and, whilst repressing speculative enterprises at home, it has directed more attention than ever to colonial investments, for which Ceylon offers splendid temptations, now that those great deterrent causes—the absence of sufficient reliable labour and of suitable outlets to the remoter districts, are in course of being removed. Judging from the data before us, the coffee exports of the present year will but slightly fall short of those of 1865, a year that witnessed the largest annual shipment on record. Considering the extended preparations made for future culture, the increased facilities of transport, and the prospect of that abundance of labour which will reduce it to the ordinary rules of competition, we may anticipate, under favouring seasons, that the production for 1866-67 will be far in advance of any previously recorded.

In our last issue we stated that a Chinaman named Ah-Yuk was endeavouring to introduce coolie labour into the Southern States of America. Advices from New Orleans inform us that Ah-Yuk's mission had so far succeeded that he had contracted, through cotton factors, for 20,000 Chinese labourers for planters.

MUSEUM OF CHINESE AND JAPANESE OBJECTS IN THE LOUVRE.

A small suite of rooms has recently been opened in the Louvre containing a collection of Chinese and Japanese objects of art and curiosity well arranged. Among the artistic products are a quantity of coloured drawings, including figures, landscapes, scenes and botanical specimens, and some of the first especially present characteristics which are not usually to be found in collections of Chinese drawings, such as a few almost nude female figures not at all ill-drawn, and a curious anatomical or artistic figure, every part being elaborately marked either with references to anatomy or proportions, perhaps both. The enamels include some very beautiful specimens, such as incense burners, vases, cups and salvers, all in good preservation, and exhibiting brilliant examples of colour and harmony, for which they have evidently been selected. The China is small in quantity, but includes, amongst other specimens, two bottle-shaped ewers and basins of the most beautiful manufacture, and apparently without spec or flaw; and there are some very good examples of decorated earthenware, having coloured ornaments on a cinnamon ground.

The jade, rock crystal, and other articles in hard and precious stones, without being remarkable for any very large pieces, include specimens of all modes of application of this branch of art, whether in the production of special ornaments or in the decoration of furniture; and other objects of use or art, such, for instance, as the representation on screens of collections of vases and imitative wares, flowers and other objects, producing at first sight the appearance of cabinets filled with precious objects of virtu. There are some very choice specimens of fine bronze, amongst which a pair of bells or gongs of flattened form hanging within a bronze frame and elaborately decorated deserve attention. The artist has exhibited his ingenuity by inserting in the suspending chain, just above the bell, a ring of jade, with a view no doubt to render the sound of the bell more clear and crisp by preventing the waves of sound being continued by the metal chain and stand. The carvings in ivory are not remarkable, the specimens being chiefly of the ordinary kind, such as a concentric pierced ball, paper knives, baskets, and comb backs; but the articles in carved wood, such as mandarins' sceptres or batons, boxes, and ornaments, are numerous, and show that in the workmanship of these articles the Chinese have nothing to fear from the rivalry of any nation under the sun; the carving is free and beautiful, closely studied from nature, and, as picturesque, not highly artistic carving, it would be difficult to find better examples.

The collection of figures of all kinds, gilt, coloured, and dressed, is large and good; there is a female divinity with a child in her arms seated on a lotus or lily flower beneath a beautifully carved joss-house, with the burners for the joss-sticks in their places in front, which is very remarkable from the excellent modelling of the face and other parts of the figure, which is of life size. There is also a full-sized figure of a man or god with a beard in real hair, brilliantly gilt like the former, which exhibits much art. There are many other figures, gilt or coloured, serious or comic, which illustrate the talent of the Chinese in this curious form of art industry.

The furniture includes two curious bedsteads, one like a circular cabin, which only requires the removal of the legs to convert it into a gigantic cradle or rocking bed; some very beautiful tables with inlaid ornaments in jade and enamelled mountings, some very handsome cabinets and china stands, and many examples of the best kind of work in papier maché and lacquer. A very large compound travelling chest, with beautifully wrought iron handles to receive the bearers' poles, could certainly not be matched in Europe as regards the perfection of its lines and angles, the simplicity of its form, and especially the beauty of the black laquer of its whole surface; it is the very perfection of workmanship.

There is a small collection of arms, executioners' knives, bows, arrows, and other implements and utensils, just sufficient to give a fair idea of the condition of Chinese manufactures of this class. Lastly, there is a small series of musical instruments, stringed and brass, which gives we believe a pretty complete idea of the musical apparatus of the Chinese; the brass horns are nearly all of a peculiar shape, some having large tubular ends with trumpet mouths, while others are curiously bent, and look more like pipes for smoking than for the emission of sweet sounds. They are however simple in form compared to the famous saxophones and other instruments of M. Sax.

The opening of this special gallery is one more indication of the attention paid by the Imperial Government to everything relating to China and the Eastern Seas, and of its desire to familiarise the public with such matters. For the benefit of visitors who are not well acquainted with the more intricate portions of the great Museum of the Louvre, it will be well to state that the Chinese and Japanese collection is to be found in the upper floor of the Museum, at the end of the *Gallerie de la Marine*, and adjoining the room containing the weapons, utensils, implements, and other productions of the Pacific Islands and other uncivilised or half-civilised nations. The new gallery is evidently only a commencement, but it is a worthy one.

Monetary and Commercial.

STOPPAGE OF THE ASIATIC BANK.

We regret to announce the stoppage of the Asiatic Bank Corporation at Bombay, followed by the suspension of the London establishment. The Asiatic is known to have made heavy losses, but it was believed they would pull through. The bank was formed in Bombay in 1863 under very favourable auspices, and shortly after its formation new shares were issued in London at £15 premium. The shares are of £20 each, with £10 paid, but the shareholders are liable as a chartered institution to double the amount of capital. The price of the shares has been £1 to £3, and to-day there is no price. The subscribed capital is £2,000,000, of which £750,000 is paid up. The liabilities are estimated at over £3,000,000, but chiefly in India. The branches were at Bombay, Calcutta, Ceylon, Singapore, Hong Kong, and Shanghai. The London bankers are the Bank of England and the London Joint-Stock. The directors are:—

F. Boykett, Esq., Chairman (late Messrs. Timothy Wiggin and Co., London; now the London Asiatic, and American Company, (Limited).

J. A. Russell, Esq., Deputy-Chairman, (late Messrs. Grey and Coles, London, and Grey and Co., Bombay; now the London, Asiatic, and American Company, (Limited).

S. D. Birch, Esq. (late Accountant-General, Bombay, and President of the Bank of Bombay).

T. Cardwell, Esq, (late Messrs. Thomas Cardwell and Co., London and Liverpool, and Cardwell, Parsons, and Co., Bombay; now the London, Asiatic, and American Company, (Limited).

C. A. Fearon, Esq. (Messrs. Fearon and Co., and late Messrs. Augustine Heard and Co., China).

Wm. Maitland, Esq. (Messrs. Mackillop, Stewart, and Co., Calcutta).

Michael H. Scott, Esq. (Messrs. Finlay, Campbell, and Co., London, and Ritchie, Steuart, and Co., Bombay).

The following is the announcement by the head-office here:—

Asiatic Banking Corporation, 4, Lombard-street, London, Oct. 5, 1866.

"The directors of the Asiatic Banking Corporation extremely regret to state that in consequence of a telegram received this morning from the Bombay agent of the bank, announcing the suspension of payment of that agency, they are compelled to close the bank.

"A statement of the affairs of the bank will be prepared, and a meeting of the creditors will be convened as early as possible after the arrival of the ensuing mail from Bombay.—By order of the Board,

"F. W. Lawrence,
"Acting General Manager."

The acceptances of Messrs. J. B. Cumming and Co., in the Singapore, Siam, and China trade, have been returned. No statement of the suspension of the firm has been announced, and it is alleged that the bills so returned were dishonoured under peculiar circumstances, which it is expected will shortly be arranged. We are informed that other acceptances, due on the same day, were duly honoured.

The bar silver and Mexican dollars brought by the West India packet, together with a large quantity of silver by the steamer, amounting in the aggregate to about £600,000, have been disposed of for shipment to the Continent. The bar silver realised 61d. per oz. and the Mexican dollars 59½d. per oz., establishing in both instances an advance of ½d. upon the rates realised for the previous arrivals.

The biddings for £325,000 in bills on India took place on the 3rd, at the Bank of England. The proportions allotted were —to Calcutta, £203,000; to Madras, £2,000; and to Bombay, £91,500. The *minimum* price was fixed at 1s. 10¾d. on all three Presidencies, being an advance of 1 per cent. as regards Calcutta and Madras. Tenders on Calcutta and Madras, at 1s. 11¼d., will receive about 43 per cent., and on Bombay, at 1s. 11¼d., in full; above these rates, in full. These results show a rise equal to 1½ per cent. in the rates given for bills on Calcutta, and ½ per cent. on Bombay, and make a total advance of between 4 and 5 per cent. within three weeks.

Tea is decidedly firmer, but the chief business of the week has been in old teas. Several vessels have arrived from Foo Chow with new teas, including the *Ada*, *Flying Spur*, *Chinaman*, and *Falcon*. The *Eliza Shaw* is hourly expected with the new Moning's from Hankow. The total export to Sept. 11 is reported at 60 million pounds. The silk by the present mail (French) is about 2,600 bales China and Japan, and the next P. and O. mail leaving Hong Kong 28th August, and expected here on the 13th or 14th, has about 1,500 bales. The quotations are 32s. to 32s. 6d. for No. 3 Tsatlees, and by telegrams from Shanghai 625 taels, or about 34s. laid down.

Cotton is once more "King." The rise at Liverpool continues daily, although it is to a great extent purely speculative, still it is the opinion of first-rate authority that the rise will be maintained. We are glad to see that China and Japan descriptions have participated in the rise, and China is now up to 10½d. The increased demand for money at present rates is attributable to the cotton speculation. Strange to say, that the Manchester markets have not responded to the upward movement.

The amount of bullion by the P. and O. Company's steamer *Tanjore*, from Southampton on the 4th inst., was—In gold, to Alexandria, £1,800; in silver, to Hong Kong, £4,500.

The Board of Trade returns for the month and eight months ended August 31st still continue to manifest a favourable appearance, and the late commercial panic does not appear to have affected the value of the exports from and imports into this country to so great an extent as might have been supposed. The total declared value of the exports during the month of August of this present year was £17,450,156, against £14,158,648 during the same month of 1865, and £16,274,269 in August, 1864; thus there is an increase for the month of £3,291 508 over 1865, and of 1,175,887 over 1864. For the eight months ended August 31st of this year the total declared value of the exports was £125,265,820; for the corresponding period last year their value was, £102,400,696; and for the eight months of 1864, £108,716,219. These show an increase in value for 1866, of £22,865,124 over 1865, and of £16,549,601 over 1864. Of the enumerated imports, the returns are given up to the 31st July, and their total declared value for the month ending with that date was £19,597,929; in the same month of 1865 their value was £18,964,190, and in 1864, £20,458,253. These figures show an increase in value over 1865 of £633,739, and a decrease from the value of the imports for the month of July, 1864, of £860,324. The total value of the imports for the seven months ended July 31st, 1866, was £134,871,287; for the corresponding period of 1865, £94,305,062, and for 1864, £119,068,429. This shows an increase in value of £40,566,225 over 1865, and of £15,802,858 over 1864. It will thus be seen that, although the value of the imports for the month only is below the value for the corresponding month in 1864, the total value of the seven months' imports for 1866 is in excess of that for 1864. The trade with the ports and countries in the Far East contributes the following figures to the returns before us:—

EXPORTS TO CHINA AND HONG KONG.

Quantity for the Month ended 31st August.

	1864.	1865.	1866.
Cotton yarn	155,911	—	114,640 lbs.

Canopus, Colombo to London, Sept. 18, 40 N., 34 W.

FREIGHTS AND CHARTERS.

We have to note but little animation in export business, though outward freights remain without alteration. Coal freights continue unchanged. In homeward charters we have no transactions to report.

Outward berth freights remain quiet, former quotations being maintained, but the supply of shipping is fully equal to the demand.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £40. For Singapore: £30. For Shanghai: £50. For Saigon: £50. For Yokohama: £51. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Singapore, £1 7s. 6d. For Shanghai: £2 10s. For Saigon: £2 8s. For Yokohama: £2 7s. 6d. Batavia: £1 6s. For Manila: £1 15s.

The Admiralty have invited tenders for the conveyance of 570 hhds. porter from the River Thames to Hong Kong, and have accepted the Belted Will for conveyance of troops to Hong Kong.

CASUALTIES.

The Robert Dickson, Wilson, from Sourabaya to Amsterdam, which put into Falmouth Sept. 19, dismasted, has been surveyed and commenced landing her cargo.

Advices from Batavia, dated Aug. 11, state that the Comus, Black, which left Sourabaya, Aug. 11, for Amsterdam, had struck near Pakies, and would probably have to discharge.

MISCELLANEOUS.

At Bahia.—Sept. 28, Gerard Pieter Servatius, Beckering, sailed for Batavia.

On the 27th Sept. Messrs. R. Steel and Co. launched from their yard on the Clyde an iron ship named the Gryfe. She is 197 ft. long, 33 ft. 6 in. broad, and her depth of hold is 21 ft. 8 in. She is owned by Capt. Russell, of Greenock, and is intended for the East India and China trade.

The P. and O. Co.'s steamer Mooltan has arrived at Southampton from Calcutta for a general overhaul and repair. She left Calcutta on the 17th July and arrived on the 4th October, being 78 days.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Author of Exchange Tables and Arbitrations of Exchanges between England, India, and China.

Now ready, Ninth Edition, revised and enlarged, price 25s., cloth lettered,

RUTTER'S EXCHANGE and BULLION TABLES; being a complete Guide to Exchange Operations between England and the East, in sterling, rupees, and dollars, extended so as to meet the requirements of Shanghae rates under any possible variation. To which is now added an Appendix, containing a guide to the negotiation of short-sighted Bills; with other information relative to Exchanges between England, India and China.

By HENRY RUTTER, late Agent of the Commercial Bank of India, Hong Kong.

London: Effingham Wilson, Royal Exchange.

ENGLISH GARDENS IN THE EAST.

THE Fourth Season has now confirmed the complete success of Mr. CHRISTY'S Cases for conveying Fruit Trees, Vines, Plants, Flowering Shrubs, and Seeds, to the East, when shipped in the holds of Steamers like ordinary Case Goods. Mr. John Waterer, junr., the American Nursery, Bagshot, Surrey, or Mr. Christy, 28, Pall Mall, London, are prepared to execute orders for gentlemen in the East, and beg to call attention to the list of prices and conditions. Fruit Trees, including Pears, Apples, Plums, Currants, Gooseberries, Peaches, Nectarines, Apricots, Cherries, and Quinces, per case, 10 Guineas.

	Guineas.
20 FRUIT TREES, with Ten venes, per case	14
ROSES of the best kinds	15
RHODODENDRONS and AZALIAS, &c.	15
GARDEN SEED (various)	5 upwds.

The number depends on the size of the roots; the cases average 30 plants each.

All the above prices include freight, insurance, and all charges to any port where the P. and O. steamers call. The season for shipment commences about September and ends in January. All orders must be accompanied by a remittance or orders for payment. The name of the agent at the port of arrival must be furnished, to prevent delay in forwarding.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, Eastcheap, E.C. Sole Manufacturer.

TO IMPORTERS.

The undersigned beg to remind Importers of Wearing Apparel, and Boots and Shoes, of the many advantages which their long experience as Manufacturers and Shippers, their vast resources, and their intimate knowledge of the requirements of Foreign and Colonial Markets enable them to offer.

Assorted Sample Cases forwarded on receipt of remittance or order on London Agent.

Hong Kong, May 17, 1866.

T. & H. SMITH'S

CODEIA LOZENGES.

THESE Lozenges have a remarkable effect in allaying Cough and Irritation of the Throat and Chest.

Prepared only by T. and H. SMITH and Co., 21 DUKE-STREET, EDINBURGH, and 69, COLEMAN-STREET, LONDON. In boxes at 1s. 1½d. and 2s. 9d. each.

T. & H. SMITH'S

ESSENCE OF COFFEE.

GIVES instantaneously a delicious Cup of Coffee with boiling water or milk merely. To be had in bottles at 1s. and 2s. each, of all respectable Grocers, Chemists, and Italian Warehousemen.

69, COLEMAN-STREET, CITY, and 21, DUKE STREET, EDINBURGH.

HOLLOWAY'S OINTMENT.—In bad legs, scrofulous sores, glandular swellings, this Ointment operates very gently, but very surely and with a rapidity that resembles magic. It should be rubbed into the parts affected after they have been fermented with luke warm water. The purifying and curative powers of this marvellous unguent have never been disputed by anyone who has given it a fair trial. It contains not a particle of any substance of a noxious nature, nor is there a case on record in which it has done the slightest harm, while there are authentic reports of innumerable cures effected by it in all countries. It is as mild in its action as it is powerful and beneficial in its effects.

IMPORTANT ANNOUNCEMENT.

JOSEPH GILLOTT,

Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street New York; and 37, Gracechurch-street, London.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE.

Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 18, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE.

The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE.

Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of othodox medical practitioners. Of course it would not be thus singularly popular did it not 'supply a want and fill a place.'"

DR. J. COLLIS BROWNE'S CHLORODYNE

is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE

is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE.

EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera.*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay.*—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE.

CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

THE SHORTEST ROUTE TO AND FROM MANILA AND THE PHILIPPINES.

NOTICE to SHIPPERS and PASSENGERS by the OVERLAND ROUTE :—

The CHINA STEAM and LABUAN COAL COMPANY (Limited), in pursuance of an agreement entered into with the Government of Manila, have arranged to despatch the steamships "MONA" and "JAPAN," or other of their first-class steamers, with the mails and passengers monthly between Singapore and Manila, and Manila and Singapore, in correspondence with the Messageries Imperiales Overland Route.

TIMES OF DEPARTURES.

From Singapore to Sarawak, Labuan, Manila, Amoy, and back :—

No. 1.

Leaves Singapore	4th each month.
Arrives at Sarawak	6th ,,
Leaves Sarawak	7th ,,
Arrives at Labuan	9th ,,
Leaves Labuan	13th ,,
Arrives at Singapore	17th ,,

No. 2.

Leaves Singapore	21st each month, on arrival of French mail.
Arrives at Labuan	24th each month.
Leaves Labuan	25th ,,
Arrives at Manila	29th ,,
Leaves Manila	4th following month.
Arrives at Amoy	8th ,,
Leaves Amoy	12th ,,
Arrives at Manila	16th ,,
Leaves Manila	21st with French mail.

JOHN PITMAN, Marine Superintendent.

The Company's agents at Singapore will take charge of goods for transhipment. For further particulars apply at the Offices of the Company, Ethelburga-house, 70 and 71, Bishopsgate-street, London, E.C.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT.—From SOUTHAMPTON and MARSEILLES. — The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, China, and Japan (Yokohama), by their steamers leaving Southampton on the 4th and 20th of every month. Prospectuses, with through rate to a thousand places free on application.

G. W. WHEATLEY and Co. (late Waghorn), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus, W.; and 32, Regent-street, S.W.

INDIA, CHINA, AND JAPAN.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations :—

Destination.	Ships.	Class.	Docks.	To Sail.
Shanghai ...	Taitsing ...	A1 14 yr.	W.I.D.	With des.
Shanghai ...	Cymbeline.	A1 13 yr.	W.I.D.	With des.
Hong Kong & Whampoa ...	Serica ...	A1 13 yr.	W.I.D.	With des.
Hong Kong ...	Blk. Prince	A1 13 yr.	S.K.D.	With des.
Kanagawa & Yokohama ...	Medina ...	A1 13 yr.	W.I.D.	With des.
Singapore and Penang ...	Spirit of the Deep	A1 13 yr.	W.I.D.	With des.

For Freight and Passage apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.

CHINA, JAPAN, and SINGAPORE.—The following splendid first-class CLIPPER SHIPS will be despatched as under :—

Port.	Ship.	Class.	Dock.	Last Shipping Day.
Shanghai ...	Whiteadder	A1 10 yr.	E.I.D.	Oct. 25.
Shanghai ...	Chinaman ...	A1 14 yr.	E.I.D.	Nov. 10.
Hong Kong & Whampoa ...	Min... ...	A1 13 yr.	E.I.D.	With des.
Kanagawa (Yokohama) ...	Eliza Shaw...	A1 15 yr.	E.I.D.	Nov. 15.
Nagasaki and Kanagawa ...	Rifle ...	A1 13 yr.	W.I.D.	With des.
Singapore ..	Newcastle ...	A1 10 yr.	W.I.D.	With des.

For Freight or Passage apply to KILLICK, MARTIN and Co., 28, Nicholas-lane, Lombard-street, E.C.

INDIA, CHINA, AND AUSTRALIA.

SHAW, LOWTHER, & MAXTON will despatch the following first-class SHIPS as under :—

Destination	Ships.	Class.	To sail.
Hong Kong and Whampoa ...	Ariel	A1 14 yrs.	Oct. 10.
Ditto	Belted Will ...	A1 14 yrs.	Oct. 25.
Ditto	Sir Lancelot ...	A1 14 yrs.	To follow
Ditto	Melbreck ...	A1 14 yrs.	To follow
Shanghai	Fiery Cross ...	A1 13 yrs.	Oct. 10.
Ditto	Falcon ...	A1 13 yrs.	To follow
Melbourne.. ...	Holmsdale ...	A1 13 yrs.	Oct. 25.
Ditto	Reigate ...	A1 12 yrs.	Nov. 25.
Sydney	Sobraon ...	A1 13 yrs.	Oct. 25.
Colombo and Cocoanada	Brockham ...	A1 12 yrs.	Nov. 5.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings.

FROM LIVERPOOL.

Destination.	Ships.	Tons	Class.	To Sail.
Shanghai ...	Maiden Queen	814	A 1 —	Imm.
Batavia & Singapore ...	Ziba	497	A 1 —	Oct. 25.
Bombay ...	Bayard ...	1319	A A 1 —	Imm.

For terms of Freight or Passage apply to McDIARMID, GREENSHIELDS, and Co., Liverpool.

COLOMBO LINE OF PACKETS.

THE undermentioned will despatch the following magnificent first-class VESSELS :—

Ships.	Tons.	Class.	Dock.	Date of Sailing.
Frances ...	489	A 1 13 yrs.	W.I.D.	Oct. 10.
Dora	379	A 1 10 yrs.	W.I.D.	With des.
Abdul Medjib ...	402	A A 1 —	W.I.D.	To follow.
John Bright ... (For Bombay)	541	A 1 12 yrs.	L.D.	Oct. 12.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's.

To sail punctually on the 10th October.

FOR SHANGHAI, the well-known clipper FIERY CROSS, A 1 thirteen years, 689 tons register, RICHARD ROBINSON, Commander; lying in the West India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

To follow the FIERY CROSS.

FOR SHANGHAI, the well-known clipper FALCON, A 1 thirteen years, 793 tons register, J. J. GUNN, Commander; lying in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Regular Line of Packet Ship.

To sail punctually on the 10th October.

FOR HONG KONG and WHAMPOA, the celebrated clipper ship ARIEL, A1 fourteen years, 853 tons register, JOHN KEAY, Commander; lying in the East India Docks. This beautiful ship has just completed her first voyage, with the new teas, in ninety-nine days into dock.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Regular Line of Packet Ship.

To sail punctually on the 25th October.

FOR HONG KONG and WHAMPOA, the well-known clipper BELTED WILL, A 1 fourteen years, 812 tons register, A. LOCKE, Commander; lying in the London Dock. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

FOR COLOMBO and COCONADA (under engagement to H.M. Council for India, to sail on the 5th November), the splendid clipper ship ROCKHAM' A 1 twelve years, 1,048 tons register, R. J. BARROW, Commander; lying in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings.

FOR COLOMBO, CEYLON, Direct, to follow the "Avon," and will have quick despatch, the well-known clipper ship THAMES, A 1 thirteen years, 444 tons register, O. J. H. ARNOLD, Commander; loading in the West India Docks. This beautiful vessel has a full poop, with every accommodation for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

FOR COLOMBO, CEYLON, Direct, will have immediate despatch, having the whole of her dead weight, and only room for light measurement goods, the clipper ship PALESTINE, A A1, 608 tons register, T. Park, Commander; loading in the West India Docks. This splendid vessel has a full poop, with magnificent accommodations for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

COLOMBO DIRECT (warranted first ship), the FRANCES, A 1 13 years, now rapidly loading in the West India Docks, and will be found the best and most speedy opportunity for shippers of fine goods, having made her last passage to Colombo in 88 days.

Apply to JOHN C. CAMPBELL, 22, or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street.

To sail October 10.

DIRECT for BOMBAY, the fine fast-sailing ship JOHN BRIGHT, A 1 twelve years, 541 tons register, N. T. MARQUAND, Commander, loading in the London Docks. (Owned by Messrs. Marquand and Co., Guernsey.) This splendid ship has a large portion of her cargo engaged, and offers a first-rate opportunity to shippers.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Per P. and O. steamer, from Southampton, Nov. 20.—To Singapore: Mr. Meldrum, Miss Jewry. To Ceylon: Mr. G. Hamner.

From Marseilles, Nov. 28.—To Ceylon: Mr. P. W. Braybrooke, Mr. W. H. De Saram, Mr. M. H. Moss. To Hong Kong: Mr. G. Newton.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port our dates are down to the 14th August. The English mails of 26th June were delivered on the 13th On the same day Sir Harry Parkes arrived from the South in H.M.S. *Salamis*, and the *Laplace*, with the French Minister on board, got aground outside the bay. The *Salamis* is said to have brought certain news of the Tycoon's forces having been completely defeated in the Inland Sea. By way of San Francisco advices have been received to the 20th August, but conveying no news of importance.

There is little circumstantial news from the seat of war, but so far the Tycoon's forces seem to have been effectually held at bay. The *Japan Times* says:—"It would appear that the Prince of Nagato is carrying the war beyond his own frontiers. In the south Mats-daira Oki-no-kami, another of the Shogoon's generals, had seized the island of Oshima, intending thence to make a descent upon Chosiu's territory, but troops were sent to expel him from his position and he fled at their approach. Satsuma has forty-five thousand men now in Miako, and the Shogoon's Gorogio, it is reported, have at last publicly recognised the fact of his hostility to their master. The Prince of Hizen, whose dominions lie between those of Satsuma and Chosiu, and who has long been known as favourable to foreigners and the scheme of confederation, is believed to be on the point of uniting with his neighbours, when the whole of the south of Japan will be in the hands of the party of progress. We publish this review with great satisfaction, and with great satisfaction it will doubtless be received by our mercantile readers, as bringing rapidly very near to us the destruction of the system of monopoly, which has hitherto so crippled our trade with Japan."

The *Swallow* arrived on the 12th August from San Francisco, having on board General Van Valkenburg, U.S. Minister for Japan, and the Hon. Francis Burlinghame, U.S. Minister for China.

Another rice-riot had taken place in the vicinity of Kanagawa. A large band of peasants, chiefly engaged in the production of silk in the Koshiu districts, being irritated by the high price of rice and the enormous inland excise duty of 300 boos per horse load (4 Japanese bales) lately imposed upon silk, descended upon Hatchogee and there destroyed the Etoquai-shai, or exchange where silk merchants do congregate. They were armed chiefly with flails, sticks, bamboos, and agricultural implements, having among them a few men on horseback and some with swords. The Hatchogee militia, a rather effective body, being armed and drilled in the European manner, quickly repulsed these poor rioters. Subsequently, a Daimio and two Hatamotos from Yedo with a body of troops went in pursuit and meeting them, killed and wounded about 300 and took 500 or 600 prisoners. The miserable remnant who escaped are now scattered over the hills between Kanagawa and Kawasaki. They descend in small parties nightly upon the villages on the Tokaido, whence they take what they require of the necessaries of life, retiring at cock crow to their hiding places in the woods and hills, where they lie concealed all day. But they are diligently hunted down. Several parties have been out in that part of the coun-

Digitized by Google

try during the last week and no traces of them were seen. The villagers confirmed, in every particular, our account of the disturbance.

The Bonded Warehouse system is in full working operation The following is a statement of the entrances and deliveries for the month of July, which shows very fairly indeed, considering the opposition with which the scheme was at first received :—

ENTRANCES.

Shirtings	518 bales,	25,900 pieces
Camlets	95 bales,	950 „
Taffachelas	30 cases,	3,000 „
T. Cloths	10 bales,	500 „

Sundries	41 „	

DELIVERIES.

Duty paid, Shirtings	28 bales	
„ Cotton Yarn	1 „	
„ Sugar	950 „	
Re-exported, Shirtings	40 „	

Some interesting antiquarian remains in the neighbourhood of Yokohama have been destroyed. The *Japan Times* says:—"A party lately went out to visit the caves at Yama-no-utchi (inside the hill) known as the Totska caves and found that either an earthquake or the late unusually heavy and continuous rain had destroyed these interesting sculptured temples. Part of the interior, they were informed, had given way and the entrance had also suffered materially. Indeed they found this nearly blocked up with soil which had fallen from above ; the closing of the aperture had been completed with rough boarding, the local authorities considering it dangerous to allow any person to venture into the caves in their present condition. This accident is regrettable, not that the sculptures in the cave were of much value, either as works of art or from any great antiquity —but they were certainly curiosities in their way. Unfortunately, as appears from the example of some of the temples about Yedo—notably of one formerly containing a large number of life-sized gilt figures (now accommodated in a shed)—the Japanese are not very active in works of restoration, and we can therefore entertain very small hopes of the Totska caves being ever cleared out and restored to their former condition."

HAKODADI.

We are in possession of dates from Hakodadi to 21st July Nothing new had transpired relative to the Russian and Japanese difficulty. But the Russian Consul had left for Nicholiefsk in H.I.R.M.'s *Variag*, and report says he will visit Saghalien also. The British steamer *Iron Prince* was sold at auction for ichibous 2,800.- Contracts for silkworms' eggs had been made at prices varying from 2 to 3 boos per sheet. Trade was reported dull, and the *Alert* was the only vessel in harbour.

From this port we hear that the misunderstanding arising from the late desecration of an Aino cemetery has been satisfactorily adjusted. From the *North China Herald* we take the following interesting particulars :—In order if possible to remove from the minds of the natives all trace of ill feeling on account of the desecration of the Aino cemetery, Capt. Vyse, H.B.M.'s Consul at this port, received instructions from Sir Harry Parkes to proceed to the villages of Mori and Otoshibe, the two places whence skulls had been stolen, and there to express in person, in the name of the British Minister, the regret that not only he but all his countrymen felt at the perpetration of the crime ; and in addition to distribute the sum of 1,000 ichibous in equal portions among the relatives of those who had been disinterred. Capt. Vyse was to be accompanied by a Vice-governor and a staff of Custom-house officials. Unfortunately H.M.'s Consul found the native Governor of the port unwilling to give his sanction to the expedition, until the three or four skulls still missing had been restored ; the bulk, some twelve or thirteen in number, having already been given up to the Custom-house authorities.

Early in March H.B.M.'s *Osprey* arrived with Mr. Gower, to relieve Capt. Vyse, who shortly after left for Yokohama in the above-mentioned vessel. It was not till after several interviews and the exercise of great patience that the Governor could be induced to give his consent ; and then a further delay occurred, owing to the protracted winter and heavy spring rains. On the first of June, the weather having been fair for the three previous days, and everything being in readiness, a start was fixed for the following day , and on the morning of the 2nd Mr. Gower, accompanied by a friend and Mr. Robertson (an officer attached to the Consulate), left Hakodadi—some three or four native officials of subordinate rank accompanying.

Sy-go-no-pi, the first resting place, some twenty miles from Hakodadi, was reached the same night. Early the following morning a Shirabiaku (Custom-house official) arrived at the tea-house, and informed Mr. Gower that the Vice-Governor was to leave Hakodadi that same day, would push on straight to Mori (eight miles from Sy-go-no-pi, and where the first distribution was to take place), and would reach there about 2 P.M. Mr. Gower and party timed their departure to arrive at Mori at 1.30 ; but after waiting three hours, without sign of the Vice-Governor, it was decided to push on to Otoshibe, leaving word at Mori to that effect, ample time being thus afforded to the Vice-Governor to reach Mori, rest there the night, and on to Otoshibe in the morning. The business accomplished there, what had to be got through at Mori could easily be done on the return journey. From the time of arrival at Mori and departure for Otoshibe, not a single Aino was seen ; the officials giving as a reason that they were assembled in a house, awaiting the distribution of the money. Leaving Mori at 4.30 P.M., Otoshibe, about twelve miles distant, was reached at 6.30 P.M.

On entering the village the first sight that greeted the eyes of the traveller was two Ainos, busy mending their fishing nets on the beach. Mr. Robertson, dismounting from his horse, walked up to them, and addressed some few words of salutation to them in their own language, but a grunt from each was the only reply, and, turning their backs, they stalked slowly away up the village. After making arrangements about quarters in the tea-house, Mr. Gower sauntered up the street, addressing by means of Japanese the Ainos he came across in a few kind words. At first they exhibited a good deal of sulkiness, but this gradually wore off, and the judicious distribution of small coin to the youthful Ainos, with here and there an ichibou to the patriarchs, changed ill-tempered countenances into smiling ones, and drew from the Ainos their usual form of salute, made by raising both palms to the chin and then stroking the beard down gently. This obeisance, which they had never failed to make to foreigners on former occasions, was neglected on the first entry of the party. The following morning, the 4th, the Vice-Governor arrived, but as the old gentleman was rather shaken by his journey, business was postponed till the afternoon. The morning was passed in a visit to Urap, ten miles from Otoshibe, and a purely Aino settlement, the only Japanese dwelling being the tea-house erected for the convenience of travellers, but more particularly for the accommodation of Government officials, whose duties take them, from time to time, up the coast.

Whatever ill-feeling may have arisen from the desecration of the Aino cemeteries, the results of the visit to Urap fully testified that it was simply confined to the two places where the crime was committed, for on entering the village the inhabitants turned out in large numbers, bowing and making the customary salute, and evincing by their looks and actions all kindly feeling to the foreign visitors. During the two hours stay in Urap, several Aino huts were visited, without the least sign of ill-will being exhibited by their humble occupants. The party reached Otoshibe on their return at 4 P.M., and preparations were immediately made for the ceremony of distribution, and expressions of regret on the part of the British authorities. These were simple enough—a few coarse mats spread in the garden at the back of the tea-house, close up to the verandah, served for the Ainos ; for Mr. Gower and the officials a bench covered with red baize was placed in the room opening on the garden. All having assembled, the Ainos, to the number of 45, with their Japanese interpreter, Mr. Gower commenced by requesting them to stand up, and with Mr. Robertson, stepping to the front of the verandah, addressed them through the interpreter as follows :—

"I am the English Consul lately arrived at Hakodadi, and have been sent by my Minister to express to you the regret that my Government, in common with my countrymen, feel at the desecration of your countrymen's graves. The three men who were guilty of this crime have been severely punished, sent away from Hakodadi, and are now undergoing imprisonment. In all countries there are good and bad men ; the bad must be punished so that the good may live in peace. The expenses incurred by you in connection with the trial will be paid by my Government ; and, in addition, I am directed to distribute the sum of 1,000 ichibous among you in

Digitized by Google

equal portions to the relations of those whose graves were desecrated. Now that these men have been punished, I hope that no ill feeling to foreigners will rest among you, and that you will receive all foreigners in the same kindly way as formerly."

Mr. Robertson then proceeded to distribute the money (each sum being done up in a small packet, with an inscription outside denoting that it was a present from the English Government) to each member of this curious little assembly. After distributing the money, about 800 ichibous (200 being reserved for Mori), Mr. Gower again expressed a hope that all ill feeling had been removed, and the Ainos, who had during the address given vent to expressions of delight, quietly dispersed, some of them making straight for the kitchen attached to the inn, there to spend a portion of their suddenly acquired wealth.

On leaving Otoshibe the following morning kindly farewells were exchanged, and Mr. Gower had the satisfaction of leaving cheerful and happy faces where he had found sour and discontented ones. At Mori the same ceremony was gone through, the number of recipients in this case being only eleven, with, it is to be hoped, the same happy results. The same opportunities of testing this did not, however, offer themselves as at Otoshibe, as the party started immediately for Sy-go-no-pi, on their way back to Hakodadi—not, however, before the heart of the Japanese acting as interpreter in both places had been gladdened by a handsome present of money.

It is to be sincerely hoped that Englishmen may never again in these climes forget the sanctity attached to a grave, however rude and simple, nor the respect due to the dead, however lowly and ignorant the people.

CHINA.

TIENTSIN.

Advices from this port are to the 11th August. Owing to the stagnant condition of the place, all the trade being in the hands of the Chinese, Messrs. Jardine, Matheson, and Co. have closed their establishment, and it is said that other firms are by no means unlikely to follow their example.

A correspondent informs us that telegrams had been received at Tientsin from Kiachta in eleven days, and would be in Shanghai in two days more—which would bring Shanghai within seventeen days of London. When the line of telegraph is extended to Peking, it will be possible under favourable circumstances to communicate from London to Shanghai in six or seven days.

Mr. Thomas, the author of the instructive articles on the Corea that lately appeared in our columns, intended proceeding there again with the French admiral, but found that the admiral had given up all idea of the Corea at present, owing to his vessels being required at Sarjon. The Corean coast is not, however, neglected by the merchants, several trading vessels having visited it.

The following is from the Circular of Messrs. Platt and Co. dated Aug. 11:—

Our last report was dated the 11th ult., since which we have telegraphic advices per French mail of the 16th June extending to the 5th July. Private telegrams, *via* Kiachta, bear a later date, and as Mr. Grant has now the entire interest in the late Trans-Mongolian Telegraph Company, it offers facilities to the public which formerly belonged to individuals exclusively. Imports: It is worthy of remark that out of about 4,000 pieces of grey shirtings imported last month not more than 5,000 were on foreign account, the remainder having been purchased by natives on the Shanghai market.

Until the commencement of our fall trade, looked for at the end of the present month, we do not anticipate much business being done, nor do we look for any improvement in prices, seeing the large stocks that are held by natives. The reported sales since the 31st ult. include 240 pcs. 30 yds. Drills at tls. 4.1.5. per piece; 750 do. 40 yds. at tls. 6.0.7 do.; 90 do. BBB Camlets at tls. 17.2.0 do; 350 do., 40 yds. Lustres at tls. 6.5.0 do.; 208 do. Span. Stripes at 1 tael do.

SHANGHAI.

The dates from this port are down to the 22nd Aug. The outward mail of 10th July was hourly expected. There is but little news to add to our issue of 6th Oct. per French mail. In an extra issued by the *Friend of China* the burning of another steamer is reported. The account is written by the purser of the *Tahwah*, dated Kuikiang, Sunday 19th Aug.

"We arrived here at 5.30 P.M. from Shanghai, and found the steamer *Kiangloong*. About an hour after the steamer *Huquang* arrived from Hankow, and went alongside Messrs. Russell and Co.'s, or the Shanghai Steam Navigation Co.'s hulk, (her accustomed place), to receive cargo. About 7 P.M. or shortly after, I was told that the *Huquang* was on fire, and ran out so see. There she was, true enough, in a blaze, from her smoke stack to her cabin forward—flames bursting out of the windows; and shortly after she was in a blaze from stem to stern, or nearly so, and continued burning until past 12 P.M. when she rolled over on her starboard side, and sunk nearly close to the bund, abreast the city wall.

"I should mention, that shortly after the fire broke out, they cast off her hawsers, &c., from the hulk, let her drop astern, then let go her anchors (one or more), and there they held her. She burnt up to the time I state, nearly five hours, her funnel was red hot, as was also her walking beam. Her starboard paddlewheel and shaft fell first, say an hour or so before she went down.

"I haven't heard, for certain, what was the cause of the fire, but it broke out near the engine room. In all probability a Chinaman, a fireman, was left below to look after everything as soon as she was made fast to the hulk, and as the Hankow coals, which I have no doubt she had (for all R. and Co.'s boats get Hankow coals) make a great deal of ashes and clinkers the China firemen, who were left to get them out, did not properly attend to it, and so the accident occurred.

"It could not have been on account of racing against the *Kiangloong*, as has frequently been the case, for on the previous trip, to this up the *Kiangloong* was beat by the *Huquong* some ten minutes from Cock's Head to Hankow, say 86 miles.

"Captain Harman of the *Huquong* has just come on board, and says the first he knew of the catastrophe was from the quartermaster coming, and telling him that the engine-room was on fire! I never saw such a blaze in my life, and parties on board who saw the *Chinkiang* and *Hankow* burn up, say they did not last so long, or give such a flare. The *Huquong* had about 800 tons of cargo on board, including a great deal of oil. Captain Andrews was on board when the fire broke out, and says he saw several of the Chinese passengers jump overboard with their trunks, &c. No doubt some are drowned, but as I have not been on shore I can't say for certain. They had a gun on the hulk's bridge, which fired three shots into her when she was nearly burnt out. H.M.'s gunboat *Cockchafer*, lying here, did not seem to care about it, as she did not get up steam and move out of the way. The water is rising here a few inches daily. Nothing further of importance.

An important notification from the Prussian Consulate General with reference to the duties upon teas, appears in the *Shanghai Recorder*. It is to the effect that all persons purchasing teas in the interior of China are, in accordance with a decree issued by Li-Footai, to obtain receipts of duties on the cargo from the producers of the same, upon presenting which they will be allowed to pass all barriers. This arrangement, however, we presume cannot be held to interfere with the right secured to foreign subjects to commute the transit duties by payment of one half the tariff duty, as agreed to by treaty; as it is precisely against allowing a loophole for placing a special tax upon such Chinese, producers or others, as foreigners may deal with, that this provision has been made. It seems by the present arrangement that while the foreign purchaser will only pay to the producer the sum specified by treaty, he may really be called upon to pay much more, in the form of enhanced price consequent upon a heavier impost being placed upon the native; and that consequently the provisions of the treaty, though preserved in form, will be evaded in fact. The subject is one of so much importance to commercial interests that we shall endeavour to obtain more particulars with respect to it, and may probably have occasion to recur to it in our next issue.

Mr. W. H. Mitchell, barrister, has astonished the public by writing a very lengthy legal opinion to the *North China Daily News* with respect to the constitution of the Shanghai Gas Company; stating that it could have easily been organised under the Limited Liability Act, and that it is, in fact no partnership association at all. While objecting to the unprofessional style of giving legal opinions in a paper, and particularly of giving them gratis, Mr. Lawrence, whose opinion previously given in conjunction with Mr. Myburgh's was made the subject of attack, returned the fire, pointed out that the Act cited by Mr. Mitchell as that under which the company ought to have been formed, did not come into force till after the company had been some time established, but to this Mr

Digitized by Google

Mitchell promises another reply, which has not, however, as yet been published.

At Hankow the river had fallen considerably when the *Shanse* left, on the 16th August. A large junk laden with coal broke from her moorings and drifted across the bows of the *Fusiyama* on the 13th, injuring herself so severely that she sank immediately with several of her crew.

A fire had occured at Ningpo which is reported to have been simply a plant, by which the owners netted twelve hundred taels at an expense of some nine thousand taels to the unfortunate shippers. It happened after this wise. Owing to the competition of foreign bottoms, large junks at Ningpo, as elsewhere, are at a discount; and so much is this now the case that, in the present instance, a junk costing originally some twelve or fifteen thousand taels was sold for the sum of eight hundred. The ingenious purchasers at once went to work to collect freight for the North, and they had so far succeeded as to obtain a cargo for which two thousand taels freight was paid in advance; hence the fire, whereby the owners are relieved from the trouble and expense of making the junk seaworthy and prosecuting a voyage, the freight to be earned by which remains their own notwithstanding. The plan is fully equal to any that we have laid with a view of reaping the sure profits offered by an Insurance Company, in preference to running the risks of precarious trade.

At Tientsin the thermometer has continued to range high, and the "oldest resident" says he has never known so hot a season. If it be true that companionship in misery is an alleviation, Shanghai will find some consolation in knowing that Tientsin is as badly off as itself in this respect; and, moreover, that the mosquitos there are even of a finer breed than here—perfect vampires, in fact.

Messrs. Farnham and Co., of Hongque, have laid the keel of a screw steamer 100 feet long, 20 feet beam, and 10 feet hold, to be fitted hereafter as a gunboat, and proportioned to carry a Blakeley's 90 amidships. The boiler and some of the machinery will be entirely new. This firm lately launched a cutter for the new Pilot Company.

HONG KONG.

Dates are down to the 28th August. The French mail of July 17 was hourly expected.

The following is the letter of our correspondent:—

The proposed imposition of a Stamp Act in this colony—the only method which has appeared feasible to Sir Richard MacDonnell for its extrication from the financial difficulties caused by previous recklessness—has aroused a storm of indignation among the higher classes of the mercantile community, of whose faith it is a cardinal point that European residents in Hong Kong have a claim to total exemption from a share in the "burdens of the State." Although the ordinance imposing the introduction of stamps as a source of revenue has passed the Legislative Council (by vote of the official members against that of the three non-officials), a meeting is called for to-morrow with the view of protesting against the Act. What arguments will be adduced on this occasion remain to be seen. Messrs. Dent and Whittal have astonished the community at large by a proposal to reinstate in Government employ a man (D. R. Caldwell) who was dismissed five years ago by order of the Secretary of State for the Colonies as the result of an inquiry into his alleged connection with the chief of a piratical association. Those gentlemen predicted that the imposition of a Stamp Act would tend to drive away the Chinese traders from Hong Kong. The schedule attached to the ordinance is certainly a long one, and some of the items proposed look rather objectionable; as for instance the imposition of stamps on "Comprador's orders," the cheques on the Chinese paymaster of each establishment—by means of which all business from the purchase of land to that of a breastpin is conducted—is likely to prove a source of annoyance in small transactions; but, so far as I can judge, Sir R. MacDonnell is too sensible, and too careless of mere popularity obtained by the sacrifice of his official opinions, to be swayed by the foolish arguments likely to be marshalled against him to-morrow.

The debates on this question have brought out more clearly than ever the astounding blunders of management in recent years, to which I have before alluded. No one attempts to defend the Mint, among other things, which is now alleged on all hands to be equally a total and a costly failure. The machinery, while incapable of turning out a coin of respectable appearance, is also inadequate to produce more than some fifteen thousand dollars per diem; and cannot, therefore, be looked upon as in any way capable of supplying the wants of commerce. This defect might be remedied by further outlay, indeed, were the prospect at all encouraging as regards the popularity of the coin produced. The new dollar is, however, as I wrote you months ago, looked upon with both contempt and suspicion by the Chinese, and, although the few that are seen in circulation, are necessarily accepted in the colony, the Chinese at Canton have pooh-poohed every attempt to introduce them there. The execution is so bad that the merest tyro, they say, could produce forgeries undistinguishable from the real coin.

The Praya, which tumbles down in part whenever we have a gale, the drains which burst whenever there is a heavy rainstorm, and the expensive new gaol on Stonecutters' Island—all works which have absorbed the major part of the revenues of the colony for years past—are understood to be the subject of objurgations loud and deep from Sir Richard MacDonnell.

The French frigate *Guerriere*, with Admiral Roze on board, arrived here the other day from Saigon *en route* for the North, the hostilities undertaken by the Annamese having been checked sufficiently to enable the Admiral to turn his attention to matters in the Corea. Instructions will be awaited from the French Government before any steps are taken in that quarter, and it is earnestly hoped here that the British Government will decide upon joint measures for the chastisement of the murdering barbarians who constitute the Corean "Government" and for the opening of the country.

Some anxiety is expressed here for the legal opening of an additional port on the west coast of Kwangtung, in lieu of that of Kiungchow, in Hainan, which is quite useless. Shueytung, the port where the *Prince Albert* was seized some months ago, has been found to afford a market for the sale of piece goods, besides supplying a valuable list of exports. Since the seizure of the *Prince Albert*, the contraband trade till then carried on with Shueytung and Hainan has quite ceased. The port has several advantages over that of Kiung-chow, the name of which was inserted in the treaty almost at random, and which has never been declared open. It has a good and sheltered river anchorage, with greater proximity to Hong Kong, and a climate less tropical than that of Hainan.

The struggle between the American house of Russell and Co. and the Hong Kong and Canton Steamship Company has terminated in favour of the latter, to the delight of most people, to whom the decided "Yankeeism" of Messrs. R. and Co. was very intolerable. The company has not been in existence more than nine months, but its success has been so marked that ths heads of the house of Russell and Co. in the United Statee have accepted terms more unfavourable to themselves by some 15 per cent. than were offered originally by the company on its formation. In addition to this they have incurred heavy losses by the frantic competition instituted on the Canton River by their steamers. These—the *Kiukiang* and the *Poyang*—have been transferred already to the British flag, which has now undisputed possession of the river traffic, although the management of the line is entirely American, being conducted by Messrs. A. Heard and Co. for the company.

You will see in the homeward newspapers from this and Shanghai sundry jocular allusions to the "sell" practised by the ingenious Mr. Hart in passing off his Chinese teacher as a mandarin of high rank, and the wretched ragamuffins from the Tartar lanes of Peking as secretaries of Legation. Everyone who has been humbugged in the delicious manner over which we in China have been roaring lately has, however, himself only to blame, for full statements were published at the time this disreputable gang departed from China respecting their true position. The fact of a "button" having been conferred at Mr. Hart's request on his teacher Pinchu has no more significancy, as regards his official rank, than the addition of the letters J.P. to an Irish squireen's name would have on his position in travelling in a foreign country. The "sell" has certainly attracted some notice to Mr. Hart and has probably served its turn, as did the woolly horse and the Feejee mermaid; but neither of those celebrities was honoured by a private reception by her Majesty!

On the subject of railways in China the *China Mail* says:—"In previous articles we have urged at some length the necessity of personal action being taken in the matter, if the projectors are at all anxious to bring the scheme forward. By personal action we mean the despatch to Peking of a duly accredited and competent person to urge upon the foreign representatives resident at the capital the advisability of their persuading the

Digitized by Google

Chinese Government to grant powers to the company to commence the formation of a line between Peking and Tientsin. The projectors would have, however, to bear in mind that they propose working in China — the great land of what may be termed topsy-turvyness—and that as they find the Chinese even in social customs to be our antipodes, so must they expect from the Chinese Government a course of treatment diametrically opposed to that experienced in similar matters from the authorities of European States. It is very probable that in spite of any descriptions, however favourable, which may be given of the certain success of the line, and of the revenue it would bring to the Imperial Exchequer, the Prince of Kung and his advisers, so far from being willing to guarantee it in any way, will actually require a heavy bonus or security for the same before granting permission for the construction of the railway being commenced. As to the eventual financial success of at least the line we have mentioned, it may be considered absolutely certain; and this we say, not as mere lookers on, judging from hearsay and published reports, but from actual experience of the large traffic, both in passengers and goods, now carried on between Peking and its seaports. We have ourselves travelled over the country through which the proposed line would pass some six times (once in company with a professional civil engineer and geologist), and can bear witness to its wonderful suitability for the line proposed."

It is stated that the head quarters of the 20th Regiment will be transferred to Singapore, it being intended that they should be replaced by native troops.

Orders have been received from England to build without delay quarters for 600 native troops, and it is rumoured, as stated in the home papers, that a local corps is to be raised; whether composed of Indians, Malays or Chinese is not known.

The chief item of gossip as given by the *China Mail* is a letter addressed to the editor of the *Daily Press* by Mr. Pollard, in which he used language unusual and undignified from one holding his position. A statement appeared in the leading columns of the *Daily Press* to the effect that in the case of Anderson *versus* Shaw and another, Mr. Pollard had behaved unbecomingly in court by interrupting the counsel for the plaintiff's cross-examination, and putting words as it were into his client's mouth. The whole article was written with such evident animus against the defendant and his counsel, that it was held by public opinion to have rather strengthened than weakened the impression in their favour. It was in fact a grave departure from the tone of impartiality which has of late distinguished that journal, and although most consider that the fault lay chiefly with the defendants, scarcely any one endorses the stinging attack made on them in the columns of the *Daily Press*. Thus far the editor. Mr. Pollard's course of action was, however, still more objectionable than the article which called it forth. Instead of writing to the *Daily Press* to merely give an unqualified denial of the fact alleged, with a request that full publicity might be given to his letter, he accuses the editor of malicious intent in very objectionable terms, and gives him the lie without allowing for the supposition of mis-information. Most people of sense are aware that legal information is furnished to editors by reporters for the press, and Mr. Pollard was bound to admit that wrong information had been furnished, until the editor made himself personally responsible for the truth of his allegation. Now comes a more absurd feature of the case. Instead of inserting the letter with a few lines expressive of regret that the writer should so far forget himself as to write in such style, and in a few calm words, giving the actual facts of the case, showing that Mr. Pollard had been guilty of a more flagrant offence against good taste than himself, the editor sent it to the club committee for their opinion or action in the matter. We have not learned the tenor of their answer, but the general opinion in Hong Kong seems to be that editors might fight their own battles themselves, and not bother the community, in a private capacity, about editorial quarrels. Those who have a certain number of columns at their absolute disposal for expressing their opinion of other people have naturally an advantage over the rest of the community, and they might rest satisfied with the power they wield.

The proposed Stamp Act has been issued *in extenso*, but is too lengthy to be reprinted. The following are a few of its provisions. Persons neglecting to use stamps in the cases required by the Act, to be fined $50, or ten times the value of the requisite stamp. Bills, policies, and similar documents drawn in sets, must be on stamped paper, under a penalty of $500. Dutiable writings or documents not stamped, are not admissible as legal. Inadvertent neglect to stamp a dutiable document may be remedied within six weeks, if satisfactorily explained. On banker's note, promissory notes or other instruments issued by any banker or banking corporation in the colony, for local circulation and payable to bearer on demand, a stamp duty of one half per cent. per $100 of the average value of such notes in circulation during each half year. The schedule is a long one, we extract from it the following items :—

	$.	c.
Affidavit before a magistrate, per sheet	0	50
Agreement or contract, or minute thereof, not of the nature of a bond or deed	0	50
Agreement for loan on deposit of security or assignment	0	50
If such loan is for one month and not exceeding two months	1	0
Ditto for two and not exceeding three	2	0
Draft, cheque, or compradore order, if payable at sight or on demand	0	3
Bill of lading, or acknowledgmant of or for any goods to be exported for each part of every set	0	10
Bond for payment of money for any sum not exceeding $10	0	5
And so on through a graduated scale up to $5,000, which is charged with a duty of	25	0
Ditto for every further $5.000, or any part thereof	10	0
Charter party or agreement for hiring a ship for sea	1	0
Composition deed with creditors	5	0
Letter or power of attorney	2	0
Trust deed for creditors	10	0
Policies of insurance, life, or property, for every $500 or part thereof	0	25
Receipts for debts above $10	0	3
Protest of any bill of exchange or promissory note for any sum	1	0
Protest of any master of vessel	1	0
Notice of intention of such protest	0	25

A letter has been published addressed by Sir Richard Mac Donnell to Mr. Whittall with the view of correcting some erroneous impressions which were entertained with regard to working of the Stamp Act. Sir Richard first explains that he has no intention of increasing the taxation more than needful to make up the deficiency in the revenue—say $120,000. That, although the schedule, as at first devised, would yield a much larger sum, it was purposely made comprehensive, that the opinion of the mercantile community might be availed of in selecting items for reduction, and that the schedule had been framed as closely as possible on the model of that used in India. Sir Richard concludes a very sensible letter in these forcible words :—"I see in it a system capable of immediate contraction and expansion according to the public exigencies. I see in it a measure which indirectly compels others than mere residents here, to share the burthen as well as the profits attendant on business conducted here. I see in it a means of abating the gambling by time-bargains, which must injuriously affect legitimate business. I see in it a system approved by the most eminent political economists as apportioning taxation according to the magnitude of the transaction which it reaches. Finally I attach the more weight to this latter consideration, because the opposition to the measure is so general here, that I infer from thence a Stamp Act would equitably include and affect all interests."

It is stated that the Chinese have ordered "needle-guns" from England.

COCHIN-CHINA.

SAIGON.

The following items of news are from the *Courrier de Saigon* of the 20th August :—

The iron dock, which had previously undergone a trial, received the frigate *La Persévérance*, which was immediately raised up. The keel of the frigate was bare, and this fine vessel being placed altogether out of water presented an extraordinary and imposing aspect.

The Governor of Benh-trean, who has been nominated Governor of Angiang, called at Saigon on his way to his new post. The Governor of Venh-Luong arrived here in order to be present at the feast of Napoleon; he was accompanied by a numerous *escorte*. Another mandarin, commissioned to bring the war indemity money, arrived here on the same day.

A sad accident befel one of the gunners who assisted at the usual salutes, who had his wrist taken off when ramming home the charge.

The news from the interior announces a good crop. The people have already commenced to gather the paddy.

The gunboat No. 30 has brought back the Commandant Alleyran and Captain Baurchet, Inspector of Tay ninh. They will not return to their post before the end of the month, by which time they will have received instructions relative to the occupation of the high countries during the winter. It is supposed that the garrison at Tay-ninh and Trambang can be

Digitized by Google

greatly reduced, in consequence of the final retreat of the enemy. The chief of the partisans at Tay-ninh, well known at Saigon by the name of Dai-thin, arrived here after having travelled on foot a distance of one hundred and fifteen kilometres in forty-two hours. He was accompanied by thirty militiamen with fifteen buffaloes. This journey, in addition to those they had to perform as our scouts, did not fatigue the natives, who averred that they could at once commence a fresh one.

The feast of the Emperor was celebrated with a lively enthusiasm, the military and the civil residents uniting in a common demonstration of gratitude to this illustrious prince, who has established the colony of Cochin China, and who gives to it so many marks of the high solicitude which he bears towards it. The Asiatics and the natives themselves appreciate the greatness of the idea that directs the acts of France in the Far East. They are eager to render their respectful homage to this powerful and generous will which has extended the limits of the empire in order that the laws of humanity may reign. The solemnity received an extraordinary *eclat* by the presence of the frigate *La Guerriere* in the Roads, the Governer of Venh Luong also came within our walls to be present at this ceremony.

Our vessels were decorated with flags from daylight, they fired a salute of twenty-one guns, and an immense crowd was gathered at the avenue of the Place d'Horloge, where the troops and marines in full dress were arriving in large numbers. At a quarter to seven the Vice-Admiral Governor came out attended by Rear-Admiral Roze and a splendid retinue of officers and functionaries. He passed in front of the troops, which were under the command of M. Legiune, naval commander; there was then an admirable defile in which our marines vied with their comrades, the infantry, in their marching and the regularity of their evolutions. Then came in full trot the artillery, the cavalry and two sections of Fusiliers, the latter were placed on waggons to form a movable column. All these movements can only be described by a military man, but we must say they were on the whole executed with a remarkable precision, and that every one could read on the lively visages of our soldiers and marines the calm and resolute air of men who have faced danger, and who have shone elsewhere.

At eight o'clock the Governor and all the inhabitants attended the Pontifical mass celebrated by Dr. Miche, Bishop of Dansara. During the *Domine Salvum* the Naval Artillery belched forth a salute of twenty-one guns. All hearts in a profound recollection united in offering up ardent and sincere prayers for the success and happiness of our sovereign. If prayers are to be heard they are those of these devout souls, who have come so far to live and die for the glory of their religion and country. At noon the *Duperre* fired a salute of twenty-one guns.

MALACCA STRAITS.

SINGAPORE.

Dates from this port are to the 6th of September. This being only five days later than our last advices, there is no news of importance.

The *Singapore Free Press* exposes a glaring instance of naval mismanagement in the following paragraph:—"We have been informed that H.M.'s steamer *Icarus* has on board four very heavy guns, one of which will throw a shot of 100 lbs. in weight, but this shot ought to be an elongated steel one, whereas there is only on board the old common round shot, which is of no use for this gun. We believe that this fault lies with the authorities at home, for on application being made for the proper kind of shot the applicants were told there were none, and they were ordered to take the round ones. If the *Icarus* had been supplied with the proper material for this large gun, no doubt it would have been able to do excellent service upon the pirates who infest the coasts of China, but now it is perfectly useless."

An accident, attended with fatal consequences occurred on the night of the 2nd October in the harbour. It appears that the master of H.M. steamer *Coquette*, Mr. Long, had gone to sleep on the poop at the stern of the vessel, and whilst in that state he unfortunately happened to turn over, and in doing so fell overboard. In his fall it is supposed that his head must have struck against the screw. Search has been made for the body, but as yet no success has attended the efforts made by those who are endeavouring to find it.

According to the returns received from the several marine offices, the number of Chinese immigrants that have arrived at the different ports in the Straits Settlements has been as follows:—Singapore, 14,279 (including 655 females); Penang, 3,008; Malacca, 152; total, 17,439. From the first-named station 3,252 immigrants (all males) returned to China, whilst out of the arrivals 324 were embarked for the Mauritius, 4,187 men and 105 women for Penang and Malacca, and their immediate neighbourhood, and 2,761 men and 41 women for different native States in the Malay Peninsula.

The *Straits Times*, referring to Holt's Liverpool line of steamers, has the following remarks:—

"The overland route, while it offers a rapidity of transit impossible to be secured by any other means, is attended with so much expense as to nearly prohibit its being availed of as a channel for the transmission of merchandise, and to present a very formidable obstacle to travel. The charge for the transmission of a ton of measurement goods from Southampton to Singapore by the P. and O. Company's steamer is, as nearly as possible, fifteen pounds sterling, and the time occupied in transit is forty-one days if the goods are brought right through and not delayed, as is frequently the case, at any of the intermediate stations. It is only the most valuable articles of merchandise that can bear such a freight as this, and the great bulk are left to the four months' voyage by sailing vessel round the Cape.

"The new line will consist of steamers which, although not equalling in rapidity those of the P. and O. Company, will yet reduce the time of transit by a sufficient period to allow the interest saved on the value of such articles to equal the additional freight.

"The duration of the voyage from Liverpool to Singapore by these vessels is about sixty days—the rate per ton is £6, and it will be at once seen that this admits of the profitable transmission of a large class of goods that are precluded from the overland route. Take, for instance, one of our chief staples, manufactured cottons:—a bale of grey shirtings is worth here say £40—about six of them make a ton, giving a value of £240; the time saved by adopting these steamers in place of sailing vessels would not be less than two months, for which interest, calculated upon the value at the current rate of discount here, would amount to about £5; to this must be added say £2 for the freight charged by sailing vessel, exhibiting, in all, a saving of £7 against an expenditure of £6, or a balance of £1, in favour of the steamers, besides all the collateral advantages and the chances of the earlier market. A point, too, in favour of the transit offered to merchandise by ocean steamers as compared with the overland route, is the avoidance of the constant shifts inseparable from the latter, and which are so destructive to every description of package."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Andrews—On the 21st September, at Clay-hill, Walthamstow, Mrs. W. H. Andrews, of a son.

Ellissen—On the 30th Sept., at 28, Maida-hill West, the wife of A. Ellissen, Esq., of a son.

Louis—On the 23rd August, at Hong Kong, the wife of the Rev. W. Louis, of a daughter.

Padday—On the 27th Sept., at 65, Princes-square, Bayswater, the wife of Reginald Padday, Esq., of a daughter.

Pereira—On the 26th Sept., at Wolesley Hall, Stafford, the Hon. Mrs. Edward Pereira, of a son.

Rennell—On the 23rd August, at Whampoa, the wife of Captain T. B. Rennell, of a daughter.

Smale—On the 26th Sept., at 19, Great Marlborough-street, W., the wife of Mr. John Smale, of a son.

MARRIAGES.

Milne—Ferris.—On the 15th Aug., at Singapore, at the Presbyterian Church, by the Rev. W. Jeffreys, Mr. T. Milne, shipwright, Sandy Point, to Miss E. C. Ferris youngest daughter of Mr. John Ferris, Belfast, Ireland.

Rickett—Cooper.—On the 9th October, at St. Mark's, South Norwood, by the Rev. G. S. Drew, M.A., incumbent of St. Barnabas, South Kensington, John Rickett, Esq., of the Peninsular and Oriental Steam Navigation Company's Service, eldest son of John Rickett, Esq., of Croydon, to Anna, eldest daughter of William Cooper, Esq., of South Norwood. No cards.

DEATHS.

Andrews—On the 5th Aug., at Shanghai, China, on his homeward way, James, son of Wm. Andrews, Esq., Union Bank of Scotland, and the faithful representative and friend of Mr. Fredk. Hogg, of London.

Baker—On the 5th Aug., at Foo-chow-Foo, drowned while bathing, Christopher, third son of Henry Baker, Esq., of Kilburn, Middlesex, aged 26.

Cormack—On the 6th Oct., at 26, James-street, Peterhead, N.B., Mr. John Cormack, of the P. and O. Company's service, Hong Kong, in the 35th year of his age.

Coxford—On the 27th July last, at Foo-chow-Foo, China, in his 21st year, drowned while bathing, John William, eldest and beloved son of Mr. J. W. Coxford, of 55, Great Prescot-street.

Grey—On the 12th Sept., at Shanghai, Charles Grey. (By telegram via Kiachta).

Green—On the 16th August, on board H.M.S. Melville, George James Green, seaman, H.M.S. Osprey, aged 31 years.

Hornby—On Sunday the 30th Sept., at Dieppe, France, very suddenly, Emelia Bithynia, wife of Sir Edmund Grimani Hornby, Judge of the Supreme Court of China and Japan.

Lindsay—On the 20th August, at Chinkeang, of gastric fever, Robert Lindsay, tide-waiter, Imperial Maritime Customs, aged 37 years.

Macpherson—On the 3rd Oct., at 30, Grosvenor-place, Bath, Christina, the beloved wife of Colonel Ronald Macpherson, Resident Councilor, Singapore, and eldest daughter of the late Dr. M. T. Bethune, of Inverness, in her 45th year. Friends are requested kindly to accept this intimation.

Prata—On the 20th August, at Hong Kong, Ambrosio C. Prata, aged 73 years.

Williams—On the 23rd August, at Hong Kong, Edward Williams, late master American ship Ellen, aged 41 years.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight.	4s. 5½d.	4s. 6¾d. to 4s. 6¾d.
At Shanghai	6 ditto	6s. to 6s.,0½d.	6s. 1½d. to 6s. 1¾d.
(per Tael.)			
At Canton	6 ditto	4s. 4½d.	4s. 5d. to 4s. 5½d.
At Hong Kong			
At Macao			
At Singapore	ditto	4s. 5d. to 4s. 5½d.	4s. 5½d. to 4s. 6d.
At Manila	ditto	4s. 1¼d.	4s. 2d.

At Shanghai, bills on India, Rs. 298 per 100 taels. At Hong Kong, Rs. 218 per $100. Bar silver at Shanghai, tls. 111·2; at Hong Kong, 11 per cent. prem. Mexican dollars at Shanghai, tls. 74 per 100; and exchange on Hong Kong, 27 discount. Hong Kong and Shanghai Bank shares, 1 to 2 per cent. dis.; Gas Company, 10 per cent. prem.; Hong Kong and Whampoa Dock, 20 to 30 per cent. prem.; Steam Shares, 6 per cent. discount; Union Dock Company, 10 per cent. dis.

The latest telegrams, dated Shanghai 19th, and Hong Kong 23rd September, give Exchange at 6s. 3d. and 4s. 7d. respectively.

The following is from Messrs. Sharp and Co.'s Circular:—

Gold.—The arrivals have been $180,000 value and the exports $390,000, including the shipments per Orissa on the 12th Aug., and excluding those to leave to-morrow. Dollars offering a more favourable remittance; there has not been much demand for gold.

Silver.—Amount inwards, $190,000, including a lac per Yokohama from San Francisco. $390,000 have been sent away by the Bombay and Calcutta steamers.

Dollar Currency.—The large export of Mexicans to India still continues, and now that clean coin has advanced in Shanghai, we have no off-set in our imports. They stand relatively at $600,000 arrived, and $1,920,000 departed.

Exchange.—Has nearly recovered the fall reported in our last, but it is significant of the depressed state of trade that the rate should remain so low in the face of the enormous amount of treasure which has left China during the past six months. In sterling the business has been but small; the rupee quotation is merely nominal.

Discount and Mortgages.—Some first class mortgages have been placed at 12 per cent.; while 10 to 12 per cent. are the current rates for good loans at one to two months.

Shares.—Transactions have been confined to a few purchases for investment, with the exception of some large sales of steams made a week since at 5 and 6 per cent. In face of the heavy rates now demanded for accommodation, the arrangement made with Messrs. Russell and Co. for the sale of their steamers has not yet brought the company's shares to par.

COMMERCIAL REPORT.

CHINA AND JAPAN EXPORTS.

Tea.—Canton.—Business has been transacted on a very moderate scale during the fortnight—indeed, for the first ten days little or nothing was done in scented kinds, and the settlements reported below have all taken place within the last few days; for these kinds the market closes at rather firmer rates. In Country Congous but little has transpired, three more chops have been taken at about previous rates; five chops have arrived during the fortnight, so the present stock consists of 72 chops or 14,288 packages. Teamen continue very firm for Congous and likewise foreigners, hence so few settlements. Scented Teas: There are still a few fine parcels of S. O. Pekoe to be met with, but no really fine Capers remain. The settlements for the fortnight are 7,500 boxes Scented Orange Pekoe at from 23½ to 33 taels and 4,500 boxes Scented Caper at from 17 to 28 taels; the fourth crop however is close at hand, when it is expected there will be plenty of musters brought forward and some fine teas among them; the only other settlement is 200 boxes packed Congou at 21 to 26 taels. In Canton Gunpowders there are no transactions to report for this mail.

Amoy.—Congou: Notwithstanding the rise in prices reported in our last, buying has steadily continued, and some 5,000 packages have been taken at rather irregular rates, say $14¾ to $19½ for Common, and $21 to $23 for fair leaf to a little flavoury. Most of the settlements have been at the latter quotation. Oolong: The market was opened for America on the 20th, and a large business has been done. 9,000 half-chests are reported settled, but at least 15,000 have been taken. Prices are higher than was anticipated, say about $3 per picul over last year's opening rates. Common $18½ to $21. Good Common to Fair $23 to $26. Fair $26 to $28. Good $28 to $33 per picul.

Foochow.—Congou: Transactions since last mail have been on a smaller scale, owing in a measure to the cessation of Australian orders. The cost of Teas of good quality is a tael higher; the fall in exchange, however, makes the laying down price about the same. Common grades are easier. Teas have been coming down from the country the last day or two, and the receipts amount to 60,000 chests in excess of last season to same date. The second crop is about finished. Souchongs are without material change, teamen being unwilling at present to accept lower rates. Oolong: The chief feature of the fortnight has been the opening of this market at rates fully 12 taels higher than last year. Purchases have consisted of the finer grades, cargo kinds being comparatively neglected. Scented: A large business has been done. Prices show no change.

Shanghai.—Black Teas: The market for Congous has been extremely dull throughout the fortnight, the large export, and unfavourable Home advices having caused buyers to make a determined stand against prices ruling at date of the last. Holders remained very firm until within the last few days, when a decline of one tael was conceded, which has led to a fair business. Arrivals from Hankow have increased the stock to 42,000 packages amongst which there are some very good teas. Green Teas: The arrival of new Fychows has been checked, the very hot weather having dried up several creeks through which the boats have to pass. Two chops of fair make and quality have been settled from musters, at tls. 34½ and 39½ proportion. Moyunes cannot now arrive in quantity until another month. Five chops of Pingsuey have found buyers at tls. 35¼ to 38¾, and two chops of Shanghai-packed Fychows at tls. 32 and 37; prices rather higher than last month's settlements.

Hankow.—There had been a good business done, chiefly in medium Oopacks of the second crop, at prices fully equal to previous rates. Third crop Oopacks had commenced to arrive, and two crops had found buyers at taels 25¼ to 25¾ per picul. The quality is considered much about the same as that of last season. The Helen Nicholson and Elizabeth Nicholson were on the berth at £4 10s. per ton.

Kiukiang.—This port had been suffering from intense heat and inundation. Black Teas: A few shipments had been made to Shanghai on native account; only one small chop having been settled, and one chop remaining in stock. Green Teas: Small overland musters of three chops had arrived, but not been shown, and chest musters might be expected before next mail.

Yokohama.—There is again a considerable business in the tea market to report, and prices have steadily risen since the last advices of the 27th ultimo; an advance of $2 has been established, although some of the purchases show even a greater advance. The supplies from the interior are good, and are likely to continue so, as the price in Ichibus realised by native merchants is greater than when the highest price in dollars was paid in January. These purchases have been for the American market. Settlements amount to about 7,690 piculs.

Raw Silk.—Canton: The telegraphic news brought on by English Mail of the 10th July, gave an impetus to the market, and directly any inquiry was shown on the part of European buyers, prices, which before had been firm, advanced, and a fair business has been done. The stock of all kinds (some 2,500 piculs) is large, but principally consists of the commoner grades, for which the demand is not so great, and although the 4th crop is just coming forward, rates are more likely to advance than decline for the finer descriptions. Quotations and settlements are as under:—Tsaltee No. 1, at $580 to 600; Tsaltee No. 2, at $560 to 580, settlements 250 bales; Loong-kong No 1, at $560 to 590, Loong-kong No 2, at $540 to 570; settlements 200 bales.

Shanghai.—Since the last report a large business has been done, at gradually increasing prices, until the quotations given below indicate an advance of from tls. 40 to 70 per picul on former rates, and it is reported that first-class Chop Tsatlees have commanded even a still higher figure just at the close of the mail. Prices ruling in the country, including the enhanced cost of dollars, lay down the best Chop No. 3 Tsatlees at tls. 590 to 595 in Shanghai, and at this high cost large purchases are being made on native account, and even, with a moderate amount of settlements continuously going on, a great increase to the unsold stocks remaining on this market may shortly have to be reported. Tsatlees, Chops No. 3, 550 to 570 per picul; Market, No. 3, 500 to 555; do. No. 4, 540 to 550; do. No. 5 and com. 490 to 520; Taysaams, Chops No. 1, 540; do. No. 2, 520; do. No. 3, 490.

Yokohama.—It is a general impression now that we have hardly to expect more than 10,000 bales for this season. After a short and ineffectual attempt at shaking the firmness of the Japanese holders, operations had been steadily resumed when the mail of the 19th June reached this port. The chance, however doubtful, of a pacific adjustment of political difficulties in Europe gave a new impetus to business, and eager purchases cleared the market at once of the available stock of new silk. Arrivals during the fortnight do not exceed 250 piculs, and some disturbances arising from the dearness of rice have contributed to impede the usual traffic in several provinces. The fine silks have not yet made their appearance, and the highest price paid was given for Mybash of a quality above the medium. Settlements during the fortnight may be stated at 200 piculs of good medium Mybash, leaving an unsold stock of about 150 piculs, chiefly composed of old silks, which are so neglected that it is useless to quote them. Total settlements from the beginning of the season amount to about 600 bales, against 2,850 bales same last year. For silkworms' eggs total settlements to date are 65,000 cards, and the prices paid during the fortnight range from 3 to 5 boos. A few cards have found buyers at 6½ boos. The unsold stock is about 40,000 cards, and it is impossible to form an estimate of the probable quantity to be brought to this market this season. Mybash, medium, $740 to $700 per picul.

Drugs, &c.—Canton.—Cassia Lignea: Has been largely dealt in; 4,500 piculs have been settled at from $61.50 upwards until the present quotations have reached $18 to 18.25 for best Tywoo. Stock computed at 9,000 piculs. Cassia Buds: Remain without animation at $40; stock 60 piculs. Galangal: Unchanged at $1.80, with 400 piculs on stock. China Root: $3.50 to 4. China Galls: Are dull, and 200 continue to be offered at $13. Rhubarb: No stocks. Essential Oils and Star Anniseed: None on the market.

Camphor.—Hong Kong.—The sales during the fortnight amount to 900 piculs Formosa at $26 per picul unpacked, and the same price is asked for the remaining 600 piculs now in stock.

China Grass.—Shanghai.—Supplies of the new crop are now coming forward freely, and there are some 8,000 bales in stock. The market, however, is very quiet, and there is little business doing. Quotations for No. 1 White, 14 taels; No. 2, 11 to 13 taels; Green 9.5 taels.

RAW COTTON.

Hong Kong.—In the beginning of the fortnight large transactions took place at somewhat improved rates, and after some fluctuations the market remains somewhat as follows:—Bengal, $22.25 to 25 per picul; Tientsin, $23 to 25; Shanghai, $24 to 25.50; and Ningpo, $24 to 27. The sales amount to about 8,000 bags.

Canton.—There has been a general advance of a tael and a half in prices, and sales to the amount of 6,000 bales. The particulars of these operations are as follows:—

Shanghai.....	300 bales,	at taels	16 to 17	per picul
Ningpo.....	300 „	at „	17 to 18½	„
Shantung.....	2.400 „	at „	15 to 17½	„
Bengal.....	3,000 „	at „	15 to 17½	„

Amoy.—The few transactions reported below show no change in value. A brisk demand is expected as soon as a fall of rain makes intercourse with the interior less difficult. Sales for the fortnight are—270 bags Chefoo Cotton at $27 to 28½ per picul; 122 do. Tientsin do. at $24½ to 28½

Digitized by Google

per picul—leaving a stock of 3,867 piculs, which are equally divided between foreign hongs and Chinese. Quotations—Chefoo $26½ to 28½, Tientsin and Shanghai $25 to 27, Bengal $22½ to 23½ per picul.

Shanghai.—Stocks are much reduced, and the Chinese have been anxious to purchase for the river and coast ports. The prices have an upward tendency, and the quotation is tls. 15½ for Tientsin Cotton, and tls. 16½ to 17 for Shanghai Cotton.

CHINA AND JAPAN IMPORTS.

HONG KONG.

A very small business has been transacted in Cotton manufactures compared with last fortnight. Grey Shirtings have been neglected, and the market is decidedly weaker. T-Cloths and Yarn, particularly Nos. 38 to 42, however have been more in demand, but dealers show no inclination to buy "to arrive." Quotations both for plain and fancy cottons are almost unchanged. For Woollens, a brisk inquiry prevails, and prices still tend upwards. In Metals: There is no change to note. Coals: West Hartley have sold ex ship at 12 dols. per ton, and Sydney coal at 9 dols. to 10. Demand is very moderate and there are still considerable arrivals, holders however remain very firm.

FOOCHOW.

The following sales are reported: 500 pieces 7 lbs. Grey Shirtings, at $3.59 per piece; 100 pieces Spot Shirting (Assorted), at $5.60 per piece; 900 piculs Lead, at $8 per picul.

SHANGHAI.

An unusually small business has been transacted during the past fortnight, owing to the heavy clearances reported last mail, and prices of most descriptions have given way. Almost the whole of the goods that have been shipped to Japan are being re-exported to this, which helps to keep down prices here. Woollens: There is hardly any change to note. Camlets and Lastings can only be sold with difficulty. Long Ells are wanted, at quotation. Spanish Stripes are not asked for. At Hankow the import trade had been almost entirely suspended in consequence of the Yangtsze inundating the settlement; by last letters, however, the river had commenced to abate, and a good demand for Woollens and Cotton Goods was anticipated. Metals: All kinds have been neglected, and sales are difficult to effect at quotations. Coals: The market is very dull, and a further decline in prices has taken place. Transactions during the fortnight have been confined to Australian Coals. There is some demand for Japan and Formosa Coals. Arrivals since the 4th instant:—4,637 tons Great Britain, 1,219 tons from America, 2,382 tons from Australia, 990 tons from Japan—in all, 9,228 tons.

YOKOHAMA.

The improvement in business has not continued, but we have on the contrary to report a fortnight of extreme depression in all branches of the Import trade. With the exception of Black Velvets, Chintzes and Blankets, for which a somewhat improved inquiry has been felt, no demand whatever has existed for goods, and deliveries are upon a very unsatisfactory scale. In the absence of transactions, we do not alter our quotations for Shirtings, but they must be considered for the present quite nominal. The strong position of the Shanghai market has induced further shipments from hence, which if made duty free, will leave a small margin of profit. Yarn has been placed to a moderate extent at our quotations, and the stock has not sensibly diminished. In metals, we notice a small sale of lead at a decline upon former rates. Sugar has also been offered upon easier terms, owing to the increasing supply.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Yokohama.— None.

At Shanghai.—From Cardiff, Aug. 20, Esperanza, Canvass Back, Silesia; from Newport, 14, China; from Hamburg, 20, Hanover.

At Hong Kong and Canton.—From Newcastle, Aug. 12, Greyhound; 13, Veritas; 16, Abbotsford; from Cardiff, 23, Dr. Peterman; 24, Lion; from Newport, 24, Oulust; from Hamburg, 14, Flora; from New York, 24, Panther.

At Manila.—None.

At Singapore.—From England, H.M.'s Icarus; from Liverpool, Aug. 30, Ajax (str.); from Glasgow, Douglas Castle, H. Dorter; from Sunderland, Nereus, Indian Empire; from Cardiff, Isis, G. L. van Leinberg; from Newcastle, Regina Maris.

At Penang.—From Liverpool, Aug. 25, Ajax.

DEPARTURES.

From Yokohama.—None.

From Shanghai.—None.

From Foochow.—For London, Aug. 9, Marion.

From Hong Kong and Canton.—For London, Aug. 7, Melbreck, Valdivia; 14, the Cedars. For New York, Aug. 11, Music; 21, Challenge.

From Manila.—For Liverpool, Aug. 11, Benjamin Bangs; for Cork, 13, Fruchoe; for New York, 17, Lady Blessington.

From Singapore.—For London, Aug. 24, Gananoque; Sept. 4, St. Andrews Castle. For Liverpool and Glasgow, Sept. 5, Huntley Caste.

From Penang.—For London, Aug. 28, Elizabeth Victor.

VESSELS EXPECTED.

From Yokohama.—Thomas Dryden.

From Nagasaki.—Queen of Avon, Chanticleer (put into Pernambuco for repairs).

From Hankow.—Eliza Shaw, Hoang Ho, Gossamer, Sir Lancelot, Napoleon III., Highflyer, Fine Queen.

From Shanghai.—Ethiopian, City of Aberdeen, Burdwan, J. R. Worcester, Pakwan, Coulnakyle, Cinderella, Fusiyama, Vigil, Star of China, Peterborough, Coral Nymph, Blencathra, Nelly, Illimani, Lansdowne, William Mcduish, Charlgrove, Agamemnon.

From Foochow. Belle of Southesk, Tamana, Feronia, Laurel, Lennox Castle, Sovereign of India, Amber Witch, Zingra, Maitland, Devana, Everest, Ornate, Philomela, Dewa Gungadhur, Marion.

From Canton.—Deerhoot, John Milton, Alma, Island Queen, Taymouth Castle, Victoria, Cedars, Melbreck, Valdivia.

VESSELS LOADING.

At Yokohama.—For London, Conference; for New York, Eliza Hands, Vanda, Receife.

At Hankow.—For London, Helen Nicholson, Elizabeth Nicholson.

At Shanghai.—For London, Wild Deer, Dartmouth, Sir W. F. Williams, Polmaise, General Caulfield, John Paul, Janet Mitchell, Ann Adamson, Marquis of Argyle, Westminster, Camila, Agamemnon, Knight of Snowdon; for New York, Tycoon.

At Foochow.—For London, Ellen Rodger (full), Naomi, Northfleet, Seawfell, Dunmail, Louisa, Fontenaye; for Liverpool, Veronica; for New York, Queensland, Adelia Carleton.

At Penang.—For London, Persian Empire, Raby Castle; for Liverpool, Monteagle.

At Hong Kong and Canton.—For London: Mary Nicholson (full), Kelso, Solent. For New York: Bella, Runnymede.

At Manila.—For London: Punjaub. For Liverpool: Mercia, Sterling.

At Singapore.—For London: Idemnity, City of Edingburh. For Liverpool: Lochleven Castle, Unrivalled, Blandina Dudley.

FREIGHTS AND CHARTERS.

At Yokohama.—To London: Cotton and Tea £2 10s. to £3 per ton; Silk, £4 to £4 10s.

At Hankow.—To London: The rate asked is £4 10s. per ton; two vessels are on the berth.

At Shanghai.—Tonnage is abundant, and rates to London have declined to £2 to £1 10s. per ton of 50 cubic feet; to New York, £2 10s per ton of 40 cubic feet.

At Foochow.—To London: £2 10s. per ton per wooden vessels; and £2 for iron vessels.

At Hong Kong and Canton.—In home charters direct nothing has been done, and rates for London to load at Whampoa must be quoted £1 10s. per ton. More activity prevails in coast charters. The circular of Geo. Holmes estimates the number of disengaged vessels in harbour at 61 (exclusive of Siamese), representing 35,859 tons.

At Manila.—The settlements of the fortnight show a slight decline on previous rates, and the inquiry for tonnage being very limited, it is doubtful if present rates will be maintained. The transactions are:—The Punjaub to London, at £2. 5s. for Clayed and £2. 10s. for Unclayed Sugar. The Mercia, for Liverpool, has only engaged part cargo, at £2. 7s. 6d. for Unclayed, and £3 for Hemp.

At Singapore.—The vessels on the berth are loading at £2. 10s. per ton dead weight, and £2. 5s. light freight.

For London.—The Raby Castle is on the berth at old rates: £1 Tin (none yet engaged); £1. 10s. Tapioca Flour; Sugar, £1. 10s.; Pepper, £2. 10s.; measurement, £3. 5s.

COMMERCIAL POSTSCRIPT.

A meeting of the shareholders of the Bank of Hindustan will be held shortly, to consider proposals for the reconstruction of the bank, and the reduction of the nominal £100 share. A call of £3 per share has been made, payable on 9th Nov.

The seat on the board of the Oriental Bank, vacated by W. W. Cargill, Esq., has been filled by the appointment of D. I. Ray, Esq., of Messrs. Finlay, Hodgson and Company.

It is rumoured that another bank is about to be established for India and China.

The Circular of Messrs. Sillar and Company states:—

Silver.—The Market has been quiet, without any alteration in the price, and few transactions of importance have taken place, the amounts offering during the last few days having been very limited, and the only demand at present still being for the Continent. The *Syria*, sailing from Southampton to-day for Bombay, takes no Silver, and only £5,000 in Sovereigns for Alexandria. Mexican dollars continue without demand for the East, except for occasional transactions, and all arrivals at present are being purchased for conversions into bars.

Digitized by Google

Exchange.—There has been an active inquiry for the Indian Government Rupee paper and Council Bills, sales of the latter having been effected at from 1s. 11½d. to 1s. 11¾d.; the amount advertised to be tendered for on the 17th instant is 32½ lacs.

Tea—The *Eliza Shaw* and *Min* have arrived from Hankow with the first of the new Monings.

Silk.—Telegrams from Shanghai to 19th September quote No. 3 Tsatlee at 570 taels.

The P. and O. Company's new steamer *Surat* will make another voyage to Alexandria previous to proceeding to the Indian station. She has proved a very satisfactory vessel during her last trip.

An extraordinary general meeting of the shareholders in the Singapore Gas Company will be held at the London Tavern on the 30th inst.

Arrivals not in the Tables.—Oct. 9, at Falmouth, from Bassein, Cornelia; from Singapore, Pieter Adolf; off Penzance, from Singapore, Nancy; at New York, from Colombo, Meg Merrilies; 9th, off Dover, from Batavia, Europia; off Beachey Head, from Ceylon, Aboyne; 10th, at Falmouth, from Rangoon, Damis; from Sourabaya, Mary Ann; 8th, off Penzance, from Batavia, D'Elmina; 10th, at Crookhaven, from Rangoon, Hindostan; 11th, at Liverpool, from Rangoon, Tudor; 10th, at Brouwershaven, from Batavia, Joh Antonius de Voorgd; 11th, off Weymouth, from Hankow, Eliza Shaw; 10th, at Scilly, from Java, Franz and Elise; from Akyab, Leila; off Scilly, from Foo-chow-Foo, Yang-Tsze; from Akyab, Warwick, Clifton Belle; 12th, at Liverpool, from Singapore, Patriot Queen; 13th, from Rangoon, Hippolyta; at Falmouth, from China, Min; 11, at Brouwershaven, from Padang, Julie; 15, off Portland, from China, Western Chief, off Scilly, from Singapore, Moncka; at Liverpool, from Rangoon, Senator Webb.

Departures.—Oct. 9, from London, for Manila, Angela; 6, from Shields for Batavia Anna; 9, from London, for Swansea, Shanghai, J. H. Schwensen; 8, from Cardiff, for Colombo, Phillip; from Shields, for Colombo, Augusta May; 10, from London, for Galle and Malabar Coast, Star of Ceylon; 11, for Colombo, Frances, Thames; for Shanghai, Taeping; 13, for Hong Kong and Canton, Ariel, 11, from Shields, for Canton, Egeria; 15, from Liverpool, for Manilla, Maria y Vicente.

Laid On.—At London, for Hong Kong and Canton, Dora; at London, for Colombo, Aboyne; at Liverpool, for Galle, Star of the South.

Casualties.—The Susanna Johanna, Pieters, from Batavia to Rotterdam, which put in at St. Helena, Sept. 6, had encountered bad weather, and it was said that the master had been recommended to obtain a supply of spars, sails, &c., and proceed.

The Star of Ceylon, Matther, which left London for Ceylon, &c., on the 10th inst., was sunk off the South Foreland on the night of the 11th inst. by collision with the Spanish steamer Velasquez, from Malaga, the master and eleven men of the Star of Ceylon have landed at Folkestone, and two men at Dover, one is said to be missing.

At Simon's Bay.—Aug 25., Lochnagar, Baskfill, from Manila.

The appointment of Mr. Julian Pauncefoot as Attorney-General of Hong Kong, already announced by us, has been officially gazetted.

Peru and the Chinese Coolie Trade.—The attention of the leading citizens of Lima had been called to the systematic abuses of the coolie trade, and the Government was strongly urged to adopt stringent measures for the regulation of the execrable traffic. It appears that from thirty to forty per cent. of the labourers embarked in China for the South American coast die on the passage thither, owing to the crowded state of the vessels and the entire absence of all sanitary precautions. No laws exist regulating the number of passengers by the tonnage of the ship, and to supply this deficiency the Government had been petitioned. Since the abolition of slavery planters have grown to depend upon Chinese labour entirely, and claim that if the coolie traffic was wholly suppressed the result would be ruinous to the agricultural interests of the country. Conceding the iniquity of the trade as now conducted, the authorities are asked to make strong laws, with a heavy penalty attached for their infringement, so that the business may be divested of some of its more horrible phases.

RESUSCITATION OF THE AGRA AND MASTERMANS BANK (LIMITED).

The plan for the resuscitation of the India and China portion of the bank's business has now been made public in the form of a circular to the shareholders. The proposed capital is to be £1,000,000, consisting of £600,000 estimated surplus assets after paying all claims, and £400,000 by the issue of 40,000 shares of £10 each, to be subscribed by the public or the existing shareholders. The plan is of a most elaborate description, and if carried through will tend very much to lessen the inconvenience now felt by creditors who are too poor not to be seriously inconvenienced by the postponement of their claims in the winding-up process now going on, although Mr. Cannan has worked very hard to reduce the time of such postponement, and the payment of 5s. in last month was an agreeable surprise to a large number of creditors. The announcement that there will be £600,000 surplus after paying all creditors has also surprised many shareholders who have been disposed to listen to tales of mismanagement and imprudent operations. All these stories are capable of very easy solution. It was a mistake to attempt to be a London bank as well as an India and China Exchange bank. The "Bears," who are described by the *Economist* as "the scavengers of the Stock Exchange," found out certain weak points, especially connected with the Paris branch, and they combined to pull it down; but for that combination we are convinced it would now be standing. One of the wisest propositions in the whole scheme is the small amount (£10) of the proposed new shares; this will render the launching far easier than by keeping the shares at the old amount (£50). It would have made the proposals more complete had the names of the proposed directors been given; the only name announced is that of Mr. Thomson, of the Madras Irrigation Company, and one of the directors of the old board. To impart confidence the names of first-class merchants unconnected with the late board will be necessary, and the proposed direction should not consist of more than seven gentlemen.

"Proposal for the Resuscitation of the Indian portion of the Business of the Agra and Masterman's Bank (Limited).

"In order to carry out a strong and earnest desire entertained by the shareholders of the Agra and Masterman's Bank (Limited), it has been determined, after conferring with some of the principal shareholders, to endeavour to revive the portion of the business formerly carried on by the old Agra and United Service Bank. Shareholders representing one-fourth of the entire capital have consented to act provisionally as a committee, which every shareholder is invited to join, to aid in carrying out the necessary arrangements until a public meeting of shareholders can be held.

"It has been satisfactorily ascertained, after conference with some of the managers of the principal Indian branches, that a large and important portion of the business will be secured to the bank, if it can be revived under its old and well-known title. No bank ever stood higher in India than the Agra and United Service Bank, and there seems no reason to doubt that if the bank be reopened and carried on upon its old basis it would receive large and influential support. The very fact of its revival would be an evidence of strength, and a large amount of its former credit would, it is believed, return.

"With a view to a resuscitation of the bank, Mr. Thomson, one of the members of the late board, and also of the above-named committee, with the assistance of some of the most efficient *employés* of the late establishment, has undertaken and completed an elaborate and detailed analysis of the bank's assets and liabilities. The result of this investigation shows that, after deducting all bad and doubtful debts, and making a full allowance for contingencies on outstanding transactions, there will remain not less than one-half, and probably two-thirds of the capital after payment of all claims. This is borne out by the statement of Mr. Cannan, the liquidator of the bank, whose approximate estimate showed a surplus of assets over liabilities of £1,000,000 sterling. In order, however, still further to confirm the accuracy of this analysis by the best independent and most impartial testimony, Mr. David Chadwick (of the firm of Messrs. Chadwick, Adamson, M'Kenna, and Co.), an accountant of leading reputation, who, as one of the auditors of the Consolidated Bank, took an active part in the resuscitation of that institution, and who also carried out the scheme for the resuscitation of the Preston Bank, recently reopened, was invited to go over the statements prepared. Mr. Chadwick has with the most careful minuteness tested them by reference to the books of the bank, which Mr. Cannan placed at his disposal for that purpose, and has not seen occasion to make any material change in the estimate submitted to him, but has suggested that to provide for losses which might possibly arise, but which there is at present no reason to anticipate, the sum of £600,000 may with all safety be taken as the balance of assets over liabilities.

"The following plan, based upon Mr. Chadwick's estimate, will provide a total paid-up capital of £1,000,000, which is considered necessary for the resuscitated bank, and of which it is proposed to raise £400,000 by the issue of new shares.

"It is intended that this capital should be represented by—

"40,000 A shares of £10 each, representing the new capital of £400,000, which will be called up as follows:—£1 per share on application, £2 per share on allotment, £3 in July, 1867, and £4 in January, 1868, with power to pay up in full at any of these periods, dividends being allowed on all payments *pro rata*.

"60,000 B shares, represented by scrip certificates of £25 each, on which £10 per share will be considered as paid up, as an interim amount for the purpose of dividends, &c., representing the above £600,000 estimated balance of assets over liabilities; but, notwithstanding this interim arrangement, the total liability of £25 per share will remain until the end of two years, when the actual balance of assets over liabilities will be ascertained, and if the same shall fall short of £600,000 the B shares will be liable to calls to make up any deficiency, all such calls to go in reduction of the liability of £25 per share, which in no event will be exceeded.

"Each holder of shares in the present bank will receive in exchange a corresponding number of the B shares.

"If the balance of assets over liabilities including expenses shall, in accordance with the estimates above referred to, be found at the end of two years to exceed £600,000, then the excess shall, from time to time, as realised, be divided rateably in cash among the holders for the time being of the B shares.

"So soon as the debts shall have been paid and the above-mentioned £600,000 realised the 60,000 B shares shall be converted into £10 fully paid up shares, and all further liability on the B shares will be extinguished. The distinction between A and B shares will then end, all the shares thenceforth ranking alike.

"The constitution of the company will be specially framed to provide for these arrangements.

"The proposed paid-up capital of £1,000,000 sterling, supplemented by a reserve fund, for which it will be seen careful provision has been made, will, it is believed, be sufficient to place the bank in a strong position, and secure for it public confidence and support under its re-organised constitution. The committee propose that for the first two years the 40,000 A shares, representing the new capital, shall receive out of the profits a preferential dividend of 10 per cent., that then the 60,000 B shares, representing the old capital, shall be entitled to 10 per cent., and that all profits above 10 per cent. shall during the two years go to the reserve fund. After the end of two years all the capital will participate alike in the future profits, with this proviso, that at least one-half the profits above 10 per cent. shall go to a reserve fund, and be invested in Indian or other Government securities, until the reserve be equal to one-half the capital.

Digitized by Google

"The resuscitated bank, on the requisite consent of shareholders and creditors being obtained, will be prepared to take over the existing assets and liabilities, and guarantee to the creditors payment of the balance (after deducting the first dividend of 5s. in the pound already paid) of their claims—viz., 15s. in the pound, by the following instalments, each instalment to bear 5 per cent. interest, and to be represented by promissory notes of the bank, viz.:—3s. in the pound in January, 1867; 3s. in the pound in July, 1867; 4s. in the pound in April, 1868; and 5s. in the pound in October, 1868.

"The committee are satisfied that upon the requisite arrangements being completed the capital will be readily subscribed on the terms proposed, whereby—

"AS TO NEW SHAREHOLDERS.

"1. They are protected, as already explained, against the balance of assets over liabilities falling short of the estimated amount of £600,000.

"2. The new shares will be entitled to a preference dividend of 10 per cent. for the first two years.

"3. They will participate in the benefit of the business connections and goodwill of the bank, which to a great extent must pass to the new concern as inheritors of the old title and as possessors of the assets.

"The committee would further point out both to creditors and shareholders that the proposed arrangement insures better results than can possibly be expected from a continuance of the liquidation.

"AS TO CREDITORS.

"1. It fixes, with the consents of all necessary parties, and thereby free from all risk of litigation or question, the precise dates when the balance of the creditors' claim will be paid; this is not unimportant, having regard to pending proceedings in other companies.

"2. Their claims will be immediately represented by negotiable instruments available for discount.

"3. They will have the additional security of the £400,000 new capital.

"AS TO PRESENT SHAREHOLDERS.

"1. They will be protected from calls for two years certain, and if the assets realised the reduced, and as it is believed perfectly safe, estimate of £600,000, there will be no necessity for any calls.

"2. The assets are sure to produce much more in the hands of a working bank than under liquidation.

"3. The present shareholders may reasonably hope in the future to make up a portion of their loss partly out of the balance of assets over £600,000, which it is believed will be realised by the carrying out of the proposed scheme, and which, when realised, will be payable in cash, and partly by the growing value of their shares in the resuscitated bank.

"There is no reason to doubt from the assurances of support which have been given by many of the old constituents of the bank that it will in the course of a short period, after its re-opening, recover its former status, and a large proportion of its profitable connection.

"Time is of the utmost importance, and the committee earnestly solicit the concurrence of their co-shareholders in their efforts to carry out the present proposal, which, after the most careful and anxious consideration, they have satisfied themselves is in every respect the most practicable and beneficial, both for creditors and shareholders.

"All communications may be addressed to James Thomson, Esq., Nos. 8 and 9, Queen-street-place, Southwark-bridge, London; or to the undersigned. "(By order)

"CHADWICK, ADAMSON, McKENNA, and Co.

"October 10. 40, Old Broad-street, London.

"When this proposal has been approved by the shareholders, the consent of the creditors will be at once applied for."

Accompanying the foregoing, the annexed circular has been issued to the shareholders:—

No. 40, Old Broad-street, London, Oct. 10.

We beg to forward to you as one of the shareholders of Agra and Masterman's Bank (Limited) the enclosed proposal for the resuscitation of the portion of the business formerly carried on by the "Agra and United Service Bank." We are desired to request the favour of your attendance at a meeting of the shareholders, at the London Tavern, Bishopsgate-street, in the City of London, on Thursday, the 18th day of October, 1866, at one o'clock in the afternoon, to consider the proposal. We enclose a ticket which will admit you to the meeting. If you should be unable to attend the meeting, will you be pleased, if you approve of the proposal, to return to us the enclosed form of assent thereto, signed, as soon as possible. The shareholders can best appreciate the value of the proposed arrangement by the fact that payments to be made on the new shares might otherwise be required as calls on their existing shares, whilst the new shares are believed to be an excellent and safe investment, and it is on that ground solely that it is anticipated the new capital will be readily subscribed, if the existing shareholders manifest their own faith therein by subscribing for a substantial proportion. We beg to subjoin the names of the shareholders (holding in the aggregate upwards of 16,000 shares) who have already intimated their willingness to acquiese in the proposal. We are, your obedient servants,

CHADWICK, ADAMSON, McKENNA and Co.

We append the comments of our contemporaries on the scheme:—

(THE TIMES.)

The plan for the resuscitation of the Agra Bank has been very favourably regarded to-day in all quarters, and the shares, which have lately been without a quotation, are now negotiable at 4 to 6. It seems that according to the most guarded estimate there is a clear total of £600,000 of surplus assets that will be available to be returned to the shareholders out of their £1,500,000 of paid-up capital, and it is now proposed to raise an additional £400,000 in 10 per cent. preference shares, and by the combination of these sums to start with a capital £1,000,000. The plan seems alike favourable for creditors and shareholders. To the creditors it will insure payment of their claims in full, with 5 per cent. interest within an average of little more than a year, while it will also doubtless enable them to obtain in the interval advances upon these claims at very moderate rates. As regards the shareholders, it will not only avert the payment of calls that would otherwise be necessary, but will recover for them all the advantages of the good feeling entertained in India towards the bank, and at the same time add greatly to the value of the existing assets and the prospect of their early realisation. The revived undertaking will likewise enjoy the active sympathy which from the time of the panic to the present hour has been felt, owing to the way in which its ruin was caused by the gamblers who were encouraged in their course by official toleration.

(DAILY NEWS.)

The expected plan for the resuscitation of the Indian portion of the business of the Agra and Masterman's Bank (Limited) has evidently been framed with great care and much thought. It has a sufficiently broad basis, inasmuch as the shareholders forming the provisional committee represent one-fourth of the entire capital of the old bank, and this committee is open to have its number further added to. Considering that, according to the estimates put forward on the competent authority of Mr. Cannan, the liquidator, Mr. Thomson, one of the members of the late board, and Mr. David Chadwick, "there will remain not less than one-half, and probably two-thirds, of the capital, after payment of all claims," the rescue of some portion of the shareholders' property, as comprised in the goodwill of this old-established business, would certainly seem to be well worth a united effort. Any difficulty that may have to be overcome will propably arise chiefly on the side of the creditors, but the strong point urged by the committee is that both to creditors and shareholders "the proposed arrangement ensures better results than can possibly be expected from a continuance of the liquidation." The old bank was so popular in India that if it be revived, with a direction of undoubted influence and character, and avoid the error of commencing business in too many places at once, there can be little doubt that all parties will ultimately be better off for co-operating in the present movement.

(MONEY MARKET REVIEW.)

The business of the Agra and United Service Bank, as it stood before the amalgamation with Messrs. Masterman's Bank, was always a profitable business, and year by year it was becoming wider and more remunerative. Why the amalgamation was effected, and how the collapse of the amalgamated bank was brought about need not now be recapitulated. It is sufficient to say that the stoppage, had more consideration been shown, was unnecessary. It is now proposed to resuscitate the Indian portion of the business, and with this view a Provisional Committee, representing one-fourth of the entire capital, are inviting the shareholders generally to aid in the necessary arrangements until a public meeting of the whole body can be held.

The plan of resuscitation has the two merits of simplicity and practicability. In the first instance, it has been ascertained, from the managers of the principal Indian branches, that a revival of the bank under its old title will secure a large and important portion of the business now suspended, and, in the next, that, after all deductions and the payment of all claims, there remains a surplus of not less than one-half, it may be two-thirds, of the capital. The estimate of the liquidator is £1,000,000, but, in order to be within safe limits, it is taken, after a careful analysis by Mr. David Chadwick, at £600,000. There is thus a solid basis of operations—a business and a capital; and the question is how shall these essential elements be adapted so as to insure the success of the resuscitated bank. India and England are both interested in this question. It appears to us that the means proposed are the best that could be devised, and that, as just said, they present the advantages of simplicity and efficiency.

A capital of not less than one million paid up is considered necessary. Of this million, £600,000 may be considered as already provided by the present shareholders from existing assets; and it is proposed to raise the other £400,000 by subscriptions to 40,000 new shares of £10 each, to be called up at specified intervals, extending over nearly two years. The £600,000 will be represented by scrip-certificates of £25 each, on which £10 will be considered paid up, thus representing the estimated balance of assets over liabilities. And so the capital is supplied. It is estimated that in two years the actual balance of assets over liabilities will have been positively ascertained. If, as expected, there should be a surplus of assets beyond the £600,000, the excess will be divided rateably in cash among the holders of the £25 scrip certificates, who are the existing shareholders; and, as the £10 shares will by that time be paid-up, the distinction between the two classes of shareholders will then cease, and they will rank alike. But for the two years the holders of the 40,000 £10 shares, representing the new capital, are to receive out of profits a preferential dividend of 10 per cent., and the holders of the 60,000 scrip certificates, representing the old capital, are next entitled to 10 per cent. Provision is made for the creation of a reserve fund, until it reaches one half of the capital.

Then there remains the case of the creditors who have already received an instalment of 5s. in the pound. How are they to be secured their remaining 15s.? In this way. The resuscitated bank will, with the consent of the creditors and the shareholders, take over the existing assets and liabilities and guarantee to the creditors the payment of the balance, with interest at 5 per cent., in four half-yearly instalments. Thus, the creditors' claims will be represented by negotiable instruments based upon the security of the old and of the new capital; they will be safe against litigation, and at definite dates their claims will be satisfied.

As to the shareholders, old and new, it is easy to perceive the improved position which they will hold. The old, for example, will be protected from calls for two years certain, and they will in all probability receive back in cash a portion of their present losses out of the surplus assets, which will certainly realise more in the hands of the resuscitated bank than in the hands of the liquidator. The new shareholders will possess equivalent benefits, besides their preference dividends for two years, from the business connections and good-will of the bank and as possessors of the assets.

The provisional committee who make these proposals have very justly reminded both creditors and shareholders that the arrangement *ensures* better results than can possibly be expected from a continuance of the liquidation. An impartial consideration will satisfy the public of the soundness of this conclusion. The question then is, cannot the friends, connections, and shareholders in a bank that was so highly esteemed as the Agra do for the very profitable Indian business of that bank what the friends, connections, and shareholders of the Preston Bank have done? and what those of the Consolidated Bank have done? We are sure they can; and we feel confident they will.

HONG KONG AND SHANGHAI BANK (LIMITED).

Another meeting of the shareholders in this bank was held at Hong Kong on the 16th August, when a statement of accounts and a report of the position of the establishment was issued to the shareholders. A dividend of $5 per share, equivalent to 8 per cent. per annum, was declared, and an announcement—which we think calculated to prove very beneficial—also made that it had been decided to postpone the opening of agencies in India. The bank had been particularly fortunate in escaping the heavy losses which have been incurred during the present year by most other banks, and considering that three banks have been removed, it is to be presumed that the Hong Kong Bank will participate in the business necessarily distributed. By the returns of the circulation of bank-notes, published in our last, we observe that the amount issued was much larger than any other bank, which shows that considerable confidence is felt in the institution. The more the directors confine themselves to local operations, and avoid distant branches with their heavy expenses, the larger will be their dividends. The local ordinance alluded to in the report to be found in our advertising columns has passed its second reading in the Legislative Council. The following is a report of the meeting, in which it will be seen that the CHAIRMAN denied the transaction alluded to in our previous issues as the "Dumbarton" operation with the Agra Bank:—

Before commencing, Mr. C. H. STORY begged to ask the chairman whether there was any probability of the proceedings of the day being invalidated by the full period of notice of the meeting, as required by the articles of association, not having been given.

The CHAIRMAN read out clause 40 of the articles, by which it appeared that "14 days at the least" were required to be given. He then referred to the date of the advertisement, which proved to be the 4th August, but the MANAGER intimated that the announcement had appeared on the evening of the 3rd.

Mr. STOREY said that the requisite notice had not evidently been given, but that he personally had no objection to urge; he wished, however, for a legal opinion on the point.

The CHAIRMAN expressed his inability to give a "legal" opinion, and as the legal adviser had not arrived his only course would be to put the question to the meeting. This was accordingly done, and it was unanimously decided to proceed to business.

The CHAIRMAN, after reading the directors' report, congratulated the shareholders upon its favourable nature. With regard to that portion of it having reference to the incorporation of the company, he thought they might consider that the ordinance had passed into law with some slight alterations which were to the company's advantage. In reference to the new capital there could be little or no doubt that the few remaining shares would be taken up. The number unappropriated was under one thousand, and it was their intention to announce by advertisement that the period of application would expire on the 31st inst. The chairman concluded by moving the adoption of the report, which was seconded by the DEPUTY-CHAIRMAN (Mr. Woldemar Nissen).

The CHAIRMAN having invited expressions of opinion, Mr. R. S. WALKER (after a considerable pause) rose to make a few brief remarks and to put a few questions which he hoped would not be considered beyond the bounds of pertinence. He would venture to suggest that in future reports the abstract of liabilities and assets, and of profit and loss account, be furnished in somewhat greater detail. He had compared the present report with the last, and had found the information given in the present one less full and complete. In the case of the abstract of liabilities and assets it might be that it arose from a change in the mode of keeping the accounts; but in proof of the correctness of his assertion he would point out that in the previous abstract two very heavy sums appeared, one of no less than 3,393,430.75 under the head of assets, and one of 1,548,219.18 under the head of liabilities. The sums were credited nd adebited respectively to "Branches andAgencies." In the present abstract "Branches and Agencies" did not figure at all, and no doubt these amounts had been merged with others on either side of the account before completing the abstract, and that a few words would explain this apparent discrepancy. He found no distinct entry showing the bank's liability on their issue of notes. He was aware that resident shareholders could obtain this information from an examination of the monthly returns in the *Government Gazette*, but he thought the report would be more complete if the item of notes were made a distinct entry in the balance-sheet abstract. He would also suggest in regard to the profit and loss abstract that, in future, in place of the net profits only being given, the gross profits should be stated on one side of the account and the interest and gross expenses on the other side; and in support of the reasonableness of the suggestion he produced the last report of the Agra and Masterman's Bank, which supplied these particulars to its shareholders. He also had with him several other reports, among which he might name the China Fire Insurance Company's and the Peninsular and Oriental Company's. Neither he nor any other shareholder required to know anything that they ought not be told, nor anything the publication of which the competitors of the bank might turn to their own purposes; but he thought that the abstracts might be made rather more full without injury to the bank. He presumed by the absence of all allusion to the Commercial Bank, that either they were not involved with that establishment, or that some set-off had been arranged. He now came to that part of the report in which the name of the Agra and Masterman's Bank was introduced, and he would like to know, if it were convenient, what amount the bank stood to lose in all, supposing, for the sake of calculation, that the Agra paid nothing in the pound. If he understood the report correctly there was rather a large sum—of, say, about 81,000 dols.—carried forward to meet the contingencies under this head; and supposing the Agra to pay their creditors 15s. in the pound (which was the most unfavourable view he had heard of the probable result of the winding up), 81,000 dols. would represent a liability of nearly three and a quarter lacs, which appeared to him to be a very heavy sum. While on the subject of the Agra Bank, he would wish to know whether there was any truth in the current report that, in consequence of private information sent to the agent of the Hong Kong and Shanghai Bank, he negotiated a large amount of bills on the agents of the bank in Hong Kong and London to the agent of the Agra Bank at Shanghai, who was in ignorance of the failure of his bank, it being the intention of the Hong Kong Bank, in place of honouring the bills, to place these amounts as a set-off against a debt or debts incurred by the Agra Bank with the Hong Kong Bank before the suspension of the former. He hoped that the chairman could contradict the report altogether, for, if not, he (Mr. Walker) could not but think it was a most unfortunate transaction. There was also a report that the bills on Hong Kong had since been honoured, and he only hoped that it was not too late to arrange that those in London should be similarly treated. His concluding question had reference to the audit, and he would preface it by saying that it was absurd to suppose that any remark or question he or any other shareholder might put could be intended to convey any want of confidence in such a direction and such auditors. The same remark equally applied to their manager, whom they all held in such respect and esteem; but it must not be forgotten that he could not be with them for ever, and on his (Mr. Kresser's) account he would not wish such a thing. In choosing at some future time a successor to their present worthy manager they might unfortunately, and without knowing it, elect a second "Redpath" and hence the necessity for a careful audit. He must again be pardoned for referring to the Agra and Masterman's report, and would read what the auditors were there required to certify. "We have examined the preceding statements Nos. 1 and 2 (balance-sheet and profit and loss) with the books, vouchers, and securities at the head-office in London, and with the detailed returns and balance-sheet signed by the auditors of several branches, and we hereby certify to the correctness and satisfactory character thereof." His question was, whether the audit was a careful one or a mere matter of form.

The CHAIRMAN, in reply, stated that he was convinced that the hon. shareholder had made his remarks and put his questions in the most disinterested spirit, although the expediency of some of them might be doubted. As regarded the accounts being rendered in greater detail, it was not the wish of the directors to withhold any information which might be reasonably expected, nor was it customary to print more details than would be found in the report. Any particulars not contained in the report could be had by application to the manager or to himself.

Mr. WALKER here asked how absent shareholders were to inform themselves.

The CHAIRMAN said that they could do so by their proxies. He could not see what advantage could be derived from affording more information to the public than had been given, but, if the shareholders thought otherwise, they had only to express themselves so, and the directors were quite prepared to abide by the decision. As regarded the alleged large amount (81,000 dols.) carried forward to the credit of the new account, such balance was only 45,696.36 dols., the other sum of 35,573.79 dols. being rebate on bills not due, constituted unrealised profit. In allusion to the rumours which had reference to the transaction at Shanghai between their bank and the Agra, he must deny that any instruction had emanated from the directors or manager, and it was a very serious charge for Mr. Walker to have repeated.

Mr. WALKER rose and said that his impression was that he did not say that the transaction had arisen in consequence of instructions emanating from Hong Kong. If he said so he begged to apologise for the mistake; what he meant to say was, that the manager at Shanghai had acted upon private information known to himself, but unknown to the Agra Bank agent.

The CHAIRMAN continued: The next subject alluded to by the proprietor was the audit of the company's accounts, and all he could say on that subject was, that they took every care in the selection of their auditors, and that the audit was most complete and satisfactory. They had specially selected Mr. Ryrie because he was quite unconnected with the bank, and did not, he believed, so much as hold a share. The audit was conducted with the utmost care, and the books and securities were at the complete disposal of the auditors for inspection and examination. He was convinced that these gentlemen had performed their very laborious duties with the utmost efficiency and impartiality. If the proprietors would look at the original copy of the abstracts, they would see that it was certified to by the auditors. This certificate might have been appended to the printed report, and he saw no objection to this addition being made in future cases. (The original abstract, certified to in a similar manner as on the last occasion, was here handed round to the proprietors for inspection.) He believed he had now replied to all the hon. shareholder's remarks and questions, except one of detail connected with the abstract of assets and liabilities, which he would leave the manager to explain.

Mr. KRESSER explained that the account headed in the previous statement "Branches and Agencies" had been merged for the sake of simplicity into those headed "Exchange Remittances and Exchange Acceptances."

The CHAIRMAN now proposed that they should proceed to elect the auditors for the coming half-year, whereupon

Mr. WALKER rose and said that after the remarks he had made it might not be out of place, in order to show his continued confidence in the Hon. Mr. Rennie and Mr. Phineas Ryrie, for him to propose the re-election of those two gentlemen, which he had great pleasure in doing.

Mr. BOSMAN having seconded this resolution it was unanimously adopted.

The CHAIRMAN then suggested that the auditors' remuneration be decided upon, when it was proposed by Mr. Bosman, and seconded by Mr. Deacon, and carried unanimously, that the amount be left to the decision of the board of directors.

A conversation then ensued, in which Mr. STOREY, Mr. POLLARD, and others took part, regarding the remuneration to the directors for their services, when it was finally moved by Mr. C. H. STOREY, and seconded by Mr. R. C. LAMBERT, "That the shareholders, feeling how much they owe to the exertions of the directors, regret to observe that they have still deferred their claim for remuneration; but, whilst appreciating their forbearance, request them to accept the amount they have fully earned and are entitled to under the deed of settlement."

This resolution having been submitted to the shareholders and unanimously carried, the meeting separated.

LONDON, MONDAY, OCT. 15, 1866.

HONG KONG FINANCIAL LEGISLATION.

A never-failing source of irritation seems destined to pervade the deliberations of the Hong Kong Legislative Council, in the shape of a settled feeling of hostility between the official and non-official members of that body. If we may rely on the statements which reach us regarding the internal organisation of the Council, none of its decisions can be taken as fairly expressing the sense of a majority; for we are told that all the official members are required to support the Governor, whatever their private opinions may be, and that having the fear of dismissal before their eyes they are content to submit, and to become, in effect, mere voting-machines in his hands. And inasmuch as the official portion of the Council outnumbers the non-official, the opinions of the latter can at any moment be over-ruled by the Governor's will, thus rendering entirely valueless the freedom of discussion they are supposed to possess. It is not right that the sense of any deliberative assembly should be made subservient to the dictum of an individual, even though that individual be its president; and as long as such a state of things exists, it must be admitted that the community has a serious grievance to complain of. But, on the other hand, it is just possible that if the purely mercantile element had a preponderating influence in the Government of the colony, its ultimate prosperity might in some cases be seriously impaired for the sake of immediate convenience. A successful merchant is not necessarily a good law-giver, and much as we may fret under the trammels of "red tape," still the steady weight of officialdom is often likely to be of service in tempering the over haste of a too sanguine amateur legislator, or sustaining the flagging energy of a desponding one. And we think that the controversy which took place in August, on the proposed Stamp Act, is a case in point.

Avoiding figures as much as possible, it may be simply stated that the estimated expenditure for 1866 exceeds the probable revenue by nearly $100,000, thus necessitating either some additional taxation, or a reduction of the proposed expenditure, which latter alternative would involve the abandonment of some most valuable public works. Feeling great reluctance to submit to this unpalatable mode of retrenchment, Sir Richard MacDonnell proposes to make up the deficiency by a stamp duty; a scheme vehemently opposed by the mercantile members of the Council, and held up to universal opprobrium by the local press. Now we can readily understand the aversion felt by the Hong Kong merchants to such an impost. In the first place, the Chinese will not at first understand it, and it may at the commencement excite some little alarm among them. Secondly, in a tropical climate people like their business transactions to flow through smooth, easy channels, and they readily magnify every slight obstruction or petty formality into a great trouble. In this sense the Stamp Act would doubtless prove irksome for a short time, until the new order of things had time to become established; but we can see no further obstacles, and are at a loss to understand wherein lies the "disastrous" character of the measure so strongly insisted on by its opponents. It would be difficult to devise any scheme of taxation that would not be obnoxious to some class, and with all its attendant inconveniences we think a Stamp Duty far preferable to a further taxation of land or house property; while any impost which would affect the character of Hong Kong as a free port is most earnestly to be deprecated. The Stamp Duty was not popular at Singapore at first, but all objections to it have ceased long ago. The system there works satisfactorily, and affords a valuable addition to the revenue. Why should it not do the same in Hong Kong?

We have not far to seek for the primary cause of the unpromising condition of Hong Kong finances. The Mint is the bugbear, and it has become so through what we cannot but consider a grave error in judgment—not as regards the necessity for such an establishment, for that we have always advocated—but as regards the manner in which its cost has been defrayed. The attempt to pay the entire outlay for buildings and machinery, amounting to about $400,000—in so short a time out of the annual revenue of the colony, was indeed a "disastrous" measure, and one which could not fail to be productive of temporary if not permanent embarrassment. Surely a loan might have been contrived, the interest on which would have formed no very heavy charge on the annual earnings, while the principal could have been repaid in a few years out of the surplus profits of the Mint. Or an advance might have been obtained from the Home Government to start with, to be replaced by moderate annual instalments. But the mischief is done; the Mint is paid for, the colonial resources are crippled, and a remedy must be devised. We can only hope that if this remedy, in the shape of a Stamp Act, be eventually formed to work badly, the profits of the Mint may be so ample as to allow of its speedy abolition.

THE HARBOUR OF GALLE.

The directors of the P. and O. Company have had an interview with Lord Carnarvon, the Secretary of State for the Colonies, on the subject of the insufficient condition of the harbour of Galle. The directors and other gentlemen have repeatedly urged on the Government the necessity of either themselves constructing a breakwater, or giving such support to the scheme as would enable a contractor to undertake the works. Our readers will remember that some months ago we detailed a very elaborate scheme for a breakwater and other works, propounded by Mr. Grinlington, a civil engineer in the employ of the Ceylon Government. This proposition we believe still to be practicable in the main features, though requiring some alterations which would bring the cost of construction down to £300,000. That Galle presents no insuperable difficulty to the erection of a breakwater has been asserted by a long list of competent nautical and engineering gentlemen, and why Government have so long neglected this important matter can only be accounted for by the lamentable failure of the Red Sea Cable, which Government guaranteed and by which ultimately lost nearly £1,000,000. But we have now a different light by which to view these things. The money sunk at the bottom of the Red Sea has been the cause of bringing submarine telegraphic cables to perfection, the first great boon being the Atlantic cable, which may save Government many millions. So long as Mr. Gladstone was in office we knew it was totally out of the question to suggest that Government ought to construct or guarantee a moderate interest for the Galle Harbour improvements, but Mr. Gladstone is now enjoying, we trust, his *otium cum dignitate*. We have in his stead Mr. Disraeli, who we feel certain will see the importance and justice of the claim. No doubt he will remember how ignominiously Lord Elgin and staff were wrecked in that very harbour, and what serious consequences ensued by the delay in his mission to China. Another matter, which no doubt the last Government was ashamed to put on the estimates again—after having thrown all the first cost into the sea through the hands of incompetent people, is the lighthouse on Basses Rocks. A great deal of the material is still there, and it would not require much outlay to raise the edifice. Even the lantern is, we believe, stowed away in the godowns of the customs at Galle. The deputation completely succeeded in showing the importance of these matters, and Lord Carnarvon, entirely agreeing, promised that the matter should be at once taken into the consideration of Her Majesty's Government. The deputation consisted of the following gentlemen:—

Mr. Hadow (deputy chairman), Rear-Admiral Hall, C.B., and Captain A. Nairne (directors), Mr. Howell (secretary), Mr. Bayley (assistant-managing director), Mr. Engledue, Mr. Sutherland, and Captains Lovell, Black, Dundas, Dunn, and Weston (commanders), Major Skinner, Chief Commissioner of Public Works, attending the interview.

EXPLORATION OF CAMBOGE.

The French Minister of Marine and the Colonies a few months since appointed a commission to explore the great river, the lower part of which bounds the three French provinces of Cochin China. The expedition left Saigon on the 5th of June last, and consisted of Captain Lagree, the director, a naval lieutenant and ensign, two surgeons, an attaché of the Foreign-office, and two interpreters, one French and the other a Cambogian. The escort consisted of a sergeant and private of marines, four sailors, and six Annamite soldiers. The avowed object of the expedition is to ascertain the physical geography of the Mekong as well as the history, philology and ethnography of the vast country refreshed by its waters. The various names given to this river have been the cause of much error and confusion; thus not long since Vincendon-Dumoulin described it as being an arm of the Menam river of Siam, while Bitter, Berghaus, and Balbi declared the two to be perfectly distinct from each other. It is considered as settled now beyond all question that the great river Mekong has its source in the mountains of Thibet, a very important fact. If this be so, these mountains give birth to the Chou-kiang, Yang-tse-Kiang, and Hoang-Ho, which fall into the China Sea, to the Brahmapoutra, Ganges, and the Indus which pass, by the Himalayas, into the Indian Sea, and lastly, by a third outlet not yet well defined, to the Mekong, the Menam, and the Irawaddy, which fall into the Indo-Chinese Sea. The lower part of the river, that which waters Cambogia, is pretty well known; the hydrography of the river of Noong, which connects the principal stream with the Lake of Angeor, has been completed, and the course of the Mekong has been explored as far as the rapids of Sambor, in latitude 12° and 13°. Here then commence the labours of the expedition in question. One of the great practical points to be decided is whether these rapids are always impracticable or only during a certain portion of the year, and consequently, if transhipment be necessary during a part or the whole of the year. It is believed, though not known for certain, that only one arm of the river at Khong is affected by the rapids, and that the other is open to navigation. Above this point all that is known positively is from the observations of M. Mouhot, who lost his life there in the autumn of 1861, and his discoveries remain incomplete. He described the Mekong, in the Laos between 19° and 20° latitude, as being more than a thousand yards wide in the narrowest part, and bordered by high mountains covered with rich verdure; he declares absolutely that there is no connection whatever between the Mekong and the Menam, but his exploration only extended to Luang-Prabang, one of the principal towns in the kingdom of Laos, and containing from 7,000 to 8,000 inhabitants, and not 80,000, as stated by Pallegoix. Below Laos the Mekong penetrates the vast and populous Chinese province of Yun-nan, where it takes the name of the Lan-tsan-kiang, which is applied to all its upper portion. It is there separated by a small distance only from the celebrated Yang tse-kiang, and from the Loo-kiang which forms the boundary of the Birman empire, of Tenasserim and Siam, and falls into the gulf of Martaban at the English port of Moulmein near Rangoon. The proximity of the Mekong to the Yang-tse-kiang (called in Yun-nan the Kincha-kiang) if a fact is an extremely important one, as the latter river serves the three great towns of Hankow, Nanking, and Shanghai. It is said that the interval which separates the two streams is, at a point towards Ta-Tching, on the 28th parallel of latitude, not more than ten leagues across; and, moreover, that there is a pass across the mountain ridge which stands between them which would allow of the formation of a road and perhaps even of a canal, thus bringing the whole of the country above Ta-Tching in easy communication with the whole of China Proper. The pass referred to is a little south of the Christian village of Bounga, and rather further in the same direction from the road leading from Peking to Lhassa, the capital of Thibet. Here, however, arises an unfortunate question. English explorers have fixed the navigable limit of the Yang-tse-Kiang, for steam vessels, close to the point in question, namely, at Pin-Shang, in 103° longitude, but the French explorers are not inclined to admit this dictum as decisive. It is to be hoped that the new expedition will settle this point beyond doubt, in order that the facilities of future communication may be exactly calculated.

THE RUSSO-AMERICAN TELEGRAPH.

The earlier portion of the year 1868 will, in all probability, witness the opening of the whole line of telegraphic communication between the Amoor and the United States. The present winter may to some extent retard but will not prevent the carrying on of the works. The exploration on the Asiatic side covered far more ground than has actually been taken up, and hurricanes, frosts, frozen seas, and pathless deserts conspired to arrest the advance of the energetic pioneers. But the time thus expended has allowed for the complete preparation of all the material required, and which has been shipped respectively from London, Hamburg, New York and San Francisco, the chief points from which redistribution took place being Sitka on the American side and Nicolajevsk at the mouth of the Amoor, Okhotsk and Anadyrsk on the Asiatic side. Three vessels, freighted by the Russian Telegraph Department at Hamburg, arrived at Nicolajevsk previous to the closing of the ice with all requisite materials for the construction of the Amoor Junction Telegraph. We have news of the subsequent arrival of the vessels referred to in the valuable letter of our correspondent as destined for the Northern Asiatic section, so that little remains to be forwarded with the exception of additional provisions. The Russian Telegraph Department and the Western Union Extension Company have in their service no less than twenty-five vessels, in addition to the vessels "with fire"—the United States steamer *Saginau* and the Russian steam corvette *Variag*, detailed to co-operate in the work. The avoidance of the peninsula of Kamschatka in the construction of the main route on the Asiatic side of the North Pacific shores commends itself to the judgment of practical men, though at the outset the opinions of leading engineers, electricians, and geographers were in its favour. The introduction of long deep sea cables has thus been avoided, and so an element of uncertainty removed. The overland line of Asiatic Russia, after leaving the Amoor, crossing the Trans-Baikal country, and penetrating by a defile the Stannovoi mountains, rounds the Okhotsk Sea to the east, passing successively through the settlements of Shantar's Bay, Ayan, and Okhotsk, the well-known stations of the whale fishery, thence to the head of the sea over a steppe with gentle elevations to the colony of Anadyrsk. Nor is it evidently any leading object with Russia to have Petropaulouski taken in by the main route. The fortunes of the place are evidently declining, and since the acquisition of the northern territory from China, emigration to the western shores of the Okhotsk has been continually going on. Thus the telegraph will lie along the pathway, not only of existing trade but future colonisation. On the American side, the explorations which followed the course of the Fraser's River and the stream of the Youcon have been rapidly followed by the engineering staffs, and a powerful steam mill at Puget's Sound is engaged in cutting thousands of cedar trees to serve for wooden forts, poles and stations, whilst the services of the Indians found along the route have been enlisted. Thus the operations of construction have been extended not only upwards from Vancouver's Island, already in connection with San Francisco, but downwards from Bhering Straits by way of the Kvichpak and the valley of the Youcon. The greatest difficulty in the obtaining of native labour was encountered in British Columbia, and the portion of the line running through that country will consequently prove most costly per mile. The labours of construction, like those of exploration, have in part to be carried on in face of tempestuous seasons. A healthy spirit of emulation appears to have been evoked between the working parties on either side, and again between these and the constructors of the Amoor junction line, so that we may anticipate that St. Petersburg will be brought into telegraphic connection with Nicolajevsk, by way of Central Asia, at the same time that the Russo-American continuation is completed. Much of the success that has been achieved in securing the good will of the natives must be attributed to the careful relations formerly maintained between the Russian Trading Company on the one side and the Cossack settlers on the other. The working of the line, besides inducing a greater amount of trade in the northern seas, must give a stimulus to colonisation which will react in its turn favourably on Europe, and especially in improving European connection with China. As to trade, the better knowledge recently acquired of the coasts and harbours of the Northern Pacific must prove of substantial service in the future. It would appear that not only is insulation better maintained in high latitudes, but that the cold is favourable to the preservation of the wire; thus lessening the calculated expense of

Digitized by Google

maintenance. The messages that will pass over the Russo-American line have been estimated at 500 per day, and the receipts at £1,000,000 per annum. The tariff charges will be moderate, and it is anticipated that one-half the receipts will cover the cost and maintenance of the line. Twenty per cent. on the capital stock of the Extension Line has been paid up, the capital of the company being £5,600,000; and it is estimated that the proportion paid up will cover the cost of construction, supplies, and stores. The whole overland route connecting the European and American systems may be thus represented:—From St. Petersburg to Irkutsk by the route traversed by the great Russian-Chinese caravans, across Amoor territory to Sofisk on the Gulf of Amoor, the depot of overland traffic between Russia and Japan, thence rounding the Okhotsk, and proceeding northward over the country of the Tchouktchis and the river Anadyr to Bhering Straits; across Bhering Straits to one of the many mouths of the Kvichpak, westward to the point at which the Youcon, virtually the same stream, flows southward, following the valley line marked by ranges of mountains running parallel to the coast, and of which the Fraser Valley is a continuation, by Vancouver and through Oregon to San Francisco. A further development manifestly awaits this great line skirting the northern boundary of the Great Pacific, and finding its termini in the American and European systems of telegraphy. Ultimately, all Central and South America will have the benefit of communicating with the great points of Eastern trade not by the slow process of navigation, but the quick throbbings of the electric pulse. The contemplated ramifications of the Russo-American and Russo Chinese lines are full of interest, premising of course the completion of the Russian line from Kiachta through the vast territory of the Mongols to the gate of Yahol and thence to Peking, eventually to be extended to the ports in China. Another subsidiary line is in view, that, crossing Turkestan, Bokhara, and Balk, to Cabool, shall be extended to the Punjaub and brought into connection with the Indian telegraphic system. There remains also the British scheme of connection with India by way of Western China. But prominent among the designs that are destined to realisation is a submarine cable across the gulf of the Amoor connecting Saghalien with Tartary, with overland communication to Cape Aniva, thence by cable to Yesso, and again by the Straits of Sangar from Yesso to Niphon, the south-western extremity of which might be brought into instantaneous communication with the Corea. The following is the letter of our correspondent, already referred to:—

The St. Petersburg *Northern Post* contains a correspondence from Guigiga of the 2nd (14th) August, with the latest intelligence concerning the Russo-American telegraph, of which the following is an abstract:—

Mr. Abasa arrived at Petropaulouski on the 8th August with three American engineers, two of whom (Capt. Meyhood and Lieut. Bush) proceeded at once to Nicolajevsk to explore the country between the Amoor and Okhotsk, whilst Mr. Abasa undertook, in company with Lieut. Kennan, the exploration of the peninsula of Kamschatka, the country of Koriatsk and the Guigiga. To form an idea of the difficulties against which these two parties had to struggle, it must be remembered that with the exception of the little village of Oudsk and the port of Ayan, the country between Nicolajevsk and Okhotsk is only inhabited by a few nomadic tribes of the Tungooses, and that hitherto Kamtschatka has never been crossed during the summer and on horseback. As probably an official report will be published at a later period of the journey of Mr. Abasa and his companions, it is only needful to state at present that, in spite of the incredible difficulties they had to encounter at every step, especially in crossing the chain of the Great Tiguilsk Mountains, they arrived after sixteen days of hard work and to the surprise of the natives, at the village of Tiguil, a journey of 1,200 wersts (800 miles). From Tiguil to Guigiga they travelled partly on horseback and partly in *baydars* or boats made of skins, across the Bay of Penjinskaya; and when the winter set in they continued their journey in sledges drawn by reindeer and dogs, crossing the camps of the wandering tribes of the Koriatsks and Tchoukotzks, often passing the night in the open air on the ground with the thermometer at 35 degrees below zero of Reaumur.

On the 22nd November Mr. Abasa arrived at Guigiga, where he was to meet the detachment of engineers who were under orders to travel from the mouth of the Anadyr up that river in boats to the colony established on its banks and then in sledges to Guigiga after exploring the intermediate country. However, not only did Mr. Abasa not meet the party but could receive no intelligence of them, which caused him to believe that on their arrival at the mouth of the Anadyr they found the river closed by ice, which sometimes happens as early as the 20th of August. This was a great disappointment, for Mr. A. expected to receive by them a supply of provisions, as his were fast falling short, but above all he was anxious to learn the result of Colonel Bulkeley's explorations in Behring's Straits. Thus all the work of laying down the line of the telegraph for a distance of 6,000 versts, or 4,000 miles, devolved upon four persons, two of whom were on the Amoor. In this uncertainty, Lieutenant Kennan, accompanied by some Cossacks and natives, was sent to the colony of Anadyrsk to obtain information and continue the survey of the country. At the same time Mr. Abasa started in the direction of Okhotsk and Ayana, crossing the chain of the Stanovoi, in order to settle the question as to whether the telegraph should be carried from Okhotsk to the Amoor by land along the coast which had never yet been explored, or by a submarine line. On the road he met Captain Meyhood and Lieutenant Bush, who, accompanied by M. Schwartz, had travelled on reindeer all the way from the Amoor to Okhotsk, a mode of conveyance exceedingly fatiguing, and through a country almost unknown even to their nomadic guides, and accomplished their object in the most satisfactory manner.

In the meantime Lieut. Kennan ascertained from some wandering tribes between Guigiga and Anadyrsk that at the end of the autumn two vessels, one with sails and the other "with fire," had arrived at the mouth of the Anadyr, and disembarked five men who were living there in a hut furnished with a stove and in possession of a sufficient supply of provisions. On his arrival at the colony Lieut. Kennan immediately proceeded in dog-sledges to the mouth of the Anadyr, a distance of 600 versts, found three of his countrymen and returned with them and all their stores to Anadyrsk. Before the arrival of Lieutenant Kennan two of the Americans had set off with a party of Tchouktchis for Anadyrsk where they safely arrived after a journey of sixty-four days. It is to be hoped they will publish some account of their proceedings, as, with the exception of Captain Billiness, who spent some time with those tribes in the year 1780, no one has ever before penetrated into that part of the country.

The chief of the expedition has now returned from his excursions and terminated his labours. The survey of the country is completed and the line for the telegraph from Anadyrsk to the Amoor—a distance of 6,000 versts—laid down. This immense work was executed by the head of the expedition, and three engineers in the course of a severe winter, during which they had to combat with almost incredible difficulties, travelling sometimes in sledges, at others on the backs of reindeer, exposed to the rigours and inclemencies of the atmosphere without any shelter, and often on half rations of food.

As soon as the sea of Okhotsk is free of ice the ships from America with the materials for the telegraph will land their stores at Guigiga and elsewhere. Those vessels bring a party of Yakouts who are engaged for the service, and the line will be set up as speedily as possible from the Amoor to Behrings Straits. Between Okhotsk and Anadyrsk the works are being actively carried on with the assistance of the natives, who are of great use in helping to build huts, squaring the timber, and putting up the telegraph poles. It is to be expected, from the well-known energy and activity of the chief of the expedition, that within two or three years this gigantic work will be completed.

THE SAN FRANCISCO, JAPAN AND CHINA LINE.

In the article in our last issue it was intimated that the steamers of this line were not to call at the Sandwich Islands *en route*. By the latest advices from New York we find that the question is still in abeyance; but it is fully expected that the decision of Government will be to omit calling there.

The rates of passage money fixed on by the company are $300 between San Francisco and Shanghai or Hong Kong for chief cabin, $200 second, and $100 steerage. To Yokohama, $250, $170, and $85 for the respective classes. These prices include all requisites, except wines and liquors, and we consider them moderate—at least as a commencement. The rates of freight have not yet been announced. The head office of the Pacific Mail Company is in New York, and the agencies in this country are Messrs. H. Starr and Co., 145, Cheapside, and Messrs. Staveley and Starr, 32. Dale-street, Liverpool, where passages can be booked and all information obtained.

It is intended, as soon as practicable, to extend the Italian line of steamers now running between Alexandria and Brindisi on to Venice as the final port instead of Ancona.

Literature.

Although the announcements of new works are as numerous as usual at this season, there are few among those recently published that demand special notice by reason of any affinity to our particular field. Of these few the first that commends itself to our notice is entitled *Memoirs and Services of the late Lieutenant-General Sir S. B. Ellis, K.C.B., Royal Marines. From his own Memoranda.* Edited by Lady Ellis. Saunders, Otley, and Co.—This work, besides many other interesting experiences in the long life of the veteran Marine officer, contains some reminiscences of the China war of twenty years since which are specially opportune at the present time:—

"I went with Dr. Lindsay on shore to the Military Hospital of the 26th Regiment. I had never witnessed a more distressing scene,—460 persons of the finest regiment of the expedition when we arrived in China lying on mattresses on the floors of several rooms of an extensive building, from the drummer-boy to the old soldier, variously afflicted with grievous complaints of dysentery, diarrhœa, and ague fever,—some dying, and all in want of many comforts requisite to their recovery, such as fresh and wholesome nourishment, good nursing and cleanliness, yet they were not to be procured; the sick were so crowded that with some difficulty we passed between their lines on the floor without inconvenience to them. The condition of many was quite hopeless. Sickness and mortality were so much on the increase that of the original number of 3,500 who landed in July last, not more than 800 bayonets could then be mustered for duty."

Digitized by Google

Here is another extract, narrating the bare escape of an entire company of native infantry from destruction:—

"About sunset an entire company of the 37th Native Infantry was missing; two companies of the 49th were sent out in search. I was also requested to detach a company of Royal Marines for the same object. I selected the 8th, armed with percussion muskets, giving the command to Lieutenant Whiting. Captain Duff of the 37th accompanied him; and, after a long and tedious march of six miles, through paddy fields filled with water, they succeeded, amidst much peril, in recovering this company, surrounded by Chinese, who were actively engaged in bringing up two guns in position for their destruction. The 37th were formed in squares on a small mound, with their fire-arms, excepting one, unavailable from the rain's effects, and were only aware of their rescue and the proximity of the marines by the latter firing a musket and giving three loud cheers, which were gladly responded to. The effect was instantaneous and most beneficial. The Chinese, not knowing the amount of force so unexpectedly near, separated a little; the 37th company retreated; and Lieut. Whiting, watching his opportunity, judiciously fired a volley or two amongst them, whereby the two companies were enabled to return to their respective corps unmolested."

Messrs. Trubner will shortly publish *The Institutes of the Laws of Ceylon*, two vols., by H. Byerley Thomson.

Our Australian Colonies; their Discovery, History, Resources, and Prospects. By Samuel Mossmann; Author of the articles "Australia" and "Australasia" in the *Encyclopædia Britannica*. London: The Religious Tract Society.—Such a comprehensive title as this is calculated to raise a vision of one of those ponderous quartos without which no large library is complete, but which are far too heavy in every sense of the word to be of much practical utility in the hands of the general reader. To allay allapprehensions on this score we may at once state that the work under notice, although somewhat ambitious in its title, is exceedingly modest and convenient in size, and eminently readable as regards its quality. In truth, the discovery of our Australian possessions is so recent, and their history consequently so short, that we can discern no reason why all that is interesting concerning them should not be compressed into very moderate limits, except, indeed, the fatal tendency to prolixity indulged in by nearly all travellers who turn book-makers. From this vice Mr. Mossmann is happily free; and, being evidently actuated by a desire that his book should rank as a standard work of reference regarding the great southern continent, he has, with the terseness of a practised hand, condensed into a single small volume such an amount of valuable information as cannot fail to achieve the desired end. The first chapter is devoted to the gradual series of discoveries by which the continent and its adjacent islands became known, from the somewhat apocryphal adventures of the early Spanish and Portuguese voyagers, and the more tangible efforts of the Dutch, down to the celebrated voyage of Captain Cook in the *Endeavour*, and the consequent appropriation by England of that vast tract of land which the illustrious navigator named New South Wales. The second chapter contains a well-digested *resume* of the many exploring expeditions by which the interior has been penetrated and surveyed in all directions. The third is on the natural history and products of the country; and the remaining ones are devoted to information of the most varied kind regarding each colony separately. And, lastly, both the interest and the value of the book are greatly enhanced by a well-executed map and plans of several of the more important towns and harbours.

The Suez Canal.—The Suez Canal Company contemplates soon undertaking the transport of certain kinds of merchandise, but it seems doubtful whether they will be able to supply sufficient means of conveyance. The traffic across Egypt is enormous. Lately, in a very short space of time, 12,000 bales of manufactured goods for India passed over the Suez line, and a great deal of cotton comes from Bombay by that route. There has been a reduction of 25 per cent. on the rate of carriage of goods sent by slow trains.

The French Consul's Reception at Bangkok.—The following letter from Bangkok has appeared in the *Moniteur*:—"M. Aubaret, French Consul at Bangkok, who, when recently in Paris, was charged by the King of Siam to deliver to the Emperor Napoleon a letter, accompanied with presents, resumed possession of his post on July 1. He carried with him the reply of the Emperor. The King of Siam was anxious to give the most solemn character possible to the reception of that message. On the arrival of M. Aubaret being announced, a mandarin of the highest rank was sent to meet him at the mouth of the Meinan, and accompanied him to the Consular residence on the banks of that stream. On July 6 a numerous deputation of Siamese functionaries, conveyed in forty boats, proceeded to the Consulate. The Imperial letter was placed on a throne of gold on board one of the boats used exclusively in the service of the King, and the procession advanced slowly along the river. On arriving at the landing-place the Emperor's letter was received with a salute of 21 guns, and was then carried in state to the palace, accompanied with a numerous escort. Representatives from the different nations, subject to the kingdom of Siam, formed a line, in which all the varied races of India and China were mingled in picturesque confusion. In the first courtyard were seen the war elephants ranged in order of battle, and by their side, forming a singular contrast with those colossal animals, the Siamese horsemen mounted on very small horses caparisoned with gold. The King, in the largest hall of the palace, awaited the arrival of the procession, seated on a magnificent throne raised 6 ft. above the ground. He wore the grand cordon of the Legion of Honour. The Princes and mandarins were prostrate on carpets. Each of them had before him the insignia of his rank—that is to say, a vessel of pure gold—some of which were so large as to literally cover the carpet. The Consul of France, on his entrance into the audience-chamber, took the enormous gold vase which contained the Emperor's letter and placed it before the throne. After the first compliments, the King himself descended the steps of his raised seat and advanced towards the Imperial letter, which M. Aubaret presented to him. The 'Memoirs of the Abbe de Choisy' contain an account of the difficulty met with in inducing the Sovereign of Siam to accept the letter of Louis XIV. from the hands of the French Ambassador. The King read the Imperial communication with marked satisfaction, and, after having conversed for some minutes with M. Aubaret, begged him to take part in a repast to which had also been invited the members of the Consulate and of the Catholic Mission, and some French merchants who had accompanied the Consul. The King, after the ceremony, addressed each of them in gracious language, and assured them repeatedly of his feelings of sympathy for France and the Emperor. The Siamese Government has lately given another proof of its friendly disposition. A scientific commission, placed under the direction of the captain of a French frigate, had been charged to explore the course of the River Mekong, which is yet unknown; and the King of Siam immediately sent instructions that the French expedition should receive all the assistance possible in its difficult and perilous enterprise."

Foreign Intelligence.

HOLLAND.

(from our own correspondent.)

Rotterdam, Oct. 7.

The history of the days which have elapsed since my last letter is of much importance. The last Parliamentary battle which was fought in the Second Chamber of the States-General must be ranked amongst the most interesting of the year's, while the speeches will fill the most important pages of the Parliamentary annals. The Chamber has rigorously blamed the Cabinet, while it has—as the *Nieuwe Rotterdamsche Courant* says—dared to treat the representatives of the people in an unfair way. The consequences of the vote of want of confidence, however, are such that the greatest political confusion now prevails throughout the country. When the Address of reply to the Speech from the throne was brought forward, the members at once made use of the opportunity to speak on political affairs instead of following the usual custom of reserving such debates until the budget were discussed. It could not be denied that a Conservative tendency was shown in the Royal Speech, but it was also clear that the Address answering to this Speech breathed a strong opposition spirit. There appeared in the Royal Speech a clause "that the nation will find, after God, its firmest support in itself." In the phrase answering thereof the words "after God" did not appear, and of course the anti-revolutionists complained thereof. Mr. Jonckblaed, however, in defending the Address said that the "Committee of Reduction" was of opinion that this expression sinned against the second of God's Ten Commandments, and as they had no plan to make an idle use of the name of God, they had omitted these words. I need not say that these expressions created much sensation, and to calm the opinions Mr. Wintgens rose to explain in a very lengthened speech the position of the several parties in Parliament. This member spoke in such a Conservative sense and finished by attacking so severely the other parties that the discussions that followed irritated the Chambers more and more. Suddenly it was thought a favourable moment to bring forward the topic of the day—the resignation of Mr. Myer and his appointment as Governor-General of the Dutch East Indies.

Not they only who are known as the promoters of the two factions of the Liberal party passed the severest judgments; on the contrary, this act of the Government was most rigorously blamed by the neutral members. Godefroi spoke of "a sad impression by every impartial member;" Kenchenius, hitherto regarded as a Ministerialist, "could not find words to express his disapprobation;" Storm van Graverzande called it an "unworthy act;" Van der Linden summoned in vain "that one member should rise to defend the appointment." The Minister of Foreign Affairs tried to calm the storm by declaring that the successor of the ex-Minister Myer, Mr. Trakranen, adhered to the same principles as his predecessor, whose promises *ergo* would be fulfilled, and he asserted that when Mr. Myer tendered his resignation he did not know positively that he was to be appointed for this lucrative office. Mr. van Henkelom demonstrated once more that Mr. Myer had been obliged, when the amendment with regard to the increase of the wages of the Indian heads had passed, to revoke his budget, and that he distrusted the whole Cabinet now that this had not taken place. Though Mr. van Limburg Brouwer asked three times after the true reasons why Mr. Myer had tendered his

Digitized by Google

resignation, who only proposed to deceive the Chambers while his luggage was ready to start for India, the matter dropped in that sitting because the Minister of the Colonial Department was not present. Instead thereof several matters of less interest were brought forward, viz., our relations to the German Confederation—whereabout every particular was known; the damming up of the Eastern Scheldt—whereabout no news could be said; and the financial question, on which occasion the Liberals argued that the position was not at all so bad as the Minister had stated in his speech. In the following sitting, however, the decisive moment had come when the ninth paragraph of the Address, in which the colonial matters were treated, was to be approved. The Minister of the Colonies rose before one member had attacked him, to lay his programme before the Chamber; which, however, was ultra-Conservative, while that of his predecessor hung dangling between the Liberal and Conservative principles. Immediately after this maiden speech was uttered, in which he so awkwardly tried to blame the present Governor-General Mr. van Swieten rose and gave the sign to storm the Cabinet. When the discussion had already become of a very violent character, Mr. Kenchenius rose—the man who said and proved that he only wished to fight for truth, or what he thought to be truth, who is an ultra-Theocrat when there is question of education and religion, but who showed himself a Radical about Indian matters. The greatest stillness prevailed when this *charge a fond* was commencing, which he founded upon the resignation of Mr. Myer, that he beheld as a disavowing of the vocation of the Cabinet, as contrary to the wants and claims of India, as a stimulus for politic immorality, and by which act the respect due to the representatives was shortened. After having argued on these points he proposed the following motion:—"The Chamber, disapproving of the conduct of the Minister of the Colonies, Mr. P. Myer, with regard to his retirement from this Cabinet, proceeds to the order of the day." The Parliamentary battle now became vehement, and after a long debate the motion was approved of with 39 against 23 votes. The Minister for Foreign Affairs, after having stated that he and his colleagues made this motion a Cabinet question and that the decision of the King should be invoked, left the Chamber in a hurry. The Address, however, was approved of and handed to the King by a special commission.

Not knowing what to do, the Conservatives had mingled the royal person in the debate. The Ministers founded their contest of the motion principally upon the opinion that the Chamber attacked one of the prerogatives of the Crown when, disapproving the appointment, they maintained that the executive power only has the right of appointing functionaries of the State; the majority however argued that according to Art 53 of our fundamental law, the King is inviolable and that the Ministers are totally responsible. It needs no comment that the Ministers demonstrated upon a false basis, the more because Mr. Kenchenius did not disapprove in his motion of the appointment but the retirement Mr. Myer.

In the first days after the motion had passed an uncertainty prevailed as to the steps which the Ministers would take—whether they would tender their resignation or dissolve the Chambers. The facts, however, that the King, after several interviews with the members of the Cabinet, started for his seat "het Loo," and that the members of the First Chamber were convoked by the telegraph, gave us a right to suppose that the Cabinet had resolved upon a call to the nation. And so it was.

Last Monday the members of the First and Second Chambers met, and the Minister of the Home Department read a Royal decree by which the sitting of the States-General, which was opened only a fortnight ago, was closed and the Chambers dissolved, while by another decree the elections were fixed to take place on the 30th of October, so that the meeting of the new Chambers will be on the 19th Nov., the day on which Mr. Myer—according to the statement of the *Handelsblad*—will start for India.

It is impossible to describe the feelings of abhorence and disgust which prevails throughout the country. Rather everyone is angry that the Cabinet applied this measure; and, indeed, when we remember what occurred in 1853, when also the Chambers were dissolved, we must fear for scandalous disturbances. Now already in Arnheim the Liberals and the students in Leyden brought overtures to Mr. Kenchenius, who fought so bravely against deception and imposture, as he termed the said appointment of the Cabinet; in the meanwhile the Conservatives at the Hague brought serenades to the Ministers and the M.P.'s for that town. I, indeed, should not wonder if within a few days every eye in Europe should be directed upon the political events that will occur here. The passionate tone of the press, which now already prevails, of course will increase with every day, which brings us nearer to the end of the month. As to Mr. Myer, he is literally affronted and injured. So says the *Arnheimsche Courant*:—"We do not envy his crown of Vice-King, which must have become a very crown of thorns. The vote of the second Chambers has vindicated the offended public morality, and that vote will always *remain*, notwithstanding the Chamber were dissolved. It has made for Mr. Myer a scaffold of the throne of Buitenzorg (his residence at Java), upon which he, when he desires it, may remain exposed ignominiously, stigmatised openly as the man who promised solemnly to fulfil the obligations with which he charged himself voluntarily, and slinks away during the darkness of the night to withdraw himself from fulfilling them." It is, I think, impossible to write in more offensive terms.

A peculiar fact happened one hour after the motion of Mr. Kenchenius had passed. The *ami intime* of the newly-appointed Governor-General, Mr. Untewaal van Stoetwegen, M.P., died suddenly by apoplexy. Of course it is supposed that there exists some connection between these two facts.

The Opposition papers mentioned that the Government advanced already to Mr. Myer a sum of 93,000f. upon his wages. Of course this creates indignation. Messrs. Uyttenhoven and Motke have started for Brussels to assist at the final experiments of the rendements of sugar and to fix an international regulation.

H.M.'s war steamers *Leeuwarden*, *Java*, and *Wilem* started on the 25th, respectively, from Flushing and Texel, destined for Batavia.

At the yards of Messrs. Paul van Vlissingen and Dudok van Heel, at Amsterdam, an iron steamship was launched for the service of the East Indies. It is named *Borneo*. The frigate *Kai Joo Maroo*, which was built at Dordrecht on account of the Japan Government, lies ready to sail at Brouwershaven.

Prince and Princess Frederick started some days ago for Stockholm, where they arrived in good health.

The sanitary condition of the country is much better, and the cholera epidemic has almost totally disappeared; only a few sporadic cases occur. The rinderpest still prevails in the same degree, and it is feared that it will spread itself more now that the winter has arrived. During the last few days the weather—which, during thirteen weeks, had been rainy—was beautiful, which influences the crops very favourably.

COMMERCIAL.

Coffee.—The market remains in a very firm condition, but transactions are of no importance. On the 17th inst. the Trading Company will offer at public sale 140,800 b. Java, Menado, Padang and Macassar. The stock amounted to 453,600 b., against 420,800 b. in 1865.

Sugar.—The market is rather firm, but inactive. The transactions include 725 mats Bezoekie, ex Webfoot, No. 13¾, at 33½f.; 651 do. Samarang, ex Kosmopoliet, No. 17, at secret prices; 487 m. Samarang, ex Ouderkerk a. d. Amstel; and 1,000 m. Probolingo, ex County of Lanark. The unsold stock of Java raw sugar was as follows:—Trading Company 30,674 m., against 30,151 m. in 1865; private, 31,838 m., and 12,911 b. The stock in entrepôts amounted to 43,984,186 kilo.

Rice.—In consequence of the fine weather the market is rather dull, and the transactions only include one cargo Rangoon, ex Kinderdyk, and 2,700 b. do., ex Jan van Galen, at 7¼f.

Spices.—With an inactive tendency; the nominal quotation is still at the last auction value. Only Mace is inquired after, so that, therefore, 1 to 2 c. in advance is paid. The unsold stock of the Trading Company includes 259 c. Nutmegs, 50 c. Mace, 132 fard. Cinnamon, while the stock on warrants is 5,502 c. Nutmegs, 1,121 c. Mace, 1,645 fard. Cinnamon.

Tea.—The market is very animated. In Amsterdam were sold at private auction 4,444 ¼, 249 ⅛, and 1,015 1-12th chests Java. The prices paid were:—

Boei	45 to 94 cents.		Pouchon ...	76 to 93 cents.	
Congou ...	56 to 99 „		Schin	48 to 93 „	
Kempoi ...	57 to 128 „		Thunkay ...	46 to 91 „	
Pecco Kempoi ...	126 to 128 „		Hysant ...	55 to 131 „	
Souchon ...	67 to 124 „		Uxim	77 to 185 „	
Pecco Souchon	142 to 158 „		Joosjees (G.B.)	152 to 155 „	
Pecco	100 to 200 „		Do. (F.B.)	177 to 185 „	
Souchon Pecco	85 to 88 „				

The Trading Company announces its autumn sale, which will take place on the 31st inst., and on which will be offered 5,932 ¼, 6 ⅛, and 329 1-12th chests Java. The valuation is not yet known. From Foo-chow-Foo a direct cargo is waited for. The will arrive within some days with 3,200 chests.

Tobacco.—The market is still inanimated, and only 285 b. Java, trade mark "Tempeh," ex Roscote, were sold. On the 16th and 18th inst. about 7,000 b. are to be offered in public auction. The stock was, on the 1st, 11,618 b. Java, and 2,679 b. Manila.

Gutta Percha.—On the 11th inst. 23,800 kilo will be offered in public sale, which are valued at 120 to 200 cts.; inferior qualities from 30 to 90 cts. The 1,500 ko. Gummi Elasticum are valued at 130f. to 135f.

Japan Wax.—The confidence in this article has highly improved, and an advance is willingly paid. Without any doubt, good prices will be paid for the 12,000 kilo., which are to be offered on the 11th inst. The quality is D, and the valuation 34 to 35f.

Rattans.—In waiting for the auction of the Trading Company, which must take place on the 11th inst., and on which 93,000 b., about 8,120 piculs, are to be offered, which are valued from 9 to 14f. There is a lively demand. 1,800 b., per Hendrika, from Macassar, will be offered at inscription on the 10th inst. Valuation, 12 to 12½f.

Indigo.—Yesterday the autumn auctions of the Trading Company took place. There was a very animated demand, particularly for fine and good qualities. The prices paid are, considered with those paid at last auction, for ord. from 10c. to 30c. lower; good ord. pari. middling, 10c. to 20c. higher. The 284 ch. Java, private import, were sold; quality A, from 355 to 445c.; G, from 285 to 495c.; B, from 495 to 580c.; BB, from 535 to 580c.; CC, at 650c.; F, 305c.; while the 152 Cer. Caracas, also sold for private account, were sold from 120 to 505c. The quantities offered by the Trading Company (together 1,235 piculs, or 1,497 ½-chests) were sold as follows:—A, from 250 to 435c.; AA, from 435 to 500c.; G, from 395 to 500; B, from 475 to 610c.; CC, from 595 to 640c.; BB, from 530 to 630c.; F, from 340 to 460c.

Hides.—Privately were sold: 618 ps. Sourab., ex Pudsey Dawson; 409 Passar. and 886 Sourab., ex Three Bells. The Trading Company offered and sold by inscription at prices which did not transpire:—

539	St. Padang	...	Rinder	...	5 to 5¼	Ko.	... ex Susanna.
588	„ do.	...	do.	...	ca. 4¾	„	... ex Samarang.
351	„ do.	...	do.	...	4 4¼	„	... ex Johannes Lodewijk.
1,748	„ Sourabaya		do.	...	4½ 4¾	„	... ex Twee Gezusters.
23	„ Padang	...	do.	...	9¼ 9¾	„	... ex Susanna.
197	„ do.	...	do.	...	ca. 9	„	... ex Samarang.
187	„ do.	...	do.	...	9 9¼	„	... ex Johannes Lodewijk.
					Bei Privaten,		
650	St. Samarang		Rinder	...	ca. 3½	Ko.	... ex Kanagawa.

Cocoa-nut Oil, with a good demand, at good prices.

Arrack.—The market is very animated. 75 casks and 50 ½-casks Batavia, ex Eryherrog Ferdinand, May; 125 whole and 50 ½-casks ditto, ex Matheran; 50 casks Batavia, ex Mary and Hillegonda, were sold, while 322 casks Batavia, ex Andrew Jackson, offered by inscription, were not granted.

Banca Tin.—The approach of the Trading Company's sale of Banca had the effect of making all operators cautious during the latter part of last month; the business reported, therefore, has been small, and confined to consumer's purchases, with a few transactions speculative on the part of both buyers and sellers, in anticipation of the sale price. They included 500 slabs at 46f., and 1,000 slabs at 45¾f., 1,500 slabs at 45½f., and 200 slabs at 46f. The sale took place on the 28th of September, and the result may be considered satisfactory, for it shows clearly what is the general opinion as to the value of tin. The whole sold at 46f. At this price

Digitized by Google

there were orders for considerably more tin than the quantity offered, so that the brokers had to make a curtailment of 15 proc. on all orders. It may give an idea of the state of the opinion of the public if we mention that at 45f. one firm alone held orders for half the sale, from which we may infer that the price paid is very moderate. The opinion in well-informed quarters is that the large quantity of Banca tin sold in the two last sales arises from an accumulated stock, which already existed in Batavia; this having been brought forward to Europe, is now disposed of, and the effect of the short production of Banca mines in 1865 will be plainly felt in 1867. Consumption is going on on an extended scale, and all manufactures in which tin is concerned are in large and increasing demand. Billiton has been in limited request. The 710 slabs brought forward in the Trading Company's sale were sold at 45¼ to 45½f. The unsold stock was on the 1st inst.—34,554 slabs, against 48,788 in 1865, while the stock on warrants amounted to 109,359 on the 1st October.

Money.—Since the Bank fixed its rate of discount at 5½ per cent. for bills and 6 per cent. for acceptances, no alterations have taken place. On the whole, however, the position may be viewed as satisfactory, and a further reduction must soon take place. In the open market large capitals are disposable at ½ to 1 per cent. under Bank discount.

The operations in stocks and shares were, since our last report, not of an extensive nature. A general flatness was rather apparent, and even Dutch stock gave way as well as foreign securities. In the meanwhile it is thought that the better state of the money market and the much improved political condition of Europe will lead to greater activity in the market, especially as the Jewish holidays have been brought to a close, and many of the dealers and brokers who have been abroad for some time are now returning to business.

Two-and-a-half per Cent. Dutch, 51⅞; Three per Cent., 65½; Four per Cent., 88; Trading Company, 136⅛; Netherlands Bank, 253; Dutch Rhenish Railway, 103¾.

Change.—London, 3 mo., f. 11.66; 2 mo., f. 11.69½; short, f. 11.79. Paris, 3 mo., f. 46.35; 2 mo., 36.47½; short, f. 46.65. Hambro, 3 mo., f. 34.87½; 2 mo., f. 34.97½; short, f. 35.25. Bremen, 3 mo., f. 188. St. Petersburg, 3 mo., f. 142.50.

Shipping.—Departures.—Sept. 25, from Texel for Batavia: H.M. steamer Willem, Robertus Hendrikus; for Sourabaya: Alika; Sept. 28, from Brouwershaven for Batavia: Cornelis Wernard Eduard; Sept. 29, from ditto for ditto: Eva Johanna; from Texel to Sydney: Zes Guzesters; Sept. 30, from Brouwershaven for Batavia: Mary and Hillegonda; Oct. 1, from Texel for Padang: Padang Packet; Oct. 2, for Batavia: H.M. steamer Java; for Samarang, Stad Leyden; for Sourabaya, Admiraal de Ruyter; Oct. 5, for Batavia: Wykaam Zee.

Arrival.—Sept. 25, at Texel from Batavia: Jupiter.

PASSENGERS OUTWARD.

For Java.—Per Minister Fransfen van de Putte: Messrs. v. d. Ende and family, Schmitt and family, Stoltman and family, Ten Siethoff and family, Redeker, Senn van Bazel, Soett Leefers, Regenhart, Kulker, Mounier Teltz, and Lambauggen; Mrs. Siedenburg and family, Lavelette. Per Robertus Hendrikus: Messrs. B. van Moerkerken and family, E. K. A. de Neve and family, Mr. Y. v. d. Heida. Per Cornelis Wernard Eduard, Messrs. A. L. van Blommenstein, A. C. Uljeé, R. W. H. Petloo, L. J. Boghtlingk, F. J. Potter, P. G. J. van Ghert, A. J. M. van Leth, Z. H. Rietberg, the family Hoorn, the family Coelen, the family Wenzel, the family Schoryder, the family Niessen, Mr. Th. Baron van Heeckeren van Brandsenburg, Mrs. Dykmans, Mrs. Thieme, Miss Hardes. Per Wykaan Zee: Mr. A. H. Clignet and family, Messrs. J. van Hoorn, J. Sheunitz and family, Betz and family, Elias and family, Misses Teunisz, Visser. Per Admiraal de Ruyter: Messrs. Grouw and family, van Heusden, van der Weyden, Misses v. d. E. C. Palm, Nicolai, and Huiser. Per Stad Leyden: Messrs. Walbehn and family, Weitengh, Barghorn, Backs, Mrs. Schultzeroden.

PASSENGERS INWARD.

From Java.—Per Jupiter: Mr. W. F. Versteeg and family, H. F. W. Cornets de Grooz and family, F. van Utenhove, D. C. de Bruin and family, J. E. W. van der Marek, W. L. Ramack, J. D. L. Jacobson, G. Constantius, Miss M. Kuhler.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.

Hamburg, Oct. 6.

As the war in Germany is now over and peace re-established the Hamburg contingent has returned to this city, the reserves have been dismissed, the superfluous horses and stores sold, and the troops replaced on the peace footing. An order of the day has been published by the Senate, announcing the reception of a highly flattering and complimentary letter from the General in command of the brigade, expressing his perfect satisfaction with the discipline and efficiency of the Hamburg troops, and only regretting they had not an opportunity of proving it before the enemy.

The Prussian corvette *Vineta* now on her voyage round the world, must by this time have arrived in China, and she will be stationed there to protect the German commerce from pirates.

Prussia is about to send another ship of war to China, to assist in putting down piracy in those waters.

COMMERCIAL.

Coffee.—This article now attracts more attention, and larger parcels than of late have been bought at full prices. Sales, 25 000 bags. Imports till end of Sept., 59,900,000 lbs., against 84,700,000 lbs. last year and 52,500,000 lbs. in 1864. Present stock, 20,000,000 lbs., against 24,000,000 lbs. last year and 7,000,000 lbs. in 1864.

Sugar.—Raw calm, and prices in favour of buyers, with a tendency to recede further. In the absence of Refined no transactions to report.

Rice.—A continued lively demand for Cleaned at firm rates. No sales of Rough.

Spices.—Nothing sold by importers, but a good consumptive business has been done by the dealers.

Spelter.—No confidence is felt in this metal, but still rather better prices are obtained. The following transactions are reported:—

1,500	centners,	in loco. at	13 Mks.	7 Sch.	Bco.
1,000	„	for Dec. and Jan. ..	13 „	10	„
1,000	„	in loco	13 „	8	„
500	„	do. W.H. ..	13 „	14	„
1,000	„	March and April ..	13 „	15	„
6,000	„	Dec. and Jan.	13 „	12	„

Imports till end of Sept. 318,000 centners, against 232,000 last year and 417,000 in 1864. Stock Oct. 1, 50,000 centners, against 15,000 last year and 24,000 in 1864.

Discount.—3¼ to 4 per cent. Money plentiful.

Shipping.—Sailed.—From Cuxhaven, Sept. 29, Hieronymus, to Hong Kong; 30, Herman and Emma, to Singapore.

Monetary and Commercial.

The directors of the China Steamship and Labuan Coal Company have issued a circular proposing to reduce the nominal capital of the concern and the liability of the shareholders, by making all the shares £5 each instead of £20. The 4,030 shares which are fully paid up will be exchanged for four £5 shares each; and on the 20,335 shares on which £11 is paid, a call of £1 will first be made, after which three £5 shares, with £4 paid, will be issued in lieu of them. This plan will doubtless tend to improve the value of the shares by relieving shareholders from the fear of future heavy calls, without in any way impairing the security of the creditors. Very encouraging accounts have been received from Labuan, and great confidence is expressed regarding the future prospects of the undertaking. The concession made by the Spanish Government on all imports by the company's vessels into Manila is likely to make the line of steamers very profitable. The following is an extract from the circular:—

"Mr. Sinclair writes:—'Labuan, August 27.—I may congratulate the directors on the lively appearance Coal Point presents at present, as there are no less than five steamers here. The *Rifleman* is now surveying within forty miles of Labuan, and as Captain Reed, who is command of her, is anxious to take advantage of the present fine weather, he has run back for coal. Since I wrote (August 13) we have shipped coal as follows:—Her Majesty's screw steamer *Rifleman*, 187 tons; Her Majesty's screw steamer *Forester*, 20 tons; the barque *Bravo*, 577 tons; screw steamer *Mona*, 161 tons; screw steamer *Japan*, 221 tons; total, 1,166 tons. B Pit.—This pit is now sunk nearly thirty-one fathoms. We have tapped a feeder of water, about 350 gallons an hour; this water comes from the sandstone which lies above No. 1 seam of coal. The small portable engine is quite sufficient power to enable us to continue sinking with more water than this. I expect the shaft will reach either the No. 1 seam or a seam above, in less than ten fathoms. New Openings of Coal.—The work here has progressed well since I wrote. A great deal of No. 1 seam is bared ready to be sent for shipment as soon as the small engine is erected to hand it over the hill. The earthwork for the formation of the self-acting inclined plane and the engine bank is nearly finished. The coolies employed in this work are those we employ in coaling ships, and at present they are all busy coaling, which creates a delay in the new opening works.' Extract from letter of Mr. Pitman, marine superintendent.—'Singapore, Sept. 1, 1866.—Steamer *Japan*.—The steamer arrived here yesterday afternoon with mails and passengers for Europe. I am pleased to inform you that the definite establishment of the line by means of the *Mona* and *Japan* has had an effect on the authorities at Manila, and that they have authoritatively granted us a first concession which is of no small importance—viz., permission for all goods sent round the Cape and transhipped by our steamers from Singapore, to be admitted at 10½ per cent. duty.'"

We understand that it is contemplated to add five more steamers to Holt's Liverpool line of screw steamers to China which now consists of the *Agamemnon*, *Achilles*, and *Ajax*, and that Japan is to be included in the service.

Mr. William Turquand, of the firm of Coleman, Turquand, Youngs, and Co., and Mr. F. W. Lawrence, the acting general manager of the bank, have been appointed provisional official liquidators of the Asiatic Banking Corporation.

At the meeting on the 18th inst. the directors of the Oriental Bank will propose an interim dividend of 30s. a share, being at the rate of 12 per cent. per annum for the half-year ended the 30th of June, 1866.

It appears that the Parsees in London are desirous that it should be known that the great Premchund Roychund is not a Parsee but a Hindoo.

Mails will be made up for Ceylon on the 12th via Southampton, and 18th via Marseilles, to be forwarded by an extra P. and O. steamer from Suez.

The shareholders in Overend, Gurney, and Co., who are trying to evade the payment of their calls, have so far succeeded that the payment is ordered to stand over until next month. In addition to this these malcontents have entered or given notice of actions against the directors of the company. The notices are served in the name of Mr. Frederick Dundas, a shareholder

Digitized by Google

and member of the defence committee, to recover damages, on the ground that he was induced to become a shareholder from misrepresentations in the prospectus. The directors were as follows:—

Henry Edmund Gurney, Esq., 65, Lombard-street.
John Henry Gurney, Esq., 9, St. James's-square, and Catton Hall, Norwich.
Robert Birkbeck, Esq., 65, Lombard-street.
Henry Ford Barclay, Esq., Monkhams, Woodford, Essex.
Thomas A. Gibb, Esq. (Messrs. T. A. Gibb and Co.), 72, Old Broad-street.
Harry G. Gordon, Esq., Chairman of the Oriental Bank Corporation.
William Rennie, Esq. (Messrs. Cavan, Lubbock, and Co.), 16, Leadenhall-street.

ARTICLES OF IMPORT.

TEA.—We have a very slight improvement to notice in our market during the past fortnight. The quantity offered without reserve at the last public sales has been much below that of the previous ones, and they have passed off with fair spirit at rather better prices for the common to fair kinds of Congou. In new Teas the trade have shown rather more disposition to purchase, the range of prices established being moderate, and on the whole we can report rather more business doing, with prices fully supported. A few of the really finest Kaisows have sold from 2s. 4d. up to 2s. 8d. per lb. in one instance. The public sales of the 2nd inst. comprised only 31,989 packages, of which 29,500 packages were sold, 29,279 being offered without reserve. Broken-leaf and dusty kinds show no change. Black-leaf siftings, with all faults, have sold from 6d. to 6¾d. per lb., Kaisow siftings from 7d. to 7¼d. per lb. Those with leaf continue firmly supported. Fair to good Kaisows of new import have sold from 1s. 7d. to 1s. 11d. per lb., fine to finest from 2s. to 2s. 8d. per lb.; Pak Ling sorts at fully former prices. Common to fair black-leaf Congous have sold at an advance of about ¼d. per lb. at the recent auctions. The new make Canton kinds have sold at about previous prices; Amoy sorts much as before. Common to fair Oolongs show no change. In Souchongs the few to hand have met with a fair demand at full prices. Flowery Pekoes of old import have sold at the recent auctions as low as 8d. to 10½d. per lb. for common to good. In Scented Teas sales have been very difficult to make, those arrived ex Belted Will being generally considered inferior to last season's, and wanting in scent, and only a very small proportion has been realised. A few of reall superior have been saleable at extreme rates, owing to their scarcity. Foo Chow kinds have sold rather lower. Of uncoloured Japans there have been no arrivals, and transactions are extremely limited. In Green Teas the amount of business has been limited, but prices for all kinds have been firmly maintained, the quantity on offer being moderate, there being a fair demand both from the Trade and Exporters. Moyune kinds have been the most sought after. Some parcels of Hyson have been taken for Export, one or two superfine Chops at very high prices. Good Canton Gunpowders have sold rather dearer, but common show no alteration.

SILK.—We have a very firm market in silk, owing to the scanty arrivals, but by no means an active one. We have now been forced into a scale of prices hitherto unknown, and it would be well to consider whether such extreme rates are justified by circumstances. The export from China this season will doubtless be very short, and perhaps not exceed 30,000 bales; but at the same time consumption is on a most restricted scale, and with the present almost prohibitory prices, the most sanguine speculator can hardly look for any material improvement in this respect. In 1864 65 the total export of China Silk only amounted to 25,031 bales, and the highest price for No. 3 Tsatlee was 31s. per lb., which quotation was only maintained for a few days. Still speculative feeling continues, and the successive telegrams are watched with increasing interest, the great point being the continually advancing prices paid in Shanghai, which is looked upon as the most effectual confirmation of the continually diminishing estimate of exports. Of Japan silk there have been some arrivals recently, speculative purchases made at the Amsterdam sales on 20th ult.; some of these have found buyers in this market at an equivalent of 36s. for best Mybash, and 56 bales of new season's Silk, from Japan direct, have also been warehoused and sold at 36s. Canton Silk of fair sizes is scarce, and worth 24s. 6d. for Loong Kong No. 1. and 26s. for Tsatlee reel. The deliveries in Sept. were 2,732 bales China, 429 Japan, and 600 Bengal—total 3,761, and from 1st to 6th inst. respectively 605, 140, and 185—total 930 bales. The stocks on 1st inst. were in total 19,488 bales, against 22,962 bales on 1st October, 1865. Of China Silk piece goods there have been no arrivals since the public sales last month, and there is a general scarcity of goods, with nominal quotations.

COTTON.—There has been a great increase of activity in the Cotton Market since our last report. This was principally caused by a constant arrival of unfavourable reports regarding the American crop. Up to the 3rd inst. an extensive business was transacted at an advance in price of 1d. to 1⅛d. per lb.; but later, there has been less animation, and more desire on the part of holders to sell, which caused a decline of ¼d. to ⅜d. per lb. At the close of the market the quotations were—for Dhollerah: 10½d. per lb for Middling Fair, 11d. to 11¼d. for Fair to Good Fair, and 12d. to 12¼d. for Good to Fine; for Tinnivelly: Fair to Good Fair 10¾d. to 11⅜d., for Good to Fine 12d.; China was not largely represented, but some sales were effected at from 9¾d. to 10½d. per lb. At Liverpool Middling Orleans is quoted at 15¼d., Dhollerah at 11d. Telegraphic advices from New York up to Oct. 9th report Middling Upland 37 cents, Gold 149¼.

SUGAR.—The dulness of the market still continues, notwithstanding a slight improvement at the commencement of last week. There has been no public sale of Foreign descriptions, but by private contract about 6 000 bags Unclayed Manila have been sold at 25s. to 25s. 3d. No business has been done in any other Foreign Sugars, and floating cargoes meet with no inquiry. Of Colonial there is little to report; what business has transpired having been chiefly in Mauritius. At the opening of the market 642 bags low to fine brown realised at auction 25s. 6d. to 28s. 6d., and at its close, on the 5th inst., 885 bags same quality offered were nearly all withdrawn, a very small quantity selling at 25s. to 28s. Of Bengal 1,437 bags were disposed of at 32s. to 34s. 6d. for middling grey to good yellow. The market has closed entirely without animation.

COFFEE.—The market opened very quietly, but has recently become more active, and although the supply placed on offer has been extensive, former prices have, for the most part, been maintained. The public sales of Plantation Ceylon have amounted to 2,300 casks 1,250 barrels and bags, which were all sold at the following prices:—Fine fine ordinary to low middling, 76s. to 80s.; middling to good middling colory, 81s. to 86s. Of Native Ceylon, 1,497 bags were disposed of publicly at 66s. to 67s. good ordinary; 69s. fine ordinary, and 72s. to 74s. bold. In addition, 820 bags sold at the close of the market at about the same prices.

RICE.—The flatness exhibited at the close of the previous market has continued without abatement, and, although offers have been made at less money, buyers decline to operate except at a material reduction, which holders have hitherto declined to submit to. The result is that we are without quotations, either of Java or Madras.

PEPPER.—This market is somewhat dull, with a tendency to a decline in prices; at present, however, the only fall has been in Malabar, other descriptions remaining the same as in our last report. The quantities and prices are as follows:—1,062 bags black Singapore offered at auction, sold at 3⅞d. per lb.; of 1,633 bags Penang, two-thirds sold at 3¼d. The wrecked cargo of the Golconda, 5,650 bags sold at at 1½d. to 3¼d., according to quality. Privately but little business has been done in Singapore, 3¼d. to 3⅝d., Penang 3⅝d. White still continues flat, and the only sales reported are 252 bags Penang at auction as 6d. to 6¾d., and 600 bags Singapore partly disposed of privately at 6⅜d. to 6 7-16d.

SAGO.—Market continues steady at about former rates. At auction 540 boxes and 589 bags sold as follows:—Fair small Pearl, 17s. 6d., fine, 18s. to 19s., large and medium, 16s. 6d. to 17s. 6d.

TERRA JAPONICA.—Cutch Pegue remains firm, but is in less demand, and is quoted about 3d. per cwt. less. At auction 803 bags were offered, of which one-fourth sold at 32s. to 32s. 6d. Of Gambier 500 bales at auction were all retired. Fine is still quoted at 23s. 6d., but there are few buyers.

HEMP (MANILA).—The market is very firm, owing to absence of supply. The business done has been very limited at £47 to £51 per ton, showing a slight advance on our last report.

HORNS.—The sales have just concluded; full prices have been realised, and there is a good demand. Siam Buffalo sold for 49s. per cwt., Madras 26s. 6d. to 34s. 6d. Of deer 17 tons sold; Cochin 60s. Ceylon 64s., Madras 41s. 6d. to 54s.

CARDAMOMS.—Still improving; 36 cases Aleppy sold at auction, ordinary 3s. 8d. per lb., good to fine 5s. 1d. to 5s. 5d. Of 31 packages Ceylon two-thirds sold, low husky 1s. 1d., fair to good 3s. 6d. to 3s. 10d.

CAMPHOR.—Since our last the market has become much more active, and a large business has been done. The quotation for Japan remains the same, viz., £6 10s. per cwt., while for China there is an advance reported of 2s. 6d., the market closing at £6 5s. per cwt.

DRUGS.—Cubebs: very quiet; 40 cases at auction all retired. Dragon's Blood: steady; 26 cases fair to good block sold at auction at £6 15s. to £10 15s. per cwt. Rhubarb: quiet; 96 cases were offered at auction, of

Digitized by Google

which only a few were sold at 4s. per lb. for middling; very little doing privately.

Spices.—Cloves: markets steady; at auction 29 cases Penang sold at 1s. 1d. to 1s. 2d., and 8 cases Ceylon at 10½d. to 1s. 9d. for very fine bold. Nothing doing in Zanzibar. Cinnamon: 110 bales offered at auction were all taken off at the same prices as in our last report, viz.—1st quality 1s. 9d. to 2s. 8d., 2nd 1s. 8d. to 2s. 5d., 3rd 1s. 3d. to 2s. 1d. Nutmegs: market quiet and prices rather lower; of 32 cases Penang at auction, one-third sold at 1s. 9d to 2s. 11d per lb. for fine small to good medium and bold. Mace: steady; and of 8 cases Penang and 4 casks Batavia at auction, one-third sold at 3s. 1d. per lb. fair palish, and middling to good reddish 1s. 7d. to 1s. 10d.

Cocoa-Nut Oil.—This market has been firm, with an improved demand. The business done has not been to a very great extent, but 158 casks Cochin and 81 casks Ceylon have been placed, at an advance of 20s. to 30s. per ton.

Oils.—Anniseed: has been in good demand, principally for speculation and export; prices are higher, being 9s. 4½d. per lb. on the spot and 9s. 6d. for arrival. Cinnamon: Quiet, and 5 cases at auction all retired. Citronelle: about 20 cases at auction realised same prices as at last report, viz., 3¼d. to 3½d. per oz. Lemon Grass: 2 cases offered at auction sold at 12½d. per oz.

Japan Wax.—The scarcity still continues, and good qualities are much wanted. Only 70 boxes Watery Saucers sold at 53s. to 58s. per cwt. Arrivals expected.

India-rubber.—Supply very limited, and in consequence sellers demand high prices. About 40 baskets Singapore have realised 2s. per lb.

Gutta Percha.—Market remains flat; 45 packages were offered at auction, about half of which sold at 1s. 4¼d. to 1s. 6½d. for ordinary to fair genuine. A sale is also reported of 5 tons reboiled at 7d.

Gums.—Benjamin; Siam cheaper, and 7 cases sold at auction for £34 per cwt. 1st quality, £20 10s. for 3rd, and £17 dark. Sumatra steady, and of 114 cases offered, one-third sold at £10 15s. for false packed 2nd quality, and £5 15s. to £6 2s. 6d. for middling 3rd quality. Gamboge: very scarce and much wanted; no business reported. Damar: scarce and firm; 40 cases at auction retired.

Tin.—The course of this market still remains unfavourable, and prices have greatly declined. Straits has fallen from £81 per ton to £79, and Banca from £82 10s. to £80 10s. for ready cash. The sales have been in fair quantities.

Hides and Skins.—The sales of East India Hides during the past month reached 233,512 Skins, out of which 6,930 were Cochin. These sold as follows:—Best Light, 8¾d. per lb.; Seconds, 7d. to 7¾d. per lb.; Heavy 5½d. to 5½d. per lb.; Second Small, 7¼d. to 7¼d. per lb.; Third Small, 6¼d. to 7d. lb.; Thirds, 5¼d. to 6½d. per lb. Of Batavia descriptions the sales were continued to 203 Buffalo, which realised 6d. to 6¼d. per lb. Of Singapore and Penang the sales have been 867 Cow and 3,441 Buffalo Hides, which have realised, Penang Cow Light, 6d. to 6½d. per lb.; Heavy, 4½d. to 5d. per lb.; Thirds, 4½d. per lb.; Buffalo Best, 5¼d. to 5½d. per lb.; Seconds, 4¾d. to 5¼d. per lb.; Light, 4⅞d. to 5⅜d. per lb.; Manila Buffalo are in limited demand; 2,769 Hides were offered, but not sold.

Wool.—At the quarterly Wool Sales held on the 25th September, about 50 bales China were offered, for which no bids were made.

Miscellaneous.—Blacklead: very firm, and 132 barrels at auction sold at 14s. to 20s 6d. fair to fine, lump, and 9s. 6d. dust. Ebony Wood: of 80 tons Ceylon at auction nearly all sold at £8 to £11 2s. 6d. per ton. Galls: all descriptions scarce; limited business has been done in China and Japan sorts at former prices. Musk: slight advance in prices with fair business; of 125 caddies Tonquin offered, about half sold at 31s. 6d. to 33s. good picked, and 21s. 6d. to 22s. middling rough and damp; subsequently about 40 caddies of the rough sold at a slight reduction from these quotations; 2 tins Grain were retired. Soy: Nothing doing. Tortoiseshell: Steady, and of 3 cases Penang, 2 sold at 12s. to 13s. 6d. per lb., 1 case Singapore sold at 18s. out of 2 offered. Turmeric: None here at present, either China or Java, but an arrival expected of China. Vermillion: 18 boxes at auction, a few of which sold at 3s. 3d. per lb. Mother-o'-Pearl: Very scarce, Singapore not obtainable, and 180s. per cwt. has been paid for a few boxes Manila. Rattans: In better demand; 14,870 bundles Singapore and 4,803 bundles Penang at auction, sold at 1s. 8d. to 6s. per hundred, according to quality.

ARTICLES OF EXPORT.

Iron.—The quotations in London are for Welsh bars £6 5s. to £6 10s.; nail rod, £8 10s. to £8 15s.; hoops, £9 10s. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 5s. to £6 10s.

Steel.—Swedish keg, £15 15s. to £16 10s.

Copper.—Sheet and Sheathing, £91 to £93 per ton; yellow metal, 7½d. per lb.

Tin.—£85 for block; £86 for common bars. Tin plates, best charcoal, I.C., 33s. to 34s.

Lead, &c.—English pig, W.B., £22 15s.; shot, patent, £23 10s. to £24; sheet, £21 5s.; spelter, £20 5s. to £20 10s.; zinc, English sheet, £27; quicksilver, £7.

The following is from the Circular of Messrs. French and Smith:—Notwithstanding the increasing ease and abundance of money, we have experienced a heaviness in this market equal to, if not resulting from, the unhappy condition of the atmosphere. Iron: Scotch Pig Iron is gradually improving. Manufactured Iron is firm, with moderate demand. Copper: After a sharp speculative inquiry early in the month, not meeting with a sufficient demand for consumption, has become again flat and inactive. To make sales of importance, instead of obtaining higher than official quotations, as the Smelters were able to do three or four weeks since, some reduction must now be submitted to. Foreign, as well as English, hangs heavily on hand. We quote—Kapunda, 92; Burra, 89; Wallaroo, 88; Spanish, for the moment, almost unsaleable. Tin: The advance in Foreign Tin reported in our last monthly circular was not long maintained; from 85s., which was paid for Fine Straits for forward delivery, the quotation receded to 81s. for immediate cash. As the time approached for the Dutch Sale, some considerable parcels of Banca were sold at £82 10s. Dutch prompt. At the actual sale, however, the whole quantity—109,300 slabs—was cleared at 46 guilders, equal to £81 10s. to £81 15s., laid down here at current exchange on day of sale. It is supposed that the Dutch commission houses took the greater portion of it, and have offered it to their various correspondents abroad. The sale going at this figure compels the English Smelters to reduce their price; and in some measure to meet this necessity, they yesterday declared a reduction of 3s. per cwt. Foreign, however, is still comparatively cheaper by some shillings per cwt. We quote prices of Banca to-day 81s., either for cash or Dutch prompt. Straits: Fine 80s. but of this latter not much is on the market. Many persons much interested in the Tin Market, and who should be well-informed, confidently expect diminished shipments both from Banca and the Straits, during the next six months; but as to the accuracy of the information on which their expectations are based, time only can give any positive decision. The quantity of Straits Tin afloat for Europe is about 920 tons against 1,680 in 1865, and 1,127 tons in 1864. Tin Plates: The manufacturers are excellently well supplied with orders, many of them having work enough to occupy the remainder of the year. They have great difficulty in satisfying the demands of their customers, as so many workmen are suffering from the prevailing sickness. The shipments last month from London and Liverpool were 135,000 boxes against 95 000 same month in 1865. Lead: The demand has been but moderate, excepting for a few favourite brands, there is no alteration in price. Spelter: is quoted about £20 5s. here. The stock here on the 1st inst. was 5,827 tons, against 6,807 tons same period last year.

EXPORT OF BULLION TO CHINA &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

We have to report outward berth freights as having become somewhat slacker since our last issue; coal rates from the northern outward ports are still quiet at previous quotations. We have no transaction to report in homeward charters.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £41. For Singapore: £32. For Shanghai: £50. For Saigon: £50. For Yokohama: £51. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Singapore, £1 9s. For Shanghai: £2 10s. For Saigon: £2 8s. For Yokohama: £2 7s. 6d. Batavia: £1 6s. For Manila: £2

The Admiralty have invited tenders for the conveyance of 570 hhds. porter from the River Thames to Hong Kong, and have accepted the Belted Will for conveyance of troops to Hong Kong.

CASUALTIES.

The Robert Dickson, Wilson, from Sourabaya to Amsterdam, which put into Falmouth Sept. 19, dismasted, has been surveyed and commenced landing her cargo.

Advices from Batavia, dated Aug. 11, state that the Comus, Black, which left Sourabaya, Aug. 11, for Amsterdam, had struck near Pakies, and would probably have to discharge.

MISCELLANEOUS.

At BAHIA.—Sept. 28, Gerard Pieter Servatius, Beckering, sailed for Batavia.

On the 27th Sept. Messrs. R. Steel and Co. launched from their yard on the Clyde an iron ship named the Gryfe. She is 197 ft. long, 33 ft. 6 in. broad, and her depth of hold is 21 ft. 8 in. She is owned by Capt. Russell, of Greenock, and is intended for the East India and China trade.

The P. and O. Co.'s steamer Mooltan has arrived at Southampton from Calcutta for a general overhaul and repair. She left Calcutta on the 17th July and arrived on the 4th October, being 78 days.

Sir J. Brooke, Rajah of Sarawak, has contracted with Messrs. Blackwood and Gordon, of Port Glasgow, for a screw steam yacht of 300 tons. Messrs. Denny, Brothers, have completed a small screw, 38ft. long, 8ft. broad, and 4ft. deep, and propelled by engines of 7-horse power.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"It prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place.'"

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay.*—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

HONG KONG & SHANGHAI BANKING COMPANY, LIMITED.

REPORT of the COURT of DIRECTORS to the ORDINARY HALF-YEARLY GENERAL MEETING of SHAREHOLDERS, to be held at the BANKING HOUSE of the Company, Wardley House, Hong Kong, on THURSDAY, the 16th of August, 1866.

To the Proprietors of the Hong Kong and Shanghai Banking Company (Limited).

GENTLEMEN,—The Court of Directors have the pleasure of submitting to you the accounts for the half-year ending the 30th June last, from which it will be seen that the net profits of the Bank, after deducting interest paid and due, salaries, rents, and all working expenses, amounted to 258,227.43 dols., out of which, after taking out the rebate, the amount written off preliminary expenses, &c., there remains for appropriation the sum of 212,396.86 dols., as shown by the following Statement of Accounts, which has been duly audited by the Hon. W. H. Rennie, and Phineas Ryrie, Esq.

ABSTRACT STATEMENT of LIABILITIES and ASSETS of the HONG KONG and SHANGHAI BANKING COMPANY (Limited), on the 30th June, 1866.

ASSETS.	Dollars.
Cash balance on hand and at bankers	1,542,650 36
Discounts, loans, credits, &c...	4,754,570.04
Exchange remittances...	4,722 212.25
Preliminary expenses	25,812.34
Dead stock	29,605.55
	11,074,850.54

LIABILITIES.	Dollars.	Dollars.
Paid-up capital—		
125 dols. per Share, 20,000 Shares	2,500,000	
1st call on new stock paid by anticipation	38,775	2,538,775.00
Reserve fund		33,300.00
Deposit and notes in circulation		3,810,833.03
Exchange acceptances...		4,433,715.03
Profit and loss account... ... —		258,227.43
		11,074,850.54

PROFIT AND LOSS ACCOUNT.

	Dollars.	Dollars.
To amount written off preliminary expenses	5,812.34	
To amount voted to the Hon. Thomas Sutherland, late Deputy-Chairman	4.444.44	
To rebate on bills not due	35,573.79	
		45,830.57
To dividend at the rate of 8 per cent. per annum, or 5 dols. per share	100,000.00	
To amount carried to reserve fund	66,700.00	
To balance, being undivided profits carried forward to next half-year...	45,696.86	
		212,396.86
		258,227.43

	Dollars
By balance of undivided profits on 31st December, 1865	12,281.00
To amount of profits for the six months ended 30th June, 1866, after deducting all expenses and interest paid and due	245,946.43
	258,227.43

RESERVE FUND.

	Dollars.
To balance 30th June, 1866	100,000.00
	100,000.00

	Dollars.
By balance on 31st December, 1865	33,300.00
By amount transferred from profit and loss account	66,700.00
	100,000.00

From the profits thus shown, the Directors recommend a Dividend of 5 dols. per share, equivalent to 8 per cent. per annum, which will absorb 100,000 dols., and of the remaining amount the Directors propose carrying 66,700 dols. to the Reserve Fund (which will increase it to 100,000 dols.), and the further balance of 45,696 dols. 86c. forward to the credit of the new account, in addition to 35,573 dols. 79c. being rebate on bills not due.

The Directors have to congratulate the Shareholders on the satisfactory result of the operations of the Bank for the last half-year, which, as is generally known, has been a period of continued and increased depression.

The Bank has had the good fortune of almost entirely escaping the effects of the crisis which has just passed over Europe and India, the only exception being Bills of the Agra and Masterman's Bank; but, from specific information received from England, as well as that of a more general character, doubtless known to the Shareholders, the Directors feel some confidence that the only prejudice the Bank is likely to suffer is the temporary lock-up of some of its funds, and the consequent loss of profit thereon. The Directors, therefore, have every reason to believe that the amount carried, as above, to new account, will be amply sufficient to provide for any contingencies on this head, and that the reserve fund of 100,000 dols. will remain intact. As shown by the accounts, the Directors have still deferred their claims for remuneration.

The business of the Bank generally has been steadily increasing, and the current and fixed deposits show a much larger amount than at the end of last year. With comparatively few exceptions, the entire mercantile community and very many native merchants are now interested in the Bank, and have given it their full support; and their confidence in the position of the Bank has not been shaken, even under the very trying circumstances which have involved so many hitherto well known banking establishments.

Incorporation.

An Ordinance to carry out this object, framed in accordance with the directions of the Secretary of State for the Colonies, and the Lords Commissioners of the Treasury, has been laid before the Legislative Council and read a first time, and subject to certain alterations suggested by His Excellency the Governor (calculated to be beneficial to the Company), the Directors believe there is but little doubt that the Ordinance will be passed at the next, or an early Meeting of the Council.

Agencies.

Under the existing very unsatisfactory state of commercial and financial relations in India, the Board have thought it prudent to postpone the opening of Agencies there for the present. They have however determined to open an Agency at Yokohama, and have appointed an Agent at that port, where they hope, in course of time, to transact a remunerative business.

New Capital.

The Shareholders are already of course aware of the change in the distribution of the Capital of the Bank, and the consequent increase of its amount, carried at the Extraordinary General Meeting held for the purpose on the 3rd of March last. This was done with a view to the Incorporation of the Bank, and, with the exception of a small portion, the new Shares have been freely applied for, and taken up, by the proprietors of the Bank; though, in view of the heavy monetary pressure prevailing for the past few months, the Directors have not yet finally closed the list of applications, which may probably account for the fact that there are still some new Shares unapplied for.

Premises.

The Directors purchased a short time ago, for 60,000 dols., the premises known as Wardley House, where the business of the Bank has hitherto been carried on. By this purchase they hope to reduce the current expenses for rent, and at the same time make a suitable investment of part of their Reserve Fund, which, no doubt, will meet the approval of the Shareholders.

Directors.

The Honourable Francis Chomley, Mr. Douglas Lapraik, Mr. Palanjee Framjee, and Mr. H. W. Wood having resigned, the Court of Directors have appointed the Honourable John Dent and Mr. Caleb T. Smith to two of the vacant seats in the direction, which is now composed of the following gentlemen:—Hon. John Dent, Chairman; Mr. Woldemar Nissen, Deputy-Chairman; Messrs. A. F. Heard, Geo. J. Helland, H. B. Lemann, A. Sassoon, Caleb T. Smith, Hon. Thomas Sutherland, G. F. Maclean.

Auditors.

In the place of Mr. Caleb T. Smith, appointed to a seat at the Board, the Directors have elected Mr. Phineas Ryrie as one of the Auditors to the Bank. In accordance with Clause 92 of the Deed of Settlement, this meeting will now have to elect two new Auditors, to examine the accounts of the Bank for the next half-year. The Board have much pleasure in recommending the re-election of the present Auditors, to whose valuable services they are greatly indebted.

JOHN DENT, Chairman.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

A. SHORTRede & CO.

Hong Kong, May 17, 1866.

HOLLOWAY'S OINTMENT and PILLS.—EFFECTUAL AID.—In the sad time of sickness it is cheering to know that a remedy does exist and that it can be procured at a little cost. Holloway's Ointment and Pills are always useful in relieving pain, in reducing inflammations, and regulating disordered actions. They never can be misapplied, nor can they, under any circumstances, cause mischief. They are a blessing to the rich when tormented by indigestion, gout, skin diseases, &c., and a precious boon to the poor when struck down by illness. Holloway's medicines should be in the possession of all soldiers, sailors, and emigrants, who will then be in a position to ease pain and cure disease when medical assistance cannot be obtained.

TO IMPORTERS.

The undersigned beg to remind Importers of Wearing Apparel, and Boots and Shoes, of the many advantages which their long experience as Manufacturers and Shippers, their vast resources, and their intimate knowledge of the requirements of Foreign and Colonial Markets enable them to offer.

ASSORTED SAMPLE CASES FORWARDED ON RECEIPT OF REMITTANCE OR ORDER ON LONDON AGENT.

E. MOSES AND SON,
CORNER OF MINORIES AND ALDGATE LONDON

Now ready, 8vo, price 12s.

RUTTER'S METRIC SYSTEM OF WEIGHTS and MEASURES compared with the British Standard Weights and Measures in a complete Set of Comparative Tables; also, Tables of Equivalent Prices under the Two Systems, and of Chinese and Indian Weights compared with Metric Weights, &c.

By HENRY RUTTER,
Author of Exchange Tables and Arbitrations of Exchanges between England, India, and China.

Now ready, Ninth Edition, revised and enlarged, price 25s., cloth lettered,

RUTTER'S EXCHANGE and BULLION TABLES; being a complete Guide to Exchange Operations between England and the East, in sterling, rupees, and dollars, extended so as to meet the requirements of Shanghae rates under any possible variation. To which is now added an Appendix, containing a guide to the negotiation of short-sighted Bills; with other information relative to Exchanges between England, India and China.

By HENRY RUTTER, late Agent of the Commercial Bank of India, Hong Kong.

London: EFFINGHAM WILSON, Royal Exchange.

ENGLISH GARDENS IN THE EAST.

THE Fourth Season has now confirmed the complete success of MR. CHRISTY'S Cases for conveying Fruit Trees, Vines, Plants, Flowering Shrubs, and Seeds, to the East, when shipped in the holds of Steamers like ordinary Case Goods. Mr. John Waterer, junr., the American Nursery, Bagshot, Surrey, or Mr. Christy, 38, Pall Mall, London, are prepared to execute orders for gentlemen in the East, and beg to call attention to the list of prices and conditions. FRUIT TREES, including PEARS, APPLES, PLUMS, CURRANTS, GOOSEBERRIES, PEACHE NECTARINES, APRICOTS, CHERRIES, and QUINCES, p case, 10 Guineas.

	Guineas.
20 FRUIT TREES, with Ten venes, per case	14
ROSES of the best kinds ... ... ,,	15
RHODODENDRONS and AZALIAS, &c.	15
GARDEN SEED (various) ... ... ,,	5 upwds.

The number depends on the size of the roots; the cases average 30 plants each.

All the above prices include freight, insurance, and all charges to any port where the P. and O. steamers call. The season for shipment commences about September and ends in January. All orders must be accompanied by a remittance or orders for payment. The name of the agent at the port of arrival must be furnished, to prevent delay in fowarding.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C Sole Manufacturer.

Per P. and O. steamer, from Southampton, Nov. 4.—To Yokohama: Mr. E. Trotter, Mr. T. Eskrigge, Mr. W. Hetherington. To Shanghai: Mrs. Wadman. To Hong Kong: Mr. E. Bigg, Mrs. F. B. Johnson and two children, Mr. and Mrs. W. T. Richardson, Mrs. Piersdoy. To Ceylon: Mr. Justice Thompson, Mr. and Mrs. J. H. March, Ensign Adams. To Singapore: Mrs. Campbell and friend, Mr. Methven, Mrs. Hargreaves, Mr. R. Riley.

From Marseilles, Nov. 12.—To Hong Kong: Mr. P. J. Forbes, Mr. E. Cunningham, Mr. G. Hughes, Mr. D. King, junr., Mr. R. Brand. To Shanghai: Colonel Raikes. To Singapore: Mr. Braddell, Mr. Baxter.

Per P. and O. steamer, from Southampton, Nov. 20.—To Singapore: Mr. Meldrum, Miss Jewry, Mr. H. K. Bilby. To Ceylon: Mr. G. Hamner.

From Marseilles, Nov. 28.—To Ceylon: Mr. P. W. Braybrooke, Mr. W. H. De Saram, Mr. M. H. Moss. Dr. J. and Mrs. and Miss Loos, Mr. and Mrs. Bonstead. To Hong Kong: Mr. G. Newton,

Summary of News from the Far East.

JAPAN.

The latest telegraphic news from Japan comes from Shanghai under date 21st ultimo, and was received on the 25th inst. It briefly announces the *reported* death of the Tycoon. A telegram of earlier date has been received since then, stating that the Tycoon had abdicated. Advices by the present mail show this to be entirely incorrect, although a rumour to that effect had for a few days obtained credence through a hoax which was played on the editor of the *Japan Times*. Our mail advices do not reach to the date at which the Tycoon's death was announced, and the report should be received with great caution.

YOKOHAMA.

From this port we have advices to the 1st September. The English mail of 10th July arrived out on the 29th August. The French war steamer *Laplace*, which by last mail was reported as being aground outside the harbour, had been got off by the aid of H.M.'s steamer *Bustard*, and the French steamer *Kienchang*.

With regard to the war in the South, the *Japan Times* says:—"There is doubt that Chosiu has been victorious over the Tycoon's generals at all points. He has the great advantage of being at home, in his own country, with accurate information at his command, and was able easily to defeat in detail the separate armies by which he was attacked at different points, it being evidently impossible for the enemy to make such attacks simultaneously. We must premise that there is no truth in the statement lately made elsewhere that the Tycoon's troops had taken possession of the town of Simonoseki. Sir Harry Parkes stopped a couple of days there on his way up the Inland Sea, and everything was found in *statu quo*. The first attack was made upon the north upon Chosiu by Il-kamon-no-kami, son of the late Regent, and Sakaki-Bara, two of the Tycoon's generals, but they were caught in a defile in the province of Iyami and routed with a loss of 300 killed. They retreated in great confusion."

After this, it appears that Chosiu crossed the Straits of Simonoseki and once more took the initiative in the province of Kokura, when he completely defeated Kishiu, the Tycoon's uncle and Commander-in-Chief. Kishiu was badly beaten and fled in confusion; also Hiroshima (Daimio of Geishiu), and Bingo, two partisans of the Tycoon, while Shekshiu (Daimio of Tsuwaro) surrendered and signed a separate peace, giving up two of the Tycoon's Hatamotos (feudal retainers of lower rank than Daimios) to be beheaded. At a town called Mats-da-mura a thousand houses were burnt, and the Prince of Bungo lost there all his stores, guns and ammunition and fled in confusion. Our correspondent concludes by stating that Tanaura, a place held for the Tycoon just opposite Simonoseki, was

Digitized by Google

still burning when he left (July 30th), and that the whole of the Yedo troops and their allies were dispersing in great confusion and fear.

The *Japan Times* says:—"We hear from Yedo, and therefore receive the news with much suspicion, that the Mikado had issued an order to all the great Daimios to prepare for the Chosiu "Seibats"—a ceremony much like "federal execution" in the Germanic Diet. The Prince of Echizen, once So-sai-sho, or Regent, went lately to Miako at the earnest solicitation of the Tycoon, whose relative and firm friend he is. His influence is great with the Daimios as well as with the Tycoon, for it was he who, when Regent, relieved the princes from the expense and humiliation of keeping their families in Yedo while they themselves were away on their own estates. If any noble in Japan could procure the consent of the Mikado to issue this degree of Federal execution on Chosiu, Echizen is the man, but even then grave doubts would exist whether the Daimios would obey.

The *Japan Herald* gives a different version of the position of the belligerents. From Osaca (says the *Herald*) the news is somewhat vague and incomprehensible. For many days tidings have been expected of the result of a great battle, in which the Tycoon was to have 30,000 to 35,000 men engaged. Whether there really is such a force accumulated under the Tycoon's banner out of Osaka itself, and advancing to meet Chosiu, seems to us very problematical. However, instead of any account of the expected battle, or any tidings of the actual movement of such an army, we have the following:—On the 16th of 6th month (Japanese) there was a skirmish, in which Midzoo-oi no kami, with a party of the Tycoon's troops, attacked a party of those of Chosiu, killing their chief, Tsoo-yama. Nine days later, on the 25th of sixth month, Midzoo-oi no kami and Ogakino Tada encountered another body of Chosiu's troops, and dispersed them. The defeat of Ikamono no kami and Sakabara seems to have been a most disgraceful affair; the discomfitted troops were seized with panic and fairly ran away. From all we can gather, the Tycoon's troops are now experiencing the ill effects of their folly in rejecting the use of the rifle. The Tycoon has far more rifles than would suffice for all his soldiers, and yet only about 10,000 have submitted to learn the use of this arm.

At this moment (says the *Herald*) Chosiu is fighting the Tycoon single-handed. He has no allies, but declares that he will fight to the death. The Tycoon's troops are divided, the greater part being still in Osaca, unless they have moved forward in consequence of the representations of those generals who had already gone to the front. Ogasawara Sama, one of the cleverest members of Gorogio, is at Kokura at the head of only 3,000 men, and, we must suppose, in a very critical position; and other Daimios have been sent forward with troops, in numbers quite too small for any decisive operations. The consequence is the Tycoon is giving the advantage to Chosiu of being able to meet his troops in detail, instead of sending a a large army forward to strike one great and decided blow. Both of the belligerents labour under the disadvantage of being without funds in their exchequer; Chosiu, being in his own territory, will naturally feel this much less than the Tycoon. The latter is put to the greatest straits to get forward his commissariat and munitions of war. For some time past strings of coolies have been passing daily along the Tokaido carrying even shot and shell on bamboo poles. The expense of such a means of transport may be easily imagined. After much hesitation, the Tycoon's Government had chartered the steamer *Fusiyama*, Captain Dundas, to carry stores and ammunition to the seat of war, paying $20,000 per month for her services.

It seems to be a source of complaint among the Tycoon's supporters that Chosiu does not "fight fair." The Tycoon sends out 1,000 men to a particular point, meaning to reinforce them in a few days, and Chosiu, if he has any wish to fight with these troops, ought, it appears—according to all Japanese military custom and tradition—to send an equal number of troops to meet them, give due notice of his approach and then have a fair fight. Instead of which, he has learnt from some detestable foreign books that the art of war consists chiefly in knowing how to throw an overwhelming force upon a given point of the enemy's line and, accordingly he sends 3,000 or 4,000 men suddenly and without decent notice against the 1,000, who are naturally defeated. This new-fashioned mode of warfare is much deprecated by the authorities in Miako.

Sir Harry Parkes was at Yedo, where his intercourse with the Gorogio is said to have been most friendly. A report had been circulated that his Excellency had been mobbed and otherwise insulted, but this proved to be entirely false. The visit of Sir Harry Parkes to Satsuma and Oowagima was freely made a subject of conversation between himself and the Gorogio; and the latter expressed pleasure that the Daimios in the south had given him so kind a reception. In a variety of ways they attempted to shew the foreigners little attentions hitherto omitted.

The Ichibos Exchange question has cropped up again, and as usual in a way little creditable to English officials. The *Pelorus* had been in harbour for several months, during a great portion of which time, exchange being unfavourable, its officers and crew did not accept the Custom-house exchange. They could get, and did get everything they required, without it—and had exchange continued as it was most certainly the ship would have left without a word being said about exchanging dollars for bous at the Custom-house. But on the eve of starting a monetary improvement took place in the rate of exchange, which was a mere flash—for it did not last more than a few days; the paymaster immediately rushed to the Custom-house with dollars for the whole amount the ship had been entitled to since its last exchange, and the authorities were so shortsighted and weak as to give it for the whole period at the rate of that day. The amount could not be said to be required for the purpose of paying Japanese tradesmen—as at least a portion of the dollars had to be borrowed for the transaction; and it is well known that no sooner was the Japanese coin received from the Custom-house than it was resold for dollars in the open market, leaving a tidy little profit to the cunning operators.

The Italian treaty with the Tycoon was signed on the 25th August. Last mail was announced the arrival of the U.S.S. *Hartford*, making three American men-of-war in harbour—the *Hartford*, the *Wyoming*, and the *Wachusett*. As the *Alcost* (Russian) had also arrived, there was more than the usual naval force. H.M. *Pelorus* had left, however; she is to stay at Shanghai for some months, and may then go home. The Admiral himself was to go to the Pehio in the *Adventure*, carrying as passengers the Duc d'Alençon and staff. One object of Admiral King's visit to Peking is to confer with Sir Rutherford Alcock on the piracy question, which is now assuming such importance in China. There was no other naval news, except that the *Barossa* was expected in about a fortnight from Hakodadi. The *Argus* was left in Nagasaki, and will shortly be relieved by the *Basilisk*.

Much indignation is expressed at the interference of the French Minister with the export of silk. The *Japan Times* says: "The injury done to our trade during the last six months is patent to all the sufferers. Our challenge to the French Legation to deny our statement that a large quantity of last year's silk crop is or was retained in Yedo as guarantee for the due fulfilment of the contracts by the Japanese party to them, remains unaccepted. Had this check not been given to the export of the country's principal staple, much of the loss which has fallen upon us would have been spared; for native coin would not have fallen so rapidly in value (though fall it ultimately must have done from other causes), and our import trade, which was in a very healthy condition at the beginning of the year, would not have experienced the disastrous blow which it has received and from which it is only now recovering."

Besides this, M. Leon Roches, the French Minister, by his interference with the trade of Yokohama. By leading the Japanese to believe that no large commercial operation can be carried through, no important contracts made or orders executed, save through and under the superintendence of a Minister or Consul, has got into his own hands the orders for very large supplies of machinery and stores required from Europe by the Japanese Government, thus depriving the merchants of Yokohama of any chance of fairly competing for this business. As a contrast to this mistaken policy, and the unwholesome prejudice it gives rise to, the *Japan Times* says:—"The enterprise and ability of Messrs. Glover and Co. have completely rooted out this absurd idea in the south, and English merchants owe a heavy debt of gratitude (if such a liability can exist among commercial men) to this firm for what it has done; for we believe that, when the new treaty is made with the Mikado, and the country thrown open to European commerce by its legitimate sovereign, it will be found that the work of this single house in the south has gone far to counterbalance the noxious effects of diplomatic trading in the north of Japan."

Digitized by Google

Colonel Fisher, the United States Consul at Yokohama, has been recalled, and General Stahl appointed in his stead.

NAGASAKI.

At Nagasaki nothing important had transpired. A rumour was current that the Mikado and his Cabinet are anxious to make a fresh treaty with the foreign Powers. No Japanese in the south regards the existing treaty as anything but a compact with one Daimio, "the man in Yedo." Some articles from the *Japan Times*, advocating the substitution of a treaty with the Mikado and the Daimios for that now existing with the Tycoon alone, have been translated, and are in the hands of a great many men of intelligence and high rank, who express themselves greatly pleased with them. The general impression among all classes at Nagasaki is, that the Tycoon will be entirely routed by Chosiu and his supporters. Satsuma at present remains neutral.

HAKODADI.

Advices are to the 19th August. H.M.S. *Scylla* had returned to this port after having visited four places in Manchuria, viz., Passiette Bay or Novgorodski, Vladivostock, Nakhodka, and Olga Bay.

The Russians intend, it is said, to make the first-named on their chief stations out there, as it is not always frozen in winter, and is never frozen for a long time. The Governor-General of Eastern Siberia was expected to visit the ports and decide. The *Scylla* had again left for the Amour and Sakhalien. The *Barossa* arrived at Hakodate on the 13th. The Russian corvette (Admiral's ship) *Askold* arrived on the 10th. The former ship brought up Major Crossman, who is inspecting the Consular buildings in the East.

CHINA.

PEKING.

Advices from Peking state that nothing of importance had occurred lately at the capital. "The drought has made the Emperor come out strong in the way of humanity at Peking, and the prisons of the Hsing-pu, where hundreds have died every summer of extra-legal tortures, are to be reformed—at which most Chinese here simply laugh; no officer dare attempt it, they say. A Protestant missionary (Thomas) has left Peking to act, it is said, as interpreter to the French expedition against Corea. A Corean embassy has arrived, but as it has travelled very slowly, knows nothing about the massacre."

NEWCHWANG.

At this port trade has not been very prosperous lately. During the early months the Mongolian dealers refrained from paying their usual visit. They were deterred by the cruelty of the robber bands, which had been rendered desperate by the campaign of Wen-seang. Local native merchants were thus tempted, in the absence of the usual and legitimate trade, to indulge in over-speculation of every kind, and the usual results ensued—bankruptcy, distrust, and stagnation. Improvement is already perceptible, and this port will moreover, in future, enjoy the advantage arising from a perfect security existing along the channels which drain and supply the market. The United States Consul has recently been to Peking and has succeeded in obtaining a garrison of disciplined troops, for the especial purpose of repressing the swordwracks, who have proved so constant a source of annoyance. The crew of a small American schooner, wrecked off the Corean coast, have recently arrived at Newchwang, and speak in the highest terms of the kindness shown them by the natives. It is to be hoped that if the French expedition be carried out, the frequent kindness shown to shipwrecked sailors will not be forgotten; and that the sins of the Government will not be visited on the heads of the people.

SHANGHAI.

The P. and O. mail of 10th July arrived out on the 22nd August, and the French mail of 17th on the 1st Sept. The dates are now down to the 7th.

The following summary of news is from the *Commercial Record* of 4th Sept:—

The only event of any importance which has taken place in Shanghai since the date of our last issue, on the 21st ulto., is the completion of the elections for the French Municipal Council, the candidates elected being Messrs. Morel, Monnier, Theric, Millot, Whittall, Fearon, Dato and Rev. M. T. Yates. This election has caused some interest, it being the first made under the new regulations for the French Concession recently promulgated by the Consul-General.

The Chinese Autumnal Festival, which has this year fallen much earlier than usual, has been celebrated by the customary display of processions, with grotesque paper josses, the letting off of crackers, and other like adjuncts of Chinese religious ceremonials. Among other customs observed by the natives at this season is the performance of worship for such men as have died without posterity, and for whom, consequently, no ancestral tablets are worshipped.

In several parts of the Kiangsu province the rice harvest has already been gathered in, the fine weather having brought it forward earlier than usual. In the Chekiang province there is much want of rain for the cotton and miscellaneous crops.

The Shanghai Chamber of Commerce are engaged in preparing their report for the approaching annual meeting, which will be convened shortly, when several matters of importance are expected to be taken into consideration. The temporary absence of the chairman was the cause of the meeting not taking place during the month of August as usual.

A meeting of the shareholders in the French Gas Company has been held. The report of the meeting shows the company to be in a sound condition; as though it is necessary to raise on loan a sum of taels 5,000 to pay the cost of fixtures to the extent of taels 3,000 and a deficit on the capital account of taels 1,400 resulting from an unanticipatedly heavy freight on getting plant, &c., out, there is every reason to look for sufficient returns from the sale of the gas fixtures to reimburse their cost and to meet the deficit; so that the original amount paid up will suffice to set the company in working order.

A meeting of the shareholders in the China Fire Insurance had taken place, a dividend of taels 60 per share was declared, and resolution passed to enter into a mutual arrangement with the Hong Kong Fire-office with regard to surplus risks; each company taking shares in the other.

The Shanghai Dock has been thoroughly put in order and placed upon a new footing. A meeting of the shareholders took place on the 27th ult., Mr. W. Hargreaves taking the chair, when, after the usual formalities of the secretary reading the notice convening the meeting and the minutes of the previous meeting, the Chairman stated that the lease of the dock concluded with Mr. Roberts for one year had been extended for five, and the terms embodied in a formal deed, which, in the course of the proceedings, it was decided to have printed for circulation among the shareholders. The accounts had been closed up to the 31st July, and on the 30th June showed a balance of tls. 6,578.41 to the credit of the concern, exclusive of a claim of tls. 175.95 against Messrs. H. Fogg and Co. for docking the steamer *Enterprise*. The accounts as laid on the table were passed. With reference to the amount against Messrs. H. Fogg and Co., the Secretary explained that they had refused payment, and had recently made a counter claim of tls. 500 for detention; and the subject being put to the meeting, it was resolved to push the claim of tls. 175.95 against Messrs. H. Fogg and Co., and to resist theirs of tls. 500, the meeting not deeming that there were grounds for the line of action taken by that firm. After some discussion it was resolved that a dividend of 6 per cent. per annum be declared for the half-year ending 30th June. This is equivalent to 12 per cent. on the cost price of the shares, which were bought at 50 per cent. discount.

A very extraordinary attempt at committing a murder was recently made upon the French side; the culprit being a Chinaman, and his victim a young European girl of about thirteen years of age. The Chinaman was found issuing from the house in a suspicious manner, and was taken up by one of the constables with an amount of adroitness and courage only eclipsed by that displayed by the police in the capture of the murderers of their Sergeant, Barron, which occurred a few months ago. On entering the house, the girl was found bathed in a pool of blood on the floor in her room, and severely but not mortally wounded. The Chinaman was brought up to the French Consulate, and after a preliminary investigation, in the course of which he confessed his crime, has been sent into the city. The murderer on being questioned showed extraordinary impassiveness, and the cause of the outrage remains a mystery. A coolie belonging to the house, and stated by the prisoner to be an accomplice, has disappeared. Before the prisoner was sent into the city the Che-Hsien came down personally to inspect the wounded girl.

A Chinaman formerly in the employ of a European house has been recently brought to the French Consulate in a miserable state of emaciation, consequent upon his wife having tied him to a board for a lengthened time and there left him,

Digitized by Google

only supplying him with food barely sufficient to support life. The luckless man on being presented with some European viands at the Hotel Municipale, devoured them with hungry alacrity. His arms were in the most attenuated condition and the unfortunate wretch, who had evidently suffered the severest ill-treatment, was almost demented. It is surmised that the motive which induced the woman to act in so extraordinary a manner was a desire to obtain the wealth of which her husband was possessed without suddenly carrying him off and thereby attracting attention. The case has been sent before the native authorities, who will no doubt deal most severely with it.

The Gordon monument on the Bund erected in memory of those who served against the Rebels in the Kiangsu Province has been wantonly defaced by some people, apparently as a practical joke, as it was painted red during the night.

The training for the Autumn Spring meeting has commenced. The races are announced for Oct. 31st, Nov. 1st, and Nov. 2nd.

The burning of the *Huquong* is detailed in the papers, but this account was given in our last.

HONG KONG.

The French mail of July 17 arrived out on August 28, and the P. and O. mail of the 26th on September 3. Dates are now down to the 11th.

A meeting of the German residents has been held for the purpose of obtaining subscriptions towards raising a fund to alleviate the sufferings of those invalided in the late German war. Several speeches were made, and it was finally resolved that all sums collected should be remitted to the Minister for the Interior at Berlin for distribution, and that the aid should be rendered to all of German blood without regard to their nationality, whether they fought on the Austrian or Prussian side. A concert has been given in aid of the funds.

The following items are from the *China Mail* of 11th Sept.: —Locally we of Hong Kong have had quite enough excitement during the past week, anything in that way being so rare. The Stamp Act is the great subject under discussion. Our own opinions are in favour of a modified Act, leaving ordinary business and shipping transactions unfettered. One of our contemporaries is entirely against any Act whatever, while the other is in favour thereof, so that all shades of opinion are pretty fairly represented in the columns of the local press.

Cheong Chat Tai, a notorious pirate, was executed yesterday morning. He made no confession before death, but Hong Kong may congratulate itself on being rid of so dangerous a scoundrel.

The Hong Kong and Whampoa Dock Company held their third meeting yesterday, when a dividend of 14 per cent. was declared. This, though not so high as on the last occasion, shows a flourishing state of affairs, and the shareholders seem to be very well satisfied.

The new City Hall Committee have held a meeting, and a contract for $85,000 was accepted from the Contractor Awah. The works are to be commenced immediately.

The new Hotel Company are showing signs of vitality. A meeting is to be held on the 13th, when we shall doubtless learn what they intend doing. A splendid institution might be established on remunerative terms if a little zeal and goodwill were shown for the project by the colonists generally.

Some new half-dollars were issued from the Mint a few days since—more however as specimens than as a promise of a good supply. We are sadly in want of these coins, the constant annoyances, incurred under the present system by those who keep no shroffs being most irritating, yet the Mint is still idle. A compulsory law, obliging the exchange of old for new dollars will, we expect, be the only means of putting the new coin into circulation.

Nineteen boxes of bullion were seized on board the mail steamer, just as she was leaving, by the Sheriff. They are said to be the property of the Agra Bank and had arrived from America. The manager endeavoured to ship them off, but was thus prevented at the last moment. We cannot understand this affair. If he were legally justified in shipping them, their detention must be vexatious and in fact illegal. If he were not justified in acting as he did, the action must be regarded as a piece of sharp practice which might be qualified with a disagreeable adjective. We cannot, however, express an opinion on the merits of the case until we are in possession of all the facts, which at present we are not.

The flogging ordinance seems to have a beneficial effect on the returns of crime, the number of prisoners having decreased some 20 per cent., and that apparently not, as a rule, from undue leniency on the part of the magistrates.

The members of the Regatta Club have been amusing themselves and the public by some well contested races, which, we trust, will be continued.

The following are the resolutions of a public meeting held on the 28th August against the Stamp Act. We have these reports with the speech of the Governor bound together, and will be happy to lend them to anyone wishing a perusal:—

Proposed by J. McDouall, Esq., seconded by F. Parry Esq.: That in the opinion of the meeting the stamp ordinance which has recently passed its second reading before the Legislative Council, is a measure fraught with serious and grave consequences to the well-being and prosperity of this community; that by the enormous burdens it will cast upon trade, it will certainly tend to the prejudice of all existing interests in the colony, and that the only thing which would justify its imposition, viz. —imperious necessity—does not exist.

Proposed by A. F. Heard, Esq., seconded by W. Kaye, Esq.: That in the opinion of the meeting even accepting the expenditure of the colony for the year 1867 at the sum appearing in the debit side of the estimates, there is no absolute necessity for any new mode of taxation; and that the sums necessary to be spent in the year 1867 can be raised by modifications of the existing taxes and rates in a manner calculated to be less prejudicial to the colony than by putting into force this new Act so repugnant to the feelings of the community.

Proposed by G. F. Maclean, Esq., seconded by E. H. Pollard, Esq.: That although this meeting recognises the fact that the estimates for the year 1867 are already passed, they think that his Excellency the Governor should be requested to defer the actual expenditure of the following items, viz.:—

New road	$23,000
Road to Kowloon	4,000
Sanitarium „	11,000

voted on the estimates, until the result of the next year's working of the Mint be seen, on the grounds that although this outlay might be desirable for a colony with a surplus in hand, the works are not of such importance as to necessitate their completion when a new tax has to be imposed to carry them out.

Proposed by A. Sassoon, Esq., seconded by G. Helland, Esq: That a memorial embodying the wishes of the community and conveying to his Excellency the Governor their requests, based upon the sentiments expressed at this meeting, be drawn up and presented to his Excellency, and that the following gentlemen be requested to act in drawing up the same and getting it signed, and also to be a deputation of the community to present it:—Messrs. McDouall, Maclean, Dalziel, Kaiser, J. S. Lapraik, Parry, Sassoon, W. H. Forbes, Nissen, Kaye, D. R. Crawford, Conil, A. F. Heard, Bosman, J. B. Endicott, B. Palanjee, and P. Ryrie.

PROTEST OF THE NON-OFFICIAL MEMBERS OF THE LEGISLATIVE COUNCIL.

Under the privilege accorded to us by rule 15 of the general rules for the Legislative Council of Hong Kong, we beg to protest against the Stamp Ordinance being passed, or promulgated, on the following grounds:

1st.—That the expenditure proposed in the estimates for 1867 would be covered by the existing revenue, were it not for the absorption of so large a portion of it by the military contribution; and as the latter amount has to be voted yearly, it is clearly open to consideration at each recurring period. This contribution was originally exacted against the recommendation of the then Governor, the protest of the majority of the Legislative Council, and the unanimous remonstrance of the whole community; and the two principal reasons for such a demand upon the colony were:—Firstly, an apparent surplus revenue which in fact never existed, and—secondly, an expected profit from the Mint, which expectation was equally groundless. Since the first exaction of this sum by the Imperial Government, the military establishment has been largely reduced in its staff, its materiel, and its numerical strength, and the gunboat borne upon the estimates for 1867 is as much as the colony can be expected to pay for in the face of the admitted fact of the sum of $866,270 (exclusive of Stamp Act) being insufficient to pay for what Government consider necessary expenditures in a colony of the size and position of Hong Kong. These are new reasons not previously urged against the exaction of this sum, but in our opinion when added to those formerly advanced, are unanswerable.

2ndly.—That assuming that the military contribution remains to be paid, the alleged deficiency in the revenue to meet the expenditure arises from the following items on the expenditure side of the estimates for 1867:—

1. Cost of maintenance of gunboat	$26,000
2. Amount to be expended on additional reservoir at Pok-foo-lum	50,000
3. Sanitarium at Kowloon	11,000
4. Carriage road to Gap above Race Course ...	23,000
5. Roads in Kowloon	4,000
	$114,000

That, in preference to imposing an entirely new tax, the natural and ordinary course of legislation with regard to item No. 1 would be to impose a special addition to the Police rate for the year of the requisite amount, and the expenditure would thus be borne by the proper constituency, and come under its own departmental accounts, as it undoubtedly is of a police and protective character.

A branch agency of the Oriental Bank has been opened at Focchow.

A handsome memorial tablet to the memory of the captain and crew of the unfortunate *Corea* that foundered at sea in a typhoon on the 30th June, 1865, has been received and will, we hear, be placed in the cathedral. It is of black and white mar-

Digitized by Google

ble, and is a very handsome piece of workmanship. It bears the names of T. W. D. Bird, the commander; four officers, five engineers, four petty officers, and three stewards.

St. Stephen's Missionary Church has been opened by a public service. The service was, as stated in the circulars sent round, partly in English and partly in Chinese, the Rev. C. F. Warren reading the English portion and the Rev. Lo-San-Yuen, native deacon, that in Chinese. The Rev. C. F. Warren preached an effective sermon from Mark XVI. 15. His Excellency the Governor and Lady McDonnell, together with about fifty English friends, were present. The rest of the building was filled with Chinese. The church was designed and built by S. G. Bird, Esq., and is intended to hold about 200 people. It is however so constructed as to be easily enlarged; it is fitted up very neatly, and is light and well ventilated. The cost of the building, together with parsonage house for native deacon, and the surrounding walls will be nearly $6,000, all of which has been subscribed by friends on the spot.

(FROM OUR OWN CORRESPONDENT.)

SEPT. 10.

As anticipated in my letter by the last mail, Sir Richard MacDonnell has made light of the remonstrances addressed to him with respect to the principle of the Stamp Act, which he is resolved to introduce into Hong Kong. A memorial, urging its abandonment, which had been very numerously signed, was presented to him on the 5th inst., when his Excellency straightforwardly informed the deputation that he thought their arguments insufficient, besides being controverted by the experience already obtained at Singapore; whilst to a deputation of Chinese Compradors his Excellency was even still more outspoken. Ascertaining from the spokesman of this assembly (what was evident from his address to the Governor), that not a single member of it had read or obtained the faintest idea concerning the schedule of the Act against which their protests were supposed to be levelled, the Governor roundly told him that he and his associates had been made fools of by foreign merchants, who wished to transfer to the Chinese that portion of the taxation of the colony which ought in justice to be borne by themselves, and thus dismissed the deputation. Nothing could more strongly prove the fanciful character of the opposition to the Stamp Act, so far as the principle goes, than the fact that the merchants who seek to combat its imposition maintain in one breath that the Chinese will be driven away by increased taxation, and that the same Chinese ought to be subjected to double taxes rather than that the expedient of raising a revenue by means of stamps should be resorted to. On the other hand, Sir Richard has given evidence of his readiness to listen to the public voice by the alteration he has introduced in the schedule of the Act (as originally devised), doing away with several features which were universally disliked.

The press of the colony has shown a remarkable divergence of opinion on this subject. The *Daily Press*, always the organ of extreme opinions, has opposed the Government tooth and nail; the *Evening Mail* has merely advocated the reform in the schedule which has actually been accomplished; whilst the *Mercury*, a newly-established journal, has given unqualified support to the Governor.

That Sir R. MacDonnell has gained general respect by his official ability and fearlessness is an undoubted fact; and it is only to be the more regretted that a "coal-heaverishness" of manner in his private relations should make him socially disliked. He appears to have arrived with the idea that some of his predecessors have "Kotowed" to an injudicious extent to the plutocracy of the colony; but his efforts to avoid this course of conduct appear to embrace almost incivility.

If residents in this part of China have to congratulate themselves on nothing else, they have at least to be thankful for having escaped (as we may now believe) the deadly heats that have distinguished the summer of 1866 elsewhere along the coast. Here, although the thermometer has certainly risen to a higher average than usual, there has not been a single case of heat appolexy on shore. In the harbour, however, the reckless exposure so common among seamen has produced several cases.

I hear from Canton that two natives were apprehended there last week in the act of kidnapping some persons to the Portuguese barracoons at Macao, and were summarily executed. The mainland is already swarming with crimps, employed by Spanish, Portuguese, and French agents, as orders for as many (it is said) as 30,000 coolies have been received from the Cuban dealers for the present season. It is reported that the French Government has taken steps to procure the alteration at Peking of the clause in the late Emigration Convention, by which the contracts entered into with the coolies are restricted to a duration of five years, whilst the Cuban authorities were also to be bound to return the emigrants to China at the expiry of this term. Notwithstanding the excessively favourable bias in the Convention signed last March at Peking to the man-selling interest, it is found that these clauses are likely to depreciate the market value of the coolie in Cuba; and hence the movement for their abrogation.

PHILIPPINES.

MANILA.

Our advices from this place are full of the expected gaiety on the arrival of the ironclad *Numancia* from Callao. Balls and parties are to be in full vogue, and Hong Kong folk are invited to share in the jollifications to celebrate the most unrighteous attack ever perpetrated by a civilised Government. It is expected that as there is no dock large enough, the *Numancia* will go to Hong Kong.

The Chinese bribery of the late Governor, already detailed in a previous issue, has been revived by the arrest of a number of them by the new Governor, and they are to be brought to trial.

Madame Bishop (who was wrecked lately) has given several concerts, and proceeds to Hong Kong.

SIAM.

BANGKOK.

Advices from Bangkok to the 14th of September do not make further mention of the acts of the French Consul. We trust, therefore, that he has given up the schemes which we lately noticed.

The following items are from the *Recorder*:—

The King of the Laos at Cheangmai arrived on the 9th Aug., having been thirty-one days in coming. He came all the way in his Royal barge, attended by about twenty-five other state boats. We had the honour of meeting him on the 12th, and of being saluted as an old acquaintance and friend. He inquired kindly after the welfare of our son-in-law and family, who made a tour to his capital in the year 1863, as he had heard that his wife did not enjoy good health. We were glad to report to him the goodness of the Lord to the family in granting full restoration to health. This is the regular year when, according to a long established custom, the King of Cheangmai should pay his triennial visit to his Majesty the King of Siam as his Suzerain, bringing with him the usual tribute of a silver tree, a gold tree, a gold necklace and finger rings richly decked with precious stones.

We accidentally had a view of the trees before they were presented. They are about eight feet high. The silver tree is said to contain 30 tamlungs of the purest silver, equal to 120 ticals, and the gold tree 15 tamlungs of the finest gold, equal to 1,080 ticals. We had before seen at the palaces of the kings of Siam many silver and gold trees of equal richness probably, and perhaps more so, but none of them were half as clear and bright as these. Those were old and dusty, these new and clean. The bodies of the trees are two inches in diameter at the bottom, and of suitable proportions as they extendstraight upward. Each had the appearance of being made entirely of the precious metal it purported to be. How precious would be that gold tree if it were wholly of that metal! But if was only a tin cylinder heavily plated, and the limbs of it being some forty or fifty in number, were made of iron wire gilded, and so graduated as to form a very graceful top, much like the shape of a clove tree. The leaves and petals of the flowers are of solid gold, and they are certainly very neatly wrought, displaying with wonderful accurateness even the ribs and veins of the leaves. The flowers are of the size of small roses, and have a purple bud the size of a lotus seed in their centre. The tree stands on a small artificial gilded mound.

The silver tree is of the same size and shape, with leaves and flowers in imitation of the same tree, said to be indigenous in the Laos country.

The gold necklace is said to be decked with four rubies of the size of a lotus seed, and 100 of the size of a grain of Indian corn.

The King of Cheangmai has come down earlier this year than usual, as we are informed, for the purpose of clearing himself of charges which had been rumoured against his loyalty to the King of Siam as his Suzerain. He had been represented by certain parties as having become dissatisfied with his Majesty as Protector, and was designing to transfer that relationship, if possible, to his Majesty the King of Burmah. We are happy to learn that he has fully satisfied the Siamese Government that he has never entertained a thought of taking such a step. The report of his disloyalty, it appears, all grew out of the fact that in consideration of some kindness shown the King of Cheangmai by the King of Burmah he sent him two elephants possessed of some peculiar excellencies in having white eyes and singular tails, but not being in any sense white elephants. With these peculiarities the King of Ava was much pleased, and sent the King of Cheangmai in return some gold ornaments richly decorated with rubies, which was probably much more than a full compensation for the animals. The rich present may have been designed to prepare the way for requesting the King of Cheangmai to deliver up a certain Burmese subject who had been an officer of high rank in Burmah, who, having rebelled, fled and took refuge in the jurisdiction of the King of Cheangmai. Not long since a high officer of Burmah sent a messenger to the King of Cheangmai requesting the rendition of that fugitive. And there is good evidence

Digitized by Google

that the latter proved his loyalty to the King of Siam by saying that he could not grant the request without first obtaining authority from the Government of Siam.

With regard to the great law case about teak timber, pending between Racha Boot, a nephew of the King of Cheangmai, and the successors of the late Captain Burn, we have heard but little since the arrival of the King. From the little we have gathered, it would seem that justice would acquit Racha Boot in the main, if not wholly. It is understood that the King of Cheangmai will remain here many months, for the purpose of having the case definitively settled.

We learn that the Siamese Government are about despatching messengers to Maulmain overland, and another company by steamer, *via* Singapore, to notify all parties concerned in the suit that the King of Cheangmai is now ready for the trial of the case here in Bangkok, and will wait a suitable time for his accusers to come hither and have their claims tried before H.B.M.'s Consul.

We are sorry to hear that the Queen of Cheangmai is now alarmingly ill of dysentery, having been seized with the complaint a little before her arrival. Her daughter also, the wife of Kyaw Meen Kyaw, Prime Minister of the King of Cheangmai, and her granddaughter, aged seven years, we are pained to learn, are dangerously ill of the same disease. Two of the King's men have recently died of dysentery. One died on the way, and more than a dozen of the men are now invalids from the same cause. These triennial visits of the King seem always to be made with much loss of life to his retinue.

MALACCA STRAITS.

SINGAPORE.

Dates are down to the 30th September. The English mail of the 10th August arrived on the 13th September, being rather behind time, owing to the new steamer *Mongolia* having made a long passage from Suez. The French mail of the 17th August arrived on the 19th September. This mail brought intelligence of the Transfer Bill having passed the House of Lords, which was received with great satisfaction. There is no news of importance. The Governor had not returned from Penang. The Recorder had arrived, and the quarterly session was opened on the 9th October. The weather continued of the same broken character as during the last two months. Considerable preparations were making for the coming French Exhibition, not a few of the producers being anxious to obtain distinction there.

PENANG.

From this port the chief item of news is the departure of Sir Peter Benson Maxwell, the late Recorder of Penang, to assume the post of Judge at Singapore. Previous to embarkation he met at the Court House by arrangement a numerous audience of the principal members of the native community of all classes, who had solicited his attendance to receive a farewell address from them. The address was a long one, signed by some 600 of the natives, and highly flattering in its terms. It was accompanied by an intimation that a sum of £300 had been subscribed for a testimonial, which was being prepared in England. Sir Benson replied at some length, both in English and Malay.

Intelligence had been received that W. Hackett, Esq., the new Recorder, had started for the Gold Coast before his appointment to Penang was made. The delay attendant on recalling him from thence will probably be considerable, so Penang may expect to be without a Recorder for some months to come. Sir P. Benson Maxwell will, in that case, hold the November sessions there.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Alabaster—On the 21st July, at Bangkok, the wife of Henry Alabaster, Esq., Interpreter to the British Consulate, of a son.

Annesley—On the 20th Oct., at Horseheath Rectory, Cambridgeshire, the wife of the Rev. Francis H. Annesley, of a son.

Brown—On the 7th Sept., at Singapore, the wife of G. H. Brown, Esq., of a daughter

Burdon.—On the 23rd of August, at Peking, the wife of the Rev. J. S. Burdon, of a son.

Hasche.—On the 2nd Sept., at Penang, Mrs. A. Hasche of a son.

Carden—On the 28th July, at Bangkok, the wife of the Rev. P. L. Carden, Missionary of the Am. Presbyterian Board, of a son.

Chaldecott—On the 18th Oct., at Beomond, Chertsey, the wife of T. A. Chaldecott, M.D., of a son.

Callis—On the 10th Sept., at 7, Hollywood-road, the wife of Mr. T. [Callis, of a daughter.

Dennis—On the 21st Oct., at Hill-side, Streatham, the wife of John Dennis, Esq., of a daughter.

Joaquim—On the 11th Sept., at Singapore, Mrs. P. Joaquim, of a son.

Maclean—On the 18th Oct., at Dunerief, Moffat, the wife of John L. Maclean, Esq., of Haremere Hall, Sussex, of a son.

Robinson—On the 27th Aug., at Singapore, the wife of Philip Robinson, Esq., of a son.

Smith—On the 3rd Sept., at Foochow, the wife of Mr. Thomas Smith, of a daughter.

Tidman—On the 21st Oct., at Ardmore, Blackheath-park, the wife of Paul Frederick Tidman, Esq, of a daughter.

MARRIAGES.

Ball—Skelton.—On the 1st Sept., at the Roman Catholic Cathedral, Hong Kong, by the Right Reverend Monseigneur Turell, Bishop of Tonquin, the Honourable Henry John Ball, Acting Chief Justice of Hong Kong, only son of the late Henry John Ball, Esq., barrister-at-law, to Sarah Westle Maria, eldest surviving daughter of James Skelton, Esq., of London.

Davy—Newbery.—West—Newbery.—On the 23rd Oct, at Wimbledon, by the Rev. John Warren, brother-in-law of the bride, J. Tressilian Davy, Esq., of Burslem, Staffordshire, to Isabel Frances Newbery; and at the same time and place, George West, late Lieut. 98th Regt., youngest son of the late Capt. C. West, R.N., to Henrietta Newbery, daughter of the late T. C. Newbery, Esq., of Ottery, St. Mary, Devon. No cards.

Knevitt—Hardman.—On the 23rd Oct, at Lewisham Church, by the Rev. J. Sowerby, Commander Knevitt, R.N., late H.M.'s gunboat Leven, to Isabella Ellen Hardman, stepdaughter of Capt. Henry Jones, steamer Far East.

Silva—Borton.—On the 4th Sept., at the Roman Catholic Church, Hong Kong, by the Rev. Fr. Favini, Januario A. da Silva, eldest son of L. J. da Silva, to Theodora Francisca, second daughter of James Borton.

DEATHS.

Alabaster—On the 5th Aug., at Bangkok, the infant son of Henry Alabaster, Esq., Interpreter to the British Consulate.

Bateman—On the 7th Sept., at Singapore, Samuel Bateman, sen., aged 66.

Dent.—On the 28th Oct., at Highwood House, Hendon, Capt. Robert Cecil Dent, late of Her Majesty's 1st Light Cavalry, Indian Army, Madras, aged 40.

Freeman—On the 16th Aug., at Yokohama, Mr. O. E. Freeman, aged 36.

Jarvie—On the 23rd Aug., at Shanghai, Robert Jarvie, of the late firm of Jarvie, Thorburn, and Co.

Le Fevre.—On the 28th Aug., at Hong Kong, George Le Fevre, late Master of the tugboat Fame, aged 26 years.

Margesson—On the 12th Oct., at 4, Green's-row, Chelsea, John Margesson, Esq. aged 72.

Nairne—On the 24th Oct., at Grove-hill, Camberwell, Capt Alexander Nairne, H.C.S., Director of the Peninsular and Oriental Company, and of the Marine Insurance Company.

Randeen—On the 26th Aug., at the Seamen's Hospital, Hong Kong, Alexander Randeen, late Steward to Messrs. Jardine, Matheson, and Co. aged 27 years.

Slater—On the 24th Oct., at Gravesend, Mrs. Ann Slater, mother of H. and T. J. Hill, of the Peninsular and Oriental Company's Service, aged 63.

Thomson—On the 29th Aug., at Singapore, Mr. Henry Dixon Thomson, Lloyd's Surveyor of this port, aged 28 years.

Venn—On the 19th Sept., at his residence, North Bridge-road, Singapore, the Rev. E. S. Venn, M.A., Missionary of the S.P.G., and Superintendent of the St. Andrew's Church Mission.

Wrighton—On the 25th Aug., at Foochow, James Wrighton, tidewaiter I.M. Customs, died on board s.s. Undine, of heat apoplexy.

On the 25th Aug., at Foochow, the Captain of the Swedish ship Gustav Adolph.

At Manila	ditto	4s. 1½d.	4s. 2d.

At Shanghai, bills on India, Rs. 298 per 100 taels. At Hong Kong, Rs. 219 per $100. Bar silver at Shanghai, tls. 111·2; at Hong Kong, 11 per cent. prem. Mexican dollars at Shanghai, tls. 74·4 per 100; and exchange on Hong Kong, 27½ discount. Hong Kong and Shanghai Bank shares, 2 to 5 per cent. dis.; Gas Company, 10 per cent. prem.; Hong Kong and Whampoa Dock, 30 per cent. prem.; Steam Shares, 28 per cent. discount; Union Dock Company, 10 per cent. dis.

The latest telegrams to hand, via Kiachta, dated Hong Kong Sept. 27 and Shanghai Oct. 3, quote Exchange at 4s. 6d. to 4s. 6½d., and 6s. 2d. to 6s. 3d.

The following is from Messrs. Sharp and Co.'s Circular :—

Gold.—The report of shipments of gold from Calcutta to England, and a probable scarcity there, caused an advance in value, and the market

Digitized by Google

has been almost cleared. The imports have been $290,000, and the exports, including those by the Northam on the 28th ultimo, and excluding those to leave by the Behar to-morrow, are $300,000.

Silver.—This has again begun to arrive from the North, consequent upon the advance in Mexicans. The amount received is $750,000, and that exported, exclusive of any shipments by the mail now departing, is $150 000.

Dollar Currency.—Total amount inward, $670,000; and outward, $1,060,000; the difference is made up of the amount by last mail, the presently outgoing items being always in arrear. We imagine, however, that the principal shipments by to-morrow's Europe steamer, and also by the Calcutta direct boats, will be of gold and silver bullion and not chiefly of Mexicans as heretofore.

Exchange.—The steamers seem lately to have had all the trade in arranging the balance of commercial transactions, but a few purchases of rupees have manifested some return of confidence, and a much larger business might have been done, but for the unwillingness of the banks to show the least anxiety to draw. The usual amount of credit and documentary bills have not been forthcoming, but a slight advance has been established, which would have been more considerable if it had not been checked by the telegram received by the Ajax, to which however but little credit is attached.

Discount and Mortgages.—We have never yet known money to fetch 12 per cent. per annum upon first class mortgages, and to be advanced by men of first class prudence, when exchange ruled at 4s. 6½d., but such is the fact, and it may be worth the notice of investors at a lower rate.

Shares.—These should command better prices, especially the Local Bank, and the only explanation of their present state is that fear prevails over judgment, and more than all that people here have not the money to invest.

COMMERCIAL REPORT.

CHINA EXPORTS.

Tea.—The speculative character of this season is now showing itself in the eagerness of buyers to obtain new Greens, which are beginning to make their appearance. The activity in the Japan market continues, and rates have an upward tendency. From Hankow, Kewkiang, Foochow, and Amoy quotations are short price; 2t. 7m. have therefore to be added to them for duty. All other quotations are free on board.

Canton.—During the fortnight a fair average business has been done; two more chops Country Congous have arrived, and settlement from stock is one, leaving 27 chops or 17,671 packages at present on hand. The fourth crop of Scented Teas is now coming forward; they promise well, and prices asked are, as a rule, moderate. Canton-made Teas: Settlements for the fortnight consist of 800 boxes and 400 half-chests Canton packed Congou at from tls. 23 to 27; 8,000 boxes Scented Orange Pekoe and 8,500 boxes Scented Caper have found buyers, the former at tls. 20 to 33½, and the latter at from tls. 15½ to 28. There are no settlements to report in Pouchong or Canton-made Greens.

Amoy.—Congou: A demand having sprung up for the American market there has been more competition among buyers, and prices have again been forced up fully $1 per picul. Settlements for the fortnight amount to about 6,000 packages, most of which have been taken at $19 to $23 per picul, but in some instances as high as $27 has been paid. Oolong: In the last report the opening of the market for shipment to America was announced. Buying continued on a most unusually large scale for some days without any general change in values although the prices paid were in some instances very irregular.

Foochow.—Congou: The stock in the hands of the teamen has accumulated to upwards of 75,000 chests, and it is reported that nearly the whole of the third crop has come forward. Prices are slightly easier, there are few buyers, and the vessels loading for the United Kingdom are filling up very slowly. Souchong: There have been considerable settlements at somewhat irregular prices, showing, however, an upward tendency. Oolongs: Settlements have continued, say for shipment to America, at fully previous rates. Flowery Pekoes: There have been no transactions during the past fornight. Scented Teas: Nearly 10,000 boxes have found buyers, at prices which show no alteration on those previously advised.

Shanghai.—Black Teas: The news received by the last mail being again of a very discouraging character, and the rate of Exchange unsettled, buyers of Congous withheld offers until within the last few days, when first-class credits were accepted at 6s. 2d. Settlements have since been to a fair extent, amounting to 22,000 chests for the fortnight, at prices rather easier than last mail's quotations. Supplies from Hankow have fallen off, and the stock is reduced to 31,000 chests, chiefly in the hands of foreigners. Green Teas: Only about 10,000 packages of new Fychow and Teenkai have as yet arrived, and already American buyers have shown great eagerness to purchase for the first ship. The result has been the settlement of two chops of medium Fychow, at taels 34 to 36½, and three chops of fine Teenkai, at taels 43 to 44½ proportion. These prices are six taels over the opening rates of last season, or nearly equal to the highest point reached. Holders are now asking even higher prices. The make and quality are very good, and compare very favourably with last season's teas. Moyunes cannot arrive under another fortnight. One chop of fine Pingsuey, at taels 42½, has been settled for London.

Hankow.—Transactions had been greatly checked by the mail advices of 10th July and although no material decline is quoted, quality being considered, the market closed very dull, and a reduction in rates is expected. The settlements consisted chiefly of third crops Oopacks and and common Oonams. It is strongly asserted that the supply for the season will not exceed that of last year. The Helen Nicholson and Elizabeth Nicholson were still on the berth at £4. Settlements for the fortnight were 11,400 chests at the following prices:—Oonams: Common to mediums, 16 to 21¾ taels per picul; Oopacks: Fair to medium (2nd and 3rd crop) 23 to 26 taels per picul.

	Arrivals.		Settlements.		Stock.
1866	306,100 chts...	..	286,600 chts.	..	19,500 chts.
1865	251,400 chts...	..	235,600 chts.	..	15,800 chts.

Kiukiang.—Black Teas: Only two small chops of Ningchow had been settled at Taels 23½ and 24½. The Green Teas were now beginning to absorb attention. Total export to date 91,000 packages, or 7,496,100lbs. against 55,000 packages, or 4,633,100 lbs. to same date last year. Green Teas: The arrivals to date compromise only about 900 packages, and the market was opened by the settlements of a small chop of medium Moyune at Tls. 34.0.0 (=2s. 2d. per lb.).

Yokohama.—The activity still continues, and prices bear an upward tendency, though slightly irregular in some instances; but for the most part they show a rise of fully $1 per picul. The supplies are moderate, and the stock is rather reduced. Settlements are estimated at about 4,000 piculs; they consist principally of Good Medium to Fine Tea, have been all made for the American market at about quotations. Quotations and stocks stand as follows:—Medium, $30 to $32, stock 800 piculs; Good Medium, $33 to $34, stock 1,400 piculs; Fine, $35 to $38, stock 800 piculs.

Raw Silk.—The raw silk by the present mail amounts to 1,925 bales, 1,765 for Southampton and 160 for Marseilles, and 89 cases for Southampton.

Yokohama.—Supplies from the interior continue so small that the Chamber of Commerce of this port had resolved to draw the attention of the foreign Ministers to this fact, which is the more unaccountable as the prices are high, the weather favourable, and the arrivals of the silkworms' eggs comparatively free. Scanty supplies and an eager competition among buyers since the arrival of the mail of 26th June, have resulted in an advance of nearly $100 on the last quotations. Arrivals during the fortnight, among which may be noticed some fine Hank Silks and some parcels of Koshiu, amount to about 350 piculs. About 450 piculs have been settled and the unsold stock is under 50 piculs. The export of silkworms' eggs will in all probability be much less than last year, and green eggs were till now much more abundant than the white ones. Total settlements may be estimated at 225,000 cards, leaving an unsold stock of about 150,000 cards, two-thirds of which at least consists of goods rejected after inspection. Prices during the fortnight have ranged between 2½ to 5½ boos according to quality. Mybash and Sinchu, best, $890 to 920 per picul; do., medium, $860 to $880; do., inferior, $820 to 850; Coshio, medium, $690 to 720; do., inferior, $650 to 670.

Shanghai.—At the closing of the last mail it was reported that as high as taels 625 had been paid for very superior chop No. 3 Tsatlee, upon which the Chinese dealers immediately advanced their demands and the best chops are now held for taels 640, but from the tone of the market it would not appear that any such advance will be obtained, even if present rates are maintained. Prices continue firm in the country, for anything like good silk, which the inferiority of recent arrivals would lead to the supposition must be nearly exhausted. Tsatlees, chops No.3, 615 to 625 tls. per picul; do. Market No. 3, 580 to 600. Taysaams, chops No. 1, 570 to 580; do. No. 2, 550.

Drugs, &c.—Canton: Cassia Lignea is firmly held at $18 to 18.25 but there is less demand at such prices and settlements are limited to 900 piculs with a large stock on the market comprising 8,000 piculs. Cassia Buds without any transactions, 60 piculs offering at $40. Galangal $1.80 with 400 piculs on stock but not any demand. China Root $3.50, stock 300 piculs. China Galls are rather easier and 200 piculs obtainable at $12.35. Vermilion $39.50 for best brands. Rhubarb none on the market.

Camphor.—Hong Kong.—No transactions have taken place in this article, the stock of unsold remains at 600 piculs for which 26 dols. per picul unpacked is asked.

China Grass.—Shanghai.—Present quotations hold out no inducement to operate, and natives are only buyers to supply their actual wants. The stock is about 6,000 to 7,000 bales. Quotations are: For No. 1, white, tls. 14.0.0; No. 2, greenish colour and short, tls. 11.0.0 to 12.0.0; green, tls. 9.0.0 to 10.0.0.

The cargo of the *Conference*, from Yokohama to London, is—tea, 92,130 lbs.; waste silk, 269 bales; gall nuts, 597 packages; soap, 1,214 packages; rags, 452 packages; wax, 34 packages; cocoons, 14 packages; tobacco, 5 packages; lamps, 22 packages; shells, 1 package; iron wire, 1 package; merchandise, 28 packages; private effects, 4 packages; curios, 53 packages.

CHINA AND JAPAN IMPORTS.

SHANGHAI.

Cottons.—The market was quiet during the early part of the fortnight and few sales were effected. A little more inquiry has appeared within the last three days, and an advance of about one mace per piece has been obtained for 8¼ lbs. Grey Shirtings. There has been comparatively a small business transacted in cotton goods, and prices generally show little change on last quotations.

Woollens.—The inquiry for Camlets has been a little better, and an advance of half a tael per piece has been obtained. Long Ells and Spanish Stripes are saleable at quotations, but Lastings are not wanted at present.

Metals.—There has been some inquiry for Quicksilver, but other kinds have been neglected.

Coals.—Arrivals during the fortnight have been heavy again, and the market is very weak. Some holders of cargoes prefer stowing to accepting the low rates offered. Arrivals: 5,035 tons English, 1,536 tons Australian 600 tons Formosa, and 444 tons Japan—in all, 7,615 tons.

YOKOHAMA.

Owing to the Japanese holidays and half-yearly settlements of accounts, which have engaged the attention of the native merchants during the greater part of the last fortnight, we have had but a limited business in imported goods. The few sales made have been however upon somewhat better terms than were previously obtained, and there is an indication of a demand for many articles, not saleable for some time past. The sudden advance that took place in the value of boos early in the fortnight promised to give a stimulus to trade, but as the price gave way again almost immediately, owing to the large amount forced upon the market by some of the participators in the official exchange, the improvement was only temporary and had no effect upon quotations. In Grey Shirtings settlements amount to about 15,000 pieces for delivery and 5,000 to arrive The stock of these goods has been further reduced by re-exports to Shanghai, and does not at present exceed six weeks' consumption, so that

Digitized by Google

unless considerable arrivals take place we may expect much higher rates shortly. Cotton Yarn has been inquired for on speculation, and some 150 bales have besides been purchased by the trade for delivery at a slight advance upon previous quotations. Black Velvets are in demand for the Shanghai market, and further sales have been made at our highest quotations. In Camlets no sensible improvement has yet taken place, although we hear of a slight advance upon former rates having been offered for the best assortments; the trade will however only take them in very small lots. A few parcels of Bar Iron have been placed at our quotations; other metals remain without inquiry; a small lot of Nail Rod and Hoop Iron together found buyers at quotations. Sugar has declined about $1 per picul, owing to the arrival in Yedo of several cargoes from the Prince of Satsuma's refineries. A considerable business has lately been done with the Japanese Government in arms and ammunition for shipment to Osaca.

HONG KONG.

There have been no arrivals with manufactured goods, but the steamer Ajax. The Yaratilda from London, now considerably overdue, is reported to be totally lost off the Cape, crew saved. Great dullness has characterised the market for manufactures throughout the fortnight, and there is but little change to note in quotations. Yarn: The stock of 16-24 is very limited. No 38-42 is inquired for. Grey shirtings are weaker by at least 20 cents. In Fancy Cottons there is no change.

Woollens continue in demand, and prices are well maintained.

In Metals there is nothing new.

Coals.—Sales have been effected of both English and Welsh Coal at $12. Demand remains slack, but holders are firm.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Yokohama.—From London, Aug. 18, Eleanor; from Sunderland, 26, Conrad.

At Shanghai.—From London, Aug. 30, Juanpore; from Plymouth, 21, Royal Berkshire; from Newcastle, 25, Alice Thompson, Royal Diadem; from Cardiff, 30, Bernhard Carl; 31, Andreas.

Reported by telegram via Kiachta.—From London, Oct. 5, Lammermuir.

At Hong Kong and Canton.—From Newcastle, Sept. 5, Light of the Age; 7, Danube; from Cardiff, 8, Evangeline; from Hamburg, 6, George Hendrich; 7, Margaretha; 5, Pudel; from Liverpool (via Singapore, &c.), 10, Ajax.

At Manila.—None.

At Singapore.—From Liverpool, Sept. 14, Cecrops; from Cardiff, 7, M. Simonetti; 10, Haamstede; from Shields, 15, Hendrika; from Swansea, 14, H. V. Van Paulo; from Bordeaux, 15, Pamplemousses; from Rotterdam, 10, Petronella.

At Penang.—From London, Sept. 19, Teesdale.

DEPARTURES.

From Yokohama.—For London, August 19, Conference.

From Shanghai.—For London, August 23, John Paul; 29, Knight of Snowdon; September 1, Marquis of Argyle; for Liverpool, August 29, Trebolgan.

From Foochow.—For London, August 24, Ellen Rodger; 29, Naomi; for Liverpool, 26, Veronica; for New York, September 1, Queensland; 2, Adelia Carleton.

From Hong Kong and Canton.—None.

From Manila.—For Liverpool, August 31, Sterling; for Cadiz, 23 Concepcion.

From Singapore.—For London, September 18, Indemnity.

From Penang.—For London, August 28th, Elizabeth; 31, Victor; September 10, Persian Empire; for Liverpool, 6, Monteagle.

VESSELS EXPECTED.

From Yokohama.—Thomas Dryden, Conference.

From Hankow.—Gossamer, Sir Lancelot, Napoleon III., Highflyer, Fire Queen, Lauderdale.

From Shanghai.—City of Aberdeen, Burdwan, J. R. Worcester, Pakwan, Coulnakyle, Cinderella, Fusiyama, Vigil, Star of China, Peterborough, Coral Nymph, Blencathra, Nelly, Illimani, Lansdowne, William Melhuish, Charlgrove, Challenger, John Paul, Knight of Snowdon, Marquis of Argyle, Trebolgan.

From Foochow.—Tamana, Feronia, Laurel, Lennox Castle, Amber Witch, Zingra, Devana, Everest, Ornate, Philomela, Dewa Gungadhur, Marion, Monarchy, Naomi, Veronica.

From Canton.—Alma, Island Queen, Taymouth Castle, Victoria, Melbreck, Valdivia, The Cedars.

VESSELS LOADING.

At Hankow.—For London: Helen Nicholson.

At Shanghai.—For London: Wild Deer, Dartmouth, Sir W. F. Williams, Polmaise, General Caulfield, Janet Mitchell, Ann Adamson, Westminster, Camilla, Agamemnon, John Bull.

At Foochow.—For London: Northfleet, Scawfell, Dunmail, Louisa, Fontenaye, Beautiful Star, Ellenborough.

At Hong Kong and Canton.—For London: Kelso, Solent.

At Manila.—For London: Eena, Punjaub. For Liverpool: Mercia.

At Singapore.—For London: City of Edinburgh, City of Delhi. For Liverpool: Blandma Dudley, Lochleven Castle, Unrivalled. For Boston: White Squall.

At Penang.—For London: Raby Castle.

FREIGHTS AND CHARTERS.

At Yokohama.—To London: Cotton and tea, £2. 10s. to £3 per ton.; silk, £4 to £4. 10s.

At Hankow.—The vessels on the berth for London are loading slowly, at £4. 10s. and £4 per ton.

At Shanghai.—There is no improvement to report in home freights; rates are down to £2 and £1. 10s., at which vessels are loading, to New York, £2. 10s. to £3 per ton.

At Foochow.—To London, £2. 10s. per ton for wooden, and £3 for iron vessels.

At Hong Kong and Canton.—In home charters and from the Philippines nothing has been done for the fortnight; there is also less inquiry for coasting purposes. The circular of George Holmes estimates the number of disengaged vessels in Hong Kong at 77, representing 41,538 tons.

At Manila.—The only vessel fixed is the Eena, for London, at £2. 7s. 6d. for unclayed, and £2. 10s. for hemp.

At Singapore.—Rates to London are less firm, at £2 to £2. 5s. dead weight and light freight. The Blandina Dudley is loading for Liverpool, taking light cargo, at £1. 15s.

At Penang.—For London:—The Raby Castle, 692 tons, has just completed loading, at £1 for tin; £1. 10s. to £1. 15s. other dead weight; £2. 10s. light freight; £3. 5s. measurement; and 8d. per gallon for rum. No other vessel has yet taken the berth.

REPORTS AND CASUALTIES.

A telegram from Tientsin, via Kiachta, report the total loss of the Danish brig Catharina.

The John Lidgett, from London to Shanghai, spoken in lat. 15.50 N., 115.30 E., 102 days out.

The British barque Evangeline, arrived at Hong Kong, reports having left Cardiff, May 14. Spoke the following vessels:—July 26, Andrea, from Cardiff, bound to Shanghai; July 31, Princess Amalie, from Amsterdam, bound to Japan; July 31, Guseria Maria, from Amsterdam, bound to Bavaria; Aug. 4, Eastveld, from Liverpool, bound to Singapore; Aug. 5, Lochleven Castle, from Glasgow, bound to Singapore; Aug. 6, Queen of the East, from Philippines, bound to China; Aug. 11, Walaperiew, from Cardiff, bound to Singapore; Aug. 12, Stirlingshire, from Swansea, bound to Hong Kong; Aug. 13, Emmanuel, from Liverpool, bound to Bangkok; Aug. 14, Herman Doctor, Liverpool, bound to Singapore, 114 days out. Aug. 14, Napoleon III., Cardiff, bound to Saigon.

VESSELS PASSED STRAITS OF SUNDA.

COMMERCIAL POSTSCRIPT.

The seizure of treasure consigned to the Agra Bank, noticed in our Hong Kong news, was a consignment of the British and Californian Bank at San Francisco on joint account, but at the failure of the Agra the interests of the Californian Bank were transferred to the Oriental Bank who effected the seizure. The manager of the Agra should have surrendered this at once, but the atmosphere of Hong Kong is impregnated with litigious ideas.

At the meeting of the Singapore Gas Company held this day the report noticed in another column was duly passed. The quantity of silk by this mail is 464 bales Japan and 1,461 bales China. The French mail brings about 2,000 bales, and will be at Marseilles on the 3rd prox. Quotations for No. 3 Tsatlee have fallen to 32s., and silk generally is quite 6d. lower.

Hides and Skins.—The result of the sales which concluded on the 25th inst. was as follows:—93 Penang Cow Hides offered, and sold at 3½d. per lb.; 967 Manila Buffalo offered, 449 sold, heavy at 4⅜d. per lb., thirds 3¼d. lb.; 372 Penang and 985 Ratavia Buffalo offered, none sold; 1,122 Brined Cochin Hides offered, all sold, best light at 8d., second light at 7d., small at 6½d., and thirds at 5¾d. per lb.

Arrivals not Included in the Tables.—Oct. 24, at Deal from Akyab, Emily; at Bristol from Singapore, Alfred Ray; 23, at Antwerp from Akyab, Moravia; 23, at London from Penang, Queensbury; 22, at Bremen from Akyab, Emilie; 23, at Helvoet from Akyab, Walsoken; 25, at London from Colombo, Boyne; 23 at Bremen from Akyab, Mercur; 24, at Helvoet from Batavia, Koffyboom; 23, at Gironde from Singapore, Immaculee Conception; 26, at London from Galle, Cru-

Digitized by Google

sader; 25, at Helvoet from Batavia, Van der Palm; 25, at Brouwershaven from Batavia, St. Jan; 28, at Deal from Batavia, Jeannette Cornelia; 28, at Falmouth from Manila, Laura; 13, at Boston from Rangoon, Henry Buck; 30, at London from Rangoon, Diadem.

DEPARTURES.—Oct. 26, from London, for Swansea and Galle, Corea; 25, from Swansea, for Hong Kong, Europa; from Shields, for Hong Kong, Vanguard; from Sunderland, for Yokohama, Amadine; 27, from Deal, for Galle, Douthwaite; 24, from Glasgow, for Singapore, Foam.

LAID ON.—At London: For Colombo, Abdul Medjid; for Shanghai, Maitland; for Colombo, Bovne, Medway.

SPOKEN.—Wilhelmine (Dutch barque) from Hong Kong, 25 days out, July 12, 7 N., 128 E.; Simoom, Manila to Queenstown, Aug. 1, 11 N., 121 E.; Friesland (Gev. barque), Cardiff to Singapore, Sept. 13, 8 N., 24 W.; Silver Eagle, London to Shanghai, Sept. 18, 9 N., 26 W.; Frederick VII., Singapore to Bremen, Oct. 5, 44 N., 23 W.; Salamander, (Prussian barque), Cardiff to Singapore, Sept. 9., 16 S., 35 W.; Lord Collingwood, Newcastle to Japan, 40 days out, 12 N., 25 W.; Oscar, Sourabaya, to Amsterdam, July 6, 34 S., 21 E.; Graaf van Hoogendorp, Newport to Singapore, Sept. 21, 14 N., 29 W.; Niphon, Swansea to Hong Kong, Sept. 23, 100 miles S.W. of Cape St. Antonio; Birman, Bordeaux to Saigon, Aug. 28, 20 S., 37 W.

MISCELLANEOUS.—Ellen Rodger, from Foo-chow-Foo to London, with 900 tons of tea on board, has been totally lost in Gaspar Straits. At Mauritius, Oct. 29th, Confiance (French vessel), from Batavia, for Bell Isle (leaky); William Naisby, from Ceylon, for London (leaky); Stad Assen, from Batavia, for Amsterdam, leaky in her topsides. At Callao, Sept. 20th, Chilian, Souza, arrived from Macao; 17, Uncowah, Bosciani, sailed for Macao.

COMMERCIAL BANK CORPORATION OF INDIA AND THE EAST.

The report of Mr. W. H. Holyland, the official liquidator of this bank, was issued on the 26th, after we had gone to press with the *London and China Express* for despatch by the mail of that day. This is to be regretted, as we believe that nothing would have been so interesting to our readers generally as this report. The anxiety for its appearance had been very much increased owing to the non-payment of a dividend to creditors, several of whom are very seriously inconvenienced in consequence. The report states that a dividend will be paid early in the year from a sum of £750,000 now in the Bank of England, and the sum of £600,000 expected remittances from India and China; these sums together will be sufficient to distribute a dividend of 10s., as the amount of claims after deducting sets-off has been reduced to £2,500,000. It has been a matter of surprise and disappointment that no dividend has been declared up to the present time, but it appears that the liquidator had no power to do so as the Court of Chancery ordered that the time for receiving claims should extend up to the 10th Nov., and be settled by the 3rd Dec. We believe the statement now put forward will very much surprise the shareholders and creditors, as a much worse description of their position had been assumed. We trust that it may turn out as expected, but there is no evading the fact that the whole matter rests upon the following paragraph in the report:—"The valuations upon which the above estimates are founded have been made upon the assumption that ample time will be allowed for realising the doubtful securities, consisting of shares in Land and Reclamation Companies in Bombay and of land and house property in China. A forced sale of these securities in the present depressed state of affairs would result in increased loss to the estate." However, there is one thing we think that is quite certain, viz., that the very best and most energetic steps have been pursued by Mr. Holyland and his colleagues in the matter. We are informed that Mr. Cameron, who has been despatched to China, was highly recommended by competent judges. We hear that his salary is £2,500 per annum.

The approximate statement now submitted to you shows that there was on the 30th June, 1866, a total indebtedness:

For deposits, current accounts, and bills payable.....	£2,962,121	19	9
Liability on drafts accepted, payable in London, £2,652,551 13s. 4d., secured by bills receivable for £2,513,834 10s., upon which it is expected there will be a claim—after allowing for a loss of £50,000—of.....	188,717	3	3
Making together.....	£3,150,839	3	0

The assets of the corporation in London, and with branches, on the 30th June, 1866, were as follows, viz.:—

Cash, Government securities, and bullion.....	£618,244	3	6
Bills receivable, and loans.....£3,719,414 17 0			
Less estimated loss thereon.. ... 1,037,000 0 0			
	2,682,414	17	0
Adjustments, which it is expected will result in good assets, amounting to.....	6,485	10	0
Furniture, and sundries, at value.....	25,302	18	10
	£3,332,447	9	4
Deduct liabilities.....	3,150,839	3	0
Leaving a probable surplus, as shown in the approximate statement annexed, of.....	£181,608	6	4

The estimated surplus will be subject to reduction in respect of claims for interest, expenses attending the various branches, the costs of the liquidation, and losses upon contingent liabilities which may not have been reported to me, also in respect of failures which I may not have anticipated. The valuations upon which the above estimates are founded have been made upon the assumption that ample time will be allowed for realising the doubtful securities, consisting of shares in land and reclamation companies in Bombay, and of land and house property in China. A forced sale of these securities in the present depressed state of affairs would result in increased loss to the estate. There appears, then, to be a reasonable prospect of a surplus remaining after discharging all the liabilities of the bank and the costs of liquidation, which surplus will be divisible amongst the shareholders. In the event, however, of there proving to be a deficiency, the creditors are secured by the liability of the shareholders to calls to the extent of £25 per share upon 40,000 shares, amounting nominally to the sum of £1,000,000; to be prepared for this contingency, the settlement of the list of contributories is being proceeded with. Since the suspension of the bank large amounts of cash and bills have been received, and there is every probability of a considerable dividend being declared early in next year, especially if the funds accumulated at Bombay are sent home in accordance with my instructions. The claims for dividend will, it is estimated, be reduced by sets-off to the sum of £2,500,000 or thereabouts, and the funds in the Bank of England in cash and in bills, which will shortly be available, amount to £750,000, and remittances are expected from the branches, including Bombay, to the amount of £600,000; making together £1,350,000. When these sums can be dealt with, and the claims have been adjudicated upon, the dividend will be declared. A further dividend will depend upon the progress to be made in the realisation of the assets in China and India. Every exertion shall be used to secure the full discharge of the liabilities at the earliest possible date; but, having regard to the nature of the securities to be realised, and the large amount of claims upon insolvent estates, the time necessary for effecting this result cannot yet be defined.

Having now laid before you a statement of the position and prospects of the liquidation, it may be well that I should add a word as to the origin of the bank, and as to the losses which the shareholders have sustained. The corporation was established by royal charter, dated the 19th February, 1864. The charter was obtained by a committee appointed by the shareholders of the Commercial Bank of India—a bank of some years' standing, which had carried on business successfully in India. The corporation was formed with the view of taking over the business of that bank, and of enlarging its operations, and establishing a head-office in London. The transfer was not completed until the end of 1864, and the corporation did not commence business until the 1st of January, 1865; but the shareholders who had previously subscribed for shares were allowed to participate in the profits of the Commercial Bank of India for the year 1864. No dividend has been paid by the corporation. The capital of the corporation was fixed £1,000,000 sterling, divided into 40,000 shares of £25 each. The whole of the capital was fully paid up, and, in addition, a reserve was formed from the following sources:—Reserve fund of the Commercial Bank of India, handed over to the corporation, £73,301; undivided profits of ditto, £69,501 11s. 4d.; premiums received on the issue of the shares of the corporation £96,000, making the reserve of the corporation £238,802 11s. 4d. The corporation, therefore, commenced business on the 1st January, 1865, with a paid-up capital of £1,000,000, and a nominal reserve of £238,802 11s. 4d., subject to any losses which might arise in the realisation of the assets of the Commercial Bank of India. The transactions of the corporation have been very large, and have resulted in serious losses, absorbing nearly the whole of the capital and reserve fund. These losses may be classed thus:—At Bombay £535,000, upon loans granted, with a few exceptions, by the corporation after its establishment upon securities which were nominally sufficient at the time, but which have since become, from the altered state of monetary affairs, nearly valueless; also from failures caused by the great depreciation in the price of cotton. At Shanghai, Hong Kong and Hankow, £326,000, resulting from large mercantile failures, depreciation in the value of land and houses held as security for loans, and from unauthorised and objectionable transactions by the manager in the East, Mr. Wiggins, which were not discovered until his death in October, 1865. At San Francisco, £180,000, caused by the agent of that branch deviating from the instructions he had received to confine his operations to the purchase of bullion, instead of which he made large advances with the funds of the bank upon the security of mining shares, which have proved to be comparatively worthless. At Calcutta, Yokohama, and Singapore, £46,000, from mercantile failures. Total, £1,087,000 sterling. The losses sustained by the corporation in Bombay were caused principally from advances having been made on shares and other securities which had obtained a fictitious value. The recent collapse of mercantile credit in India resulted in a depreciation of value in those securities to such an extent that many of them became and still are unsaleable, and others could be realised only at a very great loss. In one instance advances were made upon the security of about 1,500 shares in the Elphinstone Land and Press Company, with 1,000 rupees paid up, the market price then being 2,200 rupees per share; the present selling price is 500 rupees per share, showing a difference in value of more than £250,000 sterling. In China the ordinary advances made were considered to be amply covered by the securities taken upon land and houses; these are now unsaleable, and can only be realised by waiting favourable opportunities. The other losses made there are of an exceptional character as already stated. I have confined myself in this report to a statement of facts. It may be well, however, to mention that the principle upon which the corporation was founded, of working the business under a court of directors in London was new and untried, and that the system of accounts at first adopted proved insufficient to afford in time to the directing body the information requisite for effectively controlling the action of the local agents. Great efforts appear to have been made by the court of directors and the London manager for the amendment of the system. Upon the court being informed of the large advances made at Bombay, the chief manager was at once sent there, and subsequently, upon information of the state of matters in China and at San Francisco, inspectors were appointed specially to proceed to those places; but the mischief had been done, the whole of the available funds of the corporation had become completely locked up, and when the crisis came early in this year the directors found it impossible, from the means at their disposal, to meet the obligations of the corporation. The information afforded by the excellent reports of the inspector in China came only in time to be of use in the liquidation. In conclusion, I desire to caution the shareholders not to take too sanguine a view of the prospects of the realisation, for although it appears probable that a return will be made to them, yet it depends upon many contingencies. I trust, however, that the result may prove more favourable than I have ventured to anticipate.

ORIENTAL BANK CORPORATION.

An extraordinary general meeting of this company was held on the 18th inst., at the offices of the bank, Threadneedle-street, H. G. Gordon, Esq., in the chair.

The Chief Manager (C. J. F. Stuart, Esq.), having read the notice convening the meeting, read the balance-sheet for the half-year ending June 30, as follows :—

"Liabilities.—To promissory notes in circulation not bearing interest, £405,530 7s. 6d.; to bills of exchange in circulation not bearing interest, £6,577,001 1s. 1d.; to balances due to other banks, £259,871 5s. 3d.; to cash deposited not bearing interest, £1,454,404 17s. 11d.; to cash deposited bearing interest, £4,944,556 8s. 4d.; total due to the public, £13,641,364 0s. 1d.; to capital paid up £1,500,000; to reserved surplus fund, £444,000; to insurance fund, £50,000; to dividends remaining unpaid, £7,408 15s.; to balance of profit and loss after defraying all current charges, £116,861 12s. 9d.; due to shareholders, £2,118,270 7s. 9d.; total, £15,759,634 7s. 10d.

"Assets.—By coin and bullion, £2,374,364 2s. 9d.; by balances due from other banks, £402,195 6s. 5d.; by promissory notes or bills of other banks, £16,829 4s. 10d.; total due to the public, £2,793,388 14s.; by Government securities, £1,208,478 3s. 5d.; by landed or other property of the corporation, £237,216 6s. 5d.; by debts secured by landed or other property, £177,108 15s. 2d.; by notes and bills discounted, or other debts due to the corporation, not included under the foregoing heads, and exclusive of all debts abandoned as bad, £11,343,442 8s. 10d.; total, £15,759,634 7s. 10d.

"Profit and Loss Account.—To amount required to pay interim dividend for the half-year to this date, at the rate of £1 10s. per share, £90,000; to balance, £26,861 12s. 9d.; total, £116,861 12s. 9d. By amount of profit undivided at 31st December, 1865, £5,137 13s. 8d.; by amount of net profit for the half-year, after defraying current charges, and providing for all bad and doubtful debts, £111,723 19s. 1d.; total, £116,861 12s. 9d."

The Chairman, after declaring a dividend of £1 10s. per share, equal to £12 per cent. per annum, said that he thought he might congratulate the shareholders on the dividend as evidencing that the affairs of the company had been conducted with great prudence and caution throughout a period of unexampled commercial difficulty and distress, not only in this, but other countries. Some losses had been experienced, but they were extremely unimportant. Nothing had been lost by the failure of the Commercial or Asiatic Banks, and a very small sum in the Agra Bank would, it was expected, be fully paid. The present position of this company was most promising, the business had increased, and at the chief office additional accommodation had been required to carry it on efficiently. The prosperity of the company was in a great degree owing to the energy, activity, and intelligence of its officers in the East, who had been supported in their views by the assistance of the board at home, and he was happy to say that the dividend now declared made ample allowance for every bad and doubtful debt, a careful estimate of which was made by the bank every half-year. Under these circumstances it was gratifying to him to be able to state that in addition to the dividend now declared they had been enabled to carry forward a balance of about £27,000 to the new account. He concluded by formally declaring the dividend.

Mr. Sebag expressed his gratification at the statement they had just heard, and inquired if there had been any loss in consequence of the failure of Overend, Gurney, and Co.

The Chairman, in reply, said that he was most happy to state that the bank had lost nothing at all through the failure of Overend, Gurney, and Co.; and that although they had a claim for some £4,000 against the firm of Premchund, it was amply secured by shares in the Government Bank of Bombay—(cheers).

On the motion of Mr. H. L. Anderson, late member of the Council of Bombay, seconded by Mr. J. Arbuthnot, a cordial vote of thanks to the chairman and directors for their judgment and discrimination during a peaiod of intense commercial excitement and distress concluded the proceedings.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

A meeting of the shareholders of the Chartered Bank of India was held at the London Tavern on the 17th inst., T. A. Mitchell, Esq., M.P., in the chair.

The Chairman opened the proceedings by stating that the profits for the six months ended 30th June amounted to £60,000, of which sum it was proposed to apply £20,000 towards the payment of a dividend to the shareholders, and that the remaining £40,000 should be carried over. The Chairman stated that, in common with other banks, they had sustained losses, but there was no cause for complaint, for their losses were as nothing compared to those of other Eastern banks. During the late commercial panic in India their branches had been kept well supplied with funds, and consequently had found no difficulty in meeting all engagements. The bank was in possession of a considerable amount of Agra Bank paper, but he (the chairman) hoped to be able to state at the next meeting that little, if any loss had been sustained thereupon. With reference to the late failures of Eastern banks, the Chairman stated that during the period of the panic, of course the shares of this bank were to some extent depreciated in value, but it was evident that the shareholders did not lose their confidence in the bank, for the *bona fide* transfers of shares did not exceed 5 per cent. of the total number. The following resolution was then proposed by Mr. Mitchell, seconded by William Macnaughtan, Esq., and carried *nem. con.* :—

"That a dividend at the rate 5 per cent. per annum should be declared, free of income-tax, payable on the 24th inst."

A Shareholder suggested that a branch of the bank should be established at Madras but did not make a formal proposition to that effect, the Chairman observing that, considering the present state of affairs in India, he did not think it prudent to expend capital in establishing new branches there. A vote of thanks to the chairman carried unanimously terminated the proceedings, which occupied but a short space of time.

SINGAPORE GAS (LIMITED).

The directors in their report to be presented at a meeting on the 30th inst., refer to the continued progress in the lighting of Singapore. The profits for the half-year ending the 30th of June amounted to £803, which, together with £173 from the preceding year, made the available balance £976, out of which the directors recommended the declaration of a dividend at the rate of 7½ per cent. per annum, less income-tax, on the preference capital, and a dividend at the rate of 3½ per cent. per annum on the original capital, free from incometax—leaving a balance of £25. Upon working out the coal stock in June a deficiency was discovered the value of which was charged in the present accounts; otherwise the directors would have been prepared to recommend a larger dividend. Mr. E. J. Wells (the manager), in his report, stated that Singapore had been passing through a commercial crisis, which had materially affected the working of the concern. There had been a considerable falling off in the consumption of gas for the past three months. The depression of trade and the scarcity of money had caused the consumers to curtail their expenditure. During the past month there had been an improvement. The gas was still being used by the Chinese for illuminations. The increase in the number of lights during the half-year was 1,020, the total number of lights on the 30th of June being 4,432. The receipts for the half-year ending the 30th of June amounted to £3,966, and the expenditure to £2,990, leaving a profit of £976.

DOCTOR MACGOWAN ON CHINA.

(San Francisco Paper.)

Want of space will not admit of reviewing the whole of Doctor Macgowan's interesting address to the mayor and board of supervisors, on Monday evening of last week. But there are a few points to which we would call especial attention, as they deserve more than a mere passing notice. The first of these is his recommendation that the Government of the United States should follow the example of other great Powers and establish, at the earliest possible moment, a naval station on the coast of China or Japan. In the event of a war between the United States and any other maritime Power, one of the most important points wherein the commerce of that Power could be seriously annoyed, would be the Indian Ocean and China Seas, but to do this a powerful squadron would have to be employed; and this could not be done if we possessed no base of supplies nearer than our nearest home port, which port would be San Francisco. Had we, however, a naval station, a depot of stores and munitions of war, a port whereat our vessels could be refitted and repaired without the necessity of returning to the distant coast of the United States, we could maintain a fleet in those waters that would harass and annoy the enemy constantly, without the certainty of the vessels composing it being compelled, sooner or later, to leave their cruising ground to make good deficiencies. Even as a peace establishment, its importance and its great economy will be manifest to every one. Our squadron in the East Indies is now larger than it ever has been, and there is no probability of its being diminished in size. A proper naval depot will have always on hand the means of supplying this squadron with everything required, and if located far enough north, the port will answer admirably wherein to give the crews liberty, and enable them to recruit health and strength after an extended cruise within the tropics. Of course a hospital would form a portion of the establishment. Again, after the vessel's commission had expired, or the time had arrived to relieve the officers and crew, instead of the vessel going home, and another coming to take her place, she could be overhauled and refitted, and a new set of officers and new crew could be sent out, thus avoiding the necessity and heavy additional expense of taking the vessel from the station. We cannot now speak of all the advantages to accrue if the recommendation of Dr. Macgowan be acted upon, but we are of the opinion, if the matter is properly laid before our Government, it will receive the attention it deserves. The second point to which we will refer, and which we deem the most important, is that wherein the Doctor makes suggestions as to the kind of men we should have for consuls in China, and his remarks upon the men who have heretofore held those important positions. His remarks applied only to consuls in China, but he might with great propriety have extended them so as to apply to nearly every point whereat we have a consul. In no way does the United States suffer so much abroad as by the conduct, character and ability of the majority of those men who are sent to represent us as consuls in foreign parts. In their appointment no effort whatever is made to examine into their fitness for the position. Senator this, or Representative that, recommends John Smith or William Jones as a man who has done much to further the political interests of the party in power, and one who for this service should be properly rewarded. No pains are taken to find out who John Smith or William Jones are, or if they possess in the slightest degree qualifications for the office, but, for the want of a vacancy at home, or to get them out of the way, they are sent abroad as consuls. On arriving at their destinations, without any knowledge of the duties of a consul, or the ability to speak the first word of the language of the people among whom they are to reside, and with whom they are to be thrown in constant intercourse, they are generally like lost sheep. Then in many instances they imagine that to be a big drinker, a proficient swearer, and to have a good political swagger, impresses foreigners with the importance of a consul of the United States, and they act accordingly, until foreigners, judging from their conduct, imagine us to be a nation of ignorant fools, or blackguards, or both, from which no better selection could be made than the one amongst them. In this way we lose all respect abroad, and the State Department becomes involved in a lot of trouble and annoyance that would be entirely avoided were some care taken in selecting men for consular appointments. The remedy, as suggested by Doctor Macgowan for this evil, is the only feasible one, but we very much fear that in the present condition of politics in the United States there is but little hope of a change from the present system. And lastly, the Doctor's remarks on the great benefit to be derived from the new steamship line to Japan and China, the importance of the establishment of the electric telegraph in China, and the benefit to agriculture in this State from the acclimatisation of the plants of India, China, and Japan, are all worthy of extended notice, and we regret not being able to go over the entire ground taken by him. Not that we could say more upon the point he has handled so well, but in order that we might add our mite in aid of the good work he is engaged upon, of bring-

Digitized by Google

ing to the notice of our people how much our country can be benefited by a closer relationship with the great Celestial Empire and its neighbour, Japan. Dr. Macgowan's mission to Peking as Commissioner of the East India Telegraph Company is a most important one; that he will be successful we have no doubt. His knowledge of the people, their manners, customs, and language render him the best selection that could be made, not only for the interests of the company by whom he is employed, but for the interests of our people generally.

CHINESE EDUCATION.

(To the Editor of the *London and China Telegraph*.)

SIR,—In your last issue I read with interest an article on the study of Chinese in England, and the want of encouragement in that study. During a devotion of fourteen years to teaching it in my capacity of Professor at King's College, about three pupils on an average have attended my class. The paltry sum which nominally endows this post renders it absolutely necessary for the holder of it to seek for other engagements. This is not on account of the want of liberality on the part of those connected with China, nor do the numbers attending my class bear any proportion to the numbers leaving England for China. But both deficiencies arise from the impression—nothing more—that Chinese is too difficult to be learnt anywhere but in China. Now the language of the Hottentots, with its clicks and corkscrew-drawing sounds, may be open to such an objection, but Chinese is not only not difficult, it is positively the easiest language to learn of any with which ordinary linguists are acquainted. Before asking any to promote the study of this language, notwithstanding the necessities of the case, you must try to disabuse their minds of this crooked impression. The language of the Chinese may be viewed from two points: either, first, as a *dead* language, written in books, which is the source of the numerous dialects of the country; or, secondly, as a *living* language, which consists of many spoken dialects, all of which are comformable to the general rules and principles of the dead language, just as the living Italian, Spanish, or French may be understood best by those who have cultivated the dead classics.

The acquisition of the living tongue of China can be made more readily and perfectly under a European than by means of the unscientific teaching of a native, who has no conception of an alphabet or a grammar, and cannot, therefore, assist his pupil in the work of analysis, either of sounds or sentences. The European scholar can at once point out the path which he has himself trodden, and the real distinctions which exist. The student of a barbarous jargon of sounds, such as Chinese is in some dialects when uttered by the untutored voice, will be prone to make distinctions where the differences are imperceptible to the native, and to neglect peculiarities which are absolutely essential. His native assistant will be unable to explain these things; he will merely leave his pupil to imitate the sound, which at every utterance will probably seem more undefinable. The aid which a native scholar can afford to advanced students is, of course, much greater than that which can generally be supplied by a foreigner; but for initiation into the subject, a European teacher is preferable to a native, and if these primary difficulties have been overcome before leaving England for the East, the study of the language may be positively interesting instead of being as at present repulsive to the new comer, who sits down for the first time with a nation ignorant of English, and plunges at once *in medias res* without having prepared himself for the onset. He arises with disgust from the attempt, because he finds difficulties besetting him which neither his teacher nor himself can overcome, but which a few months of earnest work in England before departure, under the guidance of one who has travelled the same route, will avail to clear away.

It is much to be desired that the universities should hold out inducements to the study of Chinese—both oral and written—for that ground will yield as much of valuable fruit as the well-wrought field of Indian literature. But then endowments for teachers and scholars should be made worthy of the importance of the subject, and it behoves those who are immediately interested to show that they would appreciate such endowments by promoting the study of the language with the humble assistance which now presents itself.—I am, your obedient servant,

London, Oct. 15. J. SUMMERS.

CANVAS *V.* STEAM.

(FROM A CORRESPONDENT.)

The result of this year's race from Foochow to London, of four clipper ships with the new season teas, has again proved, and more signally than on former occasions, that navigation and seamanship, without steam, can perform, with canvas alone, this most lengthy voyage at a rate of speed which only one or two of the steamers have exceeded, but the most of them failed to accomplish. The distance between Foochow and London is about 15,000 miles.

This distance was run simultaneously by the ships referred to in ninety-eight days, or at an average hourly speed of 6¼ knots throughout, direct. The fastest steamer that has attempted this voyage has arrived twenty days before these ships, with what result (as compared with the clippers) to owner of vessel or cargo the future will best prove. From the fact that more than double the freight was paid for the tea by this conveyance, and that it was thus earlier delivered, it is fair to believe that, if the conveyance fulfilled expectations, there might be a mutual advantage. But there seems to be a serious impression both in London and the Clyde that although steam may succeed in lessening somewhat the time of transit of the goods the disparity of rates of freight between sailing ships and steamers requisite to pay the latter, being entirely disproportionate to to their relative performances, cannot ensure a corresponding advantage to the merchant, and therefore the question of canvas or steam in the tea trade between China and London will be answered, at least for a long time to come, in favour of the extreme sailing ships.

The magnitude and importance of this staple article of commerce, which has now become almost a necessary of daily life, render it a matter of great moment to have the transit from the place of production to the great depot of consumption effected as quickly, safely, and regularly as possible. Before steam threatened to rival the good old merchantmen in maintaining our commercial relations with distant lands in the exchange of this and other staples of trade for our own manufactures, the ships were constructed much more with a view to capacity for cargo than to attain great speed. But since the advent of steam, and now that vessels so propelled have proved themselves rapid, safe, and regular means of conveyance, the supporters of canvas have constructed their ships of extremely clipper model, many of which—in the long voyages at any rate—but particularly in the China trade, have proved by their swiftness very formidable rivals to steam. The merchant, whose property is conveyed, being deeply interested, very heartily must promote an improvement where the uncertainties of calms and storms are dispelled by application of a motive power independent of the wind; and the course, unless the sailing ship can be made in some way equal to the task of competing with a chance of success against the steamer, the preference will be awarded to the latter.

In communication with adjacent countries there is no need to dispute the supremacy of steam. But in the long voyages—in which, naturally enough, from success in the short ones, the idea of similar success has induced the attempt—it is a matter of considerable doubt whether it is at all practicable, not only on account of the many obstacles (unknown in short voyages) which meet the projectors, but chiefly from the unequal battle they must fight with the extreme clippers, which are yet the favourite means of conveyance, simply because—very different from the old merchantmen—they have proved themselves to be speedy, regular, and reliable carriers. This subject has been investigated by many owners, both in England and China, who are engaged in the trade, and although many have, with commendable enterprise, made bold endeavours to gain that reliable position which has been awarded to steam in the Transatlantic and other successful short trades, the results both to owners of cargo and steamer, in attempting the China trade, have been, to say the least, unsatisfactory. This can easily be conceived. The obvious difficulty that meets the projectors of steam in pursuing successfully so long a voyage, is the cost of maintaining by its power a rate of speed noticeably greater than that of the extreme sailing clippers, or, in other words, accomplishing the voyage in a space of time so much shorter than they can, that it will compensate for the extra rate of freight which steamers must obtain in order to pay. Next to the cost of producing this power, a similarly serious difficulty, requiring similar compensation, meets the projector, in the necessity of limiting the cargo capacity of the steamer in order to carry the engines and fuel. And besides these serious considerations, the route between England and China being naturally in favour of sailing ships, their course lying for the greatest part of the way through the regions of the trade-winds, where nothing is equal to canvas, steamers come to compete with them on terms of inequality very much in favour of the latter. Even on those parts of the voyage, the belts of calms and variable winds which bound the trades and which of old distressed the mariner in his lumbersome East Indiaman by tedious delay—where steam admittedly has the advantage of canvas—the advocates of the latter have so successfully modelled their ships, and spread on their lofty masts such press of sail, that the lightest airs, unfelt by common ships, in a very short time waft these clippers on their way. Thus the gain by the steamer in calms is of comparatively no account with the certain advantage this exceptional sort of ships has in winds.

Looking at the question of canvas *v.* steam from another point of view, and assuming that steam could effect the transit in twenty days less than a sailing ship, on the voyage from Foochow to London, and apart from the consideration of the rate of freight that would enable the owner to maintain such a vessel, what would the advantage to the merchant be? This economy in time, by such a mode of conveyance, would save the merchant interest, and probably insurance on his goods, to extent of perhaps a farthing per lb., besides giving him by early delivery the speculative chance of another farthing, or perhaps halfpenny per lb. These, together amounting to say ¾d., might enable him to pay a fair share of that to the steamship owner—beyond the rates paid by sailing vessels. One halfpenny per lb. is about 35s. per ton of 50 cubic feet of tea, which is an advance in rate of freight beyond which the merchant must feel unwilling to go as long as the clippers keep up the speed which they have, latterly especially, ensured. Beyond that, it is not at all probable that the steamship owner can calculate, unless in exceptional cases, where such earlier delivery prospectively promises a better result to the merchant, and the latter can afford thus to encourage this comparatively expensive means of transit. But it is clear to the most casual inquirer into this question that until steam can compete with canvas on equal terms, the preference will undoubtedly be awarded to the latter.

The reasons already mentioned—namely, the cost of fuel and the space it occupies in attempting this long voyage—are the (at present) insuperable difficulties to contend with, and which have been more or less the cause of so many failures in the endeavour of the promoters of steam to get a place firmly in this trade. And until these serious hindrances can be removed by some invention to economise fuel, every succeeding attempt must result as unsatisfactorily as those which have gone before. Against every new thing there naturally exists prejudice. And had steam not had a fair trial we should have been disposed to have viewed the prevailing feeling, which in China particularly is very obvious and common, against the steamers, as simply want of honest judgment. But from the comparison we have endeavoured to make in the preceding remarks it is clear that there are actual grounds of distrust in steamers, and plain reasons why sailing clippers in this trade should be preferred and substantially supported. While we come to this conclusion on the subject of canvas *v.* steam, it cannot be denied that the success of the sailing ship has been much owing to the incentive produced by competition with steam. No doubt while many unsuccessful attempts were being made the shipowner saw the necessity to meet the advancing spirit of the age, and struggle for the supremacy of sail. For from year to year the ships have been constructed of always finer model, dimensions being adopted where capacity was sacrificed for speed. In fact (of late more especially) the extreme clippers in this employment have been built with lines that more resemble those of our pleasure yachts than that of ships for carrying merchandise. So much has this been the case that these ships are renowned throughout the world for their remarkable sailing powers, and are peculiarly the pride and property of the China Tea Trade.

The London & China Telegraph.

LONDON, TUESDAY, OCT. 30, 1866.

ANNOUNCED FRENCH CONVENTION WITH CHINA.

The English newspapers published in China frequently make merry at the expense of their home contemporaries when the latter are betrayed into any *lapsus calami* with regard to affairs in China. Much allowance should be made for the mistakes of those who in Europe and America attempt to criticise the politics of Eastern Asia, but we observe little of that much-to-be-desired charity on the part of the Hong Kong and Shanghai journals. Frequently indeed the opinions of home writers are travestied and even grossly misrepresented in order to furnish forth material for a satirical article, or to fill up a gaping void by means of a spicy and sensational paragraph. We have occasionally suffered from this injustice, but we should be satisfied to bear with the slight annoyance it has caused us were the China prints themselves mirrors of accuracy, or were they in all cases rigorously closed against doubtful assertions or crazy speculations. We claim indulgence on the ground of our removal far from the field whereon the events we criticise actually occur; and we are disposed to extend a similar indulgence to our China contemporaries in consideration of the insufficient material provided for the wants of a daily paper in Hong Kong or Shanghai. But just as we disclaim any right to mercy should we be found giving expression to opinions totally at variance with common sense, and directly opposed to every well ascertained fact of Chinese history and every well recognised trait of Chinese character, so we are disposed to judge severely any statement made in the columns of the China papers on "reliable native authority" whenever that statement is irreconcilable with sense and experience. Not, indeed, that we desire to oppose facts by theories; on the contrary, our attempts are limited to testing assertions by the touchstone of ordinary judgment.

Apropos of these remarks, we find that the Shanghai papers have recently given currency to an extraordinary legend, purporting to be based on most reliable information, to the effect that a compact has been entered into between the French and Chinese Governments, under which all native Catholic converts are removed from the jurisdiction of their own authorities, and are placed directly under that of the missionaries, to whom belongs the right of adjudicating in civil and criminal cases or of deciding which shall and which shall not be submitted to the native tribunals. So startling an announcement surely demanded some previous preparation—something to make it swallowable by even the most voracious of *quidnuncs*. But no such preparation was vouchsafed to us; as we have stated it, so in other words has it been stated to the public of Shanghai and to the English and continental readers of Shanghai journals. It may appear almost childish to waste time in discussing so evident a *canard*. Our only excuse is that information relating to China is apt to be accepted for better or for worse without question, and we shall not be surprised to find Colonel Sykes or some other senator of inquiring mind demanding an explanation of the "extraordinary apathy evinced by our Minister" in permitting such a treaty to pass without protest. We utterly give up the task of accounting for the phenomenon of such an outrage on common sense and probability appearing in a Shanghai paper, and we content ourselves with pointing out the reasons upon which we ground our unqualified rejection of the (so-called) fact. In the first place, the constitutional suspicion and exclusiveness of the Chinese Government place the granting of such a power to foreigners quite out of the pale of possibility. But even if we take no account of the peculiarities of the Chinese rulers, we assume as self-evident that no Government would permit the existence of such an *imperium in imperio*, or would voluntarily resign its jurisdiction over hundreds of thousands of its subjects. Are these subjects to govern themselves in conformity with the laws under which they have hitherto lived? Nothing of the kind. They are assigned over to a body of irresponsible foreigners, themselves the objects of grave suspicion and frequently of relentless persecution. Moreover, as it is impossible to conceive that such a concession could have been made voluntarily, so it is equally impossible to conceive that the representative of such a Power as France could in this enlightened age make a demand so opposed to all justice and precedent, so alien to the faith of nations. We would ask in what light the English and American Ministers were likely to regard such a step. Would they look quietly on, and permit the measure to pass unquestioned? In fact, the discussion leads us from absurdity into absurdity whence we can escape but by one method; namely, by cutting the Gordian knot, and boldly repudiating the whole story. The inventor or reproducer seems to have forgotten, among other things, that a complete system of rules for the guidance of these ecclesiastical courts should be drawn up and promulgated; that provision should be made for appeal; that in fact the French jurisconsults should invent a code of laws and regulations to extend to the whole eighteen provinces of China, but only to apply to a certain section of the inhabitants separated from their neighbours by nothing more tangible than a difference of creed. Suppose, then, this colossal task (before which the twelve labours of Hercules sink into insignificance) is at length accomplished. The code thus constructed is to be administered by men destitute of legal attainments, and by special education unfitted to unravel the intricacies and complexities of law. How unjust must necessarily be many of the decisions; how often must the course of legal procedure be interrupted by sudden changes of faith on the part of plaintiff or defendant, according as the native or foreign courts appear to lean to the side of his adversary. We confess we stand amazed at the magnitude of the hoax practised upon the Shanghai journals, and we mentally congratulate ourselves upon the existence of so much simple faith which we are told on good authority is more "than Norman blood." Stipulations inserted in treaties wrung from the Chinese at the point of the bayonet have hitherto proved futile, yet we are now called upon to believe that upon an understanding entered into by the French and Chinese officials, the legislative system of the country is to be remodelled. Who is to be responsible for the inevitable blunders and complications? How are the decisions of the new magistrates to be enforced? These and numberless other queries of a similar nature suggest themselves to us, but it is almost needless to say that we have as yet received no enlightenment upon them.

After all, however, there must have been a foundation for this vast superstructure of fiction for which the public is indebted to the teeming imagination of some incorrigible Shanghai joker. Fortunately our correspondence supplies us with the solitary grain of wheat that has produced the bushel of chaff which we have just sifted. Far from enlarging the powers of the Catholic missionaries, an attempt has recently been made to curtail their treaty-secured privileges. To this end the authorities of the province of Szuchuan have drawn up a set of rules for the future guidance of the Catholic missionaries, said rules having the effect of limiting the existing rights of the Christian communities and of lowering the dignity of the Catholic priests and bishops. The present state of things was, indeed, to be modified, but modified in a manner diametrically opposed to that detailed by our Shanghai brethren.

FOREIGN TRADE WITH CHINA.

The Customs system in China under the foreign inspectorate has recently been modelled closely upon that adopted in Great Britain, and amongst other note-worthy improvements we would especially draw attention to the minute returns periodically issued by the Commissioners at the various ports. These returns are of a three-fold character. We have first the annual reports of trade, wherein are carefully summarised all the articles of import and export with their relative quantities and values. From these merchants are enabled to form an approximate idea of the capacity of each district whether for production or con-

Digitized by Google

sumption, and are furnished with authoritative statistics regarding the best markets for native and foreign goods. To the same end conduce the quarterly returns which have been established for the first time this year, but these latter are additionally valuable as furnishing comparative statements for different seasons of the year. Again, in order to remove every ground of error or misconception, the Commissioners are required to draw up annual *reports on the trade at the ports open by Treaty to foreign trade*, and these not only contain valuable information regarding the districts in the neighbourhood of each port which could not with propriety be inserted amongst the annual tables of statistics, but also present in a compact form the deduction that may fairly be drawn from the facts scattered throughout the tables. Such are the regularly issued reports. In addition to these the Inspector-General occasionally calls for special information upon certain points of vast importance to foreign merchants, such, for example, as the pamphlet on "Native Opium Cultivation," published some two years since. It will thus be seen that the Customs establishment at the open ports in China is not merely employed in the collection of revenue, but moreover fulfils the all-important office of recording the progress of trade, and of drawing attention to those facts regarding the country under its supervision, which are likely to prove most extensively useful to the mercantile communities. Were it only in this one respect, the Inspector-General has earned the thanks of European and American capitalists who are interested in the Eastern trade.

We have now before us the volume of *Reports on the Trade at the Ports in China open by Treaty to Foreign Trade, for the year* 1865, *published by order of the Inspector-General of Customs*, and printed at the Imperial Maritime Customs' Press, Shanghai. It forms a well-printed quarto volume of 142 pages, excellently arranged, and got up in a manner that would do credit to a London publishing house. As an appropriate preface, it opens with certain extracts from a despatch addressed on the 24th January last by the Inspector-General to the Tsung-li yamên, or Board of Foreign Affairs. From these extracts we derive all the information necessary to explain the principle upon which the reports are based, and we are further supplied with a few important facts regarding some of the more fruitful sources of the revenue. Thus the import dues are reported to have fallen off since June, 1862, principally in consequence of the American war and the resulting decrease in the manufacture of English cotton goods. Opium has increased yearly in importance, the revenue from this source having risen from Tls. 211,650 in 1860-61 to Tls. 1,692,351 in 1864-65. A falling off in export dues was noticeable during 1864-65, but this may reasonably be ascribed to those causes which operated all over the world, and we are therefore disposed to echo the Inspector-General's opinion that the annual collections for the future are more likely to exceed than to fall short of those for 1864 and 1865. Tonnage dues likewise, probably from the same cause, showed a decline during 1864-65; but on the other hand the coast trade duty has increased yearly, and there is every reason to believe that it will continue to increase. Shanghai has always been the largest collector of duties on imports, opium, tonnage, and coast trade; while Foochow and Hankow, in consequence of the large export of tea from these places, figure most prominently as collectors of export duties. And, finally, as a general summary, we are informed that during the five years ended the 30th June, 1865, the revenue accruing to the Chinese Government from foreign trade at the Treaty ports amounted in all to about Tls. 32,650,000, or, estimating this as five per cent. *ad valorem* on the total trade we may roughly assign two hundred millions sterling as the amount of foreign trade with China during the above mentioned period. Of this sum eighty millions are to be appropriated to imports, and one hundred and twenty millions to exports, thus showing the balance of trade to have been in favour of China to the amount of about forty millions sterling. We need not enlarge on the political significance of these figures. To quote the Inspector-General's words—"Foreign merchants come to "China to trade because it pays them to do so; the figures "just given will make it patent to any one that the Chinese— "merchants, people, and Government—are not without their "share in the advantages springing from commercial inter- "course."

Following this summary, we find three comprehensive statements. No 1, showing the revenue collected, under the headings of *Import*, *Opium*, *Export*, *Tonnage*, *Coast Trade*, and *Native*, at each port during each year, 1st October, 1860, to 30th June, 1865; No. 2, showing the revenue of each port from year to year; and No. 3, showing the total annual collection under each heading. Then come, varying in minuteness and importance, the reports from the Commissioners at the open thirteen ports; but before entering on these, which form the great body of the volume, we would mention an *Analysis of Chinese Commerce*, by M. Gaspard Henri Noetzli, which we would gladly summarise were it not already in a form which defies further condensation. M. Noetzli's *Analysis* has already been published in the Chinese papers, and may, we believe, be had in a separate form at Hong Kong and Shanghai. An appendix, which completes the reports, contains translations of M. Giquel's and M. Kleczkowski's contributions, the former into English, the latter into French, as also a report on the trade of Chinkiang for the year 1864, received, we presume, too late for insertion in the volume published in 1865.

We now proceed to analyse briefly the several reports, commencing with a very elaborate article on the trade and trading prospects of Newchwang, contributed by Mr. Macpherson, and placed first upon the list. Mr. Macpherson is already favourably known to Anglo-Chinese readers by his valuable report on the trade of Hankow, published about a year ago. He now furnishes a similar report on the trade of Newchwang, adding to it much important information respecting the province of Manchuria. The port of Yingtzu, which has been substituted for that of Newchwang, nominally opened to foreign trade by the Treaty of Tien-tsin, is situated on the Sua-muren, about eighteen miles from its mouth. Foreigners have lost nothing by Yingtzu having taken the place of Newchwang, inasmuch as the latter city is now inaccessible by water, save to the smallest river craft, in consequence of the rapid silting of the Sua-muren. All communication by water is cut off during about nineteen weeks out of the year, namely, from November to March inclusive, during which period the river and its approaches are blocked up by ice. The number of foreign vessels, or at least the amount of tonnage annually visiting Newchwang, has steadily increased since the opening of the port in 1861. Thus the numbers and tonnage for the past five years are represented by these figures: 1861, 33 ships, 11,346 tons; 1862, 86 ships, 27,747 tons; 1863, 201 ships, 61,155 tons; 1864, 302 ships, 88,281 tons; and 1865, 274 ships, 91,118 tons. During the five years the Customs revenues rose from Tls. 2,291 to Tls. 167,064. The large increase in foreign tonnage must not, however, be taken as indicating a corresponding increase in the total trade, as in place of about three thousand native junks which formerly arrived and departed annually, no more than thirteen hundred entered during the year 1865. The import and export trade is conducted by four foreign firms and about ten important native hongs. Of the foreign firms two are English, one American, and one German. The trade may, however, be said to be virtually in the hands of the natives, as out of the two hundred and seventy-four vessels which arrived in 1865 only thirty-seven were consigned to foreigners. This native monopoly is clearly shown by the fact that of Tls. 167,000 derived by the Customs as revenue from foreign trade during 1865, no more than Tls. 10,000 was paid by foreigners. The reasons assigned for this vast preponderance of native influence in the trade of the port are sufficiently satisfactory in a logical sense, however heavily they may weigh upon those foreigners who are most directly interested. The native merchants are chiefly of Cantonese and Swatow origin, and being thus natives of the consuming districts supplied by Newchwang, are in constant correspondence with agents or principals in these districts by whom they are supplied with invaluable information. Their long connection with the Newchwang trade enables them to purchase on credit when money is tight, and their well known integrity and large resources render their paper, drawn even at long periods, readily negotiable by the Tartar and Chinese bankers. At Newchwang money is *always* tight, and the only variations in the market are degrees of scarcity rather than degrees of plenty. In the case of foreigners, when the produce markets are low, imports must be offered at a correspondingly low figure, while, on the other hand, the native merchants hold over their stocks for the most favourable periods, and in the meanwhile discount bills, at a fairly reasonable rate, and obtain six weeks' or two months' credit before paying for the produce they purchase. But one of the most pregnant reasons assigned is the existence in its worst form of the compradore system, whereby the foreign merchant is compelled to entrust his fortune and even his reputation to an agent upon whom he has little check, if any, and whose own personal interests invariably outweigh those of his employer.

The export trade of Ying-tzu consists of pulse, bean cake, and

Digitized by Google

oil. The first is used as an article of food by the Cantonese and Fohkienese, the second makes an excellent food for cattle, but is more generally applied to purposes of agriculture, and the last is used in cookery. Oil is generally shipped by native junks for the very sufficient reason that the paper-lined baskets wherein it is transported to the South are handled more carefully on board such craft than on board foreign vessels; but pulse and bean cake are, as a rule, shipped in foreign bottoms. Cotton is also occasionally exported, and there appears, strange to say, to be a growing trade in rice, of which grain 37,728 piculs, or say 2,220 tons were shipped (chiefly to Shanghai) during 1865. It appears probable, or at least possible, that at some future day coal and silk may be numbered among the exports from Newchwang. Of the former a somewhat inferior quality is freely produced about forty miles to the south-east of Moukden, and it may be conjectured that with improved appliances the price, now estimated at Tls. 8 per ton, could be materially lowered, and a better quality of coal put on the market. Silk is also produced to the extent of about three hundred piculs per annum, at a cost of Tls. 170 per picul, and it is to be observed that the northern silkworm, which is larger than that found in Che-Kiang and Kiangsu, feeds not on the mulberry but on the leaf of a shrub oak. Following up the list of productions of Manchuria, Mr. Macpherson supplies some interesting details regarding the cultivation and collection of ginseng, the wondrous root in whose virtues every native of China and Tartary places such implicit faith. It would be difficult to enumerate the properties supposed to reside in this simple drug; far easier would it be to sum up the attributes which it has not. Human life is considered as but of secondary value when compared with the importance of obtaining supplies of ginseng, and as it is found in greatest perfection only amid the densest forests and most impenetrable morasses, many of those who are employed to search for it annually perish. Spurious qualities are freely exported—indeed the average value of eight hundred and sixty-seven catties exported in foreign vessels during 1865 was not two taels per catty, whereas on the other hand, a genuine root weighing no more than six mace is worth fifty taels, a mace being the 160th part of a catty. The value of the import trade for 1865 showed a considerable increase over 1864, due principally to the large arrivals of opium and English cotton manufactures, as also to an increase in the import of bar and nail-rod iron. Still, the general poverty of the province of Manchuria appears likely to limit the growth of Ying-tzu in importance. Moukden is a city of great wealth, and the inhabitants of south-eastern Mongolia are gradually increasing in number and riches. But the deserts on the north-west shut out the Khanates from the great Mongolian mart, and compel them to supply their wants and dispose of their produce at Kiachta. The western districts, again, are supplied directly from Hankow and Tientsin, while to the east and north-east foreign goods if they be ever required would most naturally be supplied from the Amoor territory. The Corea likewise promisses little, for although the country is believed to be rich in the precious metals the inhabitants are slothful, exclusive and unenterprising. Under any circumstances, even were the resources of the Corea developed, there are other outlets for the resulting trades which would debar Newchwang from any large share in transactions with the Coreans.

The producing districts in the neighbourhood of Newchwang lie along a line drawn through south-eastern Mongolia from the Great Wall to the Songari. Here is grown nearly four-fifths of the pulse which enters the port of Ying-tzu, but neither foreign nor native merchants attempt to make their purchases in the interior. Brokers who have been engaged in the business for years and have thus gained the full confidence of the producers enjoy a monopoly of the agency. These brokers or dealers do not sell direct to the Ying-tzu merchants but consign their purchases to keepers of "yards" at the port, between whom and the exporter local brokers act as go-betweens. Insuperable obstacles are thrown in the way of the exporter if he attempt to approach the producer except in this roundabout fashion and in fact the trade is so fully established on the existing basis that any attempt to alter it would be hopeless. We have thus summarised the contents of Mr. Macpherson's report on the trade of Newchwang; the information contained in it is of the very highest importance, and deserves careful consideration at the hands of those interested in the development of foreign trade with China. In a future issue we will return to the volume into which we have thus dipped.

THE ANGLICAN BISHOPRIC IN CHINA.

No appointment has as yet been made to the vacant bishopric of Victoria (Hong Kong). The selection of a successor to Bishop Smith has been delegated by the Earl of Carnarvon, Secretary by State for the Colonies, to the Archbishop of Canterbury. Two or three names of suitable clergymen have been submitted to his Grace's consideration; and we have reason for believing that the nomination of a new Bishop of Victoria will be made within a few weeks from the present time. It is understood that a council of bishops, usually consulted by the Primate on ecclesiastical matters in the colonies, will assemble during the ensuing month of November; after which it is presumed that there will be no further delay in filling up this vacant Colonial see.

THE MANILA CONSULATE.

The appointment of Mr. Rainals to this post has been cancelled, and Mr. G. T. Ricketts, late Consul at Sarawak, has been nominated to fill it. The former appointment, as we have already shown, was by no means a suitable one; for, although Mr. Rainals is undeniably eligible in other respects, his want of knowledge of the Spanish language would have proved a bar to his usefulness at Manila. The appointment now announced will, we trust, set the matter entirely at rest, and prove both permanent and satisfactory to all parties. Indeed it is high time that the vicissitudes which have so long kept this Consulate in an unsettled state should come to an end. On the return of Mr. Brackenbury, who only held the post a few months, Mr. Webb, the Vice-Consul—who had resided some eighteen years in Manila, and would have been a most efficient successor—assumed charge; but very shortly afterwards was removed by death. In the meanwhile, Mr. Randall Callander had been appointed to go out, but was subsequently superseded by Mr. Rainals, who in his turn now gives place to Mr. Ricketts. We may here mention, incidentally, that the post now vacated by Mr. Ricketts at Sarawak is not filled up, nor is a successor likely to be appointed at present. We find the previous services of Mr. Ricketts are as follows:—

Appointed a Cornet in the 3rd Light Dragoons January 16th, 1848; promoted to be Lieutenant Aug. 3, 1849, and served with that regiment in India from 1846 to 1853; was present during the Punjaub campaign and at the battle of Goojerat, for which he has received a medal and clasps. Was appointed Lieutenant in the 12th Lancers July 29th, 1853, and served with that regiment at Bengalore in 1854 and 1855. Exchanged into the 52nd Light Infantry November 24th, 1854. Was Paymaster in the 5th Dragoon Guards from April 6th, 1855, till January 30th, 1857, when he was appointed a Lieutenant in the Ceylon Rifle Regiment; retired Jan. 16th, 1858. Was present at the battle of the Tchernaya and the capture of Sebastopol, for which he received a medal. Was for some time Cancellier in the Consulate at Morasir, and was Acting-Consul there from December 12th, 1859, till May 15th, 1860. Was afterwards private secretary to Mr. Longworth, Consul-General at Belgrade. Was Acting-Consul at Belgrade from July 9th to November 10th, 1863; and was appointed Consul at Sarawak, Borneo, January 1st, 1864.

FRANCE AND THE COREA.

It is not the intention, we believe, of the French Government to give authority for any special expedition to the Corea, with a view of punishing the Government for the massacres inflicted on the Catholic missionaries. There has been an impression that the opportunity would be taken to enforce a treaty of commerce on the Coreans, and that Her Majesty's Government would be asked to join in the enterprise. We understand on good authority that no such respresentation has been made by the French Government.

It is stated in the French papers, that Rear Admiral Rose, commanding the French naval division in the Chinese and Japanese waters, sent a fresh note to the King of the Corea on the 2nd of September, and that if justice is not done to the demands of France, a division of gunboats, commanded by the Admiral in person, who will unfurl his flag on board of the *Bourdais* will proceed up the Nagtow-kan, which leads to the capital of the country. "We are assured, says a semi-official organ, that the Admiral is determined to obtain not only the most complete religious liberty, but also the permission for foreigners to establish themselves in the Corea, with the same rights as they now possess in China and Japan." This unwise announcement has naturally given rise to awkward comments, and a well known journalist asks:—"What should we say of England if she were to bombard Havre or Cherbourg, Marseilles or Toulon, in order to establish complete political liberty in France? What will happen when we have taught the Chinese to fight? If we teach them to defend themselves, do we not teach them to attack us? And the empire of China alone has a hundred and ten millions of inhabitants, more than all Europe together. Before going to impose complete religious 'liberty on China,' would it not be better to commence by establishing complete political liberty in France? Frenchmen, what do you think of it? Of these two policies which is the false one?"

Now we cannot help thinking that both these gentlemen exhibit a sad want of judgment, and write much in the style of speeches at a debating

Digitized by Google

society; but there is some excuse for the latter in the *bunkum* of the former, and is there not some excuse even for the former in the fact that unfortunately the French public is seldom informed of what is about to be done, but of what only has been done or attempted? We do not understand such excessive diplomacy, and we believe it to be one of the greatest mistakes possible.

TELEGRAPHIC COMMUNICATION WITH INDIA.

The report of the Select Committee on East India Communication that sat during the last session, has recently been issued, and contains some interesting particulars on this important subject.

It appears from evidence adduced that there exist at the present time two systems of telegraphy between England and our Indian possessions. One, commonly called the Turkish route, passes through Vienna, and Wallachia or Servia to Constantinople, or reaches the latter city by way of Turin, across the Adriatic to Selonica, and along the shores of the Sea of Marmora. Having reached Constantinople, it is forwarded through Asiatic Turkey to Bagdad, and thence to Fao, where it is received by British officers for despatch to Kurrachee, or by way of Teheran to Bushire, where it again falls in with the main line, and is then exclusively under the control of the Government of India. A message by this route may be dealt with by no less than ten Administrations before passing into British hands. A large mass of evidence goes to prove that the vexatious delays constantly occurring on this line are mainly due to the apathy and carelessness of Turkish officials, who not only neglect to keep any wire, or system of wires exclusively for Anglo-Indian use, under the term of the Indo-Ottoman Convention, but fail egregiously in the prompt performance of their ordinary clerical duties. The other available system, called the Russian route, passes through Berlin, via the Hague, thence into Russia, through Tiflis to Julpha, on the Arras, and so over the Persian system to Bushire. These two systems of telegraphic communication are distinct as far as the head of the Persian Gulf, but intercommunication may be altogether suspended by the occurrence of any accident to the submarine cable between this point and Kurrachee. The Russian system seems to work well as far as the eastern frontiers of that country, but fails in its entirety from the imperfect arrangements of the Persian service between Julpha and Teheran. A report submitted by Colonel Goldschmid in November, 1865, recommends that such part of the Anglo-Indian system as passes through the Ottoman Empire should be placed in the hands of Englishmen, making the principal stations at once Anglo-Ottoman, as at Fao. This plan, however, is inadmissible for political reasons. The Russian Government are willing to place their system in the hands of a London firm, and such a course would be eminently advantageous if the possession of the Persian line could be secured. The committee have therefore recommended that means should be adopted for facilitating the use of the Persian system with Europe, so as to bring the Russian route under efficient control; that to avoid future accidents, the Persian Gulf cable should be doubled, or, by arrangements with the Persian Government, that hand wires should be instituted between Ispahan and Kurrachee. That the scheme of establishing a direct communication between Aelxandria and Bombay by way of Aden is specially worthy of consideration, and should receive all possible aid from Her Majesty's Government, as thus establishing a route under one management and responsibility. The committee also urge upon the Indian authorities the absolute necessity of improving their internal arrangements, so as to remove all risk of delay in the transmission of messages from Kurrachee to the interior.

THE Order in Council for the government of the Straits Settlements of the Colonial-office has not yet been drawn up, but arrangements are we believe in progress for assuming the government early next year. Several changes are contemplated, in order to establish the future Government more in accordance with colonial regulations.

CONDITION OF THE SILK TRADE OF LYONS.

It has been pretty generally known for a long time, notwithstanding certain statements which have been put forth from time to time, that the condition of the Lyons manufacturers was most unsatisfactory. The failure of the home crop of silk, the American war and other circumstances, have done their work only too completely. Still the full extent of the mischief has been concealed with much care, till the condition of the spinners, weavers, and all who depend upon that industry has become so deplorable that concealment is no longer possible, and the task even of ameliorating the condition of that large population one which may well make thoughtful men aghast. A statement respecting the condition of the export trade of the silk district has just appeared, and the assertions contained therein are so startling that but for the high character of the reporter and his undoubted knowledge of the subject upon which he writes, would be likely to be set down as the production of a bewildered brain. M. Arlès Dufour, for it is from his pen that the statement proceeds, has just informed the world that the amount of the exports of Lyons silks, which a few years since, in 1858, if we remember aright, was eighty-four millions of francs per annum, only reached eleven millions last year, and will, he believes, not exceed *seven millions* this year. A great staple trade like this fallen down to one-twelfth of what it was eight years ago, is a fact so startling that we can scarcely understand it. This is no local misfortune; it is a national calamity, and one which will demand all the energy of the nation to meet and combat. Happily, as we are told, the difficulty is not complicated by any ill-will between the masters and the workmen; the latter have not shown, and, it is to be hoped, will not show any disposition to create difficulties; but thousands cannot be left to starve, and the sum required to feed or to employ such a population is not easy to raise. France escaped the cattle disease and came comparatively unscathed through the late commercial panic, but the silkworm disease was a severe blow, of which this sad state of things is probably in part the result. The dearness of the raw material, combined with the state of foreign markets, have probably rendered the manufacturers and merchants over cautious; but at last the sufferings of the working-classes have become too great to be borne, and a remedy must be found.

A month ago the writer of the commercial article in a Paris paper said:—"The insufficiency of the last crop of European silk and the unfavourable news from the Far East have raised the price of the small quantity of the raw material to too high a figure. Each week the silk *conditioners* of Lyons register transactions of more importance than those of the corresponding week last year; but these transactions have little to do with the manufacture of Lyons. Silk stuffs will not sell at prices sufficiently high in proportion to the cost of the material, so the manufacturers abstain, although they know that the English keep Asiatic silk at very high prices, and that the Swiss manufacturers as well as those on the banks of the Rhine continue to make large purchases of silk in the Italian markets, where prices range three or four francs higher than they do in Lyons." This statement is doubtless correct, but it increases the riddle instead of helping to explain it. If England, Switzerland, and the Rhenish manufacturers can pay such high prices for their silk, why is the trade of Lyons in such a desperate condition?

DUTCH RULE IN JAVA.

(THE TIMES.)

Parties in Holland are divided on the subject of Java. Java, as the reader is aware, is the brightest gem in the Netherlands' diadem, the pride of the Indian Archipelago, unmatched for beauty and fertility by any equal extent of the earth's surface. Java, an old Portuguese, and subsequently a Dutch colony, came into the hands of the English in 1811, and only fell back to the Netherlands by an act of spontaneous cession five years later. The Javanese, a Malay race, were already civilised at the time of the first Portuguese settlement in 1511, and by the advanced state of their agricultural industry, aided by the most perfect system of irrigation, they had made of their land the granary of the Archipelago. The Dutch, who previous to 1811 had only some settlements in the island, had introduced forced labour in their plantations; but their "peculiar institutions" were abolished during the English occupation, and not restored for several years after the reinstalment of Netherlands rule. One of the Governor-Generals of the Dutch East Indies, however, by name Van den Bosch, effected a revolution on a large scale in the island, appropriated all such soil as could best be turned to the production of sugar, coffee, indigo, &c., and, by the means of compulsory labour, changed the whole aspect and economy of the land. The results of these measures, it is stated, were a rise in the revenue to a sum of £4,000,000 yearly, and an increase of the population from 5,000,000 in 1816 to 13,649,680 in 1863. We must not, however, suffer those somewhat startling numbers to mislead us. The population of Java, with all its wondrous increase, is only about half the density of that of Lower Bengal, and as to trade, while the joint imports and exports, not only of Java, but of all the Dutch islands in those Eastern Seas, are valued at about £13,000,000, they are exceeded by £2,000,000 by those of the three little British districts in the Straits of Malacca, the two principal of which were still uninhabited eighty years ago. That, with all the wealth which they accumulate for their taskmasters, the Javanese labourers do not greatly improve their own position one might feel tempted to infer from the fact that the price of corn has during the last sixty years risen 200 per cent. The island, which was once, as we have said, the sole granary of the Malay Archipelago, has ceased to export corn, and the supply for those islands comes at the present day from the British possessions in Pegu, Aracan, and Siam.

But, however splendid may be for Holland the results of the forced labour system in an economical point of view, the time has come in which such question are put to the test humanitarian, no less than utilitarian inquiry, and an outcry has been raised among a party in the Dutch Opposition by whom the system of cultivation in their East Indies, however disguised it may be under the specious name of "apprenticeship," is stigmatised as unmitigated servitude. It is little to the purpose to assert that the Javanese are not demoralised by their present condition, or that they are aware of no oppression, that the system is indigenous, and has always been in the island. Our age is at little trouble to distinguish between *corvee* and *battue* and downright slavery. It will put up with no forced labour, even for the negro; so much less, then, for the gentle and patient Malay, who seeks no escape from his lot except in emigration, and goes forth as a sailor, sometimes even as a pirate, or looks abroad for employment in any other capacity but upon conditions of freedom.

Of such a nature is the question which seems to have roused the Dutch politicians from their wonted sluggishness. After the abolition of negro slavery in the Dutch West Indies in 1862-3 the Liberals wished to proceed to a similar measure in behalf of their Eastern possessions. A Bill for the abolition of forced labour in these colonies was brought in last year in the Dutch Parliament, but was rejected, as fraught with utter ruin to the colonies themselves, no less than to the mother country. More lately the Government filled the measure of popular discontent by the appointment to the office of Governor-General of the East Indian possessions, the highest office in the Crown's gift, of a man formerly well known for his leaning to the principles of free trade and free labour, but who had abandoned his principles, and ratted from his party. A vote of censure was passed in both Houses against the Ministers who had advised the nomination of the obnoxious Governor. The King retorted by the dissolution of the Chamber, and Holland is now in all the throes of a general election. A Royal proclamation, intended to soothe the angry spirits, seems to have been void of effect. The Liberals are likely to muster stronger than ever in the new Parliament, and, in the event of a new vote of want of confidence, the Ministers are said to contemplate a resort to exceptional measures, equivalent to a violation of the Charter of 1848. It is easier to wish than to hope that milder counsels may prevail. The question of slavery, even under the most mitigated form, is one with which the present age will bear no tampering. The mischief which a violent abolition wrought in our West Indies and in the Southern States of the American Union might be even more grievously felt in the Netherlands' colonies. For the sake of the serfs, no less than of the masters, it would be desirable that the reform, however total, might be gradual; but hitherto no consideration of prudence has ever had the power to stem the tide of passion in this delicate and dangerous matter; and we are not quite sure that even the proverbial Dutch phlegm will be able to keep its newly-awakened enthusiasm within rational elements.

Naval and Military.

The troops already detailed as proceeding to China and Japan it is now intended should proceed by the screw steamer *Golden Fleece*.

Captain Sherard Osborn has been nominated a member of the Ordnance Select Committee, vice Captain Key.

It is announced that the Secretary of State for War is prepared to receive proposals for breech-loading rifles, to replace the present service rifles. Prizes of £1,000, £600, £500, and £400 are to be given for the best cartridge. There is to be a competition for the breech-loaders, and the successful rifle is to bear the inventor's name. The sum of £300 is to be allowed to each competitor for expenses.

The following facts (says the *Army and Navy Gazette*) speak for themselves, and tend to prove the very great unpopularity of the medical service of the Royal Navy which must exist amongst our schools of medicine in the United Kingdom. On comparing the present Navy List with that of last quarter we find the number of assistant-surgeons shows a reduction of eight. There have only been six entries this year, and we moreover find that there are now no fewer than twenty-five surgeons borne in lieu of assistant-surgeons, and that sixteen ships have either no assistant-surgeon at all or only one assistant-surgeon where two would be the proper complement. The subjoined is a list, with the names of the ships and the vacancies in each. Assistant-Surgeons short:—Achilles, 1; Bellerophon, 1; Cadmus, 1; Duke of Wellington, 1; Hector, 1; Leander, 1; Liverpool, 1; Lord Clyde, 1; Resistance, 1; Rosario, 1; Royal Sovereign, 1; Scout, 1; Speedwell, 1; Vindictive, 1; Wellesley, 1; Wivern, 1—total, 16. Surgeons in lieu of Assistants:—Acorn, 1; Asia, 1; Boscawen, 1; Caledonia, 1; Cambridge, 1; Cumberland, 4; Dauntless, 1; Fisgard, 3; Ganges, 1; Impregnable, 1; Indus, 1; Jaseur, 1; Royal Adelaide, 1; Saturn, 1; Terror, 1; Trafalgar, 1; Victoria, 1; Victory, 3—total, 25.

Captain W. R. Mends, C.B., the Director of Transport Services, accompanied by Captain Willoughby, R.N., the Resident Transport Officer, and Colonel Ross, C.B., the Deputy Quartermaster General in Egypt, left London on Saturday last for Alexandria *via* Brindisi, at which latter port Her Majesty's despatch-vessel Psyche will be in readiness to convey them to their destination. The Psyche will remain at Alexandria during Captain Mends's stay in Egypt; and after he has made the necessary arrangements with his Highness the Viceroy and the Consul General for the conveyance of troops across the Isthmus, the erection of a hospital at Suez, and the establishment of offices at that place and at Alexandria, the Psyche will return with him, either to Brindisi or Malta as he may direct.

The screw steam frigate Bristol, 31, Capt. Leveson E. H. Somerset, from the west coast of Africa, has arrived in Plymouth.

The screw steam gunvessel Star, 4, at Devonport, is ordered to be put in commission with a complement of 90 officers and men for service in the East Indies. She burdens 695 tons, and has engines of 200-horse power. Her present master is Mr. John B. Snell, and chief engineer Mr. John Bruce. The pennant was hoisted on board.

The Sylvia, already noticed as fitting out for surveying operations in China and the Corea, is ordered to have a crew of 90 men and boys. A number of seamen gunners from the Excellent at Portsmouth arrived yesterday at Woolwich, having been told off to join the Sylvia.

The chartered troopship Akbar has embarked at Gravesend for Colombo 71 non-commissioned officers and men, seven soldiers' wives, and seven children of the 2nd battalion 25th (King's Own Borderers) Regiment, from Preston; eight non-commissioned officers and men of the 3rd division Depot Brigade, Royal Artillery, from Warley; and one armourer-sergeant, wife, and four children from the Royal Small Arms Factory at Pimlico. The following officers proceed in charge of the above troops:—Captain Horace William Scriven in command; Ensign John Leith Ross and Ensign Francis Welch, 2nd battalion 25th Regiment; and Staff Assistant Surgeon Robert Nelson Mally, in medical charge. The embarkation of the troops was effected under the superintendence of Brigade Major W. W. Lynch and the officials of the staff from Chatham Garrison.

The Gosforth, sailing Indiaman, a fine frigate-built ship, belonging to Messrs. T. and W. Smith, of London, embarked the following troops on the 8th October alongside Portsmouth dockyard for conveyance to the Cape of Good Hope:—Detachment of the 2nd battalion 11th Regiment, from Parkhurst, Isle of Wight—Capt. Dickens and lady; Capt. Crompton, lady, and three children; Capt. Jordan, Ensigns Bond, Vaughan, and Andrews; 125 men, 10 women, and 16 children. Detachment of the 1st battalion of the 9th Regiment from Pembroke—Lieut. Borton and lady, Ensign Burton, 48 men, nine women, and 10 children. Staff-Assist.-Surg. M'Altera in medical charge of the troops.

The following troops have embarked at Gravesend on board the chartered troopship Merchantman for conveyance to Ceylon—viz., Capt. R. Bullen, W. S. G. Burke, Lieut. W. F. Richardson, 102 non-commissioned officers and men, one officer's wife, three children, and one servant, nine soldiers' wives, and 20 children of the Royal Engineers, 23rd and 24th companies, Ensign J. W. Lang, 45 non-commissioned officers and men, three women and seven children of the 1st battalion of the 10th Regiment, from Chatham; Capt. H. F. G. Webster, Lieut. F. W. Barlow, Ensign A. Denny, Ensign R. A. Woolley, 56 non-commissioned officers and men, one officer's wife and child, seven soldiers' wives, and five children, of the 2nd battalion of the 20th Regiment, from Shornclife; Capt. G. R. Harvey, Ensign W. B. Broughton, 78 non-commissioned officers and men, seven soldiers' wives, and five children of the 99th Regiment, from Preston; and Lieut.-Col. E. Knight, wife, and servant, Cape Mounted Rifles, for passage to the Cape of Good Hope; the whole under the medical charge of Surgeon T. Tarrant, M.D., Cape Mounted Rifles.

The Prussian frigate Niobe, from Kiel for the East Indies, has arrived in Plymouth Sound.

The Vulcan, iron screw troop-ship, after having been nearly two years in Portsmouth harbour since her return from China, was removed to the steam basin, with a view of her being thoroughly surveyed and inspected as to her fitness for being repaired and brought forward for further troop service.

The Imperial Russian screw corvette Griden sailed from Portsmouth on the 24th for Cronstadt. The Griden put into Portsmouth some little time back on her way down Channel, from Cronstadt bound for the Amoor, to stop a leak. She was placed in the Corporation Dock for examination and repair, but her defects have been found so serious that she has been only temporarily repaired, and returns to Cronstadt instead of prosecuting her voyage to the Amoor.

The post of Senior Naval Officer at the island of Ascension is expected to be immediately vacant, and, among other candidates, is, we understand, Captain E. K. Barnard, who is also named for the Medway steam reserve, and to which he will probably give the preference. At Ascension, the screw steam sloop Greyhound, 5, Captain Charles Stirling, to which ship Commodore Hornby, Commander-in-Chief of the West Coast station, had on the 1st inst. transferred his broad pendant from the Flora. The Greyhound has been fitted with a poop for the reception of the Commodore, and was expected to leave for St. Helena about the 10th of October. The screw steam gunvessel Torch, 5, Commander George A. Douglas, was undergoing a refit at Ascension, preparatory to resuming her station in the Bights. The guardship Flora, 40, Captain Joseph G. Bickford; the iron screw steam storeship Dromedary, 2, Master-Commander John H. Allard; and the paddlewheel steamvessel Pioneer, Lieutenant Harry F. Yeatman, commanding, were also at the island. The Pioneer was refitting, to resume her station on the Congo. Her commander has suffered severely from coast fever.

H.M. Gunboat "Waterwitch."—An interesting trial has lately been made of this vessel, in which what is called the "turbine" method of propulsion has been adopted. The Waterwitch is an iron-cased gun-vessel of the same class as the Vixen and Viper, and will carry a similar armament, namely two 7-inch and four 20-pounder guns. She is the first vessel fitted with Ruthven's "turbine" or "hydraulic" engines, which invention is being introduced into the navy under the auspices of Admiral Elliott. The following are the main features of the system: the vessel has an inner and an outer bottom, and into the space between them the water is freely admitted by large rectangular openings in the fore part. In this space a large water-wheel, driven by a steam-engine of 150 horse-power (nominal) revolves rapidly, forcing the water at an immense pressure out of two pipes or "nozzles" one on either side of the vessel; and the force with which it is ejected propels the vessel through the water just on the same principle as a rocket is impelled through the air. By simple machinery communicating with the deck these nozzles can be directed either ahead or astern at pleasure, so that the course of the vessel can be immediately altered, checked, or reversed, without stopping the engines; while by turning one nozzle each way she can be made to revolve on her axis. The trial was a complete success, a speed of nine knots being attained, while the steering was perfect, and the motion peculiarly smooth and easy. The advantages of the new method of propulsion are numerous. Power is economised, because the propellors are not lifted out of the water by pitching as with the screw; they are not likely to be damaged by shot; the vessel is not dependent on her rudder for steerage; she could not be sunk by shot holes, as the engines would pump out far more water than could be admitted; and the management of the vessel is entirely under the control of the officer on duty, independent of the engines.

Books for Sailors.—The Rev. John Scarth (formerly of China and now chaplain of the St. Andrew's Church Mission, Gravesend) has published an appeal to the public for surplus books, magazines and papers, for the use of sailors and emigrants. Mr. Scarth has already collected some thousands of volumes, and has made up nearly fifty libraries for ships, which are supplied with them free of charge. Mr. Scarth now asks for further contributions to enable him to continue the good work.

Foreign Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Oct. 25.

The political agitation here is daily increasing, and the crisis will be decided on Tuesday next. It needs no comment that the proclamation of the King, which is addressed to every elector in the kingdom, and by which all those to whom the law gives the right to vote are invited to proceed to the ballot, will turn in favour of the Liberals. Not only in the known Liberal districts will the contest result in the return of Liberal candidates, but it is very doubtful whether any Conservatives will be returned. The Liberal party will certainly be reinforced by the new elections, and of course the new Chamber will at once proceed to pass a vote of want of confidence, so as once more to overthrow the Ministry. But in the meantime it is difficult to suppose that the Cabinet will yield, and therefore it is more than probable that the Government will have recourse to a *coup d'etat*. Our position is indeed very critical, and next Tuesday will be a day of great importance, both for the Netherlands and the East Indies.

Some Prussian papers have told us that the last despatch of the Berlin Cabinet in the matter of Luxembourg to our King, as the Grand Duke of that State, bore the aspect of an ultimatum. It was added that the King refused to comply, and dared Prussia to do her worst. This I can assure you on good authority is entirely untrue. On the contrary, the negotiations are being conducted in a friendly way, and we have every reason to expect soon a favourable result.

The Emperor of Austria has solicited Mr. P. P. Van Bosge, M.P. and ex-Minister, to become Minister of the Financial Department in that State. This gentleman has, however, declined the offer, and the Emperor Franz Josef has requested him to pass some time in Vienna, to which demand Mr. Van Bosge has agreed, and has drawn up a memorandum on the entire reorganisation of the Austrian finances.

I much regret that I have to announce the death of Dr. Ph. von Siebold, the celebrated traveller in Japan, who died on the 18th inst. at Munchen, where he had begun to form a Japan ethnographical museum. Von Siebold was chief officer of the general staff, and was aged seventy-one, having been born on the 17th of February, 1795. He leaves many manuscripts of great value. Since 1854 he has lived at Bonn, but his collections were at the Museum at Leyden.

The national exhibition in the Crystal Palace at Amsterdam was closed on the 18th, after it had been visited by the King. The total number of persons who visited the exhibition amounted to 259,551. A general discontentedness prevails about the awards of the jury.

Her Majesty returned yesterday from her journey to Switzerland.

A work of great importance has been published by M. Rodolphe Lindau. It is a geographical and moral description of Japan, and Nisi Sioesoeke, Japanese officer and student in jurisprudence at Leyden, has written the preface.

The *Kai-yoo-Maroo* will sail from Brouwershaven for Japan. It will be remembered that this vessel was built at Dordrecht, as a man-of-war, for the Japanese Government. She is fitted with thirty-two guns, twenty-six of which are 30-pounders, and will be under the command of the Lieutenant (1st class) Dinnaux. The Japanese Marine officers Oetida, Enomoto, Sawa, and Tagoezzie, will start with this ship for their mother country, and likewise the Japan second officers who were busy for some time in our iron manufacturies. Only the two medical students, Ido Genpak and Hajazi, and the naval engineer, Acamar, will remain here. The first-named take their studies at the Hospital at Nieuwediep, the latter at Amsterdam.

COMMERCIAL.

COFFEE.—The Dutch Trading Company's monthly public sale of 140,800 bags Java, Menado, Padang, and Macassar coffee, held here on the 17th inst., has gone off at some reduction, except for the fine pale sorts of Java and Padang, which sold at full prices; green qualities of Java sold at 1 cent below the valuations, ordinary to good ordinary, ½ to 1c. lower; good ordinary, 42½ to 43c., against 44½c. at the September sale. Since the auction there was a lively demand; the private transactions include—1,355 b. Padang, ex Alblasserdam, at 45½ to 48½c.; 623 b. do., at 47c.; 1,205 b. do., at 47c.; 6,000 b. do., at several prices.

SUGAR.—The market was very calm, and without any transactions of importance. The stock of raw sugar amounted to 42,087,212 ks. in bond.

RICE.—Since our last report the following parcels were sold:—8,700 b. Rangoon, ex Tonia, and 1,500 b. ex Jan van Galen, at 7¼f.; 9,844 b. Moulmain, ex Josuah L. Hale, at 4⅛ to 7f.; 1,027 b. Java, ex Hendrika, at 9½ to 10¼f.; and 2,000 b. do., at 10 to 10⅛f.

TOBACCO.—The result of the important sales of Java Leaf, which were held on the 16th and 18th insts., was as follows:—

Packages.			In average.	Packages.			In average.
1622	... Nauta/Blitar	...	59 c.	296	... Kepandjen Blitar		47¼ c.

MALANG CIGARS.—100,000 ps. offered in auction were sold at 8½f.

PEARL SAGO.—1,675 chests, imported from Singapore, per Altona, will be sold by auction on the 2nd of next month.

INDIGO.—There is a good demand for middling qualities, but there is want of stock. Only 78 chests are on sale, first hand.

BIMAS SAPANHOLZ.—Some parcels fetch 7½f.: it is impossible to buy at an inferior price.

GAMBIER.—1,171 boxes, per Altona, from Singapore, are to be offered in public sale on the 2nd of November.

BANCA TIN.—Since our last report 1,000 slabs were sold, at 45¼f.; 500 slabs, at 45f.; 500 do., at 46f.; and 200 do., at 46¼f.

ARRACK.—There is a little more demand. 17 casks Sourabaya, ex County of Lanark, were sold, besides 100 casks Batavia O.G.L., ex Kanagawa, and 150 casks, and 60 half-casks, Sourabaya, ex Star Queen. The prices did not transpire.

MONEY is so abundant that the Bank has decreased the rate of discount by ½ per cent. It is fixed now at 5 per cent. for bills, and 5½ per cent. for acceptances. In the meantime, there are no transactions at all in the stock market, so that the quotations of the different stocks are rather nominal, say:—Dutch Two-and-a-Half, 54⅛; Three per Cents., 65⅜; Four per Cents., 87¼; Trading Company, 136.

EXCHANGE.—London, 3 mo., f.11.65; 2 mo., f.11.68½; short, f.11,77. Paris, 3 mo., f.46.30; 2 mo., f.46.42½; short, f.46.65. Antwerp, 3 mo., f.46.25; short, f.46.55 Hambro', 3 mo., f.34.80; 2 mo., f.84.92½; short, f.35.15. Bremen, 3 mo., f.188.

SHIPPING.—ARRIVALS.—Oct. 14, at Texel, from Batavia, Vertrouwen; 19, from Sourabaya, Kaap Hoorn; 21, from Batavia, Quartet; 22, from Tjilatjap, Frans en Elise; 23, from Batavia, Aldeharan; from Sourabaya, Marianne, and Oscar I.

DEPARTURES.—Oct. 17, from Texel for Batavia, Maria Catherina; 19, from Hellevoet for Singapore, Marie Elizabeth; 22, from Brouwershaven for Batavia, Medea.

PASSENGERS OUTWARD.

For JAVA.—Per Medea: Messrs. J. W. van Ryck and family, J. F. Kramer and family, F. Becker and family, G. H. Lowe and family, F. H. Bauer and family, W. M. Smit and family, J. van Dulken and family, H. A. E. Tromp, A. van der Velden, A. Dessavaugies, F. K. L. Ramaer, R. Tulleken, D. E. van Gorkum, N. Beljerink, J. H. A. van Wijhe Coenen, A. Boudewjisne, Reuze, Mej. van Staveren, Blanken, van Vliet and daughter.

PASSENGERS INWARD.

From JAVA.—Per Kaap Hoorn: Mr. H. van Raalte per Quartet: Mr. van Schauenburg.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, OCT. 23.

Herr Egmont Hagedorn, a merchant of this city, announces in the local papers the receipt of a remittance of $1,120—which produced 3,360 Marks Banco—collected by his son, Mr. J. S. S. Hagedorn, of Singapore, among the German merchants and others established there (here he gives the names of the 41 donors) which at their request he has distributed as follows:—1,500 Mks. Bco. for the widows and orphans of Prussian soldiers killed in the late war, 1,000 Mks. Bco. for those of the Austrians, 300 Mks. Bco. for those of the Hanoverians, 300 Mks. Bco. for those of the Saxons, and 260 Mks. Bco. for those of the South German troops.

A letter has been received from an officer of the Prussian corvette *Vineta*, dated Valparaiso, August 16, stating that they had received orders and were preparing to sail for Shanghai, only touching at Honolulu. They will speedily be reinforced by some smaller vessels and gunboats, it being the determination of the Prussian Government to assist the other naval Powers of Europe in putting down piracy in the China seas effectually.

At the sitting of the Commercial Tribunal of this city, the following case was pleaded:—Gustav Balck *v.* Joseph Meyer, as partner in the firm of E. and J. Meyer, of Hong Kong. It appears that the planitiff had a parcel of tar in a warehouse at Manilla, the sale of which was difficult on account of the earthquakes and consequent leakage and heavy expenses. He therefore agreed to consign it to the defendant's house at Hong Kong, expressly stating that it was not his wish to speculate on the fluctuations of the Hong Kong market, but rather a prompt sale at the best price to be obtained, and thus no limit was given. On the 11th of September he received information from the defendant that the price had fallen below $8, which was the figure he had said in his first letter that could be obtainsed. On the 3rd October he quoted the market price at $6 50c., but notwithstanding the dangerous nature of the article he preferred to speculate for a rise against the positive order to sell promptly, as delay only increased the charges. He therefore wrote out to make the defendant responsible, and eventually received account of sale, by which he found the tar had been sold at $3 50c., giving $574; but after deducting the cherges, the nett proceeds amounted to only $42 57c. Plaintiff therefore claimed $6½ as the selling price, though defendants confessed to having sold inferior quality at $7. He further maintained he had only to bear the leakage and charges till November 1st, 1865, and claimed the sum of $955 45c. as per acount rendered. The Court ordered the defendant to justify within six months the course pursued by his house at Hong Kong, deferring judgment till then.

At Irkutzk a hospital for the indigent, built by a M. Soldatow, and endowed by him with a capital of 30,000 roubles, in grateful commemoration of the wonderful escape of the Emperor last year from the pistol of the assassin, has just been opened.

The Russian Consul-General von Bacherach reports so favourably of the Chinese—who amass great wealth in Victoria by rewashing the auriferous sand used and thrown away by the English gold-seekers in that colony—that he strongly recommends employing Chinese as gold-washers in the Russian auriferous districts. The suggestion has been favourably received at St. Petersburg, and a comprehensive plan for obtaining a large number of Chinese is now under consideration.

An interesting exhibition has for some days past been opened for public inspection in the saloon of the Imperial Geographical Society, at St. Petersburg. It consists of a magnificent collection of specimens of graphit from Siberia, and is destined to figure in the Russian Court at the great Paris Exhibition next year. Not the least interesting part of the collection are two albums, one of which contains more than a hundred views of different parts of Siberia, the other containing four hundred paintings on rice-paper by Chinese artists, collected by M. Alibert, during his 20 years' residence in China and Siberia.

The St. Petersburg *Government Gazette* announces the death of Her Henning, Secretary of the Russian Consulate at Tientsin, who had devoted many years of his life to the study of the Chinese language and literature. He died at Peking, and was under thirty years of age. The death of this promising young functionary is considered a great loss for Russia.

An extraordinary general meeting of the Austrian Export Company was held at Vienna on the 15th inst., when it was announced that the gross receipts of the company during the five months since their operations commenced—from February 6 to June 30—after deducting postage and charges, amounted to 28,262 florins. After a deduction of 11,162 florins for salaries and remuneration to the directors, as well as 1,504 florins for depreciation of property, there remained a clear profit of 15.595 florins, or 4fl. 41 Kreuzers per 60 florin share, being at the rate of 21 per cent. per annum.

Mr. G. T. Siemssen, of this city, one of the honorary non-forensic

Judges of the Lower Tribunal, has resigned that houourable but laborious and time-absorbing post, and is succeeded by Herr E. Jacob. In the sitting of the Burgerschaft they had to elect the successor from a list of eligible gentlemen presented to them by the Senate. Objections were raised that Mr. Jacob had not been a citizen for three years, as required by law, but this was overruled by the President, and he was elected by 43 votes out of 101 members present in the Assembly.

Herr G. Niederberger, merchant at Saigon, in Cochin-China, has been appointed Consul at that port for his Majesty the King of Prussia by Royal patent, dated Berlin, October 13, 1866.

COMMERCIAL.

Coffee.—The lively demand continues, and the deliveries are so extensive that stocks are sensibly declining, without much chance of any large supplies arriving before the winter sets in. Sales of the week, 14,000 bags.

Sugar.—Raw in a state of lethargy and prices nominal. In Refined the scarcity of goods in the market is much felt and prevents business to any extent. The sales were therefore limited to 10,000 loaves of Hamburg and foreign make.

Rice.—The market is steady, with a satisfactory amount of business transacted. In rough no sales are reported.

Spices.—Cassia Lignea is in demand and higher, 11½ Sch. Bco. having been paid for some parcels of good merchantable quality. Cloves are firmer, and 300 Gonjes lately arrived have been sold at satisfactory rates. Pepper commands an easy sale at full values.

Spelter.—The market is calm, but this metal attracts more attention than last week. The only sales recorded were 1,000 centners for Oct. and Nov. delivery at 13 Mks. 10 Sch. Bco., and 500 centners ex-warehouse at the same price. It would however be difficult to obtain any more at that figure, as holders are decidedly firmer.

Discount.—Without alteration and money plentiful, though large sums have lately been invested in the new loans of Italy and Bavaria to cover their war expenses and the indemnities paid by them to Prussia.

Monetary and Commercial.

The rumours of difficulties amongst the East India and China houses current of late have now to a great extent passed off. A large amount of bills matured during the past week but was all arranged for. The engagements of one large firm in Leadenhall-street were settled by an allowance of time by the creditors.

The Bank rate has not been altered. The discount market is well supplied with money, and the demand being only moderate, good bills have been taken at 4 per cent., with exceptional transactions at 3⅞. The applications at the Bank discount office are upon a very quiet scale, and it would appear that many persons have deferred supplying their wants in order not to lose the chance of a reduction in the Bank rate. We

In convening an extraordinary meeting of the shareholders of the Bank of Hindustan, China, and Japan (Limited), for the 19th November, at the London Tavern, the directors have issued the annexed circular:—

"In handing you the accompanying notice, I am instructed by the directors to inform you that the special resolution passed on the 24th May last was not sufficiently formal to permit of an ordinary meeting being held in November, and that, therefore, they have resolved upon calling the extraordinary meeting. On that occasion the directors will present a specially audited statement of the position of the company, which they believe will be satisfactory to the shareholders. The directors also propose to submit for consideration a plan for reconstructing the bank on a basis which shall reduce the liability upon, and the nominal amount of, the shares."

The biddings for £325,000 in bills on India took place at the Bank of England on the 18th. The proportions allotted were:—To Calcutta, £174,000; to Madras, £1,000; and to Bombay, £150,000. The *minimum* price was fixed, as before, at 1s. 10¾d. on all presidencies. Tenders on Calcutta and Madras at 1s. 11⅝d. will receive about 64 cent., and on Bombay at 1s. 11⅝d. about 38 per cent.; above these rates in full. These results show another considerable increase in the demand for means of remittance to the East. The advance in the rates now given over those on the last occasion is 1½ per cent., making a total rise of nearly 6 per cent. in little more than a month.

The various Chambers of Commerce have received at intimation that the Government of Manila has made an order to the effect that all goods shipped by the China Steamship and Labuan Coal Companies vessels at Singapore, and bearing a certificate of European origin, will be admitted into that port at a reduced duty of 10½ per cent. By this new route shippers will obtain considerable advantage, as they can have their goods transhipped at Singapore from the Peninsular and Oriental and Messageries steamers into those of the China Company for direct transmission to Manila, instead of the delay by the Hong Kong route.

Since the general meeting of the shareholders of the Agra Bank, the committee appointed have met almost daily, and arrangements are being made for calling a meeting of the creditors of the bank, many of the largest of whom have already signified their approval of the project; steps are also taken to obtain the assent of the creditors in India and China.

A numerously attended meeting of the shareholders of the Agra and Masterman's Bank (Limited) was held on the 18th, at the London Tavern, and resolutions were unanimously passed to proceed with the necessary steps for the reconstruction of the bank, the details of which were given in our last. The chairman (Mr. J. Thompson) pointed out at great length the advantages which the shareholders would derive from the proposed arrangement, and he recommended them to avail themselves of the opportunity which the proposed scheme afforded to save the valuable goodwill and connection of the bank, which would, in his opinion, at an early date regain its old position as a profitable and prosperous concern. The proprietary of the bank consists of 1,256 shareholders. At the close of the meeting it was announced that 555 shareholders in the old company had given their written assent to the proposed resuscitation, and also that 351 shareholders had agreed to take 15,379 shares, representing £153,790 of the £400,000 new capital required. Of the 701 shareholders who have not yet formally assented, 233 reside in India, or at a very remote distance from England; 226 shareholders were present at the meeting to-day, and their feeling was both cordial and unanimous. The resolutions passed were as follows:—

Proposed by the Chairman, seconded by J. Spicer, Esq., and carried unanimously:—"That the shareholders present heartily approve of the proposal which has been submitted for the resuscitation of the Indian portion of the business of the bank." Proposed by Captain Lynch, seconded by Colonel Smyth, and carried unanimously:—"That a committee, consisting of thirteen shareholders, with power to add to their number, five of whom to form a quorum, be appointed to carry out the necessary arrangements to give effect to the proposal, with power to make such modifications therein as the committee may find necessary." Proposed by Colonel Froeth, seconded by Colonel Ewart, and carried unanimously:—"That such committee consist at present of the following shareholders:—Sir George Pollock, K.C.B., W. Bracken, Esq., J. Kemp, Esq., General Campbell, Sir P. Cautley, C. H. Lushington, Esq., E. Wilmott Esq., J. Spicer, Esq., Colonel the Hon. H. B. Dalzell, E. H. Morland, Esq., Dr. Richardson, James Thomson, Esq., and H. W. Peek, Esq." Proposed by the Chairman, seconded by E. H. Morland, Esq., and carried unanimously:—"That this meeting desires to acknowledge the facilities hitherto afforded by Mr. Cannan, and request and authorise his co-operation with the committee, in taking such steps as may be necessary to give legal effect to the proposed arrangement."

The *Economist* on the subject says:—

"In general nothing is nearer to impossibility than to re-create a bank. While it existed, it lived upon its credit, and it failed only when it ceased to possess that credit. And credit cannot be revived. It is the opinion of a multitude, resting upon habit and impression, and if these supports are rudely broken, no argument will replace them or will do their work. For the most part a bank that has once failed has failed for ever. But there are cases in which the usual rule does not hold because the usual cause does not operate. Sometimes, though very rarely, a bank fails not from a failure of confidence in the minds of those who used to trust it, but from some extrinsic fatality. Thus it has been found possible to revive the Consolidated Bank, because its failure was due to the sudden fatuity of the directors in shutting their doors and in combining with the Bank of London, and not to any diffused distrust among their depositors. A like reason applies to the Agra and Masterman's Bank, which it is now proposed to revive. The best of the credit of that bank was in India, but there never was any failure of credit in India. The former directors in Europe mismanaged the funds and so broke the bank. But the Indian Civil Service who made the bank are still attached to it, and it would be still trusted in India, far rather than any unknown or new competitor. Here is, therefore, a sound reason why an attempt should be made to revive the bank, if possible. A nucleus of credit still exists which may be made a source of profit, and which a new bank would take years to earn. We shall, therefore, be glad if the attempt now being made to revive this bank should succeed, and the more so if its reconstitution should mitigate the present inconvenience both of the depositors and the shareholders of the old bank."

At the meeting of the Oriental Bank a dividend at the rate of 12 per cent. per annum was declared, and at the Chartered Bank of India and China a dividend of 5 per cent. per annum. Reports of the meeting will be found in another column.

Mr. D. T. Robertson, the chief manager of the Chartered Mercantile Bank of India, proceeded by the last mail on a tour of inspection to India and China.

The burning of the steamer *Huquong* on the Yangtze has given rise to several remarks, in consequence of the insurance recently effected on her in London against fire for £40,000.

In the Bankruptcy Court Alexander Walkinshaw has passed the first hearing. The bankrupt was an East India merchant, of 9, Gracechurch-street. The debts, as shown by the preliminary statement, amount to £18,233, of which £11,360 is stated to be due to Mr. W. Walkinshaw, in England. The other creditors are principally resident in Bombay, London, Liverpool, and Hong Kong. The bankrupt attributes his failure to losses on consignments, and pressure by some of his creditors.

A paragraph extracted in *The Times* from the *Bullionist*, with regard to banking failures at Bombay, gave a list of establishments
